**UNITED STATES OF AMERICA**  
SECURITIES AND EXCHANGE COMMISSION

**ATTESTATION**

IT IS HEREBY ATTESTED THAT:

The attached Form 10-K was received in this Commission on 3/18/2013, under the name of FXCM Inc., File No. 001-34986, pursuant to the relevant Act(s) of the Commission.

This certified document was produced from the files of this Commission on

5/26/2021

*Date*

It is hereby certified that the Secretary of the U.S. Securities and Exchange Commission, Washington, DC, which Commission was created by the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) is official custodian of the records and files of said Commission and was such official custodian at the time of executing the above attestation.

For the Commission

  
Secretary

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

TABLE OF CONTENTS**Forward-Looking Statements**

*This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which reflect our current views with respect to, among other things, our operations and financial performance. You can identify these forward-looking statements by the use of words such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “seeks,” “approximately,” “predicts,” “intends,” “plans,” “estimates,” “anticipates” or the negative version of these words or other comparable words. Such forward-looking statements are subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements. We believe these factors include but are not limited to those described under the section “Risk Factors” in Item 1A of this Report. Additional risk factors may be described from time to time in our future filings with the Securities and Exchange Commission (“SEC”). We undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise, except as required by law.*

*FXCM Inc. is a holding company that was incorporated as a Delaware corporation on August 10, 2010 and its sole asset is an equity interest in FXCM Holdings, LLC, of which FXCM, Inc. is the sole managing member. Unless the context suggests otherwise, specifically, where “Holdings” refers to FXCM Holdings, LLC and the “Corporation” refers to FXCM Inc., references in this report to “FXCM,” the “Company,” “we,” “us” and “our” refer (1) prior to the December 2010 initial public offering (“IPO”) of the Class A common stock of FXCM Inc. and related transactions, to FXCM Holdings, LLC and its consolidated subsidiaries and (2) after our IPO and related transactions, to FXCM Inc. and its consolidated subsidiaries.*

---

[TABLE OF CONTENTS](#)**PART I****Item 1. Business****Overview**

We are an online provider of foreign exchange ("FX") trading and related services to approximately 170,930 active retail customers globally. We offer our customers access to over-the-counter ("OTC") FX markets through our proprietary technology platform. In an FX trade, a participant buys one currency and simultaneously sells another, a combination known as a "currency pair". Our platform seeks to present our FX customers with the best price quotations on up to 58 currency pairs from up to 38 global banks, financial institutions and market makers, or FX market makers, which we believe provides our customers with an efficient and cost-effective way to trade FX.

We primarily offer our customers what is referred to as an agency model to execute their trades. Our agency model is fundamental to our core business philosophy because we believe that it aligns our interests with those of our customers and reduces our risks. In the agency model, when our customer executes a trade on the best price quotation offered by our FX market makers, we act as a credit intermediary, or riskless principal, simultaneously entering into offsetting trades with both the customer and the FX market maker. We earn trading fees and commissions by adding a markup to the price provided by the FX market makers and generate our trading revenues based on the volume of transactions and the spread earned on transactions.

In 2012, in order to accommodate our expanding customer base, we began to offer our smaller retail clients the option to trade through a principal model. In the principal model, we set the price and act as the counterparty for our customer's transactions, earning revenue on our trading gains or losses. We do not simultaneously offset each trade with another party.

We also earn other forms of revenue such as fees earned from referring broker fees and white label arrangements with other financial institutions to provide platform, back office and trade execution services, trading in contract-for-differences ("CFDs"), trading in equities and equity options, payments for order flow, FX market prices and other various ancillary FX related services and joint ventures.

We operate our business through two segments: retail trading and institutional trading. Our retail trading segment accounted for 85.1% of our total revenues in 2012. Our institutional trading segment, FXCM Pro, offers FX trading services to banks, hedge funds and other institutional customers on an agency model basis. In addition, we own a 50.1% controlling interest in Lucid Markets Trading Limited, an electronic market-maker and trader in the institutional FX market. Our institutional trading segment accounted for 14.9% of our total revenues in 2012. For financial information regarding our segments, see Note 24 to our consolidated financial statements in "Item 8. Financial Statements and Supplementary Data".

Our operating subsidiaries are regulated in a number of jurisdictions, including, but not limited to, the United States ("U.S."), the United Kingdom ("U.K."), where regulatory passport rights have been exercised to operate in a number of European Economic Area jurisdictions), Hong Kong, Australia and Japan. We maintain offices in these jurisdictions, among others. We offer our trading software in 17 languages, produce FX research and content in 16 languages and provide customer support in 18 languages. For the year ended December 31, 2012, approximately 90.0% of our customer trading volume was derived from customers residing outside the United States. We believe our global footprint provides us with access to emerging markets, diversifies our risk from regional economic conditions and allows us to draw our employees from a broad pool of talent.

**Acquisitions**

We continually pursue strategic and accretive acquisition opportunities in the FX arena.

On June 18, 2012, we acquired a 50.1% controlling interest in Lucid Markets Trading Limited and Lucid Markets LLP ("Lucid") for approximately \$177.5 million, net of cash from Lucid. Lucid is a leading non-bank electronic market making and trading firm in the institutional FX market.

On October 7, 2011 and March 31, 2011, we acquired a 100% interest in Foreland Forex Co. Ltd ("Foreland") and FXCM Japan Securities Co. Ltd. ("FXCMJ"), respectively, two Japan based foreign

TABLE OF CONTENTS

exchange providers. The acquisitions increased our profile in the Japanese market and helped accelerate our growth in Asia, utilizing Foreland and FXCMJ's relationships and sales force.

On October 1, 2010, we acquired ODL Group Limited ("ODL"), a broker of retail FX, CFDs, spread betting and equity options headquartered in the U.K. The acquisition increased our profile in the U.K. market and accelerated our growth in continental Europe, utilizing ODL's relationships and sales force.

**Our Products and Services**

We offer three types of accounts, each designed for a particular type of retail FX trader. Our Basic account is designed for those new to FX trading and it enables traders to open accounts between \$50 and \$4,999. These accounts offer trading in small increments, providing 24/7 support and access to DailyFX resources. Our Premium accounts are available to clients depositing between \$5,000 and \$24,999. These accounts offer the same benefits as our Basic accounts, but also allow corporate entities' accounts, include additional customer support options and allow customization of account type and setup. Our Basic and Premium level accounts are available utilizing the agency or principal models. Our principal model account may offer traders a lower transaction cost, however, the large majority of our clients choose the agency model. We also offer Active Trader accounts that are designed for experienced, high volume traders and generally require an opening deposit of \$25,000 or trading volume of at least \$10 million per month.

We also offer trading in a growing number of other financial instruments. While some customers may choose a retail FX broker based on the breadth of products they offer, we limit the products we offer to those that meet our risk, regulatory and technology criteria.

***Spot FX Pairs***

We offer spot FX trading in over 58 currency pairs. Of these pairs, our most popular seven currency pairs represent over 88.7% of all trading volume, with the EUR/USD currency pair being the most popular, representing over 35.6% of our trading volume in 2012. We add new currencies to our list provided they meet our risk and regulatory standards. We do not allow trading in currencies from nations that have prohibitions on the trading of their own currency.

***Contract-for-Difference***

We offer our non-U.S. customers the ability to trade CFDs, which are agreements to exchange the difference in value of a particular asset such as a stock index or oil or gold contract, between the time at which a contract is opened and the time at which it is closed. Our CFD offerings currently include contracts for metals, fixed income, energy and stock indices, and for the year ended December 31, 2012, CFD trading constituted approximately 18.8% of total trading volume. We will continue to introduce new products as permitted by applicable laws and regulations. Due to U.S. regulatory requirements, we do not and our affiliates do not trade or offer CFDs in the United States. CFD trading is offered through our Trading Station II and Meta Trader 4 products similar to our currency pairs. As our FX market makers cannot process agency model trades for CFDs, these products are not offered on an agency basis. We stream the best bid and offer to customers, but we do not offset each trade automatically. However, we use future contracts to hedge CFD positions on a net basis.

***Spread Betting***

We offer spread betting trading to our U.K. customers, which is where customers take a position against the value of an underlying financial instrument moving either upwards or downwards in the market. Customers can make spread betting trades on FX pairs, stock indices, gold, silver and oil. For the year ended December 31, 2012, spread betting constituted approximately 1.5% of total trading volume.

***Equities and Equity Options***

We offer our customers equity and equity option trading through ODL. ODL offers customers outside of the United States the ability to trade equities and options on U.K., continental Europe and U.S. markets. They are offered using an ODL platform which integrates proprietary as well as third party software that connects to third party data providers, clearing firms and other market participants.

TABLE OF CONTENTS

Equities and equity options offered and sold through ODL, as a regulated broker dealer in the U.K., will, if traded in the primary market, be offered and sold pursuant to Regulation S. Trading in equities and equity options for and with customers in the secondary market will be carried out by ODL in compliance with applicable rules and regulations of the Financial Services Authority and other applicable law.

These products do not currently represent a material source of revenue for us.

**Our Trading Systems**

We offer a number of trading systems, all of which are supported by our sophisticated, proprietary technology infrastructure. Our technology tracks the balances, positions, profits and losses and margin levels for all account holders in real time. The back office system's real time margin-watcher feature automatically closes out open positions if a customer's account is at risk of going into a negative balance as a result of a trading position losing value and reaching the minimum margin threshold.

*Trading Station II* (TSII) is our proprietary flagship technology platform. TSII combines power and functionality and is accessible through a user-friendly interface. TSII is designed to serve the needs of our retail FX customers, but also offers advanced functionalities often used by professional money managers and our institutional customers. TSII is a Windows-based platform with a wide variety of customization options for users to choose from including a choice of 17 languages. The platform provides an advanced chart offering called Marketscope which offers a wide array of customization features, technical analysis indicators, signal and alert functionality, as well as the ability to place trades directly from the chart. We grant many of our white labels a limited, non-exclusive, nontransferable, cost-free license to use TSII to facilitate trading volume and increase trading fees and commissions.

*Active Trader Platform*, also a proprietary technology platform, was built and designed for our higher volume customers. The platform is web-based, making it easily and quickly accessible by users without requiring a download. The platform features most of the same capabilities as the TSII platform but also adds the ability to display up to 10 tiers of market depth information. While TSII streams the best bid and best offer from our FX market makers to the customer, our Active Trader Platform displays not only the best bid and best offer but also the next nine bids and offers. Our customers can use this information to determine where market liquidity is heavier and therefore which direction the more immediate moves may likely be. This market depth information is similar to Level II information displayed on the more professionally geared equity trading systems, but is not common for retail FX. At present, we do not license rights or have any white label arrangements which include licenses to use our Active Trader Platform.

*Meta Trader 4* (MT4) is a third-party platform built and maintained by MetaQuotes Software Corp, and we have licensed the rights to offer it to our customer base. MT4 has a loyal and global user group and the platform caters towards customers with automated trading systems that they have either developed themselves or have purchased from other developers. Our MT4 platform utilizes all the features of our back office system and order execution logic that are provided to users of our proprietary technology platforms. We have integrated MT4 into the same pricing engine as TSII, enabling its users to get the same pricing and execution.

*FXCM Pro* is our institutional level FX offering that allows banks, hedge funds, professional money managers and other such entities to trade anonymously, similar to an Electronic Communication Network. We currently license the technology platform for FXCM Pro from Currenex and Integral. Our added value comes from connecting institutional customers to our top tier FX market makers to gain access to preferred pricing. Customers using FXCM Pro can both take and make prices on the platform. We earn revenue through markups on those prices and/or commissions charged to the customer. Recently, we introduced FXCM Pro Electronic Communication Network (ECN), which is our own in-house platform designed to allow banks, hedge funds, professional money managers and other entities to trade through FXCM Pro rather than third party platforms. We believe our in-house platform will allow us to be more competitive in the institutional FX market.

**TABLE OF CONTENTS**

*FastMatch* is a third party ECN for spot foreign exchange trading that offers customers access to large pools of diversified liquidity with the speed and transparency of equities trading and with a customer target of retail brokers, institutions, banks, hedge funds and proprietary trading firms. FastMatch will allow clients to trade across an array of unique liquidity sub-pools each governed by its own distinct rules of trading. FastMatch will also enable institutional clients to easily transact large sizes with minimum market impact.

**Other Platforms**

Our *Trading Station Web* is similar to TSII but is web-based. The Browser based platform allows customers to access their account from any computer without installing any additional programs. Trading Station Web is also easy to use and has most of the customization options of TSII.

*Strategy Trader* is a platform that provides an alternative to customers who prefer to automate trading strategies that they have either built themselves or bought from other developers. Strategy Trader users will have the ability to code and share C# based trading systems and run them automatically through the platform.

*Mirror Trader Platform*, is a third party platform that we license, which allows customers to scan and review dozens of pre-programmed and pre-filtered trading systems and over 1,000 automated strategies. Customers can then select the systems that match their trading and risk preferences and apply them to their trading account. Mirror Trader Platform is an ideal option for customers that follow general market trends but may not prefer to execute trades themselves. We currently offer the Mirror Trader Platform to FXCM's entire client base.

*Ninja Trader Platform* is an award-winning and leading trading software provider that is known for its high performance analytic and trade execution tools that maximize a trader's efficiency in fast-moving markets. Ninja Trader also offers free, daily trading webinars, an interactive product training video library, and an active online forum. Ninja Trader also offers multiple simulation options.

We also offer mobile platforms for multiple mobile devices, including Blackberry® and the iPhone®/iTouch®. These platforms include a majority of the functionality found on the TSII and allow customers to log in and trade anywhere in the world.

**White Label and Referring Broker Opportunities**

We offer financial institutions the ability to offer retail FX trading services to its customers using our technology, our sales and support staff and/or our access to liquidity through white label partnerships. We also have a wide network of referring brokers, which are third parties that advertise and sell our services in exchange for performance-based compensation. These partnerships allow us to expand into new markets around the world. While referring brokers are not permitted to use our name in their advertising, certain white label partnerships are fully disclosed, including our partnerships with E\*Trade FFX, LLC to launch their E\*Trade FX platform and Barclays Stockbrokers to launch Barclays Margin FX, a retail FX trading offering in the U.K.

We believe we have a well-established presence in Asia and in Europe through our white label partnerships. In October 2011, we announced a white label partnership with Bourse Direct, a leading independent French online financial broker. In May 2012, we announced a partnership with DIF Broker to white label our MT4 platform and, as noted above, in September 2012, we partnered with Barclays Stockbrokers in the U.K. who launched a retail FX trading offering called *Barclays Margin FX*. Additionally, in November 2012, we announced a partnership with GVC Gaesco to white label certain of our platforms throughout Spain.

Through our white label partners and referring brokers, we generated 46% of our retail trading volume for the year ended December 31, 2012. We intend to continue to build upon the success of our existing white label partnerships and referring broker networks and create new partnership opportunities around the world.

**Sales and Marketing**

Our sales and marketing strategy focuses on diverse customer acquisition channels to expand our customer base.

TABLE OF CONTENTS***Direct Marketing Channel***

Our direct marketing channel, through which we seek to attract new customers is our most important marketing channel. In executing our direct marketing strategy, we use a mix of online, television and radio advertising, search engine marketing, email marketing, event marketing including educational seminars and expos and strategic public and media relations, all of which are aimed at driving prospective customers to our web properties, DailyFX.com and FXCM.com. In those jurisdictions in which we are not regulated by governmental bodies and/or self-regulatory organizations, however, we are generally restricted from utilizing our direct marketing channel. See “Business — Regulation.”

While our platform is available in 17 languages (English, French, Spanish, German, Russian, Korean, Turkish, Italian, Hebrew, Greek, Portuguese, Polish, Hungarian, Chinese (Traditional), Chinese (Simplified), Japanese) and we have websites available in 12 languages (English, French, Spanish, German, Russian, Italian, Hebrew, Greek, Chinese (Traditional), Chinese (Simplified), Indonesian, Japanese), the majority of our direct marketing efforts have historically been focused on North America, our home market, and Asia, due to its high rate of growth. In the last two years, we have focused on expanding our global footprint by opening new international offices in Europe as well as the Middle East and supporting this expansion with marketing campaigns. An international office provides us many benefits, including the ability to hold in-person seminars, a location for customers to visit, the ability to accept deposits at a regional bank and provide sales and support by native speakers. Currently, we maintain offices in the United States, the United Kingdom, France, Germany, Italy, Greece, Chile, Lebanon, Israel, Hong Kong, Japan and Australia.

The primary objective of our marketing is to encourage prospective customers to register for free practice trading accounts or tradable accounts. Free registered practice trading accounts or “demo” accounts are our principal lead generation tool. We believe the demo account serves as an educational tool, providing prospective customers with the opportunity to try trading in a risk-free environment, without committing any capital. Additionally, it allows prospective customers to evaluate our technology platforms, tools and services. The demo account is identical to the platform used by our active trading customers, including the availability of live real-time streaming quotes. However, trades are not actually executed with our market makers.

During the trial period for the demo account, we provide customers with information about our firm’s advantages, educational resources and trading tools. To complement these efforts, a team of Series 3 licensed sales representatives contact prospective customers by telephone to provide individualized assistance.

***Indirect Marketing Channels***

Our second marketing channel is our indirect channel that utilizes a network of referring brokers. Referring brokers are third parties that advertise and sell our services in exchange for performance-based compensation. Many referring brokers offer services that are complementary to our brokerage offering, such as trading education and automated trading software. While referring brokers are not permitted to use our name in their advertising, accounts originating from referring brokers are legally opened with a FXCM-owned entity. In most cases, the sales function is performed by the referring broker and customer service is provided by our staff.

Our white label channel enables financial institutions to offer retail trading services to its customers using one or more of the following services: (1) our technology; (2) our sales and support staff or (3) our access to liquidity. White labels can add value to our core offering through increased positive name recognition on a regional or global scale and access to a large existing customer base.

***Institutional sales and marketing***

FXCM Pro is targeted at institutional customers, principally banks, hedge funds, corporate treasury departments and commodity trading advisors. These customers trade using a variety of tools. Some trade directly on the FXCM Pro system, using its graphic user interface. Most, however, trade using automated systems that receive price streams from FXCM Pro, as well as other institutional price providers such as banks and ECNs. The sales process involves identifying a customer, receiving credit approval from one of our prime brokers, signing them to a contract and then connecting them to our network. Our revenues are principally determined by the number of trades where we provided the customer with the price and execution size they desired.

TABLE OF CONTENTS

We service this customer base with a dedicated experienced institutional sales force primarily located in our New York, London and Hong Kong offices. As the customer base is much smaller compared to that in our retail marketplace, we are able to provide customized service and attention to each account. The institutional sales force is primarily compensated on a commission basis.

**Marketing expertise**

We believe that our in-house marketing organization provides us with a competitive advantage. We seldom rely on outside marketing agencies to provide services because our marketing team acts as an in-house agency. Our marketing team handles functions such as creative, media buying, price-per-click advertising, website development, email and database marketing, and corporate communications. Many of these staff members have been with FXCM for multiple years and have developed an internal knowledge base at FXCM that would probably not otherwise be available. This expertise has enabled us to assemble a tightly integrated digital marketing platform which encompasses our CRM (salesforce.com), Trading Back Office, Ad Serving, and Website Analytics. As a result, we can calculate the value of any media purchase with a high level of precision on a cost per lead and cost per account basis. We believe this analysis enables us to make intelligent media buying decisions allowing us to maximize our lead and account conversion.

**Customer Service**

We provide customer service 24 hours a day, seven days a week in English, handling customer inquiries via telephone, email and online chat. To provide efficient service to our growing customer base, we have segmented our customer demographic into three main categories.

- New to FX: We cater to new customers seeking to open accounts by providing low barrier account minimums and in-depth educational resources on the FX market. We believe that education is an important factor for new customers, and we have a team dedicated to educate our customers about the fundamentals of FX trading, application of technical analysis to FX and the use of risk management, specifically focusing on our Traits of a Successful Trader guide. We offer online videos for educating new customers on the FX market. In addition, we have a dedicated staff of instructors who conduct live webinars and answer questions posted by customers in forums.
- Experienced Customers: We offer our experienced customers value-added resources and trading functionality. DailyFX Plus is a proprietary secure portal that provides trading signals and high touch education. As many experienced customers are technical traders, we also provide them with the ability to trade directly from the charts.
- High Volume/Algorithmic Trading: Our Active Trader sales group caters to active customers with large account balances. Active Trader customers can receive price incentives for trading higher volumes. High volume, automated trading has increased in popularity in the FX market. We have a dedicated programming services team that can code automated trading strategies on behalf of customers. Additionally, we offer multiple automated programming interfaces that allow customers with automated trading systems to connect to our execution system.

We utilize tools that allow prospective and existing customers to contact us through an online chat feature which allows our sales and support staff to engage multiple customers at once. In addition to live support, we are introducing more self-service tools to customers to decrease inbound requests into our customer service team, enabling them to focus more on pro-active customer communication, including education and product upgrades. We believe this will lead to increased deposits and higher customer retention rates.

Our retail sales and customer service teams are not compensated on a commission basis. All customers receive the same level of service, regardless of the FXCM representative. We believe this is a key differentiator for us compared to other retail FX firms that employ commission based sales forces who may not be motivated to provide support to smaller customers.

TABLE OF CONTENTS**Technology and Infrastructure*****Proprietary technology platform***

Our FX technology platform has been designed using proprietary technologies to deliver high standards in performance, flexibility and reliability. Our platform can be divided into three main groups: front-end technology platforms and trading decision support tools, agency model technology platform and back office applications for account management, operations, reporting and reconciliation processes.

We believe that our technology and infrastructure platform provides us with a competitive advantage and enables us to provide innovative solutions to our customers and partners. As examples, we introduced the concept of real-time rebate calculation for referring brokers and automation of basic operations and account management routines to reduce processing time.

***Scalability***

Our agency model system has been designed to meet the demands of our growing customer base with a focus on speed, accuracy and reliability. Within our network, we currently process orders in under 2 milliseconds during peak load periods, and have processed over 1,700 orders per second during volatile market conditions, 340 times our average volume over the last two years. We believe our current platform has the capacity of scale to meet our growth expectations for the foreseeable future.

***Reliability and Availability***

Our trading infrastructure is primarily hosted at collocation facilities run by Equinix and DBS. The two trading venues are located in New Jersey and Tokyo, with a disaster recovery location in Pennsylvania. The New Jersey and Pennsylvania datacenters are over 90 miles apart, on separate power grids and separate fiber connectivity. Each facility has N+1 (or greater) uninterruptible power supply systems, generator systems, public utility power feeds, cooling systems, internet providers and private network providers. Locations on the eastern coast of the United States were chosen to achieve both optimal networking latency to price providers and required geographic distance separation.

Applications, servers, network, storage devices, power and temperature are monitored 24 hours a day, seven days a week by support personnel through a combination of industry standard monitoring and alerting tools, including SolarWinds, Nagios, Cacti and FlowMon. Custom written applets and scripts are used to report key resource usage in near real-time.

Personnel are distributed across five major office locations with key operations, such as dealing, customer support and technology support, staffed at multiple locations. Each office location utilizes redundant network connections to access datacenter resources.

***Security***

Data security is of critical importance to us. We use industry standard products and practices throughout our facilities. We have strict policies and procedures with a minimal set of employees retaining access to customer data. Physical security at our datacenters is handled by security staff present 24 hours a day, seven days a week. In addition, we use biometric and card access systems, video surveillance, and "man traps" which refers to a small space having two sets of interlocking doors such that the first set of doors must close before the second set opens and also requires identification for each door. Physical access at our corporate headquarters is also handled by a security staff that is present 24 hours a day, seven days a week, as well as turnstiles and card access systems.

Our systems and policies are tested annually for Payment Card Industry ("PCI") compliance. Additionally, we engaged a public accounting firm to perform an audit of our internal controls and issue a SSAE (Statements on Standards for Attestation Engagements) 16 audit report.

***Business Continuity/Disaster Recovery***

We have established a business continuity management team to prepare and maintain business continuity plans and procedures designed to ensure a prompt recovery following the loss or partial loss of any of our infrastructure, systems or locations. Our recovery plans are tested on a regular basis in order to verify their effectiveness. Plans are maintained and updated based upon results of the tests and as business needs change.

TABLE OF CONTENTS**Risk management**

We primarily utilize an agency model, which we have been offering to customers since July 2007. We have continued to invest in our agency platform, adding additional FX market makers, improving execution and adding features to enhance the trading experience of our customers and believe that our commitment to the agency model is one example of our core business philosophy to reduce risks. In our agency model, when a customer executes a trade with us, we act as a credit intermediary, or riskless principal, simultaneously entering into trades with the customer and the FX market maker.

In 2012, in order to accommodate our expanding customer base, we began to offer our smaller retail clients the option to trade with dealing desk, or principal model execution. In the principal model, we act as counterparty for our customer's transactions with revenue affected by trading gains or losses. We may maintain our trading position if we believe the price may move in our favor and against the customer and not offset the trade with another party. For those trades in which we do not create an offsetting hedge trade automatically, we are exposed to a degree of risk on each trade that the market price of our position will move against us. While our exposure is minimal relative to the size of our balance sheet, we have established policies and procedures to manage our exposure. These policies are reviewed regularly by our executive management team and include quantitative analyses by currency pair, as well as assessment of a range of market inputs, including trade size, dealing rate, customer margin and market liquidity. For example, we place limits on the size of our open exposure to protect us against market risk. To date, we have not had a situation where our exposure exceeded our limits. Our risk management procedures require monitoring risk exposure on a continuous basis and determining appropriate hedging strategies in order to maximize revenue and minimize risk.

Our FX trading operations require a commitment of our capital and involve risk of loss due to the potential failure of our customers to perform their obligations under these transactions. In order to minimize the incidence of a customer's losses exceeding the amount of cash in their account, which we refer to as negative equity, we require that each trade must be collateralized in accordance with our collateral risk management policies. Each customer is required to have minimum funds in their account for opening positions, referred to as the initial margin, and for maintaining positions, referred to as maintenance margin, depending on the currency pair being traded. Margin requirements are expressed as a percentage of the customer's total position in that currency, and the customer's total margin requirement is based on the aggregated margin requirement across all of the positions that a customer holds at any time. Each net position in a particular currency pair is margined separately. Because we do not net across different currency pairs, we believe we produce a fairly conservative margin policy. Our systems automatically monitor each customer's margin requirements in real-time and we confirm that each of our customers has sufficient cash collateral in their account before we execute their trades. If at any point in time a customer's trading position does not comply with the applicable margin requirement because our predetermined liquidation thresholds have been exceeded, the position will be automatically liquidated in accordance with our margin policies and procedures documented in our customer agreement. We believe this policy protects both us and the customer. We believe that as a result of implementing real-time margining and liquidation processing, the incidence of customer negative equity has been insignificant.

We are also exposed to potential credit risk arising from our exposure to counterparties with which we hedge and financial institutions with whom we deposit cash. By transacting with several of the largest global financial institutions, we have limited our exposure to any one institution. In the event that our access to one or more financial institutions becomes limited, our ability to hedge may be impaired.

**Relationships with wholesale FX market makers and prime brokers**

Our global network of FX market makers includes global banks, financial institutions and market makers and these relationships have been established through prime broker relationships and direct relationships with FX Market Makers.

We have entered into prime brokerage agreements with Citibank ("Citi"), Morgan Stanley and Deutsche Bank for our retail trading, and Citi, BNP Paribas and Royal Bank of Scotland for our FXCM Pro institutional business, which we believe allow us to maximize our credit relationships and activities while improving efficiency. As our prime brokers, these firms operate as central hubs through which we transact with our

TABLE OF CONTENTS

FX market makers. Our prime brokers allow us to source liquidity from a variety of executing dealers, even though we maintain a credit relationship, place collateral, and settle with a single entity, the prime broker. We depend on the services of these prime brokers to assist in providing us access to liquidity through our wholesale FX market makers. In return for paying a modest prime brokerage fee, we are able to aggregate our trading exposures, thereby reducing our transaction costs and increasing the efficiency of the capital we are required to post as collateral. Our prime brokerage agreements may be terminated at any time by either us or the prime broker upon complying with certain notice requirements. We are also obligated to indemnify our prime brokers for certain losses they may incur.

We typically also enter into International Swaps and Derivatives Association ("ISDA") agreements with each financial institution that we have a liquidity relationship with. These standardized agreements are widely used in the interbank market for establishing credit relationships and are typically customized to meet the unique needs of each liquidity relationship. Each ISDA agreement outlines the products supported along with indicative bid/offer spreads and margin requirements for each product. We have had a number of key liquidity relationships in place for over five years and as such we believe we have developed a strong track record of meeting and exceeding the requirements associated with each relationship. However, our FX market makers have no obligation to provide liquidity to us and may terminate our standing arrangements with them at any time. We currently have a number of effective ISDA agreements and other applicable agreements should the need arise.

**Intellectual Property**

We rely on a combination of trademark, copyright, trade secret and fair business practice laws in the United States and other jurisdictions to protect our proprietary technology, intellectual property rights and our brand. We also enter into confidentiality and invention assignment agreements with our employees and consultants and confidentiality agreements with other third parties and rigorously control access to proprietary technology. Currently, we do not have any pending or issued patents.

We use the following service marks that have been registered or for which we have applied for registration with the U.S. Patent and Trademark Office: Forex Capital Markets (registered service mark), FXCM PRO (registered service mark), FXCM (registered service mark) and StrategyTrader (pending service mark).

**Competition**

The retail FX trading market is fragmented and highly competitive. Our competitors in the retail market can be grouped into several broad categories based on size, business model, product offerings, target customers and geographic scope of operations. Competition in the institutional market can be grouped by type, technology and provider.

U.S. based retail FX brokers: In the U.S. market, our primary competitors are Gain Capital Holdings Inc. and OANDA Corporation. They are well capitalized, have their own technology platforms and are recognizable brands. However, all of these firms operate using the principal model. We also compete with smaller retail FX brokers such as FXDirectDealer, LLC, InterbankFX, LLC, MB Trading and FX Solutions. These firms, to date, have not been our core competitors due to their smaller size, technology and marketing limitations. With the exception of InterbankFX, all of these firms operate using the principal model.

International multi-product trading firms: Outside the United States we compete with firms such as Saxo Bank, CMC Group, IG Group Holdings plc and City Index Limited. Other than Saxo Bank, the international firms tend to focus on CFDs and spread betting.

Other online trading firms: To a lesser degree, we compete with traditional online equity brokers, OptionsXpress Holdings, Inc., E\*TRADE Financial Corp., TD Ameritrade, TradeStation and Interactive Brokers. These firms generally tend to focus on listed products and may already, or will in the future, provide retail FX principally as a complementary offering. With the exception of Interactive Brokers, the firms in this category that have entered the FX market have generally done so through a relationship with a retail FX broker who specializes in FX.

**TABLE OF CONTENTS**

*International banks and other financial institutions with significant FX operations:* We also compete with international banks that have announced or launched retail FX operations. Financial institutions generally choose to enter into a joint venture with an independent retail currency firm in lieu of building a retail operation.

*Competition in institutional market:* In the institutional market that our FXCM Pro segment competes, we face competition from three principal sources. We compete with other multi-bank ECNs such as State Street Banks' Currenex, Knight Capital's Hotspot FX and ICAP's EBS. We also compete with single bank platforms such as Deutsche Bank's Autobahn, Barclays' Barx and Citi's Velocity. The third source of competition are desktop aggregators, including Progress Software's Apama, Flextrade and Integral. Additionally, with the acquisition of Lucid, we now face competition from major FX banks, such as Deutsche Bank, Citi, Barclays and Goldman Sachs, and other non-bank electronic market making and trading firms such as GSA Capital Partners LLP.

We attribute our competitive success to the quality of the service we offer our customers and their confidence in our agency business model and strong financial condition. We believe that our expertise in product innovation, trading technology and international scale will allow us to continue to compete globally as we expand our presence in existing markets and enter new ones.

**Regulation*****Overview***

Our business and industry are highly regulated. Our operating subsidiaries are regulated in a number of jurisdictions, including the U.S., the U.K., Hong Kong, Australia and Japan.

In the United States, we are primarily regulated by the Securities and Exchange Commission ("SEC"), the New York Stock Exchange ("NYSE"), the Commodities Futures Trading Commission ("CFTC"), and the National Futures Association ("NFA"). These regulatory bodies are charged with safeguarding the integrity of the markets. The CFTC and the NFA specifically target the FX and futures markets and protect the interests of customers participating in those markets.

Outside the United States, we are regulated by, among others; the Financial Services Authority in the United Kingdom ("FSA"); the Securities and Futures Commission in Hong Kong ("SFC"); the Australian Securities and Investment Commission in Australia ("ASIC"); the Kanto Local Finance Bureau ("KLFB") the Financial Services Agency in Japan ("JFSA") and the Financial Futures Association of Japan ("FFAJ"). In addition, certain of our branch offices in Europe, while subject to local regulators (such as Commissione Nazionale per le Società e la Borsa (Consob); Autorité des Marchés Financiers ("AMF"), and Hellenic Capital Markets Commission ("CMC")), are regulated by the FSA with respect to, among other things, FX, CFDs and net capital requirements. In any foreign jurisdiction in which we operate, there is a possibility that a regulatory authority could assert jurisdiction over our activities and seek to subject us to the laws, rules and regulations of that jurisdiction. The laws, rules and regulations of each foreign jurisdiction differ. In the jurisdictions where we have the most foreign customers, we may be either licensed or registered or believe we are exempt from licensing or registration due to our limited conduct, lack of solicitation in those jurisdictions, and/or other factors. In any jurisdiction where we are relying on an exemption from registration, there remains the risk that we could be required to register, and therefore, be subject to regulation and enforcement action or, in the alternative, to reduce or terminate our activities in these jurisdictions.

***Patriot Act/EU Money Laundering Directive***

As required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, or the Patriot Act, and the EU Money Laundering Directive, we have established comprehensive anti-money laundering and customer identification procedures, designated an anti-money laundering compliance officer, trained our employees and retained an independent audit of our program. There are significant criminal and civil penalties that can be imposed for violations of the Patriot Act and the EU Money Laundering Directive.

***Net Capital Requirements***

Certain of our subsidiaries are subject to jurisdictional specific minimum net capital requirements, designed to maintain the general financial integrity and liquidity of a regulated entity. In general, net capital

**TABLE OF CONTENTS**

requirements require that at least a minimum specified amount of a regulated entity's assets be kept in relatively liquid form, usually cash or cash equivalents. Net capital is generally defined as net worth, assets minus liabilities, plus qualifying subordinated borrowings and discretionary liabilities, and less mandatory deductions that result from excluding assets that are not readily convertible into cash and from valuing conservatively other assets.

If a firm fails to maintain the minimum required net capital, its regulator and the self-regulatory organization may suspend or revoke its registration and ultimately could require its liquidation. The net capital requirements may prohibit payment of dividends, redemption of stock, prepayment of subordinated indebtedness and issuance of any unsecured advance or loan to a stockholder, employee or affiliate, if the payment would reduce the firm's net capital below minimum required levels.

Regulators in the United States, including the CFTC and the NFA, continue to evaluate and modify regulatory capital requirements in response to market events in an effort to improve the stability of the international financial system. As of December 31, 2012, on a separate company basis, we were required to maintain approximately \$67.2 million of minimum capital in the aggregate across all jurisdictions and approximately \$26.1 million of minimum capital in the aggregate for our U.S. entity. As such, as of December 31, 2012, we had approximately \$164.6 million of excess adjusted net capital over this required regulated capital in all jurisdictions and \$27.4 in our U.S. entity.

For further information regarding the risks associated with the regulation of our business and industry, please see "Item 1A. Risk Factors", beginning on page [12](#) of this Annual Report.

**Employees**

As of December 31, 2012, we had a total of 792 full-time employees and 72 full-time contractors, 464 of which were based in the United States and 328 of which were based outside the United States. We have assembled what we believe is a highly talented group of employees many of whom have been with the firm since our founding. We believe our culture promotes a strong sense of loyalty, customer focus and high ethical standards. None of our employees are covered by collective bargaining agreements. We believe that our relations with our employees are good.

**Available Information**

Our website address is <http://www.fxc.com>. The content on our website is available for information purposes only. It should not be relied upon for investment purposes, nor is it incorporated by reference into this Annual Report, unless expressly noted. We file reports with the SEC, which we make available on the Investor Relations section of our website free of charge. These reports include our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, each of which is provided on our website as soon as reasonably practicable after we electronically file such materials with or furnish them to the SEC. We also make, or will make, available through our website other reports filed with or furnished to the SEC under the Exchange Act, including our Proxy Statements and reports filed by officers and directors under Section 16(a) of that Act.

TABLE OF CONTENTS**Item 1A. Risk Factors**

An investment in our securities involves risk and uncertainties. The risks and uncertainties set forth below are those that we currently believe may materially and adversely affect us, our future business or results of operations, or investments in our securities. Additional risks and uncertainties that we are unaware of or that we currently deem immaterial may also materially and adversely affect us, our future business or results of operations, or investments in our securities.

**Risks Related to Our Business**

***The FX market has only recently become accessible to retail investors and, accordingly, we have a limited operating history upon which to evaluate our performance.***

The FX market has only recently become accessible to retail investors. Prior to 1996, retail investors generally did not directly trade in the FX market, and we believe most current retail FX traders only recently viewed currency trading as a practical alternative investment class. Our FX trading operations were launched in 1999, at which time we began offering FX trading services domestically and internationally. Accordingly, we have a limited operating history in a relatively new international retail FX trading market upon which you can evaluate our prospects and future performance. Our prospects may be materially adversely affected by the risks, expenses and difficulties frequently encountered in the operation of a new business in a rapidly evolving industry characterized by intense competition and evolving regulatory oversight and rules.

***Our revenue and profitability are influenced by trading volume and currency volatility, which are directly impacted by domestic and international market and economic conditions that are beyond our control.***

In the past few years, there has been significant disruption and volatility in the global financial markets and economic conditions, and many countries, including the United States, have been in an economic slowdown. Our revenue is influenced by the general level of trading activity in the FX market. Our revenue and operating results may vary significantly from period to period due primarily to movements and trends in the world's currency markets and to fluctuations in trading levels. We have generally experienced greater trading volume and higher revenue in periods of volatile currency markets. In the event we experience lower levels of currency volatility, our revenue and profitability will likely be negatively affected.

Currency volatility in 2012 was low throughout the year. The Daily JPMorgan Global FX Volatility Index was down 22% on average in 2012 compared with 2011. This reduced volatility suppressed trading volumes in both retail and institutional markets. Significant swings in the market volatility can also result in increased customer trading losses, higher turnover and reduced trading volume. It is difficult to predict volatility and its effects in the FX market.

Like other financial services firms, our business and profitability are directly affected by factors that are beyond our control, such as economic and political conditions, broad trends in business and finance, changes in the volume of foreign currency transactions, changes in supply and demand for currencies, movements in currency exchange rates, changes in the financial strength of market participants, legislative and regulatory changes, changes in the markets in which such transactions occur, changes in how such transactions are processed and disruptions due to terrorism, war or extreme weather events. Any one or more of these factors, or other factors, may adversely affect our business and results of operations and cash flows. A weakness in equity markets, such as the current economic slowdown causing a reduction in trading volume in U.S. or foreign securities and derivatives, could result in reduced trading activity in the FX market and therefore could have a material adverse effect on our business, financial condition and results of operations and cash flows. As a result, period to period comparisons of our operating results may not be meaningful and our future operating results may be subject to significant fluctuations or declines.

***Our risk management policies and procedures may not be effective and may leave us exposed to unidentified or unexpected risks.***

We are dependent on our risk management policies and the adherence to such policies by our trading staff. Our policies, procedures and practices are used to identify, monitor and control a variety of risks, including risks related to market exposure, human error, customer defaults, market movements, fraud and

TABLE OF CONTENTS

money-laundering. Some of our methods for managing risk are discretionary by nature and are based on internally developed controls and observed historical market behavior, and also involve reliance on standard industry practices. These methods may not adequately prevent losses, particularly as they relate to extreme market movements, which may be significantly greater than historical changes in market prices. Our risk management methods also may not adequately prevent losses due to technical errors if our testing and quality control practices are not effective in preventing software or hardware failures. In addition, we may elect to adjust our risk management policies to allow for an increase in risk tolerance, which could expose us to the risk of greater losses. Our risk management methods rely on a combination of technical and human controls and supervision that are subject to error and failure. These methods may not protect us against all risks or may protect us less than anticipated, in which case our business, financial condition and results of operations and cash flows may be materially adversely affected.

***We depend on our proprietary technology. Any disruption or corruption of our proprietary technology or our inability to maintain technological superiority in our industry could have a material adverse effect on our business, financial condition and results of operations and cash flows. We may experience failures while developing our proprietary technology.***

We rely on our proprietary technology to receive and properly process internal and external data. Any disruption for any reason in the proper functioning, or any corruption, of our software or erroneous or corrupted data may cause us to make erroneous trades, accept customers from jurisdictions where we do not possess the proper licenses, authorizations or permits, or require us to suspend our services and could have a material adverse effect on our business, financial condition and results of operations and cash flows. For example, our technology platform includes a real time margin-watcher feature to ensure that open positions are automatically closed out if a customer becomes at risk of going into a negative balance on his or her account. Any disruption or corruption of this feature would subject us to the risk that amounts owed to us by such customer exceed the collateral in such customer's account, and our policy is generally not to pursue claims for negative equity against our customers.

In order to remain competitive, we need to continuously develop and redesign our proprietary technology. In doing so, there is an ongoing risk that failures may occur and result in service interruptions or other negative consequences, such as slower quote aggregation, slower trade execution, erroneous trades, or mistaken risk management information.

Our success in the past has largely been attributable to our proprietary technology that has taken us many years to develop. We believe our proprietary technology has provided us with a competitive advantage relative to many FX market participants. If our competitors develop more advanced technologies, we may be required to devote substantial resources to the development of more advanced technology to remain competitive. The FX market is characterized by rapidly changing technology, evolving industry standards and changing trading systems, practices and techniques. We may not be able to keep up with these rapid changes in the future, develop new technology, realize a return on amounts invested in developing new technologies, and as such, may not remain competitive in the future.

***System failures could cause interruptions in our services or decreases in the responsiveness of our services which could harm our business.***

If our systems fail to perform, we could experience disruptions in operations, slower response times or decreased customer service and customer satisfaction. Our ability to facilitate transactions successfully and provide high quality customer service depends on the efficient and uninterrupted operation of our computer and communications hardware and software systems. Our systems also are vulnerable to damage or interruption from human error, natural disasters, power loss, telecommunication failures, break-ins, sabotage, computer viruses, intentional acts of vandalism and similar events. We do not have fully redundant capabilities. While we currently maintain a disaster recovery plan ("DRP"), which is intended to minimize service interruptions and secure data integrity, our DRP may not work effectively during an emergency. Any system failure that causes an interruption in our services, decreases the responsiveness of our services or affects access to our services could impair our reputation, damage our brand name and materially adversely affect our business, financial condition and results of operations and cash flows.

TABLE OF CONTENTS

***We may not be able to protect our intellectual property rights or may be prevented from using intellectual property necessary for our business.***

We rely on a combination of trademark, copyright, trade secret and fair business practice laws in the United States and other jurisdictions to protect our proprietary technology, intellectual property rights and our brand. We also enter into confidentiality and invention assignment agreements with our employees and consultants, and confidentiality agreements with other third parties. We also rigorously control access to our proprietary technology. It is possible that third parties may copy or otherwise obtain and use our proprietary technology without authorization or otherwise infringe on our rights. We may also face claims of infringement that could interfere with our ability to use technology that is material to our business operations.

In the future, we may have to rely on litigation to enforce our intellectual property rights, protect our trade secrets, determine the validity and scope of the proprietary rights of others or defend against claims of infringement or invalidity. Any such litigation, whether successful or unsuccessful, could result in substantial costs and the diversion of resources and the attention of management, any of which could negatively affect our business.

***Our cost structure is largely fixed. If our revenues decline and we are unable to reduce our costs, our profitability will be adversely affected.***

Our cost structure is largely fixed. We base our cost structure on historical and expected levels of demand for our products and services, as well as our fixed operating infrastructure, such as computer hardware and software, hosting facilities and security and staffing levels. If demand for our products and services declines and, as a result, our revenues decline, we may not be able to adjust our cost structure on a timely basis and our profitability may be materially adversely affected.

***We operate in a heavily regulated environment that imposes significant compliance requirements and costs on us. Failure to comply with the rapidly evolving laws and regulations governing our FX and other businesses may result in regulatory agencies taking action against us and significant legal expenses in defending ourselves, which could adversely affect our revenues and the way we conduct our business.***

We are regulated by governmental bodies and/or self-regulatory organizations in a number of jurisdictions, including the U.S., the U.K., Hong Kong, Australia and Japan. We are also exposed to substantial risks of liability under federal and state securities laws, federal commodity futures laws, other federal and state laws and court decisions, as well as rules and regulations promulgated by the SEC, the Federal Reserve and state securities regulators.

Many of the regulations we are governed by are intended to protect the public, our customers and the integrity of the markets, and not necessarily our shareholders. Substantially all of our operations involving the execution and clearing of transactions in foreign currencies, CFDs, gold and silver and securities are conducted through subsidiaries that are regulated by governmental bodies or self-regulatory organizations. In the United States, we are principally regulated by the CFTC and the NFA. We are also regulated in all regions by applicable regulatory authorities and the various exchanges of which we are members. For example, we are regulated by the FSA in the U.K., the SFC, the ASIC, the KLF, the JFSA and the FFAJ. In addition, certain of our branch offices in Europe, while subject to local regulators, are regulated by the FSA with respect to, among other things, FX, CFDs and net capital requirements. These regulators and self-regulatory organizations regulate the conduct of our business in many ways and conduct regular examinations of our business to monitor our compliance with these regulations. Among other things, we are subject to regulation with regard to:

- our sales practices, including our interaction with and solicitation of customers and our marketing activities;
- the custody, control and safeguarding of our customers' assets;
- account statements, record-keeping and retention;
- maintaining specified minimum amounts of capital and limiting withdrawals of funds from our regulated operating subsidiaries;

TABLE OF CONTENTS

- making regular financial and other reports to regulators;
- anti-money laundering practices;
- licensing for our operating subsidiaries and our employees;
- the conduct of our directors, officers, employees and affiliates; and
- supervision of our business.

Compliance with these regulations is complicated, time consuming and expensive. Even minor, inadvertent irregularities can potentially give rise to claims that applicable laws and regulations have been violated. Failure to comply with all potentially applicable laws and regulations could lead to fines and other penalties which could adversely affect our revenues and our ability to conduct our business as planned. In addition, we could incur significant legal expenses in defending ourselves against and resolving actions or investigations by such regulatory agencies.

***We accept customers from many jurisdictions in a manner which we believe does not require local registration, licensing or authorization. As a result, our growth may be limited by future restrictions in these jurisdictions and we remain at risk that we may be exposed to civil or criminal penalties or be required to cease operations if we are found to be operating in jurisdictions without the proper license or authorization or if we become subject to regulation by local government bodies.***

Trading volume for 2012 with customers resident in jurisdictions in which we or our agents are not licensed or authorized by governmental bodies and/or self-regulatory organizations was, in the aggregate, approximately 48.7% of our total customer trading volume. We seek to deal with customers resident in foreign jurisdictions in a manner which does not breach any local laws or regulations where they are resident or require local registration, licensing or authorization from local governmental or regulatory bodies or self-regulatory organizations. We determine the nature and extent of services we can provide and the manner in which we conduct our business with customers resident in foreign jurisdictions based on a variety of factors.

In jurisdictions where we are not licensed or authorized, we are generally restricted from direct marketing to retail investors including the operation of a website specifically targeted to investors in a particular foreign jurisdiction. This restriction may limit our ability to grow our business in such jurisdictions or may result in increased overhead costs or lower service quality to customers in such jurisdictions. Accordingly, we currently have only a limited presence in a number of significant markets and may not be able to gain a significant presence there unless and until legal and regulatory barriers to international firms in certain of those markets are modified. Existing and future legal and regulatory requirements and restrictions may adversely impact our international expansion on an ongoing basis and we may not be able to successfully develop our business in a number of markets, including emerging markets, as we currently plan.

We consult with local counsel in jurisdictions where our total retail trading volume per jurisdiction is greater than 1%. In the aggregate, these jurisdictions represent approximately 82.0% of our total retail customer trading volume. We consult with local counsel in these jurisdictions for advice regarding whether we are operating in compliance with local laws and regulations (including whether we are required to be licensed or authorized) or, in some cases where licensing or authorization requirements could be read to be applicable to foreign dealers without a local presence, whether such requirements are generally not enforced. We generally do not consult with local counsel in jurisdictions where the total retail trading volume per jurisdiction is less than 1%. These jurisdictions represent approximately 18.0% of our total trading volume in the aggregate. In these jurisdictions that each have less than 1% of our total trading volume, we are accordingly exposed to the risk that we may be found to be operating in jurisdictions without required licenses or authorizations or without being in compliance with local legal or regulatory requirements. Furthermore, where we have taken legal advice we are exposed to the risk that our legal and regulatory analysis is subsequently determined by a local regulatory agency or other authority to be incorrect and that we have not been in compliance with local laws or regulations (including local licensing or authorization requirements) and to the risk that the regulatory environment in a jurisdiction may change, including a circumstance where laws or regulations or licensing or authorization requirements that previously were not enforced become subject to enforcement. In any of these circumstances, we may be subject to sanctions, fines and restrictions on our

TABLE OF CONTENTS

business or other civil or criminal penalties and our contracts with customers may be void or unenforceable, which could lead to losses relating to restitution of client funds or principal risk on open positions. Any such action in one jurisdiction could also trigger similar actions in other jurisdictions. We may also be required to cease the conduct of our business with customers in any such jurisdiction and/or we may determine that compliance with the laws or licensing, authorization or other regulatory requirements for continuance of the business are too onerous to justify making the necessary changes to continue that business. In addition, any such event could impact our relationship with the regulators or self-regulatory organizations in the jurisdictions where we are subject to regulation, including our regulatory compliance or authorizations. If sanctions, fines, restrictions on our business or other penalties are imposed on us for failure to comply with applicable legal requirements, guidelines or regulations, our financial condition and results of operations, and our reputation and ability to engage in business, may be materially adversely affected.

We periodically evaluate our activities in relation to jurisdictions in which we are not currently regulated by governmental bodies and/or self-regulatory organizations on an ongoing basis. This evaluation may involve speaking with regulators, local counsel and referring brokers or white labels (firms that offer our trading services to their clients under their own brand name in exchange for a revenue sharing arrangement with us) operating in any such jurisdiction and reviewing published regulatory guidance and examining the licenses that any competing firms may have. As a result of these evaluations we may determine to alter our business practices in order to comply with legal or regulatory developments in such jurisdictions and, at any given time, are generally in various stages of updating our business practices in relation to various jurisdictions. For example, in 2010, we received a request from the JFSA, the regulatory authority responsible for the regulation of FX trading in Japan, that we submit a plan for coming into compliance with JFSA requirements with respect to transacting business with Japanese retail customers who register to trade with foreign entities not regulated by the JFSA. Accordingly, we submitted a plan to the JFSA to transfer our Japanese retail customers registered with any of our subsidiaries to our subsidiary, FXCMJ, which is also regulated with the KLFJ in Japan. As of December 31, 2012, no Japanese clients are trading directly with an FXCM entity other than FXCMJ. In Canada, the securities and derivatives industry is governed locally by provincial or territorial legislation, and there is no national regulator. The regulation of FX products differs from province to province and territory to territory. For example, the provincial laws of British Columbia would require us to register as an investment dealer to offer our trading services directly. We previously conducted our business in British Columbia through an affiliate that was a registered exchange contract dealer with the British Columbia Securities Commission. We currently conduct our business in British Columbia through an arrangement with a registered investment dealer in Canada. In other provinces and territories in Canada, where we conduct the bulk of our Canadian business, we have historically provided our services directly from our U.S. facilities, without registering as a dealer in Canada. We are aware that local regulators in certain Canadian provinces and territories have begun to determine that FX trading services must be carried out through a registered investment dealer. Accordingly, we have entered an agreement with a registered investment dealer to address these regulatory developments.

As a result of these, among other potential future changes in our business practices in certain jurisdictions, customers may decide to transact their business with a different FX broker, which may adversely affect our revenue and profitability. We may also be subject to enforcement actions and penalties by the regulatory authorities of those jurisdictions or be subject to customer claims.

***We conduct our business within a heavily regulated environment and may be exposed to increased compliance costs or may be restricted from entering new markets as a result of extensive regulatory requirements.***

The cost of compliance with international regulations may adversely increase our costs, affect our revenue and impede our ability to expand internationally. Since we operate our business internationally, we are subject to regulations in many different countries in which we operate. If we are required to comply with new regulations or new or different interpretations of existing regulations, or if we are unable to comply with these regulations or interpretations, our business could be adversely affected, or the cost of compliance may make it difficult to expand into new international markets, or we may be liable for additional costs, which may be substantial.

TABLE OF CONTENTS

***Servicing customers via the internet may require us to comply with the laws and regulations of each country in which we are deemed to conduct business. Failure to comply with such laws may negatively impact our financial results.***

Since our services are available over the internet in foreign countries and we have customers residing in foreign countries, foreign jurisdictions may require us to qualify to do business in their country. We believe that the number of our customers residing outside of the United States will increase over time. We are required to comply with the laws and regulations of each country in which we conduct business, including laws and regulations currently in place or which may be enacted related to internet services available to their citizens from service providers located elsewhere. Any failure to develop effective compliance and reporting systems could result in regulatory penalties in the applicable jurisdiction, which could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Our failure to comply with regulatory requirements could subject us to sanctions and could have a material adverse effect on our business, financial condition and results of operations and cash flows.***

Many of the laws and regulations by which we are governed grant regulators broad powers to investigate and enforce compliance with their rules and regulations and to impose penalties and other sanctions for non-compliance. Our ability to comply with all applicable laws and regulations is dependent in large part on our internal compliance function as well as our ability to attract and retain qualified compliance personnel, which we may not be able to do. If a regulator finds that we have failed to comply with applicable rules and regulations, we may be subject to censure, fines, cease-and-desist orders, suspension of our business, removal of personnel, civil litigation or other sanctions, including, in some cases, increased reporting requirements or other undertakings, revocation of our operating licenses or criminal conviction. Any disciplinary action taken against us could result in negative publicity, potential litigation, remediation costs and loss of customers which could have a material adverse effect on our business, financial condition and results of operations and cash flows.

In August 2011, Forex Capital Markets, LLC (“FXCM US”) entered into a settlement with the NFA. The settlement terms principally pertain to FXCM’s practice concerning the execution of price improvements or “positive slippage” in its trading execution system prior to August 2010. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations to pay a fine of \$2.0 million to the NFA and to provide restitution to the affected clients.

In October 2011, FXCM US entered into a settlement with the CFTC. The settlement principally addressed allegations regarding FXCM US’s failure to monitor and maintain its trading systems prior to August 2010. FXCM US had previously settled with the NFA for allegations regarding mainly the same underlying issues. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations, to pay a fine of \$6.0 million to the CFTC and to provide restitution to the affected clients.

In September 2012, the FSA initiated investigations relating to the past trade execution practices of Forex Capital Markets Limited and FXCM Securities Limited. Although we are in the process of complying with the FSA’s requests, we have not been formally notified whether or not the FSA intends to take any action against us with respect to our trade execution practices.

In 2012, FXCMJ accrued \$2.6 million as an estimate to settle certain trading system matters with the JFSA. We expect settlement of this matter, including any administrative penalty, in the first quarter of 2013 and do not expect the ultimate settlement amount to differ materially from the amount accrued. A similar or related enforcement action may be brought against us, which could adversely affect our revenues and our ability to conduct our business as planned.

***The regulatory environment in which we operate is subject to continual change. Changes in the regulatory environment could have a material adverse effect on our business, financial condition and results of operations and cash flows.***

The legislative and regulatory environment in which we operate has undergone significant changes in the recent past and there may be future regulatory changes in our industry. The financial services industry in general has been subject to increasing regulatory oversight in recent years. The governmental bodies and

TABLE OF CONTENTS

self-regulatory organizations that regulate our business have proposed and may consider additional legislative and regulatory initiatives and may adopt new or revised laws and regulations. As a result, in the future, we may become subject to new regulations that may affect the way in which we conduct our business and may make our business less profitable. For example, a regulatory body may reduce the levels of leverage we are allowed to offer to our customers, which may adversely impact our business, financial condition and results of operations and cash flows. Changes in the interpretation or enforcement of existing laws and regulations by those entities may also adversely affect our business.

For example, in August 2010, the CFTC released final rules relating to retail FX regarding, among other things, registration, disclosure, recordkeeping, financial reporting, minimum capital and other operational standards. Most significantly the regulations:

- impose an initial minimum security deposit amount of 2% of the notional value for major currency pairs and 5% of the notional value for all other retail FX transactions and provide that the NFA will designate which currencies are “major currencies” and review, at least annually, major currency designations and security deposit requirements and adjust such designations and requirements as necessary in light of changes in the volatility of currencies and other economic and market factors;
- provide that referring brokers must either meet the minimum net capital requirements applicable to futures and commodity options referring brokers or enter into a guarantee agreement with a CFTC-regulated FX dealer member, along with a requirement that such referring broker may be a party to only one guarantee agreement at a time;
- require that the risk disclosure statement provided to every retail FX customer include disclosure of the number of non-discretionary accounts maintained by the futures commission merchant (“FCM”), or retail foreign exchange dealer (“RFED”), that were profitable and those that were not during the four most recent calendar quarters;
- require us to ensure that our customers resident in the United States have accounts with our NFA-registered operating entity;
- require that FCMs and RFEDs are obligated when re-quoting prices to do so in a symmetrical fashion so that the re-quoted prices do not represent an increase in the spread from the initially quoted prices, regardless of the direction the market moves; and
- prohibit the making of guarantees against loss to retail FX customers by FCMs, RFEDs and referring brokers and require that FCMs, RFEDs and referring brokers provide retail FX customers with enhanced written disclosure statements that, among other things, inform customers of the risk of loss.

In response to the requirement that our customers resident in the United States maintain trading accounts only with our CFTC-registered operating subsidiary, we have migrated all consenting U.S. resident customer accounts established with our foreign affiliates to our CFTC-regulated operating subsidiary. All other U.S. resident accounts not established with our CFTC-regulated operating subsidiary have been locked from trading pending further instructions from the account holders. However, in order to permit us to comply with the rules of the FSA regarding the transfer of client accounts, the process of migrating U.S. resident customer accounts held by our FSA-regulated operating subsidiary in the U.K. was not completed until October 29, 2010, eleven calendar days following the date on which the new regulations became effective. As a result, the CFTC imposed a fine of \$140,000 on Forex Capital Markets Limited, one of our FSA-regulated operating subsidiaries in the U.K. To date, there have been no other related fines or penalties and do not expect any such fines or penalties to have a material adverse effect on our business, financial condition or results of operation.

In addition, the Dodd-Frank Wall Street Reform and Consumer Protection Act, (“Dodd-Frank Act”), enacted in July 2010 will have broad effects on the derivatives markets generally. In response to the rulemakings by the CFTC and SEC under the Dodd-Frank Act that defined the term “swap”, FXCM conducted an in-depth review of the products offered by the firm. As a precautionary measure, FXCM applied for registration as a “Swap Dealer” on December 31, 2012 and has been granted provisional status. FXCM

TABLE OF CONTENTS

will continue to monitor the applicability of the rules to the firm's existing business practices. This law and related regulatory requirements may affect the ability of FX market makers to do business or affect the prices and terms on which such market makers will do business with us. The Dodd-Frank Act may also affect the structure, size, depth and liquidity of the FX markets generally. These effects may adversely impact our ability to provide FX transactions to our customers and could have a material adverse effect on our business and profitability.

The Internal Revenue Service ("IRS") and Treasury Department recently issued final Treasury Regulations addressing withholding and information reporting requirements under the Foreign Account Tax Compliance Act ("FATCA") in an attempt to combat offshore tax evasion and recoup tax revenues. Under FATCA, non-U.S. financial institutions generally will be required to enter into agreements with the IRS to identify financial accounts held by U.S. persons or entities with substantial U.S. ownership. FATCA is complex and its application to FXCM is uncertain at this time. Each U.S. customer doing business with the Company's non-U.S. entities should consult its own tax adviser to obtain a more detailed explanation of FATCA and to learn how it might affect such customer in its specific circumstance, in particular if it may be, or hold its interest through any entity that is, classified, as a financial institution under FATCA. Compliance with FATCA could have a material adverse effect on our business.

The European Markets Infrastructure Regulation ("EMIR") is at the end of a lengthy negotiation process and will significantly alter the structure of European OTC markets. Firms will need to clear all OTC derivative transactions. The scope of the clearing obligation will apply across the five main derivative asset classes (interest rate, equity, credit, commodity and foreign exchange). The scope of the clearing obligation will apply to all financial counterparties transacting in OTC derivatives, which will in practice include all banks, insurers and asset managers. In order to address concerns that regulators do not have a full picture of the exposures of the firms they regulate and the possible systemic implications these may pose, a number of trade repositories are being established where information on positions will be collected. EMIR will require all derivative transactions (OTC and exchange traded) entered into by European Union counterparties to be reported within one day of the execution of the contract. Both counterparties to the transaction will need to report, although firms will be able to do so on behalf of their clients. The list of products that will be required to be cleared has not yet been determined. However, it is clear that the reporting obligation will impact UK entities and an implementation plan has been established to ensure compliance with the EMIR requirements in this respect.

The FSA implemented the U.K. version of the Remuneration Code from January 1, 2011 to meet the remuneration provisions of the Capital Requirements Directive. The main features of the Code are that (a) it applies to senior management, risk takers and staff in control functions, collectively known as Code Staff (b) at least 40% of a bonus must be deferred over a period of at least three years for all "Code Staff" (c) at least 50% of any bonus must be made in shares, share linked instruments or other non-cash instruments and (d) firms must not offer guaranteed bonuses of more than one year. The Code is applied on a proportionate basis, taking into account and firm's size, internal organization and nature and complexity of their activities. On this basis the U.K. entities fall in to tier three of four categories.

In addition, the ASIC is considering new regulations which would limit any inappropriate advertising by the industry, provide disclosure benchmarks for over-the-counter CFD providers, and devise a policy on customer suitability.

Additionally, the JFSA announced in August 2010 that maximum leverage for Japanese customers would be reduced from 100-to-1 to 50-to-1, and then announced a further reduction from 50-to-1 to 25-to-1, effective August 2011. The impact of these regulations may diminish trading volume of our customers in Japan which can affect our revenue and profitability.

In Korea, the Financial Services Commission and the Financial Supervisory Services announced that, as of March 2012, FX traders would be limited to 10-to-1 leverage, down from 20-to-1, and down from 50-to-1 in September 2009.

These and other future regulatory changes could have a material adverse effect on our business and profitability and the FX industry as a whole.

TABLE OF CONTENTS

In addition, the regulatory enforcement environment has created uncertainty with respect to certain practices or types of transactions that, in the past, were considered permissible and appropriate among financial services firms, but that later have been called into question or with respect to which additional regulatory requirements have been imposed. Legal or regulatory uncertainty and additional regulatory requirements could adversely affect our business.

***We are required to maintain high levels of regulatory capital, which could constrain our growth and subject us to regulatory sanctions.***

The CFTC, NFA and other U.S. and non-U.S. regulators have stringent rules requiring that we maintain specific minimum levels of regulatory capital in our operating subsidiaries that conduct our spot foreign exchange, CFDs, including contracts for gold, silver, oil and stock indices and securities business. As of December 31, 2012, on a separate company basis, we were required to maintain approximately \$67.2 million of minimum net capital in the aggregate across all jurisdictions. Regulators continue to evaluate and modify minimum capital requirements from time to time in response to market events and to improve the stability of the international financial system. For example, in 2010, the FSA increased our capital requirements in the U.K. and may do so again in the future. Additional revisions to this framework or new capital adequacy rules applicable to us may be proposed and ultimately adopted, which could further increase our minimum capital requirements in the future.

The Basel Committee on Banking Supervision has proposed a new regime for regulatory capital and liquidity, known as Basel III. The majority of these proposals were issued on December 16, 2010. The proposals include more restricted definitions of what counts as eligible regulatory capital, liquidity standards, and reform of counterparty credit risk rules. On July 20, 2011, the European Commission published its proposals for the implementation of Basel III capital requirements into EU law through the Capital Requirements Regulation and Directive (known as CRD IV). These proposals will not be debated by the EU Parliament until April 2013. The proposed implementation date of these proposals has been announced. It is proposed that this legislation will enter into force on January 1, 2013 and will be gradually brought into force, applying in full from January 1, 2019.

Even if regulators do not change existing regulations or adopt new ones, our minimum capital requirements will generally increase in proportion to the size of our business conducted by our regulated subsidiaries. As a result, we will need to increase our regulatory capital in order to expand our operations and increase our revenue, and our inability to increase our capital on a cost-efficient basis could constrain our growth. In addition, in many cases, we are not permitted to withdraw regulatory capital maintained by our subsidiaries without prior regulatory approval or notice, which could constrain our ability to allocate our capital resources most efficiently throughout our global operations. In particular, these restrictions could limit our ability to pay dividends or make other distributions on our shares and, in some cases, could adversely affect our ability to withdraw funds needed to satisfy our ongoing operating expenses, debt service and other cash needs.

Regulators monitor our levels of capital closely. We are required to report the amount of regulatory capital we maintain to our regulators on a periodic basis, and to report any deficiencies or material declines promptly. While we expect that our current amount of regulatory capital will be sufficient to meet anticipated short-term increases in requirements, any failure to maintain the required levels of regulatory capital, or to report any capital deficiencies or material declines in capital could result in severe sanctions, including fines, censure, restrictions on our ability to conduct business and revocation of our registrations. The imposition of one or more of these sanctions could ultimately lead to our liquidation, or the liquidation of one or more of our subsidiaries.

***Procedures and requirements of the Patriot Act and similar laws may expose us to significant costs or penalties.***

As a financial services firm, we and our subsidiaries are subject to laws and regulations, including the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, or the Patriot Act, that require that we know our customers and monitor transactions for suspicious financial activities. The cost of complying with the Patriot Act and related laws and regulations

TABLE OF CONTENTS

is significant. We face the risk that our policies, procedures, technology and personnel directed toward complying with the Patriot Act and similar laws and regulations are insufficient and that we could be subject to significant criminal and civil penalties or reputational damage due to noncompliance. Such penalties and subsequent remediation costs could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Due to the evolving nature of financial regulations in certain jurisdictions of the world, our operations may be disrupted if a regulatory authority deems them inappropriate and requires us to comply with additional regulatory requirements.***

The legislative and regulatory environment in which we operate has undergone, and is undergoing, significant changes in the recent past and there may be future regulatory changes affecting our industry. The financial services industry in general has been subject to increasing regulatory oversight in various jurisdictions throughout the world, including the jurisdictions in which we operate. We have benefited from recent regulatory liberalization in several emerging markets in developing regions enabling us to increase our presence in those markets. Our ability to continue to expand our presence in these regions, however, will depend to a large extent upon continued evolution of the regulatory environment in these several markets, and there is no assurance that favorable regulatory trends will continue. Moreover, we currently have only a limited presence in a number of significant markets and may not be able to gain a significant presence there unless and until regulatory barriers to international firms in certain of those markets are modified. Consequently, our recent success in various regions may not continue or we may not be able to develop our business in emerging markets as we currently plan. To the extent current activities are deemed inappropriate, we may incur a disruption in services offered to current customers as we are forced to comply with additional regulations.

***Registration as a Swap Dealer could subject the Company to additional regulation and compliance requirements which could materially adversely affect its business and financial condition.***

Recently adopted rules under the Dodd-Frank Act have established a comprehensive new regulatory framework for the derivatives markets generally. In response to the Dodd-Frank rulemakings that further defined “swap”, we conducted an in-depth review of the products offered by the firm and, as a precautionary measure, applied for registration as a Swap Dealer on a provisional basis with the NFA on December 31, 2012.

The impact of registration as a Swap Dealer on the Company remains unclear. However, additional regulation and ongoing compliance of any kind may carry additional expense and new challenges for our management team and may have a material adverse effect on our business and financial condition.

We will continue to monitor the applicability of the rules to the firm’s existing business practices.

***Attrition of customer accounts and failure to attract new accounts could have a material adverse effect on our business, financial condition and results of operations and cash flows. Even if we do attract new customers, we may fail to attract the customers in a cost-effective manner, which could materially adversely affect our profitability and growth.***

Our customer base is primarily comprised of individual retail customers. Although we offer products and tailored services designed to educate, support and retain our customers, our efforts to attract new customers or reduce the attrition rate of our existing customers may not be successful. If we are unable to maintain or increase our customer retention rates or generate a substantial number of new customers in a cost-effective manner, our business, financial condition, results of operations and comprehensive income and cash flows would likely be adversely affected. For the year ended December 31, 2012, we incurred advertising and marketing expenses of \$30.9 million. Although we have spent significant financial resources on advertising and marketing expenses and plan to continue to do so, these efforts may not be a cost-effective way to attract new customers. In particular, we believe that while rates for desirable advertising and marketing placements, including online, search engine, print and television advertising fell in 2009 and 2010 due to the overall economic slow-down, those rates began to increase in 2011 and 2012 and are likely to increase in the foreseeable future. As a result, we may be disadvantaged relative to our larger competitors in our ability to

TABLE OF CONTENTS

expand or maintain our advertising and marketing commitments, which may raise our customer acquisition costs. Additionally, our advertising and marketing methods are subject to regulation by the CFTC and NFA. The rules and regulations of these organizations impose specific limitations on our sales methods, advertising and marketing. If we do not achieve our advertising objectives, our profitability and growth may be materially adversely affected.

***We are subject to litigation risk which could adversely affect our reputation, business, financial condition and results of operations and cash flows.***

Many aspects of our business involve risks that expose us to liability under U.S. federal and state laws, as well as the rules and enforcement efforts of our regulators and self-regulatory organizations worldwide. These risks include, among others, disputes over trade terms with customers and other market participants, customer losses resulting from system delay or failure and customer claims that we or our employees executed unauthorized transactions, made materially false or misleading statements or lost or diverted customer assets in our custody. We may also be subject to regulatory investigation and enforcement actions seeking to impose significant fines or other sanctions, which in turn could trigger civil litigation for our previous operations that may be deemed to have violated applicable rules and regulations in various jurisdictions.

The volume of claims and the amount of damages and fines claimed in litigation and regulatory proceedings against financial services firms have been increasing, particularly in the current environment of heightened scrutiny of financial institutions. The amounts involved in the trades we execute, together with rapid price movements in our currency pairs, can result in potentially large damage claims in any litigation resulting from such trades. Dissatisfied customers may make claims against us regarding the quality of trade execution, improperly settled trades, mismanagement or even fraud, and these claims may increase as our business expands.

Litigation may also arise from disputes over the exercise of our rights with respect to customer accounts. Although our customer agreements generally provide that we may exercise such rights with respect to customer accounts as we deem reasonably necessary for our protection, our exercise of these rights may lead to claims by customers that we did so improperly.

Even if we prevail in any litigation or enforcement proceedings against us, we could incur significant legal expenses defending against the claims, even those without merit. Moreover, because even claims without merit can damage our reputation or raise concerns among our customers, we may feel compelled to settle claims at significant cost. The initiation of any claim, proceeding or investigation against us, or an adverse resolution of any such matter could have a material adverse effect on our reputation, business, financial condition and results of operations and cash flows.

Please see “Item 3. Legal Proceedings” beginning on page 39 of this Annual Report for a description of pending material legal proceedings we are currently involved in.

***We may be subject to customer litigation, financial losses, regulatory sanctions and harm to our reputation as a result of employee misconduct or errors that are difficult to detect and deter.***

There have been a number of highly publicized cases involving fraud or other misconduct by employees of financial services firms in recent years. Our employees could execute unauthorized transactions for our customers, use customer assets improperly or without authorization, carry out improper activities on behalf of customers or use confidential customer or company information for personal or other improper purposes, as well as misrecord or otherwise try to hide improper activities from us.

In addition, employee errors, including mistakes in executing, recording or reporting transactions for customers, may cause us to enter into transactions that customers disavow and refuse to settle. Employee errors expose us to the risk of material losses until the errors are detected and the transactions are reversed. The risk of employee error or miscommunication may be greater for products that are new or have non-standardized terms. Further, such errors may be more likely to occur in the aftermath of any acquisitions during the integration of or migration from technological systems.

Misconduct by our employees or former employees could subject us to financial losses or regulatory sanctions and seriously harm our reputation. It may not be possible to deter or detect employee misconduct

TABLE OF CONTENTS

and the precautions we take to prevent and detect this activity may not be effective in all cases. Our employees may also commit good faith errors that could subject us to financial claims for negligence or otherwise, as well as regulatory actions.

Misconduct by employees of our customers can also expose us to claims for financial losses or regulatory proceedings when it is alleged we or our employees knew or should have known that an employee of our customer was not authorized to undertake certain transactions. Dissatisfied customers can make claims against us, including claims for negligence, fraud, unauthorized trading, failure to supervise, breach of fiduciary duty, employee errors, intentional misconduct, unauthorized transactions by associated persons and failures in the processing of transactions.

***Any restriction in the availability of credit cards as a payment option for our customers could adversely affect our business, financial condition and results of operations and cash flows.***

We currently allow our customers to use credit cards to fund their accounts with us. There is a risk that in the future, new regulations or credit card issuing institutions may restrict the use of credit and debit cards as a means to fund accounts used to trade in investment products. Recently, the NFA has published a request for comments on a rule proposal to prohibit the use of credit cards to fund customer trading accounts. Deposits from credit cards, globally, represented less than 10% of total cash deposits in 2012 whereas deposits from credit cards of U.S. customers represented less than 3% of total cash deposits in 2012. The elimination or a reduction in the availability of credit cards as a means to fund customer accounts, particularly for our customers residing outside the United States, could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Our customer accounts may be vulnerable to identity theft and credit card fraud.***

Credit card issuers have adopted credit card security guidelines as part of their ongoing efforts to prevent identity theft and credit card fraud. We continue to work with credit card issuers to ensure that our services, including customer account maintenance, comply with these rules. There can be no assurances, however, that our services are fully protected from unauthorized access or hacking. If there is unauthorized access to credit card data that results in financial loss, we may experience reputational damage and parties could seek damages from us.

***In the current environment facing financial services firms, a firm's reputation is critically important. If our reputation is harmed, or the reputation of the online financial services industry as a whole or retail FX industry is harmed, our business, financial condition and results of operations and cash flows may be materially adversely affected.***

Our ability to attract and retain customers and employees may be adversely affected if our reputation is damaged. If we fail, or appear to fail, to deal with issues that may give rise to reputation risk, we could harm our business prospects. These issues include, but are not limited to, appropriately dealing with potential conflicts of interest, legal and regulatory requirements, ethical issues, money-laundering, privacy, customer data protection, record-keeping, sales and trading practices, and the proper identification of the legal, credit, liquidity, operational and market risks inherent in our business. Failure to appropriately address these issues could also give rise to additional legal risk to us, which could, in turn, increase the size and number of claims and damages asserted against us or subject us to regulatory enforcement actions, fines and penalties. Any such sanction would materially adversely affect our reputation, thereby reducing our ability to attract and retain customers and employees.

In addition, our ability to attract and retain customers may be adversely affected if the reputation of the online financial services industry as a whole or retail FX industry is damaged. In recent years, a number of financial services firms have suffered significant damage to their reputations from highly publicized incidents that in turn resulted in significant and in some cases irreparable harm to their business. The perception of instability within the online financial services industry could materially adversely affect our ability to attract and retain customers.

TABLE OF CONTENTS***The loss of members of our senior management could compromise our ability to effectively manage our business and pursue our growth strategy.***

We rely on members of our senior management to execute our existing business plans and to identify and pursue new opportunities. Our chief executive officer, Drew Niv, has been our chief executive officer since our founding and was one of our founders. Certain others on our management team have been with us for most of our history and have significant experience in the FX industry. Our continued success is dependent upon the retention of these and other key executive officers and employees, as well as the services provided by our trading staff, technology and programming specialists and a number of other key managerial, marketing, planning, financial, technical and operations personnel. The loss of such key personnel could have a material adverse effect on our business. In addition, our ability to grow our business is dependent, to a large degree, on our ability to retain such employees.

***Our acquisitions of ODL and several Japanese operating entities may adversely affect our business, and new acquisitions or joint ventures that we may pursue could present unforeseen integration obstacles.***

We completed our acquisition of ODL, a London-based broker dealer of FX, CFDs, spread betting, stocks and options with substantial business in U.K. and Europe on October 1, 2010. In March 2011 and October 2011, we acquired the retail FX businesses of FXCMJ, formerly GCI, and the Japanese FX broker Foreland, respectively. In June 2012, we acquired a controlling interest in Lucid, an electronic market making and trading firm. The process of integrating the operations of these entities with ours may require a disproportionate amount of resources and management attention as the acquisitions will increase the geographic footprint of our operations, especially in Asia, Europe and the Middle East. Any substantial diversion of management attention or difficulties in operating any of the combined business could affect our ability to achieve operational, financial and strategic objectives. The unsuccessful integration of any of the operations of these entities with ours may also have adverse short-term effects on reported operating results and may lead to the loss of key personnel. In addition, customers from these entities may react unfavorably to the combination of our businesses or we may be exposed to additional liabilities of the combined business, both of which could materially adversely affect our revenue and results of operations.

We may also pursue new acquisitions or joint ventures that could present integration obstacles or costs. We may not realize any of the benefits we anticipated from the strategy and we may be exposed to additional liabilities of any acquired business, any of which could materially adversely affect our revenue and results of operations. In addition, future acquisitions or joint ventures may involve the issuance of additional limited liability company interests in FXCM Holdings, LLC, or Holdings Units, or shares of our Class A common stock, which would dilute ownership.

***We are subject to a variety of new risks as a result of our acquisition of Lucid Markets***

As a result of our acquisition of Lucid we are exposed to a variety of new risks, including:

- Significant fluctuations in our revenues and profitability from period to period;
- Risk of trading losses;
- Competition from new competitors; and
- Our failure to implement and apply new risk management controls and procedures.

Lucid's revenues and operating results vary significantly from period to period, whether due to movements and trends in the underlying markets, to competitors who are willing to trade more aggressively by decreasing their bid/offer spreads and thereby assuming more risk in order to acquire market share, to fluctuations in trading levels or otherwise. As a result, our revenues and profitability may be subject to significant fluctuations or declines.

As a market maker, Lucid provides liquidity by buying from sellers and selling to buyers. Lucid Markets may accumulate significant positions preceding unfavorable price movements in currencies, creating the potential for trading losses. Should these events occur or increase in frequency or magnitude, we could experience material losses.

TABLE OF CONTENTS

As a result of our acquisition of Lucid business we have new competitors. Our competitors include sophisticated institutions which have larger customer bases, more established name recognition and substantially greater financial, marketing, technological and personnel resources than we do. These competitors, including commercial and investment banking firms, may have access to capital in greater amounts and at lower costs than we do, and therefore, may be better able to respond and to compete for market share generally. We may not be able to compete effectively against these firms, particularly those with greater financial resources, and our failure to do so could materially affect our business, financial condition and results of operations and cash flows.

Lucid is dependent on risk management policies and the adherence to such policies by trading staff. Policies, procedures and practices are used to identify, monitor and control a variety of risks, including market risk and risks related to human error, customer defaults, market movements, fraud and money-laundering. Some of our methods for managing risk are discretionary by nature and are based on internally developed controls and observed historical market behavior, and also involve reliance on standard industry practices. We may need to continually implement and apply new risk management controls and procedures as a result of our acquisition of Lucid Markets. We may not successfully implement and apply risk management policies and procedures that will identify, monitor and control the risks associated with principal trading.

***New lines of business or new products and services may subject us to additional risks.***

From time to time, we may implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of our system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on our business, results of operations and financial condition.

For example, we introduced trading in CFDs. Through our acquisition of ODL, we increased the size of our CFD business and added spread betting and equity options. We face the same risks with these products that we face in our FX trading business, including market risk, counterparty risk, liquidity risk, technology risk, third party risk and risk of human error. Furthermore, the volatility of the CFD and spread betting markets may have an adverse impact on our ability to maintain profit margins similar to the profit margins we have realized with respect to FX trading. The introduction of these and other potential financial products also poses a risk that our risk management policies, procedures and practices, and the technology that supports such activities, will be unable to effectively manage these new risks to our business. In addition, these offerings may be subject to regulation under applicable securities or other consumer protection laws. Our non-U.S. subsidiaries, FXCM Securities Limited and Forex Capital Markets Limited (which are licensed with the FSA in the U.K.), FXCM Australia Limited (which is licensed with the ASIC) and FXCMJ (which is licensed with the JFSA and a member of the FFAJ) offer and sell CFDs outside the United States in compliance with applicable local regulatory requirements. CFDs are not and may not be offered in the United States by us and are not eligible for resale to U.S. persons. They are not registered with the SEC or any U.S. regulator. CFDs may not be enforceable in the United States. In the event that an offer or sale of CFDs by our non-U.S. subsidiaries was to constitute an offer or sale of securities subject to the U.S. federal securities laws or swaps, futures, forwards or other instruments over which the CFTC has, or under the Dodd-Frank Act, will have jurisdiction, we would be required to comply with such U.S. laws with respect to such offering. In that event, we may determine that it would be too onerous or otherwise not feasible for us to continue such offers or sales of CFDs. We currently derive approximately 17.3% of our revenues from our CFD business.

TABLE OF CONTENTS***We have recently begun offering retail clients trading through a principal model in addition to agency model, which will expose us to additional risks, including the risk of material trading losses.***

We have recently begun to offer our smaller retail clients the option to trade through a principal model. In our agency model, when a customer executes a trade with us, we act as a credit intermediary, or riskless principal, simultaneously entering into trades with the customer and the FX market maker. In the principal model, however, we may maintain our trading position if we believe the price may move in our favor and against the customer and not offset the trade with another party. As a result, we may incur trading losses using principal model execution for a variety of reasons, including:

- Price changes in currencies;
- Lack of liquidity in currencies in which we have positions; and
- Inaccuracies in our proprietary pricing mechanism, or rate engine, which evaluates, monitors and assimilates market data and reevaluates our outstanding currency quotes and is designed to publish prices reflective of prevailing market conditions throughout the trading day.

These risks may affect the prices at which we are able to sell or buy currencies, or may limit or restrict our ability to either resell currencies that we have purchased or repurchase currencies that we have sold. In addition, competitive forces may require us to match the breadth of quotes our competitors display and to hold varying amounts and types of currencies at any given time. By having to maintain positions in certain currencies, we may be subject to a high degree of market risk.

We may not be able to successfully implement and apply risk management policies and procedures that address the risks associated with principal model execution and may otherwise fail to manage such risks successfully. Accordingly, we could experience significant losses from such activities, which could have a material adverse effect on our business, financial condition and results of operations and cash flows.

In addition, the revenues we expect to record from our principal model broker activities consists primarily of trading gains and losses, and are more affected by market volatility.

Finally, as we have for a number of years conducted our retail operations on the basis of the agency model, we could suffer reputational damage and additional regulatory scrutiny by offering execution to retail clients that creates an inherent conflict between the interests of the customer and our interests.

***We may be unable to effectively manage our rapid growth and retain our customers.***

The rapid growth of our business during our short history has placed significant demands on our management and other resources. If our business continues to grow at a rate consistent with our historical growth, we may need to expand and upgrade the reliability and scalability of our transaction processing systems, network infrastructure and other aspects of our proprietary technology. We may not be able to expand and upgrade our technology systems and infrastructure to accommodate such increases in our business activity in a timely manner, which could lead to operational breakdowns and delays, loss of customers, a reduction in the growth of our customer base, increased operating expenses, financial losses, increased litigation or customer claims, regulatory sanctions or increased regulatory scrutiny.

In addition, due to our rapid growth, we will need to continue to attract, hire and retain highly skilled and motivated officers and employees. We may not be able to attract or retain the officers and employees necessary to manage this growth effectively.

***We may be unable to respond to customers' demands for new services and products and our business, financial condition and results of operations and cash flows may be materially adversely affected.***

Our business is subject to rapid change and evolving industry standards. New services and products provided by our competitors may render our existing services and products less competitive. Our future success will depend, in part, on our ability to respond to customers' demands for new services and products on a timely and cost-effective basis and to adapt to address the increasingly sophisticated requirements and varied needs of our customers and prospective customers. We may not be successful in developing, introducing or marketing new services and products. In addition, our new service and product enhancements

TABLE OF CONTENTS

may not achieve market acceptance. Any failure on our part to anticipate or respond adequately to customer requirements or changing industry practices, or any significant delays in the development, introduction or availability of new services, products or service or product enhancements could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Our revolving credit facility is guaranteed by certain subsidiaries of the Company and is secured by a pledge of certain equity interests of the Company's domestic and foreign subsidiaries. The credit facility also contains financial covenants and other restrictions on our actions, and it could therefore limit our operational flexibility or otherwise adversely affect our financial condition.***

We have, from time to time, financed our liquidity needs in part from borrowings made under a revolving credit facility. On November 8, 2012, we entered into an amendment to our credit agreement which now provides us with the ability to borrow up to \$155.0 million. The credit agreement for our revolving credit facility contains a number of restrictive covenants including, among others, covenants relating to consolidated leverage ratio, excess net capital requirements, and net unhedged exposure. The credit agreement also contains financial covenants relating to limitations on liens, investments, payments, fundamental changes, dispositions, the incurrence of indebtedness, and transactions with affiliates. The credit agreement contains customary events of default, including, among others, non-payments of principal and interest; breach of representations and warranties; failure to maintain compliance with the financial and other covenants contained in the credit agreement; the existence of bankruptcy or insolvency proceedings; insolvency; and a change of control.

Failure to comply with these restrictive or financial covenants could result from, among other things, changes in our results of operations or general economic conditions. These covenants may restrict our ability to engage in transactions that would otherwise be in our best interests. Failure to comply with any of the covenants under the credit agreement could result in a default. An event of default would permit our lenders to declare all amounts borrowed from them to be due and payable, together with accrued and unpaid interest. If the lenders accelerate the repayment of borrowings, we may not have sufficient assets to repay our debt or it would have a material adverse effect on our business, operations, financial condition and liquidity. As of December 31, 2012, the outstanding balance under the credit facility was \$85 million. See Note 20 to our consolidated financial statements in "Item 8. Financial Statements and Supplementary Data" for further information on our credit facility.

***Despite current indebtedness levels associated with our credit facility, we may still be able to incur substantially more debt. This could further exacerbate the risks associated with our current leverage.***

We may be able to incur substantial additional indebtedness in the future. Under certain circumstances, the credit facility may be increased during the term of the credit agreement by up to \$155.0 million. If new debt is added to our current debt levels, the related risks we now face could intensify.

***We face significant competition. Many of our competitors and potential competitors have larger customer bases, more established brand recognition and greater financial, marketing, technological and personnel resources than we do which could put us at a competitive disadvantage. Additionally, some of our competitors and many potential competitors are better capitalized than we are and able to obtain capital more easily which could put us at a competitive disadvantage.***

We compete in the FX market based on our ability to execute our customers' trades at competitive prices, to retain our existing customers and to attract new customers. Certain of our competitors have larger customer bases, more established name recognition, a greater market share in certain markets, such as Europe, and greater financial, marketing, technological and personnel resources than we do. These advantages may enable them, among other things, to:

- develop products and services that are similar to ours, or that are more attractive to customers than ours, in one or more of our markets;
- provide products and services we do not offer;
- provide execution and clearing services that are more rapid, reliable or efficient, or less expensive than ours;

TABLE OF CONTENTS

- offer products and services at prices below ours to gain market share and to promote other businesses, such as FX options listed securities, CFDs, including contracts for precious metals, energy and stock indices, and OTC derivatives;
- adapt at a faster rate to market conditions, new technologies and customer demands;
- offer better, faster and more reliable technology;
- outbid us for desirable acquisition targets;
- more efficiently engage in and expand existing relationships with strategic alliances;
- market, promote and sell their products and services more effectively; and
- develop stronger relationships with customers.

These larger and better capitalized competitors, including commercial and investment banking firms, may have access to capital in greater amounts and at lower costs than we do and thus, may be better able to respond to changes in the FX industry, to compete for skilled professionals, to finance acquisitions, to fund internal growth and to compete for market share generally. Access to capital is critical to our business to satisfy regulatory obligations and liquidity requirements. Among other things, access to capital determines our creditworthiness, which if perceived negatively in the market could materially impair our ability to provide clearing services and attract customer assets, both of which are important sources of revenue. Access to capital also determines the degree to which we can expand our operations. Thus, if we are unable to maintain or increase our capital on competitive terms, we could be at a significant competitive disadvantage, and our ability to maintain or increase our revenue and earnings could be materially impaired. Also, new or existing competitors in our markets could make it difficult for us to maintain our current market share or increase it in desirable markets. In addition, our competitors could offer their services at lower prices, and we may be required to reduce our fees significantly to remain competitive. A fee reduction without a commensurate reduction in expenses would decrease our profitability. We may not be able to compete effectively against these firms, particularly those with greater financial resources, and our failure to do so could materially and adversely affect our business, financial condition and results of operations and cash flows. We may in the future face increased competition, resulting in narrowing bid/offer spreads which could materially adversely affect our business, financial condition and results of operations and cash flows.

***If we are unable to effectively compete in emerging international markets, either directly or through joint ventures with local firms, the future growth of our business may be adversely affected.***

We regard emerging international markets as an important area of our future growth. Due to cultural, regulatory and other factors relevant to those markets, however, we may be at a competitive disadvantage in those regions relative to local firms or to international firms that have a well established local presence. In some regions, we may need to enter into joint ventures with local firms in order to establish a presence in the local market, and we may face intense competition from other international firms over relatively scarce opportunities for market entry. Given the intense competition from other international firms that are also seeking to enter these fast-growing markets, we may have difficulty finding suitable local firms willing to enter into the types of relationships with us that we may need to gain access to these markets. This competition could make it difficult for us to expand our business internationally as planned. For the year ended December 31, 2012, we generated approximately 90.0% of our customer trading volume from customers outside the United States. Expanding our business in emerging markets is an important part of our growth strategy. We face significant risks in doing business in international markets, particularly in developing regions. These businesses, legal and tax risks include:

- less developed or mature local technological infrastructure and higher costs, which could make our products and services less attractive or accessible in emerging markets;
- difficulty in complying with the diverse regulatory requirements of multiple jurisdictions, which may be more burdensome, not clearly defined, and subject to unexpected changes, potentially exposing us to significant compliance costs and regulatory penalties;

TABLE OF CONTENTS

- less developed and established local financial and banking infrastructure, which could make our products and services less accessible in emerging markets;
- reduced protection of intellectual property rights;
- inability to enforce contracts in some jurisdictions;
- difficulties and costs associated with staffing and managing foreign operations, including reliance on newly hired local personnel;
- tariffs and other trade barriers;
- currency and tax laws that may prevent or restrict the transfer of capital and profits among our various operations around the world; and
- time zone, language and cultural differences among personnel in different areas of the world.

In addition, in order to be competitive in these local markets, or in some cases because of restrictions on the ability of foreign firms to conduct business locally, we may seek to operate through joint ventures with local firms as we have done, for example, in South Korea. Doing business through joint ventures may limit our ability to control the conduct of the business and could expose us to reputational and greater operational risks.

***Our business could be adversely affected if global economic conditions continue to negatively impact our customer base.***

Our customer base is primarily comprised of individual retail customers who view foreign currency trading as an alternative investment class. If global economic conditions continue to negatively impact the FX market or adverse developments in global economic conditions continue to limit the disposable income of our customers, our business could be materially adversely affected as our customers may choose to curtail their trading in the FX market which could result in reduced customer trading volume and trading revenue.

***A systemic market event that impacts the various market participants with whom we interact could have a material adverse effect on our business, financial condition and results of operations and cash flows.***

We interact with various third parties through our relationships with our prime brokers, white labels and referring brokers. Some of these market participants could be overleveraged. In the event of sudden, large market price movements, such market participants may not be able to meet their obligations to brokers who, in turn, may not be able to meet their obligations to their counterparties. As a result, if a systemic collapse in the financial system were to occur, defaults by one or more counterparties could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***The decline in short-term interest rates has had an adverse effect on our interest income and revenues.***

A portion of our revenue is derived from interest income. We earn interest on customer balances held in customer accounts and on our cash held in deposit accounts at various financial institutions. As a result of the recent decline in short-term interest rates, our interest income has declined significantly. Short-term interest rates are highly sensitive to factors that are beyond our control, including general economic conditions and the policies of various governmental and regulatory authorities. For both years ended December 31, 2012 and 2011, our interest income was approximately \$3.6 million. Interest income may not return to the amount we reported in prior years, and any further deterioration in short-term interest rates could further adversely affect our interest income and revenue.

In addition, this decline in interest rates has narrowed cross-border interest rate differentials, which has adversely affected the “carry trade”, a once popular investing strategy which involves buying a currency that offers a higher interest rate while selling a currency that offers a lower interest rate. We believe the decline in the carry trade has resulted in a decrease in retail FX volume. Accordingly, our growth could be impeded if cross-border interest rate differentials remain compressed.

TABLE OF CONTENTS

***Our operations in certain developing regions may be subject to the risks associated with politically unstable and less economically developed regions of the world. Trading in the currencies of these developing regions may expose our customers and the third parties with whom we interact to sudden and significant financial loss as a result of exceptionally volatile and unpredictable price movements and could negatively impact our business.***

Our operations in some emerging markets may be subject to the political, legal and economic risks associated with politically unstable and less economically developed regions of the world, including the risks of war, insurgency, terrorism and government appropriation. For example, we do business in countries whose currencies may be less stable than those in our primary markets. Currency instability or government imposition of currency restrictions in these countries could impede our operations in the FX markets in these countries. In addition, emerging markets may be subject to exceptionally volatile and unpredictable price movements that can expose customers and brokers to sudden and significant financial loss. Trading in these markets may be less liquid, market participants may be less well capitalized and market oversight may be less extensive, all of which could increase trading risk, particularly in markets for derivatives, commodities and currencies. Substantial trading losses by customers or customer or counterparty defaults, or the prospect of them, in turn, could drive down trading volume in these markets.

***We are dependent on FX market makers to continually provide us with FX market liquidity. In the event we lose access to current prices and liquidity levels, we may be unable to provide competitive FX trading services, which will materially adversely affect our business, financial condition and results of operations and cash flows.***

We rely on third party financial institutions to provide us with FX market liquidity. These FX market makers, although under contract with us, have no obligation to provide us with liquidity and may terminate our arrangements at any time. We also rely upon these FX market makers to provide us with competitive FX pricing which we can pass on to our customers. In the event we lose access to the competitive FX pricing and/or liquidity levels that we currently have, we may be unable to provide competitive FX trading services, which will materially adversely affect our business, financial condition and results of operations and cash flows. When we act as a riskless principal between our customers and our FX market makers, we provide our customers with the best bid and offer price for each currency pair from our FX market makers plus a fixed markup. When a customer places a trade and opens a position, we act as the counterparty to that trade and our system immediately opens a trade between us and the FX market maker who provided the price that the customer selected. In the event that an offsetting trade fails, we could incur losses resulting from our trade with our customer.

In addition, whether as a result of exceptional volatility or situations affecting the market, the absence of competitive pricing from FX market makers and/or the suspension of liquidity would expose us to the risk of a default by the customer and consequently, trading losses. Although our margining practices are designed to mitigate this risk, we may be unable to close out customer positions at a level where margin posted by the customer is sufficient to cover the customer's losses. As a result, a customer may suffer losses greater than any margin or other funds or assets posted by that customer or held by us on behalf of that customer. Our policy is generally not to pursue claims for negative equity against our customers.

***We are subject to risk of default by financial institutions that hold our funds and our customers' funds.***

We have significant deposits with banks and other financial institutions. As of December 31, 2012, 43 financial institutions held our funds and our customer funds of \$1.5 billion, of which HSBC held approximately 12.8%, Bank of America held approximately 11.1% and Nomura held approximately 26.0%. Pursuant to current guidelines set forth by the NFA and the CFTC for our U.S.-regulated subsidiaries, we are not required to segregate customer funds from our own funds. As such, we aggregate our customers' funds and our funds and hold them in collateral and deposit accounts at various financial institutions. In the event of insolvency of one or more of the financial institutions with whom we have deposited these funds, both we and our customers may not be able to recover our funds. Moreover, in aggregate, HSBC, Bank of America and Nomura holds in excess of 50.0% of our entire customer and our funds, if any of such financial institutions becomes insolvent, a significant portion of our funds and our customer funds may not be recovered. In such an event, our business and cash flow would be materially adversely impacted. Because our customers' funds

TABLE OF CONTENTS

are aggregated with our own, they are not insured by the Federal Deposit Insurance Corporation or any other similar insurer domestically or abroad, except to the extent of the maximum insured amount per deposit, which is unlikely to provide significant benefits to our customers. In any such insolvency, we and our customers would rank as unsecured creditors in respect of claims to funds deposited with any such financial institution. As a result, we may be subject to claims by customers due to the loss of customer funds and our business would be harmed by the loss of our own funds.

***We are subject to counterparty risk whereby defaults by parties with whom we do business can have an adverse effect on our business, financial condition and results of operations and cash flows.***

Our FX trading operations require a commitment of capital and involve risk of losses due to the potential failure of our customers to perform their obligations under these transactions. All retail customers are required to deposit cash collateral in order to trade on our retail platforms.

Certain institutional customers that use our retail trading platforms are not required to deposit cash collateral in order to trade on our retail platforms. In rare circumstances, we provide short term credit directly to certain institutional customers when initial collateral does not cover risk exposure.

Most of the institutional customers that use our institutional trading platforms trade via credits and limits set by the customers' prime brokers and by our prime brokers. As part of our arrangement with our prime brokers, they incur the credit risk regarding the trading of our institutional customers. We also, in certain situations, act in the capacity of prime broker to a select number of institutional customers that use our institutional trading platform.

As of December 31, 2012, we have extended a minimal amount of credit to institutional customers that use our trading platforms. We have not suffered, nor do we anticipate suffering, losses due to failure to repay amounts credited to those certain institutional customers.

We are also subject to counterparty risk with respect to clearing and prime brokers as well as banks with respect to our own deposits and deposits of customer funds. We are exposed to credit risk in the event that such counterparties fail to fulfill their obligations. Although we seek to manage the credit risk arising from institutional counterparties by setting exposure limits and monitoring exposure against such limits, carrying out periodic credit reviews, and spreading credit risk across a number of different institutions to diversify risk, if our credit and counterparty risk management processes are inadequate we could face significant liabilities which could have a material adverse effect upon our business, financial conditions, results of operations and cash flows.

***We depend on the services of prime brokers to assist in providing us access to liquidity through our FX market makers. The loss of one or more of our prime brokerage relationships could lead to increased transaction costs and capital posting requirements, as well as having a negative impact on our ability to verify our open positions, collateral balances and trade confirmations.***

We depend on the services of prime brokers to assist in providing us access to liquidity through our FX market makers. We currently have established three prime brokerage relationships which act as central hubs through which we are able to deal with our FX market makers. In return for paying a transaction-based prime brokerage fee, we are able to aggregate our trading exposures, thereby reducing our transaction costs. Since we trade with our FX market makers through our prime brokers, they also serve as a third party check on our open positions, collateral balances and trade confirmations. If we were to lose one or more of our prime brokerage relationships, we could lose this source of third party verification of our trading activity, which could lead to an increased number of record-keeping or documentation errors. Although we have relationships with FX market makers who could provide clearing services as a back-up for our prime brokerage services, if we were to experience a disruption in prime brokerage services due to a financial, technical, regulatory or other development adversely affecting any of our current prime brokers, our business could be materially adversely affected to the extent that we are unable to transfer positions and margin balances to another financial institution in a timely fashion. In the event of the insolvency of a prime broker, we might not be able to fully recover the assets we have deposited (and have deposited on behalf of our customers) with the prime broker or our unrealized profits since we will be among the prime broker's unsecured creditors.

TABLE OF CONTENTS***Failure of third-party systems or third-party service and software providers upon which we rely could adversely affect our business.***

We rely on certain third party computer systems or third party service and software providers, including technology platforms, back-office systems, internet service providers and communications facilities. For example, for the year ended December 31, 2012, approximately 8% of our trading volume was derived from trades utilizing the Meta Trader 4 platform, a third-party technology platform we license that is popular in the international trading community and offers our customers an alternative trading interface. Any interruption in these third party services, or deterioration in their performance or quality, could adversely affect our business. If our arrangement with any third party is terminated, we may not be able to find an alternative systems or services provider on a timely basis or on commercially reasonable terms. This could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Our computer infrastructure may be vulnerable to security breaches. Any such problems could jeopardize confidential information transmitted over the internet, cause interruptions in our operations or give rise to liabilities to third parties.***

Our computer infrastructure is potentially vulnerable to physical or electronic computer break-ins, viruses and similar disruptive problems and security breaches. Any such problems or security breaches could give rise to liabilities to one or more third parties, including our customers, and disrupt our operations. A party able to circumvent our security measures could misappropriate proprietary information or customer information, jeopardize the confidential nature of information we transmit over the internet or cause interruptions in our operations. Concerns over the security of internet transactions and the safeguarding of confidential personal information could also inhibit the use of our systems to conduct FX transactions over the internet. To the extent that our activities involve the storage and transmission of proprietary information and personal financial information, security breaches could expose us to a risk of financial loss, litigation and other liabilities. Our current insurance policies may not protect us against all of such losses and liabilities. Any of these events, particularly if they result in a loss of confidence in our services, could have a material adverse effect on our business, financial condition and results of operations and cash flows.

***We have relationships with referring brokers who direct new customers to us. Failure to maintain these relationships could have a material adverse effect on our business, financial condition and results of operations and cash flows.***

We have relationships with NFA-registered referring brokers who direct new customers to us and provide marketing and other services for these customers. Many of our relationships with referring brokers are non-exclusive or may be terminated by the brokers on short notice. In addition, under our agreements with referring brokers, they have no obligation to provide us with new customers or minimum levels of transaction volume. Our failure to maintain our relationships with these referring brokers, the failure of the referring brokers to provide us with customers or our failure to create new relationships with referring brokers would result in a loss of revenue, which could have a material adverse effect on our business, financial condition and results of operations and cash flows. To the extent any of our competitors offer more attractive compensation terms to one of our referring brokers, we could lose the broker's services or be required to increase the compensation we pay to retain the broker. In addition, we may agree to set the compensation for one or more referring brokers at a level where, based on the transaction volume generated by customers directed to us by such brokers, it would have been more economically attractive to seek to acquire the customers directly rather than through the referring broker. To the extent we do not enter into economically attractive relationships with referring brokers, our referring brokers terminate their relationship with us or our referring brokers fail to provide us with customers, our business, financial condition and results of operations and cash flows could be materially adversely affected.

***Our relationships with our referring brokers may also expose us to significant reputational and legal risks as we could be harmed by referring broker misconduct or errors that are difficult to detect and deter.***

Our reputation may be harmed by, or we may be liable for, improper conduct by our referring brokers, even though we do not control their activities. Referring brokers maintain customer relationships and delegate to us the responsibilities associated with FX and back-office operations. Furthermore, many of our referring

TABLE OF CONTENTS

brokers operate websites, which they use to advertise our services or direct customers to us. It is difficult for us to closely monitor the contents of their websites to ensure that the statements they make in relation to our services are accurate and comply with applicable rules and regulations. Under the current rules of the NFA, we are responsible for the activities of any party that solicits or introduces a customer to us unless such party is a member or associate of the NFA. Although all of our referring brokers are members or associates of the NFA, any disciplinary action taken against our referring brokers in the United States and abroad, could have a material adverse effect on our reputation, damage our brand name and materially adversely affect our business, financial condition and results of operations and cash flows, and, in any event, we may be subject to claims by customers and others concerning the conduct of referring brokers. In August 2010, the CFTC adopted regulations which require that referring brokers either meet the minimum net capital requirements applicable to futures and commodity options referring brokers or enter into a guarantee agreement with a CFTC-regulated FX broker, along with a requirement that such referring broker may be a party to only one guarantee agreement at a time. If the referring brokers with whom we currently do business choose to enter into a guarantee agreement, we cannot assure you that such referring brokers will choose to enter into such a guarantee agreement with us, rather than one of our competitors. We would be liable for the solicitation activity and performance of our referring brokers we guarantee. At this time, we have entered into a guarantee agreement with three referring brokers.

***We have relationships with white labels who direct customer trading volume to us. Failure to maintain these relationships or develop new white label relationships could have a material adverse effect on our business, financial condition and results of operations and cash flows.***

We have relationships with white labels which provide FX trading to their customers by using our technology platform and other services and therefore provide us with an additional source of revenue. In certain jurisdictions, we are only able to provide our services through white label relationships. Many of our relationships with white labels are non-exclusive or may be terminated by them on short notice. In addition, our white labels have no obligation to provide us with minimum levels of transaction volume. Our failure to maintain our relationships with these white labels, the failure of these white labels to continue to offer online FX trading services to their customers using our technology platform, the loss of requisite licenses by our white labels or our inability to enter into new relationships with white labels would result in a loss of revenue, which could have a material adverse effect on our business, financial condition and results of operations and cash flows. To the extent any of our competitors offer more attractive compensation terms to one or more of our white labels, we could lose the white label relationship or be required to increase the compensation we pay to retain the white label.

White labels with whom we have relationships accept customers from many jurisdictions and are therefore subject to regulations in a number of jurisdictions. If such regulations, or changes in such regulations, increase the white labels' overhead costs, including compliance costs and legal fees and expenses, limit their ability to engage or grow their business and increase their market share or result in sanctions and fines, their business, financial condition and results of operations may be adversely affected. This could reduce the volume of customer trading that such white labels direct to us, which would, in turn, adversely affect our business and results of operations. Our relationships with our white labels also may expose us to significant regulatory, reputational and other risks as we could be harmed by white label misconduct or errors that are difficult to detect and deter. If any of our white labels provided unsatisfactory service to their customers or are deemed to have failed to comply with applicable laws or regulations, our reputation may be harmed or we may be subject to claims as a result of our association with such white label. Any such harm to our reputation or liability would have a material adverse effect on our business, financial condition and results of operations and cash flows.

***Reduced spreads in foreign currencies, levels of trading activity, trading through alternative trading systems and price competition from principal model firms could harm our business.***

Computer-generated buy and sell programs and other technological advances and regulatory changes in the FX market may continue to tighten spreads on foreign currency transactions. Tighter spreads and increased competition could make the execution of trades and market-making activities less profitable. In addition, new and enhanced alternative trading systems have emerged as an option for individual and institutional investors

TABLE OF CONTENTS

to avoid directing their trades through retail FX brokers, which could result in reduced revenue derived from our FX brokerage business. We may also face price competition from our competitors. Many competing firms using a principal model can set their own prices as they generate income from trading with their customers. In contrast, the prices we provide to our customers are set by our FX market makers which vary based on market conditions.

TABLE OF CONTENTS**Risks Related to Our Organizational Structure**

***FXCM Inc.'s only material asset is its interest in FXCM Holdings, LLC, and it is accordingly dependent upon distributions from FXCM Holdings, LLC to pay taxes, make payments under the tax receivable agreement or pay dividends.***

FXCM Inc. is a holding company and has no material assets other than its ownership of Holdings Units. FXCM Inc. has no independent means of generating revenue. FXCM Inc. intends to cause FXCM Holdings, LLC to make distributions to its unitholders in an amount sufficient to cover all applicable taxes at assumed tax rates, payments under the tax receivable agreement and dividends, if any, declared by it. Deterioration in the financial condition, earnings or cash flow of FXCM Holdings, LLC and its subsidiaries for any reason could limit or impair their ability to pay such distributions. Additionally, to the extent that FXCM Inc. needs funds, and FXCM Holdings, LLC is restricted from making such distributions under applicable law or regulation or under the terms of our financing arrangements, or is otherwise unable to provide such funds, it could materially adversely affect our liquidity and financial condition.

Payments of dividends, if any, will be at the discretion of our board of directors after taking into account various factors, including our business, operating results and financial condition, current and anticipated cash needs, plans for expansion and any legal or contractual limitations on our ability to pay dividends. Any financing arrangement that we enter into in the future may include restrictive covenants that limit our ability to pay dividends. In addition, FXCM Holdings, LLC is generally prohibited under Delaware law from making a distribution to a member to the extent that, at the time of the distribution, after giving effect to the distribution, liabilities of FXCM Holdings, LLC (with certain exceptions) exceed the fair value of its assets. Subsidiaries of FXCM Holdings, LLC are generally subject to similar legal limitations on their ability to make distributions to FXCM Holdings, LLC. In addition, our regulated subsidiaries are subject to regulatory capital requirements that limit the distributions that may be made by those subsidiaries.

***FXCM Inc. is controlled by the members of FXCM Holdings, LLC, whose interests may differ from those of our public shareholders.***

As of December 31, 2012, the members of FXCM Holdings, LLC controlled approximately 57% of the combined voting power of our Class A and Class B common stock. Accordingly, the members of FXCM Holdings, LLC have the ability to elect all of the members of our board of directors, and thereby to control our management and affairs. In addition, they are able to determine the outcome of all matters requiring shareholder approval, including mergers and other material transactions, and are able to cause or prevent a change in the composition of our board of directors or a change in control of our company that could deprive our shareholders of an opportunity to receive a premium for their Class A common stock as part of a sale of our company and might ultimately affect the market price of our Class A common stock.

In addition, as of December 31, 2012, the members of FXCM Holdings, LLC owned 57% of the Holdings Units. Because they hold their ownership interest in our business through FXCM Holdings, LLC, rather than through the public company, these owners may have conflicting interests with holders of shares of our Class A common stock. For example, if FXCM Holdings, LLC makes distributions to FXCM Inc., these owners will also be entitled to receive distributions pro rata in accordance with the percentages of their respective limited liability company interests in FXCM Holdings, LLC and their preferences as to the timing and amount of any such distributions may differ from those of our public shareholders. The members of FXCM Holdings, LLC may also have different tax positions from us which could influence their decisions regarding whether and when to dispose of assets, especially in light of the existence of the tax receivable agreement that we entered into in connection with our IPO, whether and when to incur new or refinance existing indebtedness, and whether and when FXCM Inc. should terminate the tax receivable agreement and accelerate its obligations thereunder. In addition, the structuring of future transactions may take into consideration these owners' tax or other considerations even where no similar benefit would accrue to us. See "Item 13. Certain Relationships and Related Person Transactions, and Director Independence".

TABLE OF CONTENTS

***The members of FXCM Holdings, LLC could take steps so that we would qualify for exemptions from certain corporate governance requirements available to a “controlled company” within the meaning of the New York Stock Exchange rules.***

The members of FXCM Holdings, LLC control a majority of the combined voting power of all classes of our voting stock. Under the New York Stock Exchange corporate governance standards, a company of which more than 50% of the voting power for the election of directors is held by an individual, a group or another company is a “controlled company” and may elect not to comply with certain corporate governance requirements of the New York Stock Exchange, including (1) the requirement that a majority of the board of directors consist of independent directors, (2) the requirement that we have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities and (3) the requirement that we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities and that the compensation committee be required to consider certain independence factors when engaging compensation consultants, legal counsel and other committee advisors. While we do not currently intend to take advantage of the exemptions available to a “controlled company” under the New York Stock Exchange corporate governance standards, if we were to do so we would not be required to have a majority of independent directors and our compensation and corporate governance and nominating committees would not be required to consist entirely of independent directors. Accordingly, you may not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the New York Stock Exchange.

***FXCM Inc. will be required to pay the counterparties to the tax receivable agreement for certain tax benefits it may claim arising in connection with our IPO and related transactions, and the amounts it may pay could be significant.***

In connection with our IPO, we purchased Holdings Units from our pre-IPO owners, including members of our senior management. We also entered into a tax receivable agreement with our pre-IPO owners that provides for the payment by FXCM Inc. to these parties of 85% of the benefits, if any, that FXCM Inc. is deemed to realize as a result of the increases in tax basis resulting from our purchases or exchanges of Holdings Units and certain other tax benefits related to our entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement. See “Item 13. Certain Relationships and Related Transactions, and Director Independence”.

We expect that the payments that FXCM Inc. may make under the tax receivable agreement will be substantial. Assuming no material changes in the relevant tax law, and that we earn sufficient taxable income to realize all tax benefits that are subject to the tax receivable agreement, we expect future payments under the tax receivable agreement relating to the purchase by FXCM Inc. of Holdings Units as part of the IPO to aggregate \$71.7 million and to range over the next 15 years from approximately \$3.4 million to \$7.4 million per year and decline thereafter. Future payments to our pre-IPO owners in respect of 2012 exchanges are in addition to these amounts and aggregate to \$28.9 million, the amounts per year ranging from approximately \$1.0 million to \$2.7 million over the next 15 years. The foregoing numbers are merely estimates, and the actual payments could differ materially. It is possible that future transactions or events could increase or decrease the actual tax benefits realized and the corresponding tax receivable agreement payments. There may be a material negative effect on our liquidity if, as a result of timing discrepancies or otherwise, the payments under the tax receivable agreement exceed the actual benefits we realize in respect of the tax attributes subject to the tax receivable agreement and/or distributions to FXCM Inc. by FXCM Holdings, LLC are not sufficient to permit FXCM Inc. to make payments under the tax receivable agreement after it has paid taxes. The payments under the tax receivable agreement are not conditioned upon our pre-IPO owners’ continued ownership of us.

***In certain cases, payments under the tax receivable agreement may be accelerated and/or significantly exceed the actual benefits FXCM Inc. realizes in respect of the tax attributes subject to the tax receivable agreement.***

The tax receivable agreement provides that upon certain mergers, asset sales, other forms of business combinations or other changes of control, or if, at any time, FXCM Inc. elects an early termination of the tax

TABLE OF CONTENTS

receivable agreement, FXCM Inc.'s (or its successor's) obligations with respect to exchanged or acquired Holdings Units (whether exchanged or acquired before or after such transaction) would be based on certain assumptions, including that FXCM Inc. would have sufficient taxable income to fully utilize the deductions arising from the increased tax deductions and tax basis and other benefits related to entering into the tax receivable agreement. As a result, (1) FXCM Inc. could be required to make payments under the tax receivable agreement that are greater than or less than the specified percentage of the actual benefits FXCM Inc. realizes in respect of the tax attributes subject to the tax receivable agreement and (2) if FXCM Inc. elects to terminate the tax receivable agreement early, FXCM Inc. would be required to make an immediate payment equal to the present value of the anticipated future tax benefits, which upfront payment may be made years in advance of the actual realization of such future benefits. Upon a subsequent actual exchange, any additional increase in tax deductions, tax basis and other benefits in excess of the amounts assumed at the change in control will also result in payments under the tax receivable agreement. In these situations, our obligations under the tax receivable agreement could have a substantial negative impact on our liquidity. There can be no assurance that we will be able to finance our obligations under the tax receivable agreement. In addition, the present value of such anticipated future payments are discounted at a rate equal to LIBOR plus 100 basis points.

Payments under the tax receivable agreement will be based on the tax reporting positions that we determine. Although we are not aware of any issue that would cause the Internal Revenue Service to challenge a tax basis increase, FXCM Inc. will not be reimbursed for any payments previously made under the tax receivable agreement. As a result, in certain circumstances, payments could be made under the tax receivable agreement in excess of the benefits that FXCM Inc. actually realizes in respect of the increases in tax basis resulting from our purchases or exchanges of Holdings Units and certain other tax benefits related to our entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement.

***Anti-takeover provisions in our charter documents and Delaware law might discourage or delay acquisition attempts for us that you might consider favorable.***

Our certificate of incorporation and bylaws will contain provisions that may make the acquisition of our company more difficult without the approval of our board of directors. Among other things, these provisions:

- authorize the issuance of undesignated preferred stock, the terms of which may be established and the shares of which may be issued without stockholder approval, and which may include super voting, special approval, dividend, or other rights or preferences superior to the rights of the holders of Class A common stock;
- prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- provide that the board of directors is expressly authorized to make, alter, or repeal our bylaws and that our stockholders may only amend our bylaws with the approval of 80% or more of all of the outstanding shares of our capital stock entitled to vote; and
- establish advance notice requirements for nominations for elections to our board or for proposing matters that can be acted upon by stockholders at stockholder meetings.

These anti-takeover provisions and other provisions under Delaware law could discourage, delay or prevent a transaction involving a change in control of our company, including actions that our stockholders may deem advantageous, or negatively affect the trading price of our Class A common stock. These provisions could also discourage proxy contests and make it more difficult for you and other stockholders to elect directors of your choosing and to cause us to take other corporate actions you desire.

**Risks Related to our Class A Common Stock**

***The market price of our Class A common stock may decline due to the large number of shares of Class A common stock eligible for exchange and future sale.***

The market price of shares of our Class A common stock could decline as a result of sales of a large number of shares of Class A common stock in the market or the perception that such sales could occur. These

TABLE OF CONTENTS

sales, or the possibility that these sales may occur, also might make it more difficult for us to sell shares of Class A common stock in the future at a time and at a price that we deem appropriate.

In addition, we and our pre-IPO owners entered into an exchange agreement under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO (subject to the terms of the exchange agreement), to exchange their Holdings Units for shares of our Class A common stock on a one-for-one basis, subject to customary conversion rate adjustments. The market price of shares of our Class A common stock could decline as a result of the exchange or the perception that an exchange could occur. These exchanges, or the possibility that these exchanges may occur, also might make it more difficult for holders of our Class A common stock to sell such stock in the future at a time and at a price that they deem appropriate.

***If securities or industry analysts stop publishing research or reports about our business, or if they downgrade their recommendations regarding our Class A common stock, our stock price and trading volume could decline.***

The trading market for our Class A common stock is influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who covers us downgrades our Class A common stock or publishes inaccurate or unfavorable research about our business, our Class A common stock price may decline. If analysts cease coverage of us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our Class A common stock price or trading volume to decline and our Class A common stock to be less liquid.

***The market price of shares of our Class A common stock may be volatile, which could cause the value of your investment to decline.***

The market price of our Class A common stock may be highly volatile and could be subject to wide fluctuations. Securities markets worldwide experience significant price and volume fluctuations. This market volatility, as well as general economic, market or political conditions, could reduce the market price of shares of our Class A common stock in spite of our operating performance. In addition, our operating results could be below the expectations of public market analysts and investors due to a number of potential factors, including variations in our quarterly operating results or dividends, if any, to stockholders, additions or departures of key management personnel, failure to meet analysts' earnings estimates, publication of research reports about our industry, litigation and government investigations, changes or proposed changes in laws or regulations or differing interpretations or enforcement thereof affecting our business, adverse market reaction to any indebtedness we may incur or securities we may issue in the future, changes in market valuations of similar companies or speculation in the press or investment community, announcements by our competitors of significant contracts, acquisitions, dispositions, strategic partnerships, joint ventures or capital commitments, adverse publicity about the industries we participate in or individual scandals, and in response the market price of shares of our Class A common stock could decrease significantly. You may be unable to resell your shares of Class A common stock at or above the price you originally paid.

In the past few years, stock markets have experienced extreme price and volume fluctuations. In the past, following periods of volatility in the overall market and the market price of a company's securities, securities class action litigation has often been instituted against public companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

***You may be diluted by the future issuance of additional Class A common stock in connection with our incentive plans, acquisitions or otherwise.***

As of December 31, 2012, we had an aggregate of more than 2.98 billion shares of Class A common stock authorized but unissued, including approximately 57.98 million shares of Class A common stock issuable upon exchange of Holdings Units. Our certificate of incorporation authorizes us to issue these shares of Class A common stock and options, rights, warrants and appreciation rights relating to Class A common stock for the consideration and on the terms and conditions established by our board of directors in its sole discretion, whether in connection with acquisitions or otherwise. We have reserved 11,295,000 shares for issuance under our 2010 Long Term Incentive Plan, including, as of December 31, 2012, 8,817,890 shares

TABLE OF CONTENTS

issuable upon the exercise of stock options that we have granted to our officers, employees and independent contractors and 85,890 shares issuable upon the exercise of stock options that we have granted to our outside directors. See “Item 11. Executive Compensation”. Any Class A common stock that we issue, including under our 2010 Long Term Incentive Plan or other equity incentive plans that we may adopt in the future, would dilute the percentage ownership held by the investors.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

Our company headquarters are located at 55 Water Street, 50<sup>th</sup> Floor, New York, NY 10041, with other U.S. offices in Plano, TX and San Francisco, CA. Outside the United States, we have offices in London, Paris, Berlin, Milan, Athens, Hong Kong, Sydney, Tel-Aviv, Chile, Beirut and Tokyo. We lease each of these facilities and do not own any real property. We believe we have adequate office space or will be able to find additional space on reasonable commercial terms to meet our projected growth rates.

**Item 3. Legal Proceedings**

In the ordinary course of business, we may from time to time be involved in litigation and claims incidental to the conduct of our business, including intellectual property claims. In addition, our business is also subject to extensive regulation, which may result in regulatory proceedings against us. We have been named in various arbitration and civil litigation cases brought by customers seeking damages for trading losses. Management has investigated these matters and believes that such cases are without merit and is defending them vigorously. However, the arbitrations and litigations are presently in various stages of the judicial process and no judgment can be made regarding the ultimate outcome of the arbitrators’ and/or court’s decisions.

In August 2011, Forex Capital Markets LLC (“US”) entered into a settlement with the NFA. The settlement terms principally pertain to US’s practice concerning the execution of price improvements in its trading execution system prior to August 2010. Under the terms of the settlement, US agreed, without admitting or denying any of the allegations to pay a fine of \$2.0 million to the NFA and to provide restitution to the affected clients.

In October 2011, US entered into a settlement with the CFTC. The settlement principally addresses allegations regarding US’s failure to monitor and maintain its trading systems prior to August 2010. Under the terms of the settlement, US agreed, without admitting or denying any of the allegations to pay a fine of \$6.0 million to the CFTC and to provide restitution to the affected clients.

We incurred costs of approximately \$16.3 million relating to these matters which are included in General and administrative in the consolidated statement of operations. Additionally, in June 2011, US entered into an agreement with certain founding members of Holdings, whereby these members reimbursed US for the amounts related to the NFA and CFTC matters, up to \$16.0 million, plus additional amounts, as approved by such founding members. Consequently, there was no impact to the Corporation’s net income as the expense was allocated to the respective founding members as permitted under the terms of Holdings LLC Agreement. Accordingly, \$16.3 million of additional capital was provided by the respective founding members.

In October, 2011, the Trustee in bankruptcy, representing three debtors, Certified, Inc., Global Bullion Trading Group, Inc., and WJS Funding, Inc., filed an adversary complaint in the United States Bankruptcy Court for the Southern District of Florida against US, ODL Securities, Inc. and ODL Securities, Ltd. (the “Defendants”). Before the Defendants filed any response, the Trustee amended the Complaint to add ODL Group Limited, FXCM Securities, LLC, FXCM Securities Limited (“FSL”), FXCM, Inc., and Holdings as Defendants. The Amended Complaint asserts claims under the Federal Bankruptcy Code to recover allegedly preferential and fraudulent transfers to the Defendants, under the Racketeer Influenced and Corrupt Organizations Act (“RICO”), 18 U.S.C § 1961 et seq., as well as the common law. The Amended Complaint seeks an unspecified amount of compensatory and punitive damages, interests, and costs. The Defendants have filed motions to dismiss the Amended Complaint in its entirety. Thereafter, the parties engaged in non-binding mediation. Ultimately a settlement was reached in the amount of \$0.7 million which was approved by the Bankruptcy Court on June 20, 2012.

TABLE OF CONTENTS

In September 2012, the FSA initiated investigations relating to the past trade execution practices of Forex Capital Markets Limited and FSL. Although we are in the process of complying with the FSA's requests, we have not been formally notified whether or not the FSA intends to take any action against us with respect to our trade execution practices.

In 2012, FXCMJ accrued \$2.6 million as an estimate to settle certain trading system matters with the JFSA. The Company expects settlement of this matter, including any administrative penalty, in the first quarter of 2013 and does not expect the ultimate settlement amount to differ materially from the amount accrued.

For the outstanding matters referenced above for which a loss is more than remote but less than likely, whether in excess of an accrued liability or where there is no accrued liability, we have estimated a range of possible loss. We believe the estimate of the aggregate range of possible loss in excess of accrued liabilities for such matters is between nil and \$6.5 million as of December 31, 2012.

In view of the inherent difficulty of predicting the outcome of litigation and claims, we cannot predict what the eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss related to each pending matter may be. Furthermore, the above-referenced matters represented in the estimated aggregate range of possible loss will change from time to time and actual results may vary significantly from the current estimate. An adverse outcome in one or more of these matters could be material to the our results of operations or cash flows for any particular reporting period.

**Item 4. Mine Safety Disclosure**

Not applicable.

[TABLE OF CONTENTS](#)**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market Information**

Our Class A common stock currently trades on New York Stock Exchange under the symbol "FXCM". The following table sets forth, for the period indicated, the high and low sales prices per share of our Class A common stock as reported by the New York Stock Exchange from December 2, 2010, the first day of trading following our initial public offering, through our fiscal year end on December 31, 2012. The initial public offering price was \$14.00 per share.

<b>Fiscal 2012</b>	<b>Low</b>	<b>High</b>
First Quarter	\$ 9.46	\$ 13.50
Second Quarter	\$ 9.58	\$ 13.42
Third Quarter	\$ 8.60	\$ 12.00
Fourth Quarter	\$ 8.96	\$ 10.39
<b>Fiscal 2011</b>	<b>Low</b>	<b>High</b>
First Quarter	\$ 11.22	\$ 14.80
Second Quarter	\$ 8.80	\$ 14.40
Third Quarter	\$ 8.13	\$ 14.30
Fourth Quarter	\$ 8.70	\$ 14.09
<b>Fiscal 2010</b>	<b>Low</b>	<b>High</b>
December 2 to December 31, 2010	\$ 12.05	\$ 15.34

Our Class B common stock is not publicly traded.

**Holders of Record**

On March 2, 2013, there was 1 holder of record of our Class A common stock and 43 holders of our Class B common stock. The number of record holders does not include persons who held our Class A common stock in nominee or "street name" accounts through brokers.

**Dividends**

We declared a quarterly dividend of \$0.06 per share on our outstanding Class A common stock during 2012. Following is a summary of dividends declared per share of Class A common stock during fiscal year 2012 (in thousands, except per share amounts):

<b>Date of Declaration</b>	<b>Dividend per share</b>	<b>Record Date</b>	<b>Payment Date</b>	<b>Total Amount</b>
March 14, 2012	\$ 0.06	April 19, 2012	April 30, 2012	\$ 1,258,598
May 9, 2012	\$ 0.06	June 19, 2012	June 29, 2012	1,420,585
August 9, 2012	\$ 0.06	September 19, 2012	October 1, 2012	2,053,736
November 8, 2012	\$ 0.06	December 19, 2012	December 31, 2012	2,081,016

The declaration, amount and payment of any future dividends on shares of Class A common stock will be at the sole discretion of our board of directors and we may reduce or discontinue entirely the payment of such dividends at any time. Our board of directors may take into account general and economic conditions, our financial condition and operating results, our available cash and current and anticipated cash needs, capital requirements, contractual, legal, tax and regulatory restrictions and implications on the payment of dividends by us to our stockholders or by our subsidiaries to us, and such other factors as our board of directors may deem relevant.

FXCM Inc. is a holding company and has no material assets other than its ownership of Holdings Units in FXCM Holdings, LLC. We intend to cause FXCM Holdings, LLC to make distributions to us in an amount sufficient to cover cash dividends, if any, declared by us. If FXCM Holdings, LLC makes such distributions to

TABLE OF CONTENTS

FXCM Inc., the other holders of Holdings Units will also be entitled to receive distributions pro rata in accordance with the percentages of their respective limited liability company interests.

Any financing arrangements that we enter into in the future may include restrictive covenants that limit our ability to pay dividends. In addition, FXCM Holdings, LLC is generally prohibited under Delaware law from making a distribution to a member to the extent that, at the time of the distribution, after giving effect to the distribution, liabilities of FXCM Holdings, LLC (with certain exceptions) exceed the fair value of its assets. Subsidiaries of FXCM Holdings, LLC are generally subject to similar legal limitations on their ability to make distributions to FXCM Holdings, LLC. In addition, our regulated subsidiaries are subject to regulatory capital requirements that limit the distributions that may be made by those subsidiaries.

The Company made distributions to the holders of Holding Units of FXCM Holdings, LLC in the amount of \$14.9 million and \$29.9 million during 2012 and 2011, respectively. Distributions to the holders of Holding Units during 2010 that were made prior to our IPO amounted to \$71.0 million. These distributions exceeded the amounts distributed to members pursuant to the tax distribution provisions of the then-effective limited liability company agreement of FXCM Holdings, LLC. We anticipate that future distributions by FXCM Holdings, LLC to FXCM Inc. and the other members of FXCM Holdings, LLC generally will not significantly exceed the amounts distributed to members pursuant to the tax distribution provisions of the amended and restated limited liability company agreement of FXCM Holdings, LLC, although future distributions may from time to time exceed such amounts.

**Purchases of Equity Securities by the Issuer**

Shares of Class A common stock repurchased by the Company during the quarter ended December 31, 2012, were as follows:

Period	Issuer Repurchases of Equity Securities			
	Total Number of Shares Purchased*	Average Price Paid per Share**	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
Month 10: October 1, 2012 to October 31, 2012	—	—	—	21,453,855.97
Month 11: November 1, 2012 to November 30, 2012	92,800	9.51	2,737,334	50,571,523.51

<b>Total</b>	<b>525,200</b>	<b>\$ 9.91</b>	<b>3,169,734</b>	<b>\$ 46,167,446.96</b>

\* As of Settlement Date

\*\* Average Price including Commission

On May 17, 2011, the Company's Board of Directors approved the repurchase of up to \$30.0 million of its Class A common stock. On October 17, 2011, the Company announced that its Board of Directors authorized a \$20.0 million increase in the size of the Company's share repurchase plan and on November 8, 2012 the Company announced that its board of directors increased its share repurchase program an additional \$30.0 million, bringing the total authorization to \$80.0 million. As of December 31, 2012 the Company had repurchased a total of 3,169,734 shares of its Class A common stock. The Company is not obligated to purchase any shares under the Repurchase Program which does not have an expiration date. All of the above repurchases were part of this program.

TABLE OF CONTENTS**OVERVIEW*****Industry Environment***

*Economic Environment* — Currency volatility in 2012 was low throughout the year. The daily JPMorgan Global FX Volatility Index was down 22% on average in 2012 compared with 2011. This reduced volatility suppressed trading volumes in both retail and institutional markets.

Volatility in the currency markets significantly impacts customer trading volumes which in turn impacts our financial performance. In general, in periods of elevated volatility customer trading volumes tend to increase, however, significant swings in market volatility can also result in increased customer trading losses, higher turnover and reduced trading volume. It is difficult to predict volatility and its effects in the FX market.

*Competitive Environment* — The retail FX trading market is highly competitive. Our competitors in the retail market can be grouped into several broad categories based on size, business model, product offerings, target customers and geographic scope of operations. These include U.S. based retail FX brokers, international multi-product trading firms, other online trading firms, and international banks and other financial institutions with significant FX operations. We expect competition to continue to remain strong for the foreseeable future.

*Regulatory Environment* — Our business and industry are highly regulated. Our operating subsidiaries are regulated in a number of jurisdictions, including the United States, the United Kingdom (where regulatory passport rights have been exercised to operate in a number of European Economic Area jurisdictions), Hong Kong, Australia and Japan.

***Business Strategy***

Since our inception, we have pursued a strategy to grow the business to reap the benefits of scale and the protection of diversified sources of revenue.

- Increase our Scale  
Goal: Operating efficiency, sustainable results, resilience across good/bad markets
  - Organic growth supplemented by selective acquisitions
  - Take advantage of market turbulence to increase share
  - Expand distribution through white labels and similar relationships
- Build a Diversified Revenue Base  
Goal: Exploit global opportunities, protection against downturns in a geography or segment
  - Establish/expand presence in best markets globally
  - Offset declines in one jurisdiction with growth from others
  - Increase institutional presence to balance our strength in retail

***Executive Summary***

In 2012, we experienced some of the lowest currency volatility in recent history, with annual averages down 22% from the year prior and the monthly average at year end 43% lower than December of last year. In fact, currency volatility has been declining steadily for many years and finished the year at levels we have not seen since mid 2007. Despite these difficult market conditions, our scale and diverse revenue base enabled us to grow revenues, active accounts modestly while making solid improvements in client equity and cash from operations. Some of our achievements in 2012 include successfully expanding our distribution by adding white label partners including two with significant potential in E\*Trade and Barclays; completing integration of three Japanese brokers to create one of the top 10 FX brokers by volume in Japan; and adding scale and diversity in our market segments by purchasing Lucid and launching FastMatch. Our retail and institutional revenue mix has moved from Institutional contributing 7% in 2011 to 15% in 2012 and would have been 25% with a full year of contributions from Lucid. We are also more diversified geographically — volumes from U.S. clients represent 11% of our total in 2012, vs. 21% in 2010. We believe this further diversification will better prepare for unfavorable market conditions, including changes in the regulatory environment.

TABLE OF CONTENTS

Our focus on growing retail customer equity was one of the reasons why we were able to maintain volume levels despite the drop in currency volatility. In addition, selective acquisitions of ODL, GCI and Foreland have added to our organic growth and contributed to our growing our client equity by more than 4x since 2008. We believe with \$1.2b in customer assets, a cumulative annual growth of 47% over the last four years, we are in an excellent position to take advantage of improved market conditions.

Looking ahead to 2013, we are optimistic that market conditions will improve and our focus on diversification should translate into higher volumes and ultimately generate better returns. If conditions slow again or adverse regulatory changes are enacted, we believe we can hold our course better than our competitors and continue to gain market share. Regulatory changes have been a constant in our market for the past 4 years and we expect this will continue in 2013. While they can present challenges in different geographies or segments, we continue to believe they present us with more opportunities than obstacles. There are a number of regulations some already enacted, some proposed and some potential, which will impact other assets classes making spot FX more attractive; or impacting other FX brokers presenting opportunities. We believe regulatory changes, market conditions and the importance of scale will continue to fuel consolidation in 2013 across all major geographies. We would expect to continue to be active but selective in making acquisitions throughout the upcoming year.

**Primary Sources of Revenues**

Most of our revenues are derived from fees charged as a markup or commission when our retail or institutional customers execute trades on our platform with our FX market makers. This revenue is primarily a function of the number of active accounts, the volume those accounts trade and the fees we earn on that volume.

*Retail Trading Revenue* — Retail trading revenue is our largest source of revenue and is primarily driven by: (i) the number of active accounts and the mix of those accounts —high volume accounts are charged a lower markup; (ii) the volume these accounts trade, which is driven by the amount of funds customers have on deposit, also referred to as customer equity, and the overall volatility of the FX market; (iii) the size of the markup we receive, which is a function of the mix of currency pairs traded, the spread we add to the prices supplied by our FX market makers and the interest differential between major currencies and the markup we receive on interest paid and received on customer positions held overnight; and (iv) retail revenues earned from CFD trading, fees earned through white label relationships, payments we receive for order flow from FX market makers and income from spread betting. For both the years ended December 31, 2012 and 2011, 27% of our retail trading revenues were derived from the activities noted in item (iv).

*Institutional Trading Revenue* — We generate revenue by executing spot FX trades on behalf of institutional customers through our institutional trading segment, FXCM Pro, enabling them to obtain optimal prices offered by our FX market makers. The counterparties to these trades are external financial institutions that hold customer account balances and settle these transactions. We receive commissions for these services without incurring credit or market risk. We also earn revenues from market making and electronic trading in the institutional FX spot and futures markets through our subsidiary Lucid. The income we earn on market making and electronic trading in FX spot and futures markets represents the spread between the bid and ask price for positions purchased and sold and the change in value of positions purchased and sold.

*Other* — We are engaged in various ancillary FX related services and joint ventures, including use of our platform and trading facilities, providing technical expertise, and earning fees from data licensing. In addition, through FXCM Securities Limited we earn commission revenues through equity and related brokerage activities.

**Primary Expenses**

*Referring Broker Fees* — Referring broker fees consist primarily of compensation paid to our referring brokers and white labels. We generally provide white labels access to our platform, systems and back-office services necessary for them to offer FX trading services to their customers. We also establish relationships with referring brokers that identify and direct potential FX trading customers to our platform. Referring brokers and white labels generally incur advertising, marketing and other expenses associated with attracting the customers they direct to our platform. Accordingly, we do not incur any incremental sales or marketing

TABLE OF CONTENTS

expense in connection with trading revenue generated by customers provided through our referring brokers and/or white labels. We do, however, pay a portion of the FX trading revenue generated by the customers of our referring brokers and/or white labels and record this under referring broker fees.

*Compensation and Benefits* Compensation and benefits expense includes employee salaries, bonuses, stock compensation awards, benefits and employer taxes. Changes in this expense are driven by fluctuations in the number of employees, increases in wages as a result of inflation or labor market conditions, changes in rates for employer taxes and other cost increases affecting benefit plans. In addition, this expense is affected by the composition of our work force. The expense associated with our bonus plans can also have a significant impact on this expense category and may vary from period to period. The Lucid acquisition resulted in \$9.4 million of deferred compensation of which \$1.7 million was recognized as expense for the year ended December 31, 2012. See “Results of Operations, Acquisitions” for additional details.

At the time of our IPO and in 2011 and 2012, we granted awards of stock options to purchase shares of our Class A common stock pursuant to the our Long-Term Incentive Plan (“LTIP”) to certain employees and independent directors. We recorded stock compensation expense of \$10.2 million and \$9.5 million for the year ended December 31, 2012 and 2011, respectively, related to these awards which is included in compensation and benefits. The LTIP also provides for other stock based awards (“Other Equity Awards”) which may be granted by our Executive Compensation Committee (the “Committee”). During the year ended December 31, 2012, we granted 945,847 of its Class A common stock as Other Equity Awards. The Other Equity Awards were fully vested at the date of the grant. Stock compensation expense of \$11.1 million for this Other Equity Awards is included in Compensation and benefits for the year ended December 31, 2012. See Note 15 to our consolidated financial statements in “Item 8. Financial Statements and Supplementary Data.”

*Advertising and Marketing* — Advertising and marketing expense consists primarily of electronic media, print and other advertising costs, as well as costs associated with our brand campaign and product promotion.

*Communications and Technology* — Communications and technology expense consists primarily of costs for network connections to our electronic trading platforms, telecommunications costs, and fees paid for access to external market data. This expense is affected primarily by the growth of electronic trading, our network/ platform capacity requirements and by changes in the number of telecommunication hubs and connections which provide our customers with direct access to our electronic trading platforms.

*Trading Costs, Prime Brokerage and Clearing Fees* — Trading costs, prime brokerage and clearing fees primarily represent fees paid to third party clearing banks and prime brokers for clearing foreign exchange spot futures currency and contract transactions, transaction fees paid to exchanges, equity options brokerage activity fees, and fees paid to third party providers for use of their platform for our market making trading business. Clearing fees primarily fluctuate based on changes in volume, rate of clearing fees charged by clearing banks and rate of fees paid to exchanges.

*General and Administrative* — We incur general and administrative costs to support our operations, including:

- *Professional fees and outside services expenses* — consisting primarily of legal, accounting and outsourcing fees;
- *Bank processing fees* — consisting of service fees charged by banks primarily related to our customer deposits and withdrawals;
- *Regulatory fees* — consisting primarily of fees from regulators overseeing our businesses which are largely tied to our overall trading revenues; and
- *Occupancy and building operations expense* — consisting primarily of costs related to leased property including rent, maintenance, real estate taxes, utilities and other related costs.

Our general and administrative expenses have increased as a result of the additional legal, accounting, insurance and other expenses associated with being a public company.

*Depreciation and Amortization* — Depreciation and amortization expense results primarily from the depreciation of long-lived assets purchased and internally developed software that has been capitalized.

**TABLE OF CONTENTS**

Amortization of purchased intangibles primarily includes amortization of intangible assets obtained through our acquisitions of ODL, FXCMJ", Foreland and Lucid.

**Income Taxes** — Our sole operating subsidiary, Holdings operates in the U.S. as a limited liability company that is treated as a partnership for U.S. federal and state income tax purposes. As result, FXCM Holdings, LLC's income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, our U.S. tax provision is solely based on the portion of Holdings' income attributable to FXCM Inc. and excludes the income attributable to other members of Holding's whose income is included in Net income attributable to non-controlling interest.. Prior to the IPO, we operated as a limited liability company that was treated as a partnership for U.S. federal income tax. As a result, our income from U.S. operations was not subject to U.S. federal income tax because the income was attributed to its members and included in the tax returns of its members.

In addition to U.S. federal and state income taxes, we are subject to Unincorporated Business Tax which is attributable to FXCM Holdings, LLC's operations apportioned to New York City. Our foreign subsidiaries are also subject to local taxes.

**Other**

**Non-Controlling Interest** — As a result of the IPO, FXCM Inc. is a holding company, and its sole material asset is a controlling membership interest in Holdings. As the sole managing member of Holdings, FXCM Inc. operates and controls all of the business and affairs of Holdings, LLC and, through FXCM Holdings, LLC and its subsidiaries, conduct our business. FXCM Inc. consolidates the financial results of Holdings and its subsidiaries, and the ownership interest of the other members of FXCM Holdings, LLC is reflected as a non-controlling interest in the consolidated financial statements of FXCM Inc. We also consolidate the financial results of Lucid in which we have a 50.1% controlling interest. The 49.9% ownership interest of the other Lucid members is reflected as a non-controlling interest in the consolidated statements of FXCM Inc.

**Segment Information**

ASC Topic 280, *Segment Reporting* — The FASB establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. Our operations relate to FX trading and related services and operate in two segments — retail and institutional, with different target markets with separate sales forces, customer support and trading platforms. For financial information regarding our segments, see Note 24 to our consolidated financial statements in "Item 8. Financial Statements and Supplementary Data".

**Common Stock Repurchase Program**

On May 17, 2011 and October 17, 2011, our board of directors approved the repurchase of \$30.0 million and \$20.0 million of its Class A common stock (the "Stock Repurchase Program"), respectively. On November 7, 2012, the Board of Directors approved a \$30.0 million increase in the Stock Repurchase Program for an aggregate of \$80.0 million. As of December 31, 2012, we had repurchased 3.2 million shares for \$33.8 million under these authorizations.

Pursuant to an agreement between the FXCM Inc. and Holdings, anytime the FXCM Inc. repurchases shares of its Class A common stock FXCM Holdings enters into an equivalent Holding Unit transaction with the FXCM Inc. Therefore, as of December 31, 2012, FXCM Holdings has repurchased 3.2 million of Holding Units from FXCM Inc. related to FXCM Inc. Class A common stock repurchases noted above.

**Credit Agreement**

In December 2011, we entered into a three year credit agreement (the "Credit Agreement") with a syndicate of financial institutions. The Credit Agreement provided for a revolving credit line of up to \$75.0 million. The credit facility is guaranteed by certain subsidiaries of ours and is secured by a pledge of all of the equity interests in certain of our domestic subsidiaries and 65% of the voting equity interests in certain

TABLE OF CONTENTS

of our foreign subsidiaries. On November 8, 2012, we entered into an amendment to the Credit Agreement (the “Amendment”). The Amendment provides us with the ability to increase the credit facility during the term of the Credit Agreement up to a maximum of \$175.0 million. Additionally, the Amendment modified certain terms of the Credit Agreement, among other things, to provide additional flexibility regarding financing and investment initiatives. Simultaneously, on November 8, 2012, we received additional commitments from a group of financial institutions, both new and existing lenders, and increased the credit facility to \$155.0 million. See “Liquidity and Capital Resources” for more information.

**RESULTS OF OPERATIONS***Acquisitions*

On June 18, 2012 (the “Acquisition Date”), we acquired a 50.1% controlling interest in Lucid, an electronic market maker and trader in the institutional foreign exchange spot and futures markets headquartered in the U.K., to expand our presence and capabilities in the institutional marketplace. As consideration, we issued a \$71.4 million, 3.5% unsecured promissory note, and 9.0 million unregistered shares of the Corporation’s Class A common stock to Lucid sellers as well as a \$15.8 million, 3.5% unsecured promissory note for all liquid assets for a total estimated purchase price of \$177.5 million. Any of the Corporation’s common shares issuable to a Lucid seller on an anniversary from closing will be restricted (the “Lucid Liquidity Restriction”) for sale until the eighth anniversary of the closing of the Acquisition if the recipient ceases to be employed by us.

The assets acquired, liabilities assumed and non-controlling interest were recorded at their estimated fair values at the Acquisition Date. This resulted in the recording of intangible assets of \$84.9 million primarily related to proprietary technology which will be amortized over a weighted average life of 4.1 years. Goodwill of \$236.5 million was recorded as the excess over the estimated fair value of the net assets acquired. In addition, the estimated fair value assigned to the Lucid Liquidity Restriction was \$9.4 million which is accounted for as deferred compensation and recognized over a 3 year term.

On October 7, 2011 and March 31, 2011, we acquired a 100% interest in Foreland (the “Foreland acquisition”) and FXCMJ (the “FXCMJ Acquisition”), respectively, two Japan based foreign exchange providers. The acquisitions were designed to increase our profile in the Japanese market and accelerate its growth in Asia, utilizing Foreland and FXCMJ’s relationships and sales force. As consideration, we provided \$37.7 million and \$15.7 million in cash, respectively.

On October 1, 2010, we acquired a 100% interest in ODL, a leading broker of FX, CFDs, spread and equity options headquartered in the U.K. (the “ODL Acquisition”). The ODL Acquisition was designed to increase our profile in the U.K. market and accelerate our growth in continental Europe, utilizing ODL’s relationships and sales force. As consideration, we provided \$2.2 million in cash and issued a 5.25% equity interest in the Company to ODL’s shareholders for a total purchase price of \$54.6 million. The acquisitions noted above resulted in a significant increase in goodwill and intangible assets in our consolidated statements of financial condition. Intangible assets acquired include non-compete agreements, retail customer relationships, institutional customer relationships, trade name and other items.

The acquisitions noted above will result in a significant increase in amortization of intangible assets in our consolidated statements of operations and comprehensive income as these intangible assets are amortized over their estimated useful lives. In addition, the acquisitions of these entities contributed to year over year revenue and operating expense fluctuations highlighted in our discussion of year over year results since we begin reporting their respective revenues and operating expenses as of the acquisition date. Therefore, a full year of their associated revenues and operating expenses are not reflected in the year in which the respective entity was acquired.

TABLE OF CONTENTS

Year Ended December 31, 2012 and 2011

The following table sets forth our consolidated statement of operations and income for the years ended December 31, 2012 and 2011:

	For the Year Ended December 31,	
	2012	2011
	(Amounts in thousands, except per share data)	
<b>Revenues</b>		
Retail trading revenue	\$ 339,685	\$ 363,774
Institutional trading revenue	62,033	28,908
Trading revenue	401,718	392,682
Interest income	3,571	3,644
Brokerage interest expense	277	329
Net interest revenue	3,294	3,315
Other income	12,303	19,581
<b>Total net revenues</b>	<b>417,315</b>	<b>415,578</b>
<b>Operating Expenses</b>		
Referring broker fees	76,585	92,832
Compensation and benefits	105,779	95,086

<b>Total operating income</b>	<b>50,227</b>	<b>69,597</b>
<b>Other Expense</b>		
Interest on borrowings	2,763	—
<b>Income before income taxes</b>	<b>47,464</b>	<b>69,597</b>
Income tax provision	8,986	10,816
<b>Net income</b>	<b>38,478</b>	<b>58,781</b>
Net income attributable to non-controlling interest in FXCM Holdings, LLC	23,131	46,045
Net income attributable to non-controlling interest in Lucid	6,389	—
<b>Net income attributable to FXCM Inc.</b>	<b>\$ 8,958</b>	<b>\$ 12,736</b>

**Highlights**

- On June 18, 2012, we consummated the acquisition of Lucid, an electronic market maker and trader in the institutional foreign exchange spot and futures markets headquartered in the U.K. Our acquisition of Lucid is intended to expand our presence and capabilities in the institutional marketplace.
- In 2012, we experienced significant growth in institutional trading with a 114.6% increase in institutional trading revenue to \$62.0 million primarily as a result of the acquisition of Lucid. Revenues from Lucid were 10.1% or \$42.2 million of our total net revenues since its acquisition.
- Total net revenues increased \$1.7 million or 0.4% to \$417.3 million for the year ended December 31, 2012 compared to the year ended December 31, 2011 as institutional trading revenues increased with the Lucid acquisition, offset by 6.6% and 37.2% decline in retail trading revenues and other income, respectively. Retail trading revenues declined as a result of lower volatility, decreased trading volume of 4.6% and a 2.1% decrease in markup to \$94 per million traded. Other

TABLE OF CONTENTS

income decreased due to the recognition of \$6.0 million in deferred revenue in 2011 resulting from the termination of an agreement to provide trade execution services to FXCMJ and the inclusion of non-recurring income of \$3.3 million attributable to the remeasurement of a liability pursuant to the tax receivable agreement to reflect our revised U.S. federal tax rate in 2011.

- Net income decreased 34.5% or \$20.3 million to \$38.5 million for the year ended December 31, 2012 versus the year ended December 31, 2011 as a result of the acquisitions of Lucid, Foreland, and FXCMJ in June 2012, October 2011 and March 2011, respectively, including higher amortization of intangibles relating to these acquisitions. Net income also decreased due to the inclusion of compensation costs of \$13.8 million in connection with the renegotiation of certain employment contracts and the Lucid acquisition, offset by lower referring broker, advertising and marketing and general and administrative costs during the year ended December 31, 2012 compared to the year ended December 31, 2011.

**Revenues**

	December 31, 2012	December 31, 2011
	(In thousands)	
<b>Revenues:</b>		
Retail trading revenue	\$ 339,685	\$ 363,774
Institutional trading revenue	62,033	28,908
Trading revenue	401,718	392,682
Interest income	3,571	3,644
Brokerage interest expense	277	329
Net interest revenue	3,294	3,315
Other income	12,303	19,581
<b>Total net revenues</b>	<b>\$ 417,315</b>	<b>\$ 415,578</b>
<b>Customer equity</b>	<b>\$ 1,190,762</b>	<b>\$ 1,046,983</b>
Tradable accounts	190,217	194,606
Active accounts	170,930	163,094
Total retail trading volume <sup>(1)</sup> (billions)	\$ 3,601	\$ 3,774
Retail trading revenue per million traded <sup>(1)</sup>	\$ 94	\$ 96
Institutional Trading Volumes <sup>(1)</sup> (billions)	\$ 1,179	\$ 1,171

(1) Volumes translated into equivalent U.S. dollars

Retail trading revenue decreased by \$24.1 million or 6.6% to \$339.7 million for the year ended December 31, 2012 compared to the year ended December 31, 2011 primarily due to the decline in retail trading volume of 4.6% resulting from lower volatility in the currency markets and the effect of that on customer volumes and a 2.1 % decrease in markup to \$94 per million resulting from a higher proportion of volume coming from higher volume retail clients trading on lower average markups. The impact of lower volatility in the currency markets was dampened by growth in customer equity. In 2012, we grew customer equity by 14% to \$1.2 billion.

Institutional trading revenue increased by \$33.1 million or 114.5% to \$62.0 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The net increase of \$33.1 million was due to the inclusion of \$42.2 million of Lucid's revenue in the year ended December 31, 2012 offset by a decline of \$9.1 million or 31.4% in revenue earned by our other institutional business. The decline of \$9.1 million in our other institutional business is attributable to a 32.0% lower markup. In 2012, despite the low volatility in currencies and a de-risking by a number of market participants, resulting in lower volumes generally in the institutional FX market, our institutional trading volume increased 1% when compared to last year. We believe this performance was due to the migration of clients from a third party platform to an in-house platform in which we passed the savings that resulted from migration to customers by lowering the customer mark-up. We believe that over time volume increases will make up for the lower markup.

TABLE OF CONTENTS

Net interest revenue remained consistent for the year ended December 31, 2012 compared to the year ended December 31, 2011.

Other income decreased by \$7.3 million or 37.2% to \$12.3 million. Other income in 2011 included the recognition of \$6.0 million in previously deferred revenue recognized upon the termination of an agreement to provide trade execution services to FXCMJ prior to our acquisition and the inclusion of non-recurring income of \$3.3 million attributable to the remeasurement of a liability pursuant to the tax receivable agreement to reflect our revised U.S. federal tax rate. When excluding these items, other income increased \$2.0 million or 19.3%. The \$2.0 million increase is attributable to \$2.4 million of account maintenance fees (these fees were \$2.5 million for the year ended December 31, 2011 and were included in Retail trading revenue) and a \$1.4 million gain from a settlement with the former owners of ODL. This was partially offset by a \$1.0 million decline in ODL's brokerage activities business and a decrease in service licensing fees of \$0.7 million.

**Expenses**

	December 31, 2012	December 31, 2011
	(In thousands)	
<b>Expenses:</b>		
Referring broker fees	\$ 76,585	\$ 92,832
Compensation and benefits	105,779	95,086
Advertising and marketing	30,860	34,897
Communication and technology	37,113	31,869
Trading costs, prime brokerage and clearing fees	16,935	8,167
General and administrative	63,043	63,077
Depreciation and amortization	36,773	20,053
<b>Total expenses</b>	<u>\$ 367,088</u>	<u>\$ 345,981</u>

Referring broker fees decreased \$16.2 million or 17.5% to \$76.6 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The decrease in referring broker fees is correlated to the decrease in indirect volume of 17.9% during the year ended December 31, 2012 compared to the year ended December 31, 2011.

Compensation and benefits expense increased \$10.7 million or 11.3% for the year ended December 31, 2012 compared to the year ended December 31, 2011. The \$10.7 million net increase in compensation and benefits is primarily due to: (i) \$12.1 million of expense related to equity based compensation issued in connection with the renegotiation of certain employment contracts; (ii) \$1.7 million associated with the amortization of the deferred compensation in relation to the Lucid acquisition and (iii) \$1.9 million due to a full year of expense in 2012 for Foreland and FXCMJ. This was partially offset by \$4.2 million of lower employee bonus expense and \$1.5 million of additional compensation that was capitalized.

Advertising and marketing expense decreased \$4.0 million or 11.6% to \$30.9 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The decrease is partly due to the decline in advertising costs associated with the sponsorship of a FX television show and a trading contest on the CNBC television network in 2011. Advertising and marketing costs have also decreased in line with our cost reduction strategies.

Communication and technology expense increased \$5.2 million or 16.5% to \$37.1 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The \$5.2 million net increase is primarily attributable to (i) \$1.3 million due to a full year of expense in 2012 for Foreland and FXCMJ; (ii) \$0.6 million due to the inclusion of Lucid's expenses and (iii) \$3.0 million of additional expense relating to database infrastructure upgrade and support services.

Trading costs, prime brokerage and clearing fees increased \$8.8 million or 107.4% to \$16.9 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The inclusion of Lucid in the results for the year ended December 31, 2012 amounted to \$11.1 million which was offset by renegotiated lower prime brokerage fees and the migration of transactions to lower cost providers. In connection with the Lucid acquisition, we began reporting Trading costs, prime brokerage and clearing fees separately since these

TABLE OF CONTENTS

costs are a significant component of Lucid's costs base. In prior periods, Trading costs, prime brokerage and clearing fees were not material and were reported as a component of General and administrative expense. The decrease in General and administrative expense was 0.1% to \$63.0 million during the year ended December 31, 2012 compared to the year ended December 31, 2011.

General and administrative expense in 2011 included a \$16.3 million expense relating to our settlement with the CFTC and the NFA regarding trade execution activities. In addition, general and administrative expenses in 2011 included \$4.4 of costs relating to the relocation of our corporate headquarters. When excluding these charges, general and administrative expense increased \$12.4 million or 24.4%. The \$12.4 million increase is primarily attributable to (i) \$2.8 million due to a full year of expense in 2012 for Foreland and FXCMJ; (ii) \$1.4 million of one-time costs incurred in 2012 related to the relocation of FXCMJ's operations and system redundancy; (iii) \$2.4 million expense resulting from a system error while integrating FXCMJ's platform; (iv) \$2.6 million of expense related to a reserve established to settle certain trading system matters with the JFSA regarding trade execution activities (v) \$1.2 million expense related to an extraordinary levy by the U.K. FSA on all of its members; and (vi) \$3.0 million in increased professional fees relating our acquisition of Lucid and higher accounting and auditing fees.

Depreciation and amortization expense increased \$16.7 million or 83.4% to \$36.8 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The \$16.7 increase is primarily attributable to \$11.4 of expense due to the amortization of intangibles related to the Lucid acquisition, \$1.6 million of the increase due to a full year of expense for FXCMJ's and Foreland's and \$3.6 million due to higher capitalized software amortization.

**Non-Operating Expenses**

	December 31, 2012	December 31, 2011
	(In thousands)	
Interest on borrowing	\$ 2,763	—

Interest on borrowing of \$2.8 million for the year ended December 31, 2012 consists of \$1.2 million related to the Credit Agreement and \$1.6 million related to the notes issued in connection with Lucid Acquisition. We did not incur interest expense in 2011 because we had no outstanding borrowings.

**Income Taxes**

	December 31, 2012	December 31, 2011
	(In thousands, except percentages)	
Income before income taxes	\$ 47,464	\$ 69,597
Income tax provision	\$ 8,986	\$ 10,816
Effective tax rate	18.9%	15.5%

Our income tax provision decreased \$1.8 million or 16.9% to \$9.0 million for the year ended December 31, 2012 compared to the same period in 2011. Our effective rate increased to 18.9% for the year ended December 31, 2012 from 15.5% for the year ended December 31, 2011.

Our effective tax rate is lower than the U.S. federal statutory rate because it includes a rate benefit attributable to the fact that our operating subsidiary, Holdings is as a limited liability company that is treated as a partnership for U.S. federal and state income tax purposes. As result, Holdings income from its U.S. operations is not subject to U.S. federal and state income tax because the income is attributable to its members. Accordingly, our U.S. tax provision is solely based on the portion of Holdings' income attributable to us and excludes the income attributable to other members of Holdings whose income is included in Net income attributable to non-controlling interest.

The increase in the effective tax rate for the year ended December 31, 2012 compared to the year ended December 31, 2011 was primarily due to an increase in our ownership in Holdings. The increase in our ownership in Holdings is due to members of Holdings exchanging their membership units for our Class A common stock. Our effective tax rate will continue to increase as additional exchanges occur. The effect of Holdings member unit exchanges is partially offset by our Class A Common Stock repurchases. Anytime we

TABLE OF CONTENTS

repurchase shares of our Class A common stock, Holdings enters into an equivalent Holdings membership unit transaction with us. The effect of these repurchases decreases our ownership in Holdings. Please refer to Note 4 to our consolidated audited financial statements in "Item 8. Financial Statements and Supplementary Data" for further information. Our effective tax rate also increased because we earned a higher portion of income from our subsidiaries (primarily Lucid) taxed locally as corporations in their respective foreign jurisdictions somewhat offset by a lower statutory rate in effect in the U.K. in 2012 when compared to 2011. In addition, our effective rate for the year ended December 31, 2011 reflects the release of valuation allowance relating to FXCMJ tax loss carryforwards.

*Years Ended December 31, 2011 and 2010*

The following table sets forth our consolidated statement of operations and comprehensive income for the years ended December 31, 2011 and 2010:

**Highlights**

- The year ended December 31, 2011 experienced strong growth in customer balances with a 63.3% increase in customer equity to \$1.0 billion and a 19.5% increase in active accounts to approximately 163,094 compared to 2010.
- Total revenue increased 15.4% to \$415.9 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. This increase was due primarily to increases in retail revenue and other income. Retail trading revenue increased 14.2% due primarily to retail trading volumes increasing by 18.7% for the year ended December 31, 2011 versus the year ended December 31, 2010, partially offset by 4% decrease in markup to \$96 per million traded. Other income increased by \$8.0 million or 68.8% to \$19.6 million due primarily to \$5.5 million increase in revenues from ODL's equity option brokerage activities and the inclusion of non-recurring income of \$3.3 million attributable to the remeasurement of the tax receivable liability to reflect the Company's revised U.S. federal tax rate.

TABLE OF CONTENTS

- Net income decreased 41.3% to \$58.8 million for the year ended December 31, 2011 compared to the year ended December 31, 2010 as a result of higher expenses resulting from the acquisitions of Foreland, FXCMJ and ODL in October 2011, March 2011 and October 2010, respectively, including higher amortization of intangibles relating to these acquisitions. Net income also decreased as a result of \$16.3 million of expenses relating to a settlement with the NFA and CFTC regarding trade execution activities.
- On October 7, 2011 and March 31, 2011, respectively, we completed the acquisitions of the retail FX businesses of Foreland and FXCMJ. Our acquisitions of the retail FX business of Foreland and FXCMJ are intended to increase our profile and accelerate our growth in the Japanese market utilizing their relationships and sales force.

**Revenues**

	December 31, 2011	December 31, 2010
	(In thousands)	
<b>Revenues:</b>

Interest income	3,644	2,373
Other income	19,581	11,599
<b>Total revenues</b>	<b>415,907</b>	<b>360,227</b>
Customer equity	\$ 1,046,983	\$ 641,152
Tradable accounts	194,606	175,240
Active accounts	163,094	136,427
Total retail trading volume <sup>(1)</sup> (billions)	\$ 3,774	\$ 3,178
Retail trading revenue per million traded <sup>(1)</sup>	\$ 96	\$ 100

(1) Volumes translated into equivalent U.S. dollars

Retail trading revenue increased by \$45.3 million or 14.2% to \$363.8 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. This increase was due primarily to retail trading volumes increasing 18.7% as a result of organic growth and the acquisitions of ODL in the fourth quarter of 2010 and, FXCMJ and Foreland in 2011, partially offset by a 4.0% decrease in markup to \$96 per million traded. Our retail markup is influenced by a number of factors but tends to be negatively impacted by lower volatilities in the currency markets. During the year ended December 31, 2011, currency volatilities were lower than the year ended December 31, 2010 on average, the latter period including a very volatile May 2010 where Euro zone troubles were of particular focus.

Institutional trading revenue increased by \$1.1 million or 3.9% to \$28.9 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. While institutional trading volume increased 55.7% for the years ended December 31, 2011 compared to the year ended December 31, 2010, our markup or institutional trading revenue per million traded declined 32.4%. This reflects in part FXCM's transition of a portion of its institutional business from a third party platform to an in-house platform and reducing its price per million to gain market share and increase volume.

Interest income increased by \$1.3 million or 53.6% to \$3.6 million for the year ended December 31, 2011 compared to year ended December 31, 2010. The increase was primarily due to higher cash balances which increased by 47.6% at December 31, 2011 versus December 31, 2010.

Other income increased 68.8% to \$19.6 million for the year ended December 31, 2011 compared to the year ended December 31, 2010, due primarily to \$5.5 million increase in revenues from ODL's equity broker-dealer business and the inclusion of non-recurring income of \$3.3 million attributable to the change in tax rate in 2011 attributable to the remeasurement of the tax receivable liability to reflect the Company's revised U.S. federal tax rate.

TABLE OF CONTENTS*Expenses*

	December 31, 2011	December 31, 2010
	(In thousands)	
<b>Expenses:</b>		
Referring broker fees	\$ 92,832	\$ 81,365
Compensation and benefits	95,086	76,195
Advertising and marketing	34,897	23,788
Communications and technology	31,869	27,120
General and administrative	71,244	38,077
Depreciation and amortization	20,053	9,306
Interest expense	329	116
<b>Total expenses</b>	<b>\$ 346,310</b>	<b>\$ 255,967</b>

Referring broker fees increased \$11.5 million or 14.1% to \$92.8 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. The change was due primarily to a higher proportion of the Company's volume derived from indirect sources and the inclusion of Foreland, FXCMJ and ODL in the Company's results. Indirect volume increased 20.0% for the year ended December 31, 2011 as compared to the year ended December 31, 2010 due primarily to a higher proportion of trading volume in the year ended December 31, 2011 being derived from Asia, where the Company typically has more referring broker relationships than other regions. In addition, ODL, FXCMJ and Foreland which were acquired in October 1, 2010, March 31, 2011 and October 7, 2011, respectively, added \$5.6 million in referring broker fees in the year ended December 31, 2011 as compared to the year ended December 31, 2010.

Compensation and benefits expense increased \$18.9 million or 24.8% to \$95.1 million for the year ended December 31, 2011 compared to the same period in 2010. The change was due primarily to \$9.5 million in stock compensation expense resulting from stock options awards granted at the time of the IPO in December 2010 and in August of 2011 and \$9.9 million of compensation expense from Foreland, FXCMJ and ODL which were acquired in October 2010 and March 31, 2011, respectively.

Advertising and marketing expense increased \$11.1 million or 46.7% to \$34.9 million for the year ended December 31, 2011 compared to the same period in 2010. The Company has been increasing spending of advertising and marketing to further growth, including initiating sponsorships of a FX television show and a trading contest that commenced in the first and third quarters of 2011, respectively, on the CNBC television network in the first quarter of 2011.

Communications and technology expense increased \$4.7 million or 17.5% to \$31.9 million for the year ended December 31, 2011, compared to the same period in 2010. \$4.5 million of the increase is due to the acquisition of Foreland, FXCMJ and ODL offset by a slight decrease in communication and technology expense relating to our institutional trading business for the year ended December 31, 2011.

General and administrative expense, including Trading costs, prime brokerage and clearing fees, increased \$33.2 million or 87.1% to \$71.2 million for the year ended December 31, 2011 compared to the same period in 2010. \$16.3 million of the increase was due to costs related to a settlement with the NFA and CFTC relating to trade execution activities, \$11.3 million due to the inclusion of Foreland, FXCMJ and ODL in the results of the year ended December 31, 2011, \$4.4 million increased occupancy costs relating to the Company's relocation of its corporate headquarters, and \$2.2 million in higher professional fees associated with being a public company.

Depreciation and amortization expense rose \$10.7 million or 115.5% to \$20.1 million during the year ended December 31, 2011 compared to the same period in 2010. Of this amount, \$4.5 million was increased amortization due to the amortization of intangibles acquired in the ODL and FXCMJ purchases, \$1.5 million due to the inclusion of depreciation related to Foreland, FXCMJ and ODL in the Company's results in the year ended December 31, 2011 following the acquisition of Foreland, FXCMJ and ODL on October 1, 2010 and March 31, 2011, respectively. The remainder is higher depreciation and amortization expense resulting from higher office, communication, computer equipment and software.

TABLE OF CONTENTS**Income Taxes**

	December 31, 2011	December 31, 2010
	(In thousands, except percentages)	
Income before income taxes	\$ 69,597	\$ 104,310
Income tax provision	\$ 10,816	\$ 4,149
Effective tax rate	15.5%	4.0%

Income tax provision increased \$6.7 million or 160.7% to \$10.8 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. While income before taxes decreased 33.3%, our effective tax rate increased from 4.0% to 15.5% due to a shift in 2011 from taxation as primarily a partnership for U.S. income purposes to a portion, FXCM Inc., being taxed as a corporation for U.S. tax purposes at a substantially higher tax rate. Additionally, trading activity moved from the U.S. to the U.K., increasing the level of business activity in the U.K. and the provision for income taxes in the U.K. Since a majority of our business is still in partnership form in 2011, a shift in business to the U.K with a 26% statutory rate in 2011 from the U.S. resulted in an increase in our effective tax rate.

**Segment Results***Years Ended December 31, 2012, 2011 and 2010*

**Retail trading** — Retail Trading is our largest segment and consists of providing FX trading and related services to approximately 170,930 active retail customers globally as of December 31, 2012.

Revenues, operating expenses and income before income taxes of the Retail Trading segment for the years ended December 31, 2012 and 2011 are as follows:

	December 31, 2012	December 31, 2011
	(In thousands)	
Revenues	\$ 355,282	\$ 383,356
Operating and other expenses	218,018	218,534
Income before income taxes	<u>\$ 137,264</u>	<u>\$ 164,822</u>

Revenues from Retail Trading segment decreased \$28.1 million or 7.3% to \$355.3 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. Retail trading revenue decreased by \$24.1 million or 6.6% to \$339.7 million for the year ended December 31, 2012 compared to the year ended December 31, 2011 primarily due to the decline in retail trading volume of 4.6% resulting from lower volatility in the currency markets and the effect of that on customer volumes and a 2.1% decrease in markup to \$94 per million resulting from a higher proportion of volume coming from retail clients trading with lower average markups. The impact of lower volatility in the currency markets was dampened by growth in customer equity. In 2012, we grew customer equity by 14% to \$1.2 billion.

Operating expense decreased \$0.5 million or 0.2% to \$218.0 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. Operating expense decreased as a result of (i) lower referring broker fees of \$16.0 million or 17.6% in 2012 compared to 2011 which correlates to the decrease in indirect volume of 18.4%; (ii) higher compensation costs of \$10.0 million primarily due to \$12.7 million of expense associated with equity based compensation issued in connection with the renegotiation of certain employment contracts and \$1.9 million resulting from the inclusion of a full year of compensation and benefits expenses in 2012 for Foreland and FXCMJ compared to partial year expenses recorded during 2011 following their acquisitions in October 2011 and March 2011, respectively, partially offset by lower bonus expense in 2012; (iii) lower advertising and marketing costs of \$4.0 million due in part to the decline in advertising costs associated with the sponsorship of a FX television show and a trading contest on the CNBC television network in 2011 and decreased costs in line with the Company's cost reduction strategies; (iv) higher general and administrative expense of \$5.0 million primarily due to a loss resulting from a system integration error in Tokyo and a reserve established to settle certain trading system matters with the JFSA regarding trading execution activities; and (v) \$4.1 million of higher depreciation and amortization expenses primarily due to increased expense resulting from higher capitalized software.

TABLE OF CONTENTS

Revenues, operating expenses and income before income taxes of the Retail Trading segment for the years ended December 31, 2011 and 2010 are as follows:

	December 31, 2011	December 31, 2010
	(In thousands)	
Revenues	\$ 383,356	\$ 332,328
Operating and other expenses	218,534	167,725
Income before income taxes	<u>\$ 164,822</u>	<u>\$ 164,603</u>

Revenues for the Retail Trading segment increased \$51.2 million or 15.4% for the year ended December 31, 2011, compared to the year ended December 31, 2010. The increase is a result of retail customer trading volume increased 18.7% to \$3,774 billion, partially offset by the markup for retail trading revenue per million traded decreasing 4.0% from \$100 to \$96, increased revenue from a full year of ODL's business and the inclusion of Foreland and FXCMJ's revenues in the year ended December 31, 2011.

Operating expenses increased \$53.2 million or 31.7% to \$221.0 million for the year ended December 31, 2011, compared to the year ended December 31, 2010. The increase was due primarily to \$11.4 million or 14.2% higher referring broker fees, \$14.1 million or 34.2% in higher compensation and benefits expense, \$10.7 million or 115.5% higher depreciation and amortization expense, \$11.1 million or 46.8% in higher advertising and marketing expense and \$6.1 million or 65.7% of higher bank processing and regulatory fees. The increase in referring broker expense was due primarily to a higher proportion of the Company's volume derived from indirect sources and the inclusion of Foreland, FXCMJ and ODL in the Company's results. The increase in compensation and benefits expense was due primarily to stock compensation expense resulting from stock options awards granted at the time of the IPO in December 2010 and the inclusion of ODL's and FXCMJ's compensation and benefit expenses in the Company's result for the year ended December 31, 2011 compared to the year ended December 31, 2010. The increase in depreciation and amortization expense was due primarily to the amortization of intangibles acquired in the Foreland, FXCMJ and ODL purchases and the inclusion of Foreland's, FXCMJ's and ODL's depreciation and amortization expenses in the Company's results in the year ended December 31, 2011 following the acquisitions of Foreland, FXCMJ and ODL in October 2010 and March 2011, respectively. The Company had been increasing spending of advertising and marketing to further growth, including initiating a sponsorship of a FX television show on the CNBC television network in the first quarter of 2011. The increase in general and administrative expense fees was primarily due to the inclusion of Foreland, FXCMJ and ODL in the Company's results for the year ended December 31, 2011 compared to the year ended December 31, 2010 and higher prime brokerage fees.

*Institutional Trading* — Our Institutional Trading segment facilitates spot foreign currency trades on behalf of institutional customers, market making and electronic trading in the institutional foreign exchange spot and futures markets. The facilitation of spot foreign enables them to obtain optimal prices offered by our FX market makers. The counterparties to these trades are external financial institutions that hold customers account balances and settle these transactions. We receive commissions for these services without incurring credit or market risk.

Revenues, operating expenses and income before income taxes of the Institutional Trading segment for the years ended December 31, 2012 and 2011 are as follows:

	December 31, 2012	December 31, 2011
	(In thousands)	
Revenues	\$ 62,033	\$ 28,908
Operating and other expenses	45,164	20,784
Income before income taxes	<u>\$ 16,869</u>	<u>\$ 8,124</u>

Revenues for our Institutional Trading segment increased \$33.1 million or 114.6% to \$62.0 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The net increase of \$32.1 million was due to the inclusion of \$42.2 million of Lucid's revenue in the year ended December 31, 2012 offset by a decline of \$9.0 million or 31.4% in revenue earned by the our other institutional business. The decline of \$9.0 million in our other institutional business is attributable to a 32.0% lower markup. In

TABLE OF CONTENTS

2012, despite the low volatility in currencies and a de-risking by a number of market participants, resulting in lower volumes generally in the institutional FX market, our institutional trading volume was increased 1% when compared to last year. We believe this performance was due to our migration of clients from a third party to an in-house platform in which we passed the savings that resulted from migration to customers by lowering the customer mark-up. We believe that over time volume increases will make up for the lower markup.

Operating and other expenses decreased \$24.4 million or 117.3% to \$45.2 million for the year ended December 31, 2012, compared to the year ended December 31, 2011. The change is due primarily to (i) the acquisition of Lucid which added \$12.5 million in operating expenses and \$11.3 million in amortization of intangibles in 2012; (ii) additional compensation of \$2.0 million due to the addition of a voice broker division; (iii) \$1.1 million in higher depreciation from a new options trading platform placed in service in December 2011; and (iv) acquisition related interest expense of \$1.5 million. These increases were offset by \$2.0 million of lower communication and technology expense due to the migration of new clients to in-house trading platform and lower trading costs of \$2.0 million due to more favorably negotiated prime brokerage expenses.

Revenues, operating expenses and income before income taxes of the Institutional Trading segment for the years ended December 31, 2011 and 2010 are as follows:

	December 31, 2011	December 31, 2010
	(In thousands)	
Revenues	\$ 28,908	\$ 27,833
Operating expenses	20,784	18,931
Income before income taxes	<u>\$ 8,124</u>	<u>\$ 8,902</u>

Revenues for our Institutional Trading segment increased \$1.1 million or 3.9% to \$28.9 million for the year ended December 31, 2011 compared to the year ended December 31, 2010. While institutional trading volume increased 55.9% for the year ended December 31, 2011 compared to the year ended December 31, 2010 our markup on institutional trading revenue per million traded declined 32.4%. This reflects in part FXCM's transition of a portion of its institutional business from a third party platform to an in-house platform and reducing its price per million to gain market share and increase volumes.

Operating expenses decreased \$4.2 million or 22.0% to \$14.8 million for the year ended December 31, 2011, compared to the year ended December 31, 2010. The change is due primarily to \$1.5 million in higher compensation and benefits expense resulting from stock options awards granted at the time of the IPO in December 2010 and higher benefit costs, offset by \$3.8 million of lower communication and technology expense, due to a non-recurring lump sum settlement of a disputed amount in the prior year to a third party provider of the platform used by the institutional segment to provide trading services.

*Corporate* — Loss before income taxes of the Corporate segment for the years ended December 31, 2012 and 2011 are as follows:

	December 31, 2012	December 31, 2011
	(In thousands)	
Revenues	\$ —	\$ 3,314
Operating expenses	106,669	106,663
Loss before income taxes	<u>\$ (106,669)</u>	<u>\$ (103,349)</u>

Loss before income taxes increased \$3.3 million or 3.2% to \$106.7 million for the year ended December 31, 2012 compared to the year ended December 31, 2011. The increase is attributable to the inclusion of \$3.3 million of non-recurring income in 2011 related to a tax receivable liability to reflect our revised U.S. federal tax rate. Operating expenses primarily consists of general and administrative, communication and technology, rent and compensation and benefits expenses. For the year ended December 31, 2012, general and administrative expenses decreased \$5.5 million, rent expense decreased \$1.0 million and salary expense decreased \$1.2 compared to the year ended December 31, 2011. These decreases were offset by communication and technology costs increases of \$6.7 million primarily as a result

TABLE OF CONTENTS

additional expense relating to database infrastructure upgrade and support services for the year ended December 31, 2012 compared to the year ended December 31, 2011.

As noted above, general and administrative expense component of operating expense decreased \$5.5 million to \$44.4 million during the year ended December 31, 2012 compared to the year ended December 31, 2011. General and administrative expense in 2011 included a \$16.3 million expense relating to our settlement with the CFTC and the NFA regarding trade execution activities. In addition, operating expense in 2011 included \$4.4 million of costs relating to the relocation of our corporate headquarters. When excluding these charges, operating expense increased \$15.2 million. The \$15.2 million increase is primarily attributable to (i) \$2.8 million due to a full year of expense in 2012 for Foreland and FXCMJ; (ii) \$1.4 million of one-time costs incurred in 2012 related to the relocation of FXCMJ's operations and system redundancy; (iii) \$2.4 million expense resulting from a system error while integrating FXCMJ's platform; (iv) \$2.6 million of expense relating to the settlement with the JFSA regarding trade executive activities; (v) \$1.2 million expense related to an extraordinary levy by the U.K. FSA on all of its members; and (vi) \$3.0 million in increased professional fees relating our acquisition of Lucid and higher accounting and auditing fees.

Loss before income taxes of the Corporate segment for the years ended December 31, 2011 and 2010 are as follows:

	<b>December 31, 2011</b>	<b>December 31, 2010</b>
	(In thousands)	
Revenues	3,314	\$ —
Operating expenses	<u>\$ 106,663</u>	<u>\$ 69,195</u>
Loss before income taxes	<u>\$ (103,349)</u>	<u>\$ (69,195)</u>

Loss before income taxes increased \$38.0 million or 54.8% to \$107.3 million for the year ended December 31, 2011, compared to the year ended December 31, 2010. \$22.1 million of increased general and administrative cost which includes a \$16.3 million regulatory settlement reserve, higher compensation cost of \$3.3 million resulting from the inclusion of ODL and stock compensation awards, and \$8.5 million in higher Communication and Technology. \$4.4 million in increased rent and occupancy expense were the result of additional branch office openings in Europe, the relocation of our Hong Kong office and increased space in New York, and \$2.3 million was due to an increase in legal and accounting fees. These increases were offset by the inclusion of non-recurring income of \$3.3 million attributable to the remeasurement of the tax receivable liability to reflect the Company's revised U.S. federal tax rate.

[TABLE OF CONTENTS](#)**LIQUIDITY AND CAPITAL RESOURCES**

We finance, and plan to continue to finance, our operating liquidity and capital needs with funds generated from our operations. In addition, we may choose to rely on our Credit Agreement to assist us with managing our operating liquidity and capital needs subject to the terms of the Credit Agreement. As of December 31, 2012, we had cash and cash equivalents of \$272.3 million and available borrowing capacity under the Credit Agreement of \$70.0 million. We primarily invest our cash and cash equivalents in short-term demand deposits at various financial institutions. In general, we believe all our deposits are with institutions of high credit quality and we have sufficient liquidity to conduct the operations of our businesses.

As a holding company, almost all of the funds generated from our operations are earned by our operating subsidiaries. We access these funds through receipt of dividends from our subsidiaries. Some of our subsidiaries are subject to requirements of various regulatory bodies relating to liquidity and capital standards, which may limit the funds available for the payment of dividends to us. In addition, while we currently do not intend nor foresee a need to repatriate funds deemed to be permanently reinvested in certain foreign subsidiaries, the election to do so in the future could increase our effective tax rate. At December 31, 2012, approximately 27% of our cash and cash equivalents was held in these respective foreign subsidiaries.

	As of December 31, 2012			
	Regulatory Jurisdiction	Minimum Regulatory Capital Requirements	Capital Levels Maintained	Excess Net Capital
		(In thousands)

We filed a shelf registration statement on Form S-3 with the SEC on October 4, 2012. The shelf registration statement provides us with the ability to offer, from time to time and subject to market conditions, debt securities, preferred stock, common stock, depositary shares, purchase contracts warrants or units for proceeds in the aggregate amount of up to \$125.0 million. The shelf registration statement is intended to give us greater flexibility to efficiently raise capital and put us in a position to take advantage of favorable market conditions as they arise.

**Cash Flow and Capital Expenditures**

*Years Ended December 31, 2012 and 2011*

The following table sets forth a summary of our cash flow for the years ended December 31, 2012 and December 31, 2011:

	December 31, 2012	December 31, 2011
(In thousands)		
Cash provided by operating activities	\$ 102,134	\$ 83,949
Cash used for investing activities	(67,952)	(45,603)
Cash used for financing activities	56,364	(44,052)
Effect of foreign currency exchange rate changes on cash and cash equivalents	(2,935)	(2,903)
<b>Net increase (decrease) in cash and cash equivalents</b>	<b>87,611</b>	<b>(8,609)</b>
<b>Cash and cash equivalents – end of year</b>	<b>\$ 272,332</b>	<b>\$ 184,721</b>

TABLE OF CONTENTS*Operating Activities*

Details of cash provided by operating activities are as follows, with amounts in thousands:

	<u>Years Ended December 31,</u>	
	<u>2012</u>	<u>2011</u>
EBITDA <sup>(1)</sup>	\$ 87,000	\$ 89,650
Non-cash equity-based compensation	22,979	9,535
Net interest payments	(2,334)	—
Net income tax payments	(12,617)	(4,117)
All other, net, including net current assets and liabilities	7,106	(11,119)
	<u>\$ 102,134</u>	<u>\$ 83,949</u>

(1) (See Non-GAAP Financial Measures)

Despite the decline in net income, cash provided by operating activities increased \$18.2 million to \$102.1 million in 2012 when compared to 2011. The increase was primarily related to positive cash flow from current year operations and the cash receipts of \$8.5 million related to prior year account receivables. The increase in positive cash flow from current year operations is primarily attributable to the cash flow generated by Lucid and the timing of payments related to accounts payable and accrued expenses somewhat offset by increased income tax payments of \$8.5 million and interest payments of \$2.3 million.

*Investing Activities*

Details in cash used in investing activities are as follows, with amounts in thousands:

	<u>Years Ended December 31,</u>	
	<u>2012</u>	<u>2011</u>
Capital expenditures	\$ (27,263)	\$ (30,041)
Acquisition, net of cash received	(36,555)	(12,787)
Payment for equity investments	(4,000)	(1,319)
Other	(134)	(1,456)
	<u>\$ (67,952)</u>	<u>\$ (45,603)</u>

Cash used in investing activities increased by \$22.3 million to \$68.0 million in 2012 principally due to the cash used in the acquisition of Lucid and our \$4.0 million investment in FastMatch, partially offset by a decrease in capital expenditures. Capital expenditures in 2012 included \$14.0 million of capitalized software, \$7.4 million of leasehold improvements in connection with our relocation of our corporate headquarter and \$5.9 million of computer equipment.

Details in cash provided by (used in) financing activities are as follows, with amounts in thousands:

	<u>Years Ended December 31,</u>	
	<u>2012</u>	<u>2011</u>
Distributions to members	\$ (14,926)	\$ (29,911)
Contributions from members	578	16,263
Dividend payments	(6,813)	(3,905)
Common stock repurchased	(7,475)	(26,357)
Net borrowings under the Credit Agreement	85,000	—
Other	—	(142)
	<u>\$ 56,364</u>	<u>\$ (44,052)</u>

Cash provided by financing activities in 2012 increased by \$100.4 million compared to \$44.1 million used in 2011. Distributions to non-controlling members were approximately \$14.9 million in 2012 compared to \$29.9 million in 2011. The decrease in distributions is attributable to the decrease in the non-controlling ownership of Holdings as well as the decline in our net income. As of December 31, 2012, non-controlling members owned approximately 57.5% of Holdings compared to 79.6% as of December 31, 2011. Dividends

TABLE OF CONTENTS

paid to our Class A common stockholders were \$6.8 million in 2012 compared to \$3.9 million in 2011. The increase in dividend paid to our Class A common stockholders is due to the increase in our outstanding Class A common stock. In 2012, our weighted average Class A common stock shares outstanding were 24.1 million compared to 16.6 million in 2011. In 2012, we used approximately \$7.5 million for repurchases of our Class A common stock compared to \$26.4 million in 2011. As previously mentioned, our board of directors has approved a Stock Repurchase Program aggregating \$80.0 million and through December 31, 2012, we have repurchased 3.2 million shares or \$33.8 million under this Stock Repurchase Program. The size and timing of these purchases are based on a number of factors, including price, business and market conditions. In 2012, we borrowed \$85.0 million under the Credit Agreement. The funds were primarily used to paydown the \$64.0 million of notes that were issued in connection with the Acquisition.

*Years Ended December 31, 2011 and 2010*

The following table sets forth a summary of our cash flow for the years ended December 31, 2011 and December 31, 2010:

	December 31, 2011	December 31, 2010
	(In thousands)	
Cash provided by operating activities	\$ 83,949	\$ 89,512
Cash used for investing activities	(45,603)	(9,190)
Cash used for financing activities	(44,052)	(28,835)
Effect of foreign currency exchange rate changes on cash and cash equivalents	(2,903)	1,985
<b>Net increase in cash and cash equivalents</b>	<b>(8,609)</b>	<b>53,472</b>
<b>Cash and cash equivalents – end of year</b>	<b>\$ 184,721</b>	<b>\$ 193,330</b>

Cash provided by operating activities was \$82.6 million for the year ended December 31, 2011 compared to \$89.5 million for the year ended December 31, 2010, a decrease of \$6.9 million. This decrease was due to \$41.4 million lower net income in addition to an increase of \$34.5 million in adjustments to reconcile net income to net cash provided by operating activities in the year ended December 31, 2011 compared to the year ended December 31, 2010. The increase in adjustments to reconcile net income to net cash provided by operating activities was primarily a result of an decrease in cash and cash equivalents, held for customers of \$116.3 million for the year ended December 31, 2011 compared to an increase of \$126.8 million for the year ended December 31, 2010, an increase in other assets of \$4.6 million for the year ended December 31, 2011 versus an increase of \$3.2 million for the year ended December 31, 2010, an increase of \$119.0 million in customer account liabilities for the year ended December 31, 2011 compared to an increase of \$100.6 million for the year ended December 31, 2011, a \$8.1 million increase in accounts payable and accrued expenses versus an increase of \$0.6 million for the year ended December 31, 2010 and a \$4.3 million decrease in due to brokers versus an increase of \$11.2 million for the years ended December 31, 2011 and 2010, respectively.

Cash used in investing activities was \$44.3 million for the year ended December 31, 2011 compared to \$9.2 million for the year ended December 31, 2010, an increase of \$35.0 million. The reason for the increase in cash used was \$30.0 million for the purchase of fixed assets for the year ended December 31, 2011 compared to \$8.6 million for the purchase of fixed assets for the year ended December 31, 2010, cash paid for the acquisition of FXCMJ and Foreland of \$12.8 and purchase of intangible assets in the amount of \$1.5 million.

Cash used in financing activities was \$44.1 million for the year ended December 31, 2011, compared to \$28.8 million for the year ended December 31, 2010, an increase of \$15.2 million. The decrease in cash used in financing activities was due to lower distributions to members in the year ended December 31, 2011 of \$29.9 million compared to a payout of \$70.7 million in the year ended December 31, 2010, dividend paid in amount of \$3.9 million and the repurchase of treasury stock in the amount of \$26.4 million.

Capital expenditures were \$31.5 million for the year ended December 31, 2011, compared to \$12.3 million for the year ended December 31, 2010. Capital expenditures for the year ended December 31,

TABLE OF CONTENTS

2011 relate to capitalized software of \$10.2 million, license of \$10.1 million, computer equipment of \$6.5 and leasehold improvements of \$3.8 million as a result of the New York office relocating its corporate headquarters.

***Credit Agreement***

On December 19, 2011, Holdings entered into a three year Credit Agreement with a syndicate of financial institutions. The Credit Agreement provided for a revolving credit facility of up to \$75.0 million. The credit facility is guaranteed by certain subsidiaries of Holdings and is secured by a pledge of all of the equity interests in certain of Holdings' domestic subsidiaries and 65% of the voting equity interests in certain of its foreign subsidiaries.

On November 8, 2012, the Holdings entered into an amendment to the Credit Agreement (the "Amendment"). The Amendment provides Holdings with the ability to increase the credit facility during the term of the Credit Agreement up to a maximum of \$175.0 million. Additionally, the Amendment modified certain terms of the Credit Agreement, among other things, to provide additional flexibility regarding financing and investment initiatives. Simultaneously, on November 8, 2012, Holdings received additional commitments from a group of financial institutions, both new and existing lenders, and increased the credit facility to \$155.0 million. As of December 31, 2012, Holdings' outstanding balance under the Credit Agreement was \$85.0 million.

Under the terms of the Credit Agreement, loans will bear interest at either a Eurodollar Rate or a Base rate (as defined below), at the Holdings' election, plus an applicable margin, based on Holdings' leverage ratio. In addition, the Holdings must pay an annual commitment fee based on Holdings' leverage ratio on the undrawn commitments under the Credit Agreement. The applicable margin and commitment fees are set forth in the table below:

	Commitment Fee	Applicable Margin for Eurodollar Loans	Applicable Margin for Base Rate Loans
Consolidated Leverage Ratio			
Less than .5 to 1.0	0.25%	1.75%	0.75%
Greater than or equal to 0.5 to 1.0 but less than 1.0 to 1.0	0.30%	2.00%	1.00%
Greater than or equal to 1.0 to 1.0 but less than 1.50 to 1.00	0.35%	2.25%	1.25%
Greater than or equal to 1.50 to 1.00	0.40%	2.50%	1.50%

The Base Rate means for any day a fluctuating rate per annum equal to the highest of (a) the Federal Funds Rate, as defined in the Credit Agreement, plus 0.5%, (b) the rate of interest in effect for such day as publicly announced from time to time by the administrative agent, Bank of America, N.A., as its prime rate, and (c) the Eurodollar Rate plus 1.00%. The Eurodollar Rate means the rate per annum equal to (i) the British Bankers Association LIBOR Rate, or (ii) if such rate is not available, the rate per annum determined by the administrative agent.

Interest expense related to borrowings under the Credit Agreement, including the amortization of debt financing costs was \$0.9 million and \$0.8 million for the years ended December 31, 2012 and 2011, respectively.

Pursuant to covenants in the Credit Agreement, Holdings' is required to maintain: excess net capital amount of 125% of adjusted net capital required to be maintain as of the last day of any fiscal quarter for U.S. and U.K., Consolidated Interest Coverage Ratio and Consolidated Leverage Ratio, as defined in Credit Agreement, of 4:00 to 1:00 and 2:00 to 1:00, respectively, as of the last day of any fiscal quarter and Net Unhedged Exposure, as defined Credit Agreement, of less than 20% of total assets of Holdings and its subsidiaries. In addition, the Credit Agreement contains certain customary covenants as well as certain customary events of default. As of December 31, 2012, Holdings was in compliance with all material covenants.

During the year ended December 31, 2012 and 2011, the weighted average dollar amount of borrowings related to the Credit Agreement was \$41.2 million and the weighted average interest rate was 2.1%.

TABLE OF CONTENTS**Notes Payable**

In connection with the Acquisition, we issued to the Lucid Sellers 3.5% unsecured promissory notes in the amounts of \$71.4 million and \$15.5 maturing on December 21, 2012. On December 21, 2012, in satisfaction of the matured notes we repaid the \$64.0 million in cash and issued a series of 2.25%, \$22.9 unsecured promissory notes for the balance. The notes matures on December 21, 2013.

**NON-GAAP FINANCIAL MEASURES**

Management uses certain financial measures to evaluate our operating performance, as well as the performance of individual employees, that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"). These measures should not be considered a substitute for, or superior to, measures of financial performance prepared in accordance with U.S. GAAP, and our calculations thereof may not be comparable to similarly entitled measures reported by other companies.

More specifically, we utilize results presented on an Adjusted Pro Forma basis, including Adjusted EBITDA that excludes certain items relating to the IPO of FXCM Inc. and also reflect the exchange of all units of FXCM Holdings, LLC for shares of Class A common stock of FXCM Inc. We believe that these Adjusted Pro Forma measures, when presented in conjunction with comparable U.S. GAAP measures, are useful to investors to compare our results across different periods and facilitate an understanding of our operating results. The differences between Adjusted Pro Forma and U.S. GAAP results are as follows:

1. *Assumed Exchange of Units of FXCM Holdings, LLC for FXCM Inc. Class A Shares.* As a result of the exchange of FXCM Holdings units, the non-controlling interest related to these units is converted to controlling interest. The Company's management believes that it is useful to provide the per-share effect associated with the assumed exchange of all FXCM Holdings units.
2. *Stock Based Compensation Expense.* Adjustments have been made to the Adjusted Pro Forma Earnings to eliminate expense relating to stock based compensation relating to the Company's initial public offering and compensation costs associated with the renegotiation of certain employment contracts. The Company's management believes it is useful to provide the effects of eliminating these expenses relating to these one-time items.
3. *Acquisition Costs.* Adjustments have been made to the Adjusted Pro Forma Earnings to eliminate certain acquisition related costs. The Company's management believes it is useful to provide the effects of eliminating these expenses.
4. *Regulatory Costs.* Adjustments have been made to the Adjusted Pro Forma Earnings to eliminate certain costs associated with a settlement with the Company's regulators in the United States and the estimated expense associated with reimbursement of clients regarding trading issues at the Company's Japanese subsidiary. The Company's management believes it is useful to provide the effects of eliminating these expenses of non-recurring nature.
5. *Income Taxes.* Prior to the initial public offering FXCM was organized as a series of limited liability companies and foreign corporations, and even following the initial public offering not all of the Company's income is subject to corporate-level taxes. As a result, adjustments have been made to the Adjusted Pro Forma earnings to assume that the Company has adopted a conventional corporate tax structure and is taxed as a C corporation in the U.S. at the prevailing corporate rates and the deferred tax assets related to tax benefits for equity-based compensation awards are realized when the stock options are exercised. This assumption is consistent with the assumption that all of FXCM Holdings' units are exchanged for shares of FXCM Inc. Class A common stock, as discussed in Item 1 above, as the assumed exchange would change the tax structure of the Company.

TABLE OF CONTENTS

In addition, the Company presents results on an Adjusted Pro Forma Cash basis where Adjusted Pro Forma results are adjusted for certain non-cash items. The Company believes Adjusted Pro Forma Cash presentation may be useful to investors to compare FXCM's results across several periods and facilitate an understanding of FXCM's operating results. The Company uses these measures to evaluate its operating performance, as well as the performance of individual employees. The differences between Adjusted Pro Forma Cash and Adjusted Pro Forma results are as follows:

1. *Stock Based Compensation Expense.* Additional adjustments have been made to Adjusted Pro Forma Earnings to eliminate expense relating to stock based compensation and other non-cash compensation granted subsequent to the Company's initial public offering. The Company's management believes it is useful to provide the effects of eliminating these non-cash expenses to evaluate the potential impact on the Company's cash flow.
2. *Depreciation and amortization.* Adjustments have been made to the Adjusted Pro Forma Earnings to eliminate the depreciation of fixed assets and the amortization of intangible assets. The Company's management believes it is useful to provide the effects of eliminating these non-cash expenses to evaluate the potential impact on the Company's cash flow.
3. *Income Taxes.* Adjustments have been made to the Adjusted Pro Forma Earnings to present the Company's estimate of tax expense in the next twelve months under the assumptions regarding taxes discussed in the above. The Company's management believes it is useful to provide the effects of eliminating these expenses to evaluate the potential impact on the Company's cash flow.

## TABLE OF CONTENTS

The following table reconciles our Adjusted Pro Forma results with our results presented in accordance with U.S. GAAP for the years ended December 31, 2012, 2011 and 2010.

TABLE OF CONTENTS

- 
- (1) Represents the elimination of stock-based compensation associated with the IPO, severance and stock-based compensation in connection with the renegotiation of certain employment contracts in the Company's institutional and retail businesses.
  - (2) Represents the elimination of acquisition-related costs and an accrual established to settle certain trading system matters with the Financial Services Agency of Japan.
  - (3) Represents an adjustment to reflect the assumed effective corporate tax rate of approximately 33.2%, 26.9% and 37.3% for the years ended December 31, 2012, 2011 and 2010, respectively, which includes a provision for U.S. federal income taxes and assumes the highest statutory rates apportioned to each state, local and/or foreign jurisdiction. The adjustment assumes full exchange of existing unitholders Holdings units for shares of Class A common stock of the Company.
  - (4) Represents the elimination of the non-controlling interest associated with the ownership by existing unitholders of Holdings (excluding FXCM, Inc.), as if the unitholders had fully exchanged their Holdings units for shares of Class A common stock of the Company.
  - (5) Represents the elimination of stock-based compensation granted subsequent to the IPO and of compensation costs associated with the recognition of deferred compensation in connection with the Lucid which was acquired by the Company on June 18, 2012. Pursuant to the terms of the Acquisition, the Company issued shares of FXCM Inc. Class A common stock to the Lucid sellers subject to Lucid Liquidity Restriction. The fair value of the Lucid Liquidity Restriction is accounted for as deferred compensation and recognized as expense over the three year period from closing of the acquisition.
  - (6) Represents the elimination of the depreciation of fixed assets and the amortization of intangible assets.
  - (7) Represents an adjustment to reflect the assumed effective corporate tax rate of approximately 20.7%, 29.0% and 28.5% for the years ended December 31, 2012, 2011 and 2010, respectively, which includes U.S. federal current income taxes and assumes the highest statutory rates for current income taxes apportioned to each state, local and/or foreign jurisdiction. The adjustment assumes full exchange of existing Holdings unitholders for shares of Class A common stock of the Company.
  - (8) Represents an adjustment to reflect the Lucid's non-controlling interest amortization expense related to the identified intangible assets associated with the Acquisition.
  - (9) Represents the elimination of an amount related to the remeasurement of our tax receivable liability pursuant to a tax receivable agreement. This non-recurring income is attributable to the change in our U.S. federal income tax rate.
  - (10) Represents the elimination of stock-based compensation associated with the IPO.
  - (11) Represents an adjustment to eliminate an expense relating to a settlement with the National Futures Association and ongoing discussions with the Commodity Futures Trading Commission regarding trade execution activities. Pursuant to an agreement with a subsidiary Holdings, certain founding members of Holdings agreed to reimburse the cost of these matters, up to \$16.0 million plus additional amounts as approved by such founding members. Consequently, there was no impact to FXCM Inc.'s net income for the year ended December 31, 2011 as the entire expense was allocated to such funding members. Accordingly \$16.3 million of additional capital was provided by the respective founding members.
  - (12) Represents the elimination of stock-based compensation for stock options granted subsequent to the IPO.
  - (13) Represents the elimination of stock-based compensation associated with the IPO and onetime charges in 2010 relating to certain arrangements with a former employee and our CFO as a result of the IPO
  - (14) Represents fully diluted shares assuming all unitholders had fully exchanged their Holdings units for shares of Class A common stock of the Company.

**TABLE OF CONTENTS**

The following table reconciles EBITDA and adjusted EBITDA to U.S. GAAP Net Income and Adjusted Pro Forma Net Income, as presented and reconciled in the prior table for the years ended December 31, 2012, 2011 and 2010:

	<b>For the Years Ended December 31,</b>								
	<b>(In thousands)</b>

**Contractual Obligations and Commercial Commitments**

The following tables reflect a summary of our contractual cash obligations and other commercial commitments at December 31, 2012:

	<b>As of December 31, 2012</b>				
	<b>Total</b>	<b>Less Than 1 Year</b>	<b>1 – 3 Years</b>	<b>3 – 5 Years</b>	<b>More Than 5 Years</b>
	<b>(In thousands)</b>				
<b>Lease obligations</b>	\$ 41,086	\$ 4,587	\$ 9,482	\$ 5,635	\$ 21,382
<b>Credit Agreement<sup>(1)</sup></b>	89,675	2,380	87,295	—	—
<b>Lucid Note Payable<sup>(2)</sup></b>	23,489	23,489	—	—	—
<b>Vendor obligations</b>	4,044	2,445	1,599	—	—
<b>Total</b>	<b>\$ 158,294</b>	<b>\$ 32,901</b>	<b>\$ 98,376</b>	<b>\$ 5,635</b>	<b>\$ 21,382</b>

(1) Assumes there will be no increases or decreases to the amount borrowed at December 31, 2012 and the outstanding December 31, 2012 balance will be paid upon expiration of the facility. Includes interest expense and commitment fees using the rates in effect as of December 31, 2012.

(2) Principal plus interest at the stated rate of 2.25%.

**Off-Balance Sheet Arrangements**

As of December 31, 2012, we did not have any significant off-balance sheet arrangements as defined by the regulations of the SEC.

[TABLE OF CONTENTS](#)**CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

The notes to our consolidated financial statements include disclosure of our significant accounting policies and estimates. In establishing these policies within the framework GAAP, management must make certain assessments, estimates and choices that will result in the application of these principles in a manner that appropriately reflects our financial condition and results of operations. Critical accounting policies are those policies that we believe present the most complex or subjective measurements and have the most potential to affect our financial position and operating results. While all decisions regarding accounting policies are important, there are certain accounting policies and estimates that we consider to be critical. These critical policies, which are presented in detail in the notes to our consolidated financial statements, relate to revenue recognition, cash and cash equivalents, held for customers, fair value measurements valuation and office, communication and computer equipment, business combinations, goodwill, other intangibles, derivatives and income taxes.

TABLE OF CONTENTS

A summary of our critical accounting policies and estimates follows:

***Revenue Recognition***

We make foreign currency markets for customers trading in FX spot markets and through its subsidiary FSL, engages in equity and related brokerage activities. FX transactions are recorded on the trade date and positions are marked to market daily with related gains and losses, including gains and losses on open spot transactions, recognized currently in income. Commissions earned on brokerage activities are recorded on a trade date basis and are recognized currently in income.

***Retail Trading Revenue***

Under our retail agency FX offering, trading revenue is earned by adding a markup to the price provided by FX market makers generating trading revenue based on the volume of transactions and is recorded on trade date. Under the agency model, when a customer executes a trade on the best price quotation presented by the FX market maker, we acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. This agency model has the effect of automatically hedging our positions and eliminating market risk exposure. Retail trading revenues principally represent the difference of our realized and unrealized foreign currency trading gains or losses on its positions with customers and the systematic hedge gains and losses from the trades entered into with the FX market makers. Retail trading revenue also includes fees earned from arrangements with other financial institutions to provide platform, back office and other trade execution services. This service is generally referred to as a white label arrangement. We earn a percentage of the markup charged by the financial institutions to their customers. Fees from this service are recorded when earned on a trade date basis. Additionally, we earn income from trading in CFDs, rollovers, payments for order flow, and spread betting. Income or loss on CFDs represents the difference between the our realized and unrealized trading gains or losses on its positions and the hedge gains or losses with the other financial institutions. Income or loss on CFDs is recorded on a trade date basis. Income or loss on rollovers is the interest differential customers earn or pay on overnight currency pair positions held and the markup that we receive on interest paid or received on currency pair positions held overnight. Income or loss on rollovers is recorded on a trade date basis. Income earned on order flow represents payments received from certain FX market makers in exchange for routing trade orders to these firms for execution. Our order routing software ensures that payments for order flow do not affect the routing of orders in a manner that is detrimental to its retail customers. We recognize payments for order flow as earned on a trade date basis. Spread betting is where a customer takes a position against the value of an underlying financial instrument moving either upward or downward in the market. Income on spread betting is recorded as earned on a trade date basis.

Recently, we launched an offering to some of its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, we earn revenue from: (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades we have has chosen to hedge and (ii) net gains or losses, if any, where we have hedged the customer trade.

***Institutional Trading Revenue***

Institutional trading revenue relates to commission income generated by facilitating spot FX trades on behalf of institutional customers through the services provided by the FXCM Pro division. The counterparties to these trades are external financial institutions that also hold customer account balances. We receive commission income for customers' use of FXCM Pro without taking any market or credit risk. Institutional trading revenue is recorded on a trade date basis. We also earn income from market making and electronic trading in the institutional foreign exchange spot and futures markets through its subsidiary, Lucid. Income on market making and electronic trading in foreign exchange spot and future currencies represents the spread between the bid and ask price for positions purchased and sold and the change in value of positions purchased and sold. Income on market making is recorded as trading gains, net of trading losses, on a trade date basis.

TABLE OF CONTENTS***Cash and Cash Equivalents, held for customers***

Cash and cash equivalents, held for customers represents cash held to fund customer liabilities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects us to concentration risk. We have not experienced losses in such accounts.

The balance arises primarily from cash deposited by customers and net realized gains from customer trading activity. We record a corresponding liability in connection with this amount that is included in customer account liabilities in the consolidated statements of financial condition (see Note 6). A portion of the balance is not available for general use due to legal restrictions in accordance with certain jurisdictional regulatory requirements. These legally restricted balances were \$1.0 billion and \$0.9 billion as of December 31, 2012 and 2011, respectively.

***Derivatives***

Derivative financial instruments are accounted for in accordance with ASC 815, *Derivatives and Hedging* ("ASC 815"), and are included in due to/from brokers in the consolidated statements of financial condition. The Company recognizes all derivative financial instruments in the consolidated balance sheet as either assets or liabilities at fair value. The Company enters into future contracts to (i) economically hedge the open customer contracts on its CFD business and (ii) hedge trading in its electronic market making and institutional foreign exchange spot and futures markets. Future contracts are exchanged traded contracts to either purchase or sell a specific asset at a specified future date for a specified price. Gains or losses on future contracts related to the Company's CFD business are included in Retail trading revenue and gains or losses on hedge trading in its electronic market making and institutional foreign exchange spot and futures markets are included in Institutional trading revenue in the consolidated statements of operations.

***Fair Value Measurements***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. These three levels of fair value hierarchy are defined as follows:

Level I: Quoted prices in active markets for identical assets or liabilities, accessible by the Company at the measurement date.

Level II: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level III: Unobservable inputs for assets or liabilities.

As of December 31, 2012 and 2011, substantially all of the Company's financial instruments were carried at fair value based on spot exchange rates broadly distributed in active markets, or amounts approximating fair value. Cash and cash equivalents and cash and cash equivalents, held for customers are deemed to be Level I financial assets. Open futures contracts included in Due from brokers and Due to brokers are classified as Level I financial assets and liabilities, respectively, as they are actively traded and valued at their quoted market prices. Unsettled spot currency trades included in Due from brokers and Due to brokers are classified as Level II financial assets and liabilities, respectively, and are carried at contracted amounts, which approximate fair value. Other assets, including receivables from others, are carried at contracted amounts, which approximate fair value and are classified as Level II financial assets. Other liabilities, including customer account liabilities, payables to others, credit agreement and notes payable are carried at contracted amounts, which approximates fair value and are classified as Level II financial liabilities.

The Company did not have any Level III financial assets or liabilities as of December 31, 2012 and 2011. The Company did not have any transfers in or out of Level I and II during the year ended December 31, 2012.

TABLE OF CONTENTS***Office, Communication and Computer Equipment, net***

Office, communication and computer equipment, net, consist of computer equipment, purchased technology hardware and software, internally developed software, leasehold improvements, furniture and fixtures and other equipment, licenses and communication equipment. Office, communication and computer equipment are recorded at historical cost, net of accumulated depreciation. Additions and improvements that extend the lives of assets are capitalized, while expenditures for repairs and maintenance are expensed as incurred. Certain costs of software developed or obtained for internal use are capitalized. Depreciation is computed using the straight-line method. We depreciate these assets using the following useful lives:

Computer equipment	3 to 5 years
Software	2 to 5 years
Leasehold improvements	Lesser of the estimated economic useful life or the term of the lease
Furniture and fixtures and other equipment	3 to 5 years
Licenses	2 to 3 years
Communication equipment	3 to 5 years

***Business Combination***

We account for business acquisitions in accordance with ASC 805 and records assets acquired and liabilities assumed at their fair values as of the acquisition date. We records any excess purchase price over the value assigned to net tangible and identifiable intangible assets of a business acquired as goodwill. Acquisition related costs are expensed as incurred.

***Goodwill***

We recorded goodwill from the acquisitions of ODL, FXCMJ, Foreland and Lucid. Goodwill represents the excess purchase price over the value assigned to the net tangible and identifiable intangible assets of a business acquired. Goodwill is allocated to our reporting units based on the assignment of the fair values of each reporting unit of the acquired company. For purposes of the goodwill impairment test, we have identified its Retail and Institutional trading segments as its reporting units. We perform a two-step goodwill impairment review at the reporting unit level annually, or in interim periods if certain events occur indicating that the carrying value may be impaired. We test for impairment during the fourth quarter of our fiscal year using October 1 carrying values.

The first step of the two-step process involves a comparison of the estimated fair value of a reporting unit to its carrying amount, including goodwill. In performing the first step, we determine the fair value of a reporting unit using a discounted cash flow ("DCF") analysis. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, the amount and timing of expected future cash flows. The cash flows employed in the DCF analyses are based on our most recent budgets and business plans and, when applicable, various growth rates are assumed for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the respective reporting units. If the estimated fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with its carrying amount to measure the amount of impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination (i.e., the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that reporting unit including any unrecognized intangible assets as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid). If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the reporting unit's goodwill, an impairment loss is recognized in an amount equal to that excess.

There was no impairment of goodwill for the year ended December 31, 2012. Although there is no impairment as of December 31, 2012, events such as economic weakness and unexpected significant declines

**TABLE OF CONTENTS**

in operating results of reporting units may result in our having to perform a goodwill impairment test for some or all of our reporting units prior to the required annual assessment. These types of events and the resulting analysis could result in goodwill impairment charges in the future.

***Other Intangible Assets, net***

Other intangible assets, net, primarily include customer relationships, proprietary technology and non-compete agreements. Customer relationships were acquired from ODL and FXCMJ, non-compete agreements were acquired from ODL, FXCMJ, Foreland and Lucid and the proprietary technology was acquired from Lucid.

The customer relationships and non-compete agreements are finite-lived intangibles and are amortized on a straight-line basis over their estimated average useful life of 2 to 9 years and 2 to 3 years, respectively. Proprietary technology is also finite-lived intangibles and is amortized on a straight-line basis over their estimated average useful life of 4 to 7 years, respectively. The useful life of these intangibles is based on the period they are expected to contribute to future cash flows as determined by the Company's historical experience. For these finite-lived intangible assets subject to amortization, impairment is considered upon certain "triggering events" and is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset. There was no impairment of finite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

The FX trading license is an indefinite-lived asset that is not amortized but tested for impairment. Our policy is to test for impairment at least annually or in interim periods if certain events occur indicating that the fair value of the asset may be less than its carrying amount. An impairment test on this indefinite-lived asset is performed during the fourth quarter of the our fiscal year using the October 1<sup>st</sup> carrying value. Impairment exists if the carrying value of the indefinite-lived intangible asset exceeds its fair value. There was no impairment of indefinite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

***Income Taxes***

Holdings operates in the U.S. as a limited liability company that is treated as a partnership for U.S. federal and state income tax purposes. As result, Holding's income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holding's income attributable to the Corporation and excludes the income attributable to other members of Holding's whose income is included in Net Income Attributable to Non-controlling Interest in the consolidated statements of operations. Prior to the IPO, we operated as a limited liability company that was treated as partnership for U.S. federal income tax. As result, our income from its U.S. operations was not subject to U.S. federal income tax because the income was attributed to its members and included in the tax returns of its members.

Deferred taxes are provided using a liability method, whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences represent the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect for changes in tax laws and rates on the date of enactment.

In addition to U.S. federal and state income taxes, we are subject to Unincorporated Business Tax which is attributable to Holding's operations apportioned to New York City. Our foreign subsidiaries are also subject to local taxes.

We recognize tax benefits for uncertain tax positions only if it is more likely than not that the position is sustainable based on its technical merits. Interest and penalties on uncertain tax positions are included as a component of the provision for income taxes on the consolidated statements of operations.

***Allocation and Distribution to Non-controlling Interests***

The allocation of Holdings' earnings to the members is determined in accordance with the sharing ratios as defined in the LLC Agreement. Distributions to members are made according to the LLC Agreement.

**TABLE OF CONTENTS**

The allocation of Lucid's earnings to the Lucid non-controlling member is determined in accordance with the Deed of Shareholders Agreement (the "Shareholders Agreement"). Distributions to the Lucid non-controlling members are made in accordance with the Shareholders Agreement.

***Recently Adopted Accounting Pronouncements******Fair Value Measurements and Related Disclosures***

In May 2011, the FASB issued authoritative guidance that provides a uniform framework for fair value measurements and related disclosures between U.S. GAAP and International Financial Reporting Standards. Additional disclosure requirements under this guidance include: (1) for Level 3 fair value measurements, quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity's use of nonfinancial asset that is different from the asset's highest and best use, the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required, the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. This guidance became effective for us on January 1, 2012 and did not have a material impact on its consolidated financial statements.

***Presentation of Comprehensive Income***

In June 2011, the FASB issued authoritative guidance that eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other updates to the presentation of comprehensive income. Under this guidance, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. This guidance became effective on January 1, 2012 and did not have a material impact on its consolidated financial statements.

***Recently Issued Accounting Pronouncement******Balance Sheet Offsetting***

In December 2011, the FASB issued Accounting Standards Update ("ASU") No. 2011-11 which requires disclosures of both gross and net information about instrument and transactions eligible for offset as well as transactions subject to an agreement similar to a master netting agreement. ASU No. 2011-11 is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods and must be applied retrospectively. As this guidance is limited to presentation only, adoption of this guidance is not expected to have a material impact on the Company's financial statements.

***Testing Goodwill for Impairment***

In July 2012, the FASB issued amended guidance relating to FASB ASC Topic 350, "Intangibles — Goodwill and Other," which permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then no further action is required. This accounting guidance is effective for the Company on January 1, 2013 with early adoption permitted. Since this guidance only changes the manner in which the Company assesses indefinite-lived intangible assets for impairment, adoption is not expected to have a material effect on the Company's financial position or results of operations.

TABLE OF CONTENTS**Item 7A. Quantitative and Qualitative Disclosures about Market Risk*****Currency risk***

Currency risk arises from the possibility that fluctuations in foreign exchange rates will impact the value of our assets denominated in foreign currencies as well as our earnings due to the translation of our statement of financial condition and statement of operations from local currencies to U.S. dollars. We currently have limited exposure to currency risk from customer open positions as we utilize an agency model, simultaneously entering offsetting trades with both our customers and FX market makers. However, we do incur currency mismatch risk arising from customer accounts denominated in one currency being secured by cash deposits in a different currency. As exchange rates change, we could suffer a loss.

As at December 31, 2012, 7.6% of our net assets (assets less liabilities) were in British pounds, 12.5% in Euros, 10.5% in Japanese yen, and 7.8% in all other currencies other than the US dollar. For illustrative purposes, if each of these currencies were to adversely change by 10% with no intervening hedging activity by ourselves, this would result in a pre-tax loss of \$4.3 million in the case of British pounds, \$7.2 million for Euros, \$6.1 million for Japanese yen and \$3.9 million for Hong Kong Dollars.

***Interest rate risk***

Interest rate risk arises from the possibility that changes in interest rates will impact our financial statements.

Our cash and customer cash (on which we do not pay interest) is held primarily in short-term demand deposits at banks and at our FX market makers. Interest rates earned on these deposits and investments affects our interest revenue. We currently derive a minimal amount of interest income on our cash balances as interest rates are near-zero. In addition, we have a credit facility which had an outstanding balance of \$85.0 million as of December 31, 2012 with a floating interest rate. Based on cash and customer cash held and the amount drawn on the credit facility at December 31, 2012, we estimate that a 50 basis point increase in interest rates would increase our annual pretax income by approximately \$7.3 million, net of the additional interest expense of the credit facility and the notes payable.

We also earn a spread on overnight position financing (rollovers) and the interest differential our customers earn or pay depends on whether they are long a higher or lower yielding currency relative to the currency they borrowed. Currently interest rate differentials globally are at low levels and we earn a minimal amount of income from our spread on rollover.

***Credit risk***

Credit risk is the risk that a borrower or counterparty will fail to meet their obligations. We are exposed to credit risk from our retail and institutional customers as well as institutional counterparties.

All retail customers are required to deposit cash collateral in order to trade on our platforms. Our policy is that retail customers are not advanced credit in excess of the cash collateral in their account and our systems are designed so that each customer's positions are revalued on a real-time basis to calculate the customer's useable margin. Useable margin is the cash the customer holds in the account after adding or deducting real-time gains or losses, less the margin requirement. The retail customer's positions are automatically closed once his or her useable margin falls to zero. Exposure to credit risk from customers is therefore minimal. While it is possible for a retail customer account to go negative in rare circumstances, for example, due to system failure, a final stop loss on the account is automatically triggered which will execute the closing of all positions. For the years ended December 31, 2012 and 2011, we incurred \$0.3 million and \$0.9 million, respectively, in losses from customer accounts that had gone negative.

Institutional customers are permitted credit pursuant to limits set by the prime brokers that we use. As part of our arrangement with our prime brokers, they incur the credit risk regarding the trading of our institutional customers.

In addition, we are exposed to the following institutional counterparties: clearing and prime brokers as well as banks with respect to our own deposits and deposits of customer funds. We are exposed to credit risk in the event that such counterparties fail to fulfill their obligations. We manage the credit risk arising from

TABLE OF CONTENTS

institutional counterparties by setting exposure limits and monitoring exposure against such limits, carrying out periodic credit reviews, and spreading credit risk across a number of different institutions to diversify risk. As of December 31, 2012, our exposure to our three largest institutional counterparties, all major global banking institutions, was 35.3% of total assets and the single largest within the group was 18.4% of total assets. As of December 31, 2011, our exposure to our three largest institutional counterparties, all major global banking institution, was 47.8% of total assets and the single largest within the group was 24.1% of total assets.

**Market risk**

Market risk is the risk of losses in on- and off-balance sheet positions arising from movements in market prices. In our retail business, we operate predominantly on an agency execution model and are not exposed to the market risk of a position moving up or down in value with the exception of certain trades of our CFD customers. As of December 31, 2012, our net unhedged exposure to CFD customer positions was 2.3% of total assets. A hypothetical 10% change in the value of our unhedged CFD positions as of December 31, 2012 would result in an \$4.8 million decrease in pre-tax income.

Recently we launched an initiative to offer our smaller retail clients the option to trade with a dealing desk, or principal model. In our agency execution model, when a customer executes a trade with us, we act as a credit intermediary, simultaneously entering into trades with the customer and the FX market maker. In the principal model, we may maintain our trading position if we believe the price may move in our favor and against the customer and not offset the trade with another party. As a result, we may incur trading losses using principal model execution from changes in the prices of currencies where we are not hedged. We have established risk limits, policies and procedures to monitor risk on a continuous basis and they have been reviewed and approved by our Board of Directors. As of December 31, 2012, our net unhedged exposure to FX customer positions was 3.4% of total assets. A hypothetical 10% change in the value of our unhedged FX positions as of December 31, 2012 would result in an \$7.0 million decrease in pre-tax income.

We also recently acquired a 50.1% interest in Lucid, an electronic market making and trading firm in the institutional foreign exchange market. Lucid has risk limits by currency, trading strategy and overall exposure which are monitored continuously. In addition, Lucid seeks to close all open positions by the end of each foreign exchange trading day in New York. The average intra-day gross notional position in the year ended December 31, 2012 was \$18.9 million and the maximum intra-day gross position was \$91.5 million. A 10% fully correlated decrease in value at the maximum intra-day position would result in a \$9.2 million decrease in consolidated pre-tax income.

**Liquidity risk**

In normal conditions, our business of providing online FX trading and related services is self-financing as we generate sufficient cash flows to pay our expenses as they become due. As a result, we generally do not face the risk that we will be unable to raise cash quickly enough to meet our payment obligations as they arise. Our cash flows, however, are influenced by customer trading volume and the income we derive on that volume. These factors are directly impacted by domestic and international market and economic conditions that are beyond our control. In an effort to manage this risk, we maintain a substantial pool of liquidity. As of December 31, 2012, cash and cash equivalents, excluding cash and cash equivalents held for customers, were 13.2% of total assets.

**Operational risk**

Our operations are subject to various risks resulting from technological interruptions, failures, or capacity constraints in addition to risks involving human error or misconduct. Regarding technological risks, we are heavily dependent on the capacity and reliability of computer and communications systems supporting our operations. We have established a program to monitor our computer systems, platforms and related technologies and to address issues that arise promptly. We have also established disaster recovery facilities in strategic locations to ensure that we can continue to operate with limited interruptions in the event that our primary systems are damaged. As with our technological systems, we have established policies and procedures designed to monitor and prevent both human errors, such as clerical mistakes and incorrectly placed trades, as well as human misconduct, such as unauthorized trading, fraud, and negligence. In addition, we seek to mitigate the impact of any operational issues by maintaining insurance coverage for various contingencies.

TABLE OF CONTENTS***Regulatory capital risk***

Various domestic and foreign government bodies and self-regulatory organizations responsible for overseeing our business activities require that we maintain specified minimum levels of regulatory capital in our operating subsidiaries. If not properly monitored or adjusted, our regulatory capital levels could fall below the required minimum amounts set by our regulators, which could expose us to various sanctions ranging from fines and censure to the imposition of partial or complete restrictions on our ability to conduct business. To mitigate this risk, we continuously evaluate the levels of regulatory capital at each of our operating subsidiaries and adjust the amounts of regulatory capital in each operating subsidiary as necessary to ensure compliance with all regulatory capital requirements. These may increase or decrease as required by regulatory authorities from time to time. We also maintain excess regulatory capital to provide liquidity during periods of unusual or unforeseen market volatility, and we intend to continue to follow this policy. In addition, we monitor regulatory developments regarding capital requirements to be prepared for increases in the required minimum levels of regulatory capital that may occur from time to time in the future. As of December 31, 2012, we had \$67.2 million in regulatory capital requirements at our regulated subsidiaries and \$231.8 million of capital on a consolidated basis.

***Regulatory risk***

We operate in a highly regulated industry and are subject to the risk of sanctions from U.S., federal and state, and international authorities if we fail to comply adequately with regulatory requirements. Failure to comply with applicable regulations could result in financial and operational penalties. In addition, efforts to comply with applicable regulations may increase our costs and/or limit our ability to pursue certain business opportunities. Federal and state regulations significantly limit the types of activities in which we may engage. U.S. and international legislative and regulatory authorities change these regulations from time to time. See “Item 1A. Risk Factors.”

TABLE OF CONTENTS

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Shareholders of FXCM Inc.

We have audited the accompanying consolidated statements of financial condition of FXCM Inc. as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income, stockholders' equity/members' capital, and cash flows of FXCM Inc. (prior to December 7, 2010, FXCM Holdings, LLC and subsidiaries) for each of the three years in the period ended December 31, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of FXCM Inc. at December 31, 2012 and 2011, and the consolidated results of operations and cash flows of FXCM Inc. (prior to December 7, 2010, FXCM Holdings, LLC and subsidiaries) for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of Public Company Accounting Oversight Board (United States), FXCM Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our reported dated March 15, 2013 expressed an unqualified opinion thereon.

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 1. Nature of Business and Organization**

FXCM Inc. (the “Corporation”), a Delaware holding company incorporated on August 10, 2010, is a global online provider of foreign exchange (“FX”) trading and related services to retail and institutional customers worldwide. The Corporation operates through its managing membership interest in FXCM Holding, LLC (“Holdings”), the Corporation’s sole operating asset. Holdings is a minority-owned, controlled and consolidated subsidiary of the Corporation. Prior to the completion of the reorganization and the Corporation’s initial public offering (“IPO”) described in Note 2, the Corporation was a wholly-owned subsidiary of Holdings. As used in these notes, the term “Company” collectively refers to the Corporation, Holdings and subsidiaries of Holdings.

As an online provider of FX trading and related services, the Company offers its retail and institutional customers access to global over-the-counter FX markets. In a FX trade, a participant buys one currency and simultaneously sells another, a combination known as a “currency pair.” The Company’s proprietary trading platform presents its FX customers with the price quotations on several currency pairs from a number of global banks, financial institutions and market makers, or FX market makers. The Company’s primary offering to retail customers is what is referred to as agency execution or an agency model. Under the agency model, when a customer executes a trade on the price quotation presented by the FX market maker, the Company acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. The Company earns trading revenue by adding a markup to the price provided by the FX market makers, not trading profit or losses. Recently, the Company launched an offering to its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, the Company earns revenue from: (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades the Company has chosen to hedge and (ii) net gains or losses, if any, where the Company has not hedged the customer trade.

The Company also offers FX trading services to banks, hedge funds and other institutional customers, on an agency model basis, through its FXCM Pro division. These services allow customers to obtain optimal prices offered by external banks. The counterparties to these trades are external financial institutions that hold customer account balances and settle the transactions. The Company receives commissions for providing these services. In addition, the Company, through its 50.1% controlling interest in Lucid Markets Trading Limited (“Lucid”) (see Note 5), is an electronic market-maker and trader in the institutional FX market. The Company is also engaged in various ancillary FX related services which include use of its platform, technical expertise, trading facilities and software. Additionally, the Company offers its customers the ability to trade contract for differences (“CFDs”), spread betting, equities and equity options through its United Kingdom subsidiary FXCM Securities Limited (“FSL”). CFDs allow for the exchange of the difference in the value of a particular asset such as a stock index or oil or gold contracts, between the time at which a contract is opened and the time at which it is closed. Spread betting allows our customers to bet on the price fluctuations of various financial markets such as FX, indices, oil and metals.

**Note 2. Reorganization and IPO*****Reorganization***

Prior to the completion of the Corporation’s IPO, the limited liability company agreement of Holdings (the “LLC Agreement”) was restated among other things, to modify its capital structure by reclassifying the interests held by its existing owners (i.e., the owners of Holdings prior to the IPO) (the “Existing Unit Holders”) into a single new class of units (“Holding Units”). The Existing Unit Holders also entered into an exchange agreement (the “Exchange Agreement”) under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO, subject to the terms of the exchange agreement as described therein, to exchange their Holding Units for shares of the Corporation’s Class A common stock on a one-for-one basis, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. Following the IPO, each of the Existing Unit Holders

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 2. Reorganization and IPO – (continued)**

held one share of Class B common stock. The shares of Class B common stock have no economic rights but entitle the holder, without regard to the number of shares of Class B common stock held, to a number of votes on matters presented to stockholders of the Corporation that is equal to the aggregate number of Holdings Unit held by such holder, subject to customary adjustments for stock splits, stock dividends and reclassifications.

At the time of the IPO, the Corporation purchased newly-issued Holding Units from Holdings and outstanding Holding Units from the Existing Unit Holders, including members of its senior management, at a purchase price per unit equal to the \$14.00 price per share of Class A common stock in the offering net of underwriting discounts. Since the Existing Unit Holders continued to have control of over 50% of the voting shares (through their interests in the Corporation) upon completion of the exchange, the exchange of cash by the Corporation for Holding Units was accounted for as a transaction between entities under common control in accordance with the guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 805, *Business Combinations* (“ASC 805”). The date of the exchange was December 7, 2010 (i.e., the effective date of the IPO).

***IPO***

On December 7, 2010, the Corporation closed the IPO of its Class A common stock. Pursuant to the IPO, the Corporation offered and sold 17,319,000 shares of Class A common stock. The Corporation also acquired an equivalent number of Holding Units. Total proceeds from the IPO were \$226.7 million. The Corporation used \$49.7 million of these proceeds to purchase 3,800,000 newly issued Holding Units, and \$177.0 million of the proceeds to purchase 13,519,000 Holding Units from Existing Unit Holders, including members of Holdings senior management.

As described in more detail in Note 3, subsequent to the IPO and the reorganization described above, the Corporation consolidates the financial results of Holdings and its subsidiaries and reflects the ownership interest of the other members of Holdings as a non-controlling interest in the Corporation’s consolidated financial statements.

***Tax Receivable Agreement***

In connection with the Reorganization, Holdings made an election under Section 754 of the Internal Revenue Code effective for each taxable year in which an exchange of Holding Units shares of Class A common stock as described above occurs, which may result in an adjustment to a portion of the tax basis of the assets of Holdings at the time of an exchange of Holding Units. As a result of both the initial purchase of Holding Units from the Existing Unit Holders in connection with the IPO and these subsequent exchanges, the Corporation is entitled to a proportionate share of the existing tax basis of the assets of Holdings. In addition, the purchase of Holding Units and subsequent exchanges, in conjunction with the election under Section 754 described above, are expected to result in increases in the tax basis of the assets of Holdings that otherwise would not have been available. Both this proportionate share and these increases in tax basis may reduce the amount of tax that the Corporation would otherwise be required to pay in the future. These increases in tax basis may also decrease gains (or increase losses) on future dispositions of certain capital assets to the extent tax basis is allocated to those capital assets.

The Corporation entered into a tax receivable agreement with Holdings members that will provide for the payment by the Corporation to Holdings members an amount equal to 85% of the amount of the benefits, if any, that the Corporation is deemed to realize as a result of (i) the existing tax basis in the intangible assets of Holdings on the date of the IPO, (ii) any increases in tax basis resulting from Section 754 election and (iii) certain other tax benefits related to our entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement. These payment obligations are obligations of the Corporation and not of Holdings. For purposes of the tax receivable agreement, the benefit deemed realized by

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 2. Reorganization and IPO – (continued)**

the Corporation is computed by comparing the actual income tax liability of the Corporation to the amount of such taxes that the Corporation would have been required to pay had there been no increase to the tax basis of the assets of Holdings as a result of the purchase or exchanges, had there been no tax benefit from the tax basis in the intangible assets of Holdings on the date of the IPO and had the Corporation not entered into the taxreceivable agreement. The term of the taxreceivable agreement will continue until all such tax benefits have been utilized or expired, unless the Corporation exercises its right to terminate the taxreceivable agreement for an amount based on the agreed payments remaining to be made under the agreement or the Corporation breaches any of its material obligations under the taxreceivable agreement in which case all obligations will generally be accelerated and due as if the Corporation had exercised its right to terminate the agreement.

**Note 3. Significant Accounting Policies and Estimates**

***Basis of Presentation***

The accompanying consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Company consolidates those entities in which it is the primary beneficiary of a variable-interest entity as required by ASC 810, *Consolidations* ("ASC 810"), or entities where it has a controlling interest. Intercompany accounts and transactions are eliminated in consolidation.

As indicated above, the Corporation operates and controls all of the businesses and affairs of Holdings and its subsidiaries. As such, Holdings meets the definition of a variable interest entity under ASC 810. Further, the Corporation is the primary beneficiary of Holdings as a result of its 100% voting power and control over Holdings. As a result, the Corporation consolidates the financial results of Holdings and records a non-controlling interest for the economic interest in Holdings held by the Existing Unit Holders to the extent that the book value of their interest in Holdings is greater than zero. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 42.5% and 57.5%, respectively, as of December 31, 2012. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 20.4% and 79.6%, respectively, as of December 31, 2011.

Net income attributable to the non-controlling interest on the consolidated statements of operations represents the portion of earnings or loss attributable to the economic interest in Holdings held by the non-controlling unit holders and the portion of earnings or loss attributable to the economic interest in Lucid (see Note 5) held by Lucid non-controlling members. Non-controlling interest in the consolidated statements of financial condition represents the portion of net assets of Holdings attributable to the non-controlling unit holders based on total units of Holdings owned by such unit holder and the portion of the net assets of Lucid attributable to the non-controlling Lucid members based on the equity interest owned by each of the Lucid non-controlling members.

The Company's consolidated financial statements include the following subsidiaries of Holdings:

Forex Capital Markets LLC	("US")
FXCM Asia Limited	("HK")
Forex Capital Markets Limited	("UK")
FXCM Australia Limited	("Australia")
ODL Group Limited	("ODL")
FXCM Securities Limited	("FSL")
FXCM Japan Securities Co., Ltd.	("FXCMJ")
FXCM UK Merger Limited	("Merger")
Lucid Markets Trading Limited	("Lucid")

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

FXCMJ a wholly owned subsidiary of Holdings, has a fiscal year end of March 31 while the Company has a fiscal year end of December 31. FXCMJ is a Japanese based foreign exchange provider and is required under Japanese law to have a fiscal year end of March 31. The difference between the Company's reporting year end and FXCMJ does not result in a material impact on the Company's financial position or results of operations.

Certain reclassifications have been made to previously reported amounts to conform to the current presentation.

***Use of Estimates***

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements as well as the reported amount of revenue and expenses during the year. Actual results could differ from those estimates and could have a material impact on the consolidated financial statements.

***Cash and Cash Equivalents***

Cash and cash equivalents include cash at banks and highly liquid instruments with original maturities of less than 90 days at the time of purchase and cash held by FX and CFD market makers related to hedging activities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.

***Cash and Cash Equivalents, held for customers***

Cash and cash equivalents, held for customers represents cash held to fund customer liabilities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.

The balance arises primarily from cash deposited by customers and net realized gains from customer trading activity. The Company records a corresponding liability in connection with this amount that is included in customer account liabilities in the consolidated statements of financial condition (see Note 6). A portion of the balance is not available for general use due to legal restrictions in accordance with certain jurisdictional regulatory requirements. These legally restricted balances were \$1.0 billion and \$0.9 billion as of December 31, 2012 and 2011, respectively.

***Due from/to Brokers***

Due from/to brokers represents the amount of the unsettled spot currency trades that the Company has open with its financial institutions. Also included in due from/to brokers is the fair value of open future contracts discussed above. The Company has master netting agreements with its respective counterparties under which its due to/from brokers are presented on a net-by-counterparty basis in accordance with ASC 815.

***Derivatives***

Derivative financial instruments are accounted for in accordance with ASC 815, *Derivatives and Hedging* ("ASC 815"), and are included in due to/from brokers in the consolidated statements of financial condition. The Company recognizes all derivative financial instruments in the consolidated balance sheet as either assets or liabilities at fair value. The Company enters into future contracts to (i) economically hedge the open customer contracts on its CFD business and (ii) hedge trading in its electronic market making and institutional foreign exchange spot and futures markets. Future contracts are exchanged traded contracts to either purchase or sell a specific asset at a specified future date for a specified price. Gains or losses on future contracts related to the Company's CFD business are included in Retail trading revenue and gains or losses on hedge trading in its electronic market making and institutional foreign exchange spot and futures markets are included in Institutional trading revenue in the consolidated statements of operations.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

***Fair Value Measurements***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. These three levels of fair value hierarchy are defined as follows:

Level I: Quoted prices in active markets for identical assets or liabilities, accessible by the Company at the measurement date.

Level II: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level III: Unobservable inputs for assets or liabilities.

As of December 31, 2012 and 2011, substantially all of the Company's financial instruments were carried at fair value based on spot exchange rates broadly distributed in active markets, or amounts approximating fair value. Cash and cash equivalents and cash and cash equivalents, held for customers are deemed to be Level I financial assets. Open futures contracts included in Due from brokers and Due to brokers are classified as Level I financial assets and liabilities, respectively, as they are actively traded and valued at their quoted market prices. Unsettled spot currency trades included in Due from brokers and Due to brokers are classified as Level II financial assets and liabilities, respectively, and are carried at contracted amounts, which approximate fair value. Other assets, including receivables from others, are carried at contracted amounts, which approximate fair value and are classified as Level II financial assets. Other liabilities, including customer account liabilities, payables to others, credit agreement and notes payable are carried at contracted amounts, which approximates fair value and are classified as Level II financial liabilities.

The Company did not have any Level III financial assets or liabilities as of December 31, 2012 and 2011. The Company did not have any transfers in or out of Level I and II during the year ended December 31, 2012.

***Office, Communication and Computer Equipment, net***

Office, communication and computer equipment, net, consist of computer equipment, purchased technology hardware and software, internally developed software, leasehold improvements, furniture and fixtures and other equipment, licenses and communication equipment. Office, communication and computer equipment are recorded at historical cost, net of accumulated depreciation. Additions and improvements that extend the lives of assets are capitalized, while expenditures for repairs and maintenance are expensed as incurred. Certain costs of software developed or obtained for internal use are capitalized. Depreciation is computed using the straight-line method. The Company depreciates these assets using the following useful lives:

Computer equipment	3 to 5 years
Software	2 to 5 years
Leasehold improvements	Lesser of the estimated economic useful life or the term of the lease
Furniture and fixtures and other equipment	3 to 5 years
Licenses	2 to 3 years
Communication equipment	3 to 5 years

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

***Valuation of Other Long-Lived Assets***

The Company also assesses potential impairments of its other long-lived assets, including office, communication and computer equipment, when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is recognized when the carrying amount of the long-lived asset exceeds its fair value and is not recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Any required impairment loss is measured as the amount by which the carrying amount of a long-lived asset exceeds its fair value and is recorded as a reduction in the carrying value of the related asset and a charge to operating results. There was no impairment of other long-lived assets in the years ended December 31, 2012, 2011 and 2010.

***Business Combination***

The Company accounts for business acquisitions in accordance with ASC 805 and records assets acquired and liabilities assumed at their fair values as of the acquisition date. The Company records any excess purchase price over the value assigned to net tangible and identifiable intangible assets of a business acquired as goodwill. Acquisition related costs are expensed as incurred. See Note 5 for further details.

***Goodwill***

The Company recorded goodwill from the acquisitions of ODL, FXCMJ, Foreland Forex Co. Limited (“Foreland”) and Lucid. Goodwill represents the excess purchase price over the value assigned to the net tangible and identifiable intangible assets of a business acquired. Goodwill is allocated to the Company’s reporting units based on the assignment of the fair values of each reporting unit of the acquired company. For purposes of the goodwill impairment test, the Company has identified its Retail and Institutional trading segments as its reporting units. The Company performs a two-step goodwill impairment review at the reporting unit level annually, or in interim periods if certain events occur indicating that the carrying value may be impaired. The Company tests for impairment during the fourth quarter of our fiscal year using October 1 carrying values.

The first step of the two-step process involves a comparison of the estimated fair value of a reporting unit to its carrying amount, including goodwill. In performing the first step, the Company determines the fair value of a reporting unit using a discounted cash flow (“DCF”) analysis. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, the amount and timing of expected future cash flows. The cash flows employed in the DCF analyses are based on the Company’s most recent budgets and business plans and, when applicable, various growth rates are assumed for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the respective reporting units. If the estimated fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit’s goodwill with its carrying amount to measure the amount of impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination (i.e., the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that reporting unit including any unrecognized intangible assets as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid). If the carrying amount of the reporting unit’s goodwill exceeds the implied fair value of the reporting unit’s goodwill, an impairment loss is recognized in an amount equal to that excess.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

There was no impairment of goodwill for the year ended December 31, 2012. Although there is no impairment as of December 31, 2012, events such as economic weakness and unexpected significant declines in operating results of reporting units may result in our having to perform a goodwill impairment test for some or all of our reporting units prior to the required annual assessment. These types of events and the resulting analysis could result in goodwill impairment charges in the future. See Note 9 below for further discussion.

***Other Intangible Assets, net***

Other intangible assets, net, primarily include customer relationships, proprietary technology and non-compete agreements. Customer relationships were acquired from ODL, Foreland and FXCMJ, non-compete agreements were acquired from ODL, and Lucid and the proprietary technology was acquired from Lucid.

The customer relationships and non-compete agreements are finite-lived intangibles and are amortized on a straight-line basis over their estimated average useful life of 2 to 9 years and 2 to 3 years, respectively. Proprietary technology is also finite-lived intangibles and is amortized on a straight-line basis over their estimated average useful life of 4 to 7 years, respectively. The useful life of these intangibles is based on the period they are expected to contribute to future cash flows as determined by the Company's historical experience. For these finite-lived intangible assets subject to amortization, impairment is considered upon certain "triggering events" and is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset. There was no impairment of finite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

The FX trading license is an indefinite-lived asset that is not amortized but tested for impairment. The Company's policy is to test for impairment at least annually or in interim periods if certain events occur indicating that the fair value of the asset may be less than its carrying amount. An impairment test on this indefinite-lived asset is performed during the fourth quarter of the Company's fiscal year using the October 1<sup>st</sup> carrying value. Impairment exists if the carrying value of the indefinite-lived intangible asset exceeds its fair value. There was no impairment of indefinite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

***Equity Method Investment***

Investments where the Company is deemed to exercise significant influence (generally defined as owning a voting interest of 20% to 50%), but no control, are accounted for using the equity method of accounting. The Company records its pro-rata share of earnings or losses each period and records any dividends as a reduction in the investment balance. These investments are included in Other assets in the consolidated statements of financial condition and earnings or losses are included in Other income in the consolidated statements of operations. Equity method investments are included in corporate for purposes of segment reporting (see Note 24).

***Accounts Receivable, net***

As of December 31, 2012 and 2011, accounts receivable, net, consisted primarily of amounts due from institutional customers relating to the Company's FX business, and fees receivable from the Company's white label service to third parties and payments for order flow, described in "Retail Trading Revenue" below. Receivables are shown net of reserves for uncollectible accounts. The reserve for bad debts is maintained at a level that management believes to be sufficient to absorb estimated losses in the accounts receivable portfolio. The reserve is increased by the provision for bad debts which is charged against operating results and decreased by the amount of charge-offs, net of recoveries. The amount charged against operating results is based on several factors including, but not limited to, a continuous assessment of the collectability of each

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

account, the length of time a receivable is past due and our historical experience with the particular customer. As of December 31, 2012 and 2011, the reserve netted against receivables in the consolidated statements of financial condition was not material.

***Other Assets***

Other assets include prepaid expenses, equity method investments, deposits for rent security and employee advances (see Note 11).

***Accounts Payable and Accrued Expenses***

Accounts payable and accrued expenses include operating expenses payable, commissions payable which represents balances owed to referring brokers for trades transacted by customers that were introduced to the Company by such brokers, taxes payable, due to members pursuant to a tax receivable agreement (see Note 14), due to the Lucid non-controlling members in connection with trade settlements, bonuses payable, deferred rent, interest due on borrowings and a payable for a portion of the cash consideration relating to the business acquisitions (see Notes 5 and 12).

***Foreign Currency***

Foreign denominated assets and liabilities are re-measured into the functional currency at exchange rates in effect at the statement of financial condition dates through the consolidated statements of operations. Gains or losses resulting from foreign currency transactions are re-measured using the rates on the dates on which those elements are recognized during the period, and are included in retail and institutional trading revenue in the consolidated statements of operations. The Company recorded a gain of \$0.8 million, \$3.1 million and \$2.8 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Translation gains or losses resulting from translating the Company's subsidiaries' financial statements from the functional currency to the reporting currency, net of tax, are included in Foreign currency translation gain (loss) in the consolidated statements of comprehensive income. Assets and liabilities are translated at the statement of financial condition date while revenues and expenses are translated at an applicable average rate.

***Revenue Recognition***

The Company makes foreign currency markets for customers trading in FX spot markets and through its subsidiary FSL, engages in equity and related brokerage activities. FX transactions are recorded on the trade date and positions are marked to market daily with related gains and losses, including gains and losses on open spot transactions, recognized currently in income. Commissions earned on brokerage activities are recorded on a trade date basis and are recognized currently in income.

***Retail Trading Revenue***

Under the Company's retail agency FX offering, trading revenue is earned by adding a markup to the price provided by FX market makers generating trading revenue based on the volume of transactions and is recorded on trade date. Under the agency model, when a customer executes a trade on the best price quotation presented by the FX market maker, the Company acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. This agency model has the effect of automatically hedging the Company's positions and eliminating market risk exposure. Retail trading revenues principally represent the difference of the Company's realized and unrealized foreign currency trading gains or losses on its positions with customers and the systematic hedge gains and losses from the trades entered into with the FX market makers. Retail trading revenue also includes fees earned from arrangements with other financial institutions to provide platform, back office and other trade execution services. This service is generally referred to as a white label arrangement. The Company earns a percentage of the markup charged by the financial institutions to their customers. Fees from this service are recorded

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

when earned on a trade date basis. Additionally, the Company earns income from trading in CFDs, rollovers, payments for order flow, and spread betting. Income or loss on CFDs represents the difference between the Company's realized and unrealized trading gains or losses on its positions and the hedge gains or losses with the other financial institutions. Income or loss on CFDs is recorded on a trade date basis. Income or loss on rollovers is the interest differential customers earn or pay on overnight currency pair positions held and the markup that the Company receives on interest paid or received on currency pair positions held overnight. Income or loss on rollovers is recorded on a trade date basis. Income earned on order flow represents payments received from certain FX market makers in exchange for routing trade orders to these firms for execution. The Company's order routing software ensures that payments for order flow do not affect the routing of orders in a manner that is detrimental to its retail customers. The Company recognizes payments for order flow as earned on a trade date basis. Spread betting is where a customer takes a position against the value of an underlying financial instrument moving either upward or downward in the market. Income on spread betting is recorded as earned on a trade date basis.

Recently, the Company launched an offering to some of its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, the Company earns revenue from: (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades the Company has chosen to hedge and (ii) net gains or losses, if any, where the Company has not hedged the customer trade.

***Institutional Trading Revenue***

Institutional trading revenue relates to commission income generated by facilitating spot FX trades on behalf of institutional customers through the services provided by the FXCM Pro division. The counterparties to these trades are external financial institutions that also hold customer account balances. The Company receives commission income for customers' use of FXCM Pro without taking any market or credit risk. Institutional trading revenue is recorded on a trade date basis. The Company also earns income from market making and electronic trading in the institutional foreign exchange spot and futures markets through its subsidiary, Lucid. Income on market making and electronic trading in foreign exchange spot and future currencies represents the spread between the bid and ask price for positions purchased and sold and the change in value of positions purchased and sold. Income on market making is recorded as trading gains, net of trading losses, on a trade date basis.

***Interest Income***

Interest income consists of interest earned on cash and cash equivalents and cash and cash equivalents, held for customers and is recognized in the period earned.

***Other Income***

Other income includes amounts earned from the sale of market data, equity and equity option brokerage activities, earnings and losses from equity method investments, account maintenance fees and ancillary fee income.

For the year ended December 31, 2012, Other income in the consolidated statements of operations includes the recognition of a gain related to a settlement with the former owners of ODL in connection with the acquisition of ODL in October 2010 (see Note 14).

For the year ended December 31, 2011, Other income in the consolidated statements of operations includes \$4.5 million of revenue related to the termination of a trade execution services contract that resulted in the recognition of previously deferred income and \$3.3 million attributable to the re-measurement of the Due to related parties pursuant to tax receivable agreement to reflect the Company's revised U.S. Federal income tax rate.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

***Communications and Technology***

Communications and technology expense consists primarily of costs for network connections to our electronic trading platforms, telecommunications costs, and fees paid for access to external market data. This expense is affected primarily by the growth of electronic trading, our network/ platform capacity requirements and by changes in the number of telecommunication hubs and connections which provide our customers with direct access to our electronic trading platforms.

***Trading Costs, Prime Brokerage and Clearing Fees***

Trading costs, prime brokerage and clearing fees primarily represent fees paid to third party clearing banks and prime brokers for clearing foreign exchange spot futures currency and contract transactions, transaction fees paid to exchanges, equity options brokerage activity fees, and fees paid to third party providers for use of their platform for the Company's market making trading business. Clearing fees primarily fluctuate based on changes in volume, rate of clearing fees charged by clearing banks and rate of fees paid to exchanges.

***Referring Broker Fees***

Referring broker fees represent commissions paid to brokers for introducing trading customers to the Company. Commissions are determined based on the number and size of transactions executed by the customers and are recorded on a trade date basis.

***Compensation and Benefits***

Compensation and benefits expense represents employee and member salaries and benefit expense, including stock based compensation expense.

The Company accounts for stock-based compensation in accordance with ASC 718, *Compensation-Stock Compensation* ("ASC 718"). The fair value of the Company's stock-based compensation is estimated using the Black-Scholes option pricing model or on the fair value of the Corporation's Class A common stock. The Company recognizes compensation expense for equity awards on a straight-line basis over the requisite service period of the award. Compensation expense is adjusted for an estimate of equity awards that do not vest in the future because service or performance conditions are not satisfied (forfeitures) and have been included in Compensation and benefits in the consolidated statements of operations. See Note 15 for further details.

***Advertising and Marketing***

Advertising and marketing costs are charged to operations when incurred.

***General and Administrative Expenses***

General and administrative expenses include bank processing and regulatory fees, professional and consulting fees, occupancy and equipment expense and other administrative costs. Bank processing fees are costs associated with the processing of credit card transactions. Regulatory fees are volume-based costs and annual fees charged by certain regulatory authorities.

***Income Taxes***

Holdings operates in the United States ("U.S."), as a limited liability company that is treated as a partnership for U.S. federal, state and local income tax purposes. As a result, Holding's income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holdings' income attributable to the Corporation and excludes the income attributable to other members of

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

Holdings whose income is included in Net Income attributable to non-controlling interest in FXCM Holdings LLC in the consolidated statements of operations. Prior to the IPO, the Company operated as a limited liability company that was treated as partnership for U.S. federal income tax purposes. As a result, the Company's income from its U.S. operations was not subject to U.S. federal income tax because such income was entirely attributed to its members and included in the tax returns of its members.

Deferred taxes are provided using a liability method, whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences represent the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect for changes in tax laws and rates on the date of enactment. See Note 22 for further details.

In addition to U.S. federal and state income taxes, the Company is subject to Unincorporated Business Tax which is attributable to Holding's operations apportioned to New York City. The Company's foreign subsidiaries are also subject to local taxes.

The Company recognizes tax benefits for uncertain tax positions only if it is more likely than not that a position is sustainable based on its technical merits. Interest and penalties on uncertain tax positions are included as a component of the provision for Income taxes on the consolidated statements of operations.

***Allocation and Distribution to Non-controlling Interests***

The allocation of Holdings' earnings to the members is determined in accordance with the sharing ratios as defined in the LLC Agreement. Distributions to members are made according to the LLC Agreement. See Notes 14 and 21 for further details. The allocation of Lucid's earnings to the Lucid non-controlling member is determined in accordance with the Deed of Shareholders Agreement (the "Shareholders Agreement"). Distributions to the Lucid non-controlling members are made in accordance with the Shareholders Agreement. See Note 5 for further details.

***Recently Adopted Accounting Pronouncements***

***Fair Value Measurements and Related Disclosures***

In May 2011, the FASB issued authoritative guidance that provides a uniform framework for fair value measurements and related disclosures between U.S. GAAP and International Financial Reporting Standards. Additional disclosure requirements under this guidance include: (1) for Level 3 fair value measurements, quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity's use of nonfinancial asset that is different from the asset's highest and best use, the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required, the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.

***Presentation of Comprehensive Income***

In June 2011, the FASB issued authoritative guidance that eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other updates to the presentation of comprehensive income. Under this guidance, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 3. Significant Accounting Policies and Estimates – (continued)**

either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.

***Recently Issued Accounting Pronouncement***

***Balance Sheet Offsetting***

In December 2011, the FASB issued Accounting Standards Update (“ASU”) No. 2011-11 which requires disclosures of both gross and net information about instrument and transactions eligible for offset as well as transactions subject to an agreement similar to a master netting agreement. ASU No. 2011-11 is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods and must be applied retrospectively. As this guidance is limited to presentation only, adoption of this guidance is not expected to have a material impact on the Company’s financial statements.

***Testing Goodwill for Impairment***

In July 2012, the FASB issued amended guidance relating to FASB ASC Topic 350, “Intangibles — Goodwill and Other,” which permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then no further action is required. This accounting guidance is effective for the Company on January 1, 2013 with early adoption permitted. Since this guidance only changes the manner in which the Company assesses indefinite-lived intangible assets for impairment, adoption is not expected to have a material effect on the Company’s financial position or results of operations.

**Note 4. Non-Controlling Interest**

***Holdings***

The Corporation consolidates the financial results of Holdings whereby it records a non-controlling interest for the economic interest in Holdings, held by the Existing Unit Holders (see Note 2). Pursuant to an agreement between the Corporation and Holdings, anytime the Corporation cancels, issues or repurchases shares of its Class A common stock, Holdings enters into an equivalent Holding Unit transaction with the Corporation. In addition, anytime Existing Unit Holders exchange their Holding Units for shares of the Corporation’s Class A common stock, Holdings is required to transfer an equal amount of Holding Units to the Corporation. Changes in the non-controlling and the Corporation’s interests in Holdings for the year ended December 31, 2012 are presented in the following table:

*Lucid*

As discussed in Note 5, the Company owns a 50.1% controlling interest in Lucid and consolidates the financial results of Lucid whereby it records a non-controlling interest for the economic interest in Lucid held by the Lucid non-controlling members.

**Note 5. Business Acquisition****Lucid**

On June 18, 2012 (the “Acquisition Date”), the Company acquired a 50.1% controlling interest in Lucid, an electronic market maker and trader in the institutional foreign exchange spot and futures markets headquartered in the U.K., to expand the Company's presence and capabilities in the institutional marketplace. As consideration, the Company issued a \$71.4 million, 3.5% unsecured promissory note, and 9.0 million unregistered shares of the Corporation's Class A common stock to Lucid sellers as well as a \$15.8 million, 3.5% unsecured promissory note for all liquid assets for a total estimated purchase price of \$177.5 million. The Lucid sellers were entitled to 1.8 million shares of the 9.0 million shares at closing, with the remaining 7.2 million shares held in escrow (the “Remaining Shares”), subject to the achievement of certain fixed profit-based targets (the “Profit Targets”). If the Profit Targets are achieved, the Lucid sellers are entitled to receive the Remaining Shares on the first, second and third anniversary following the Acquisition Date or over a three year term (the “Term”) pursuant to the sale purchase agreement (the “Purchase Agreement”). Pursuant to the terms of the Acquisition, any of the Corporation's common shares issuable to a Lucid seller on an anniversary from closing will be restricted (the “Lucid Liquidity Restriction”) for sale until the eighth anniversary of the closing of the Acquisition if the recipient ceases to be employed by Lucid or any entity controlled by the Corporation for reasons other than death or incapacity on such anniversary. The Purchase Agreement includes a contingent arrangement which provides for a claw back of the Remaining Shares in the event that the Profit Targets are not achieved. Additionally, the Company has the option to buy-out the

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 5. Business Acquisition – (continued)**

remaining interest of the Lucid sellers subject to terms of the Purchase Agreement. In the event the buy-out is not exercised by the Company within four years from the Acquisition Date, the Lucid sellers have the ability to buy-back the Company's ownership interests within 30 days of the fourth anniversary date.

The estimated fair value of the 9.0 million shares was \$89.4 million and is accounted for as equity. This fair value consisted of 1.8 million shares with a fair value of \$21.5 million based on the Corporation's closing stock price as of the Acquisition Date and the Remaining Shares with an estimated fair value of \$67.9 million, adjusted for the Lucid Liquidity Restriction. The estimated fair value of the Lucid Liquidity Restriction was \$9.4 million, and is accounted for as deferred compensation and recognized over the Term.

The Acquisition was accounted for in accordance with ASC 805. The assets acquired, liabilities assumed and non-controlling interest were recorded at their estimated fair values in accordance with ASC 820 at the Acquisition Date as summarized in the table below. Full goodwill of \$236.5 million was calculated as the fair value over the estimated fair value of the net assets acquired. The estimated fair value of the non-controlling interest was \$160.2 million, and was determined by valuing Lucid using a discounted cash flow method, less the considerations transferred. The estimated of the fair value of the non-controlling interest is based on an assumed discount rate between 10.0% and 11.0%, annual earnings growth rate of 4.0% and assumed adjustments due to the lack of control that market participants would consider when estimating the fair value of the non-controlling interest in Lucid. Goodwill was allocated at the reporting unit level in the Institutional segment based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining the Lucid market making business with the Company's foreign exchange trading expertise. The goodwill is deductible for United Kingdom income tax purposes.

**Lucid Purchase Price Allocation**

<b>(Amounts in thousands)</b>	
Purchase price	\$ 177,496
Non-Controlling interest	160,165
Total fair value at Acquisition Date	337,661
Net assets acquired	\$ 16,237
Adjustments to reflect acquired assets and liabilities at fair value	
Proprietary technology <sup>(1)</sup>	83,900
Non-compete agreements <sup>(2)</sup>	1,000
Fair value of net assets acquired	101,137
Goodwill resulting from the Lucid acquisition	\$ 236,524

(1) Consists of internally developed software platforms through which the Company: (i) executes its specific trading strategies, with an amortization life of 4 years and (ii) clears and efficiently settle trades with, an amortization life of 7 years.

(2) Consists of two non-compete agreements with amortization lives of 3 years.

The amounts included in the Lucid Purchase Price Allocation table represent the preliminary allocation of the purchase price and are subject to revision during the remainder of the measurement period, a period not to exceed 12 months from the acquisition date. Adjustments, if any, to the provisional values during the measurement period will be pushed back to the date of acquisition. Comparative information for periods after acquisition but before the period in which the adjustments are identified will be adjusted to reflect the effects of the adjustments as if they were taken into account as of the acquisition date. Changes to the amounts recorded as assets and liabilities may result in a corresponding adjustment to goodwill.

**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 5. Business Acquisition – (continued)**

**Condensed Statement of Net Assets Acquired**

The following condensed statement of net assets acquired reflects the amounts of Lucid net assets recognized as of the Acquisition Date, with amounts in thousands:

	<b>As of June 18, 2012</b>
<b>Assets</b>	
Cash and cash equivalents	\$ 28,656
Accounts receivable, net	5,100
Due from brokers	302
Deferred tax asset	125
Office, communication and computer equipment, net	499
Intangible assets	84,900
Other assets	226
<b>Total assets</b>	<b>\$ 119,808</b>
<b>Liabilities</b>	
Accounts payable and accrued expenses	13,361
Deferred tax liability	5,310
<b>Total liabilities</b>	<b>18,671</b>
Fair value of net assets acquired	<b>\$ 101,137</b>

**Contingencies and Accounts Receivable**

There were no contingent liabilities recorded in the fair value of net assets acquired as of the Acquisition Date and the fair value of net assets acquired includes accounts receivables with book value that approximates fair value. There was no reserve netted against receivables as of the Acquisition Date (see Note 3) since based on current information and events, it is probable that the Company will collect all amounts due according to the contractual terms of the receivable.

**Condensed Combined Financial Information:**

The following condensed financial information presents the resulting operations of Lucid from the Acquisition Date to December 31, 2012:

	<b>For the period June 18, 2012 to December 31, 2012</b>
<b>Total revenue</b>	<b>\$ 42,198</b>
<b>Net income</b>	<b>\$ 21,446</b>

**Foreland**

On October 7, 2011, the Company acquired a 100% interest in Foreland (the “Foreland Acquisition”), a Japan based foreign exchange provider. The Foreland Acquisition was designed to increase the Company’s profile in the Japanese market and accelerate its growth in Asia, utilizing Foreland’s relationships and sales force. The Company’s purchase price was \$37.7 million provided in cash. The Foreland Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$37.7 million purchase price was allocated to Foreland assets acquired and liabilities assumed based on their estimated fair values at the acquisition date as summarized in the following table. Goodwill of

[TABLE OF CONTENTS](#)

**Accounts Receivable**

The Company has collected all material accounts receivable amounts as of December 31, 2012.

***FXCMJ***

On March 31, 2011, the Company acquired a 100% interest in FXCMJ (the “FXCMJ Acquisition”), a Japan based foreign exchange provider that had previously contracted to use the FXCM Japan trademark. The FXCMJ Acquisition was designed to increase the Company’s profile in the Japanese market and accelerate its growth in Asia, utilizing FXCMJ’s relationships and sales force. The Company’s purchase price was \$15.7 million provided in cash. The FXCMJ Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$15.7 million purchase price was allocated to FXCMJ assets acquired and liabilities assumed based on their estimated fair values at the acquisition date as summarized in the following table. Goodwill of \$0.8 million was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Goodwill was allocated to the Retail Trading segments based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining FXCMJ’s foreign exchange with the Company’s foreign exchange trading expertise, the economies of scale expected from combining the operations of the two companies and the retail relationships brought by the FXCMJ’s management. No goodwill is expected to be deductible for federal income tax purposes.

Fair value of net assets acquired		14,959
Goodwill resulting from the FXCMJ acquisition		<u>\$ 766</u>

(1) Consists of retail customers. The amortization life is 6 years.

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 5. Business Acquisition – (continued)**

**Condensed Statement of Net Assets Acquired**

The following condensed statement of net assets acquired reflects the amounts of FXCMJ net assets recognized as of March 31, 2011, with amounts in thousands:

	As of March 31, 2011
<b>Assets</b>	
Cash and cash equivalents	\$ 9,827
Cash and cash equivalents, held for customers	114,024
Due from broker	3,885
Accounts receivable, net	194
Tax receivable	478
Office, communication and computer equipment, net	2,279
Intangible assets	1,064
Other assets	1,189
<b>Total assets</b>	<u>\$ 132,940</u>
<b>Liabilities</b>	
Customer account liabilities	\$ 114,023
Accounts payable and accrued expenses	3,561
Deferred tax liability	397
<b>Total liabilities</b>	<u>117,981</u>
Fair value of net assets acquired	<u>\$ 14,959</u>

**Accounts Receivable**

The Company has collected all material accounts receivable amounts as of December 31, 2012.

**ODL**

On the October 1, 2010, the Company acquired a 100% interest in ODL (the “ODL Acquisition”), a leading broker of FX, CFDs, spread betting, equities and equity options headquartered in the U.K. The ODL Acquisition was designed to increase the Company’s profile in the U.K. market and accelerate its growth in continental Europe, utilizing ODL’s relationships and sales force. As consideration, the Company provided \$2.2 million in cash and issued a 5.25% equity interest in the Company to ODL’s shareholders for a total purchase price of \$54.6 million. The ODL Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$54.6 million purchase price was allocated to ODL assets acquired and liabilities assumed based on their estimated fair values at the acquisition date as summarized in the following table. Goodwill of \$38.2 million was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Goodwill was allocated to the Retail Trading and Institutional segments based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining ODL’s FX, CFDs and spread betting business with the Company’s foreign exchange trading expertise, the economies of scale expected from combining the operations of the two companies and the retail and institutional relationships brought by the ODL’s management. No goodwill is expected to be deductible for federal income tax purposes.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 5. Business Acquisition – (continued)**

**Accounts Receivable**

The Company has collected all material accounts receivable amounts as of December 31, 2012.

**Condensed Combined Financial Information**

The following condensed financial information presents the results of operations of ODL from the Acquisition Date to December 31, 2010, with amounts in thousands:

	<b>For the Period October 1, 2010 to December 31, 2010</b>
<b>Total revenues</b>	<b>\$ 10,588</b>
<b>Net Income</b>	<b>\$ 3,007</b>

**Pro Forma Condensed Combined Financial Information**

Pro Forma condensed combined financial information for the acquisitions completed in 2012 (i.e., Lucid), 2011 (i.e., Foreland and FXCMJ) and 2010 (i.e., ODL) are presented as they may have appeared if all acquisitions had been completed on January 1, 2012, 2011 and 2010, with amounts in thousands:

	<b>For the Years Ended</b>		
	<b>December 31, 2012</b>	<b>December 31, 2011</b>	<b>December 31, 2010</b>
<b>Total revenues</b>	<b>\$ 459,171</b>	<b>\$ 581,507</b>	<b>\$ 419,163</b>
<b>Net Income before non-controlling interest</b>	<b>\$ 51,337</b>	<b>\$ 114,739</b>	<b>\$ 73,612</b>

These pro forma results for the years ended December 31, 2012, 2011 and 2010 primarily include the related tax impact and the elimination of certain revenues and expenses resulting from transactions conducted with Lucid, Foreland, FXCMJ and ODL prior to these acquisitions as well as the adjustments for the intangible assets acquired in the Acquisition and the related tax impact.

**Acquisition-related Costs**

For the year ended December 31, 2012, acquisition-related transaction costs for the Acquisitions was \$0.9 million. For the year ended December 31, 2011, acquisition-related transaction costs for the acquisitions were \$0.2 million for the acquisition of Foreland and \$0.3 for the acquisition of FXCMJ. For the year ended December 31, 2010, acquisition-related costs for the ODL Acquisition were \$2.0 million. Acquisition-related transaction costs are included in General and administrative expense in the consolidated statements of operations.

**Note 6. Customer Account Liabilities**

Customer account liabilities represent amounts due to customers related to cash and margin transactions. This includes cash deposits and gains and losses on settled FX, CFDs and spread betting trades as well as unrealized gains and losses on open FX commitments, CFDs and spread betting. Customer account liabilities were \$1.2 billion and \$1.0 billion as of December 31, 2012 and 2011, respectively.

**Note 7. Equity Method Investment**

On December 4, 2012, the Company completed the acquisition of a non-controlling equity interest in an operator of an electronic communication network for foreign exchange trading. As the Company holds a 38% equity interest and exerts significant influence, the investment is accounted for using the equity method. The Company also has 26.3% equity interest in a developer of FX trading software and 33.0% equity interest in a referring broker and accounts for these investments using the equity method.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 7. Equity Method Investment – (continued)**

As of December 31, 2012 and 2011, the Company's carrying value of equity method investments were \$12.0 million and \$4.6 million, respectively, and are included as a component of Other assets in the consolidated statements of financial condition. Equity method investments are included in corporate for purposes of segment reporting (see Note 24).

Income recognized from equity method investments was not material for the years ended December 31, 2012, 2011 and 2010 and is included as a component of other income in the consolidated statements of operations.

There were no dividend distributions received from the Company's equity method investments during the years ended December 31, 2012, 2011 and 2010.

**Note 8. Office, Communication and Computer Equipment, net**

Office, communication and computer equipment, net, including capitalized software development costs, leasehold improvements, capital leases, furniture and fixtures and other equipment, licenses and communication equipment, consisted of the following as of December 31, 2012 and 2011, with amounts in thousands:

	December 31, 2012	December 31, 2011
Computer equipment	\$ 34,541	\$ 27,167
Software	31,476	18,119
Leasehold improvements	9,478	7,724
Furniture and fixtures and other equipment	3,185	2,476
Licenses	20,222	17,082
Communication equipment	1,522	1,151
	100,424	73,719
Less: Accumulated depreciation	(50,108)	(34,033)
Office, communication and computer equipment, net	\$ 50,316	\$ 39,686

Depreciation is computed on a straight-line basis (see Note 3). Depreciation expense included in the consolidated statements of operations was \$17.7 million, \$13.1 million, and \$6.9 million for the years ended December 31, 2012, 2011 and 2010. Also included in depreciation expense was amortization expense of capitalized software development cost in the amount of \$6.5 million, \$3.0 million, and \$1.7 million for the years ended December 31, 2012, 2011 and 2010. Unamortized capitalized software development costs were \$20.3 million and \$13.5 million as of December 31, 2012 and 2011, respectively. The assets disposed of during the year ended December 31, 2012 was \$2.9 million. The Company disposed of \$1.4 million of fully depreciated assets during the year ended December 31, 2011.

**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 9. Goodwill**

The following table presents the changes in goodwill by segment during the year ended December 31, 2012, with amounts in thousands:

	<b>Retail Trading</b>	<b>Institutional Trading</b>	<b>Total</b>
Balance at December 31, 2011	\$ 37,812	\$ 10,793	\$ 48,605
Goodwill acquired	—	236,524	236,524
Foreign currency translation adjustment	39	486	525
Balance at December 31, 2012	<u>\$ 37,851</u>	<u>\$ 247,803</u>	<u>\$ 285,654</u>

**Note 10. Other Intangible Assets, net**

The Company's acquired intangible assets consisted of the following as of December 31, 2012 and 2011, with amounts in thousands:

	<b>December 31, 2012</b>			<b>December 31, 2011</b>		
	<b>Gross Carrying Amount</b>	<b>Accumulated Amortization</b>	<b>Net Carrying Amount</b>	<b>Gross Carrying Amount</b>	<b>Accumulated Amortization</b>	<b>Net Carrying Amount</b>
<b>Finite-lived intangible assets</b>						
Customer relationships	\$ 32,269	\$ (9,815)	\$ 22,454	\$ 32,144	\$ (4,628)	\$ 27,516
Non-compete agreements	8,214	(5,841)	2,373	7,214	(3,290)	3,924
Proprietary technology	83,900	(11,081)	72,819	—	—	—
Foreign currency translation adjustment	(220)	(244)	(464)	(230)	230	—
Total finite-lived intangible assets	<u>\$124,163</u>	<u>\$ (26,981)</u>	<u>\$ 97,182</u>	<u>\$ 39,466</u>	<u>\$ (8,025)</u>	<u>\$ 31,441</u>
<b>Indefinite-lived intangible assets</b>						
License	610	—	610	610	—	610
Total indefinite-lived intangible assets	<u>\$ 610</u>	<u>\$ —</u>	<u>\$ 610</u>	<u>\$ 610</u>	<u>\$ —</u>	<u>\$ 610</u>

Customer relationships, non-compete agreements, and proprietary technology are amortized on a straight-line basis over 2 to 9 years, 2 to 3 years, 4 years and 7 years, respectively, which approximates the weighted average useful lives. Indefinite-lived assets are not amortized (see Note 3). Amortization expense included in the consolidated statements of operations was \$19.0 million, \$6.9 million and \$2.4 for the years ended December 31, 2012, 2011 and 2010 respectively. Estimated future amortization expense for acquired intangible assets outstanding as of December 31, 2012 is as follows, with amounts in thousands:

<b>Year Ending December 31, 2012,</b>	<b>Estimated Amortization Expense</b>
2013	\$ 27,829
2014	26,114
2015	25,890
2016	14,053
2017	1,971
Thereafter	1,325
	<u>\$ 97,182</u>

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 11. Other Assets**

Other assets were comprised of the following as of December 31, 2012 and 2011, with amounts in thousands:

	December 31, 2012	December 31, 2011
Prepaid expenses	\$ 6,548	\$ 10,305
Equity method investments	12,000	4,639
Deposits	1,555	3,728
Employee advances	851	532
Other	13	14
	<u>\$ 20,967</u>	<u>\$ 19,218</u>

**Note 12. Accounts Payable and Accrued Expenses**

Accounts payable and accrued expenses were comprised of the following as of December 31, 2012 and 2011, with amounts in thousands:

	December 31, 2012	December 31, 2011
Operating expenses payable	\$ 28,886	\$ 19,273
Due to Lucid non-controlling members	9,611	—
Due to Holdings non-controlling members	8,590	3,707
Commissions payable	8,126	8,576
Deferred rent	4,113	2,290
Bonus payable	3,945	12,412
Income tax payable	1,231	8,123
Acquisitions cash consideration payable	808	2,342
Interest due on borrowing	121	—
	<u>\$ 65,431</u>	<u>\$ 56,723</u>

**Note 13. Earnings per Share**

Basic earnings per share ("EPS") measures the performance of an entity over the reporting period. Diluted earnings per share measures the performance of an entity over the reporting period while giving effect to all potentially dilutive common shares that were outstanding during the period. The Company uses the treasury stock method in accordance with ASC Topic 260 — *Earnings per Share* ("ASC 260"), to determine the dilutive potential of stock options and Class B common stock that are exchangeable into the Corporation's Class A common stock.

In accordance with ASC 260, all outstanding unvested share-based payments that contain rights to non-forfeitable dividends participate in the undistributed earnings with the common stockholders and are therefore participating securities. The shares of Class B common stock do not share in the earnings of the Company and are therefore not participating securities. Accordingly, basic and diluted net earnings per share of Class B common stock have not been presented.

In 2012, the Company granted 109,488 stock options to purchase shares of the Corporation's Class A common stock to its independent directors and 725,000 stock options to purchase shares of the Corporation's Class A common stock to its employees. For the years ended December 31, 2012 and 2011, stock options granted to certain employees, non-employees and members of the board of directors in the aggregate of 9,178,128 and 8,598,140, respectively, were not included in the computation of earnings per common share because they were antidilutive under the treasury method.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 13. Earnings per Share – (continued)**

The Company also issued 9.0 million shares of the Corporation's Class A common stock in connection with the Lucid Acquisition. For the year ended December 31, 2012, 7.2 million of these shares were subject to the achievement of certain Profit Targets and, therefore, considered contingently issuable shares under ASC 260. In accordance with ASC 260, contingently issuable shares are considered outstanding common shares and included in basic EPS as of the date that all necessary conditions have been satisfied (that is, when issuance of the shares is no longer contingent). Since the Profit Targets were not achieved as of December 31, 2012, the shares were not included in the computation of basic or diluted EPS.

Additionally, as discussed in Note 2, the Existing Unit Holders also entered into an Exchange Agreement under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO, (subject to the terms of the Exchange Agreement as described therein) to exchange their Holding Units for shares of the Corporation's Class A common stock on a one-for-one basis at fair value, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. These shares were also excluded from the computation of earnings per common shares because they were anti-dilutive under the treasury method. During the year ended December 31, 2012, certain members of Holdings exchanged 10.8 million of their Holding Units, on a one-for-one basis, for shares of Class A common stock of the Corporation under the Exchange Agreement (see Note 14).

The following is a reconciliation of the numerator and denominator used in the basic and diluted EPS calculations, with amounts in thousands except per share data:

	Year ended December 31, 2012	Year ended December 31, 2011	December 7, 2010 through December 31, 2011
<b>Basic and diluted net income per share:</b>			
<b>Numerator</b>			
Net income available to holders of Class A common stock	\$ 8,958	\$ 12,736	\$ 146
Earnings allocated to participating securities	—	—	—
Earnings available for common stockholders	<u>\$ 8,958</u>	<u>\$ 12,736</u>	<u>\$ 146</u>
<b>Denominator for basic net income per share of Class A common stock</b>			
Weighted average shares of Class A common stock	24,086	16,567	17,319
Add dilutive effect of the following:			
Stock options	—	—	—
Assumed conversion of Holding Units for Class A common stock	—	—	—
Dilutive weighted average shares of Class A common stock	<u>24,086</u>	<u>16,567</u>	<u>17,319</u>
<b>Basic income per share of Class A common stock</b>	<u>\$ 0.37</u>	<u>\$ 0.77</u>	<u>\$ 0.01</u>
<b>Diluted income per share of Class A common stock</b>	<u>\$ 0.37</u>	<u>\$ 0.77</u>	<u>\$ 0.01</u>

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 14. Related Party Transactions**

Amounts receivable from, and payable to, related parties are set forth below, with amounts in millions:

	December 31, 2012	December 31, 2011
<b>Receivables</b>		
Advances to employees	\$ 0.9	\$ 0.5
<b>Payables</b>		
Method Credit Fund	\$ 9.0	\$ —
Employees	0.3	0.3
Shareholders with greater than 5% ownership in the Company	0.7	2.5
Due to Holdings non-controlling members	8.6	3.7
Due to Lucid non-controlling members in connection with trade settlements	9.6	—
Notes payable to Lucid non-controlling members in connection with the Acquisition	22.9	—
Tax receivable agreement	92.3	67.2
	<u>\$ 143.4</u>	<u>\$ 73.7</u>

The Company has advanced funds to several employees. The outstanding balances as of December 31, 2012 and 2011, included in the table above, are included in Other assets in the consolidated statements of financial condition.

Customer account liabilities include balances for employees and shareholders with greater than 5% ownership in the Company. Account liabilities of employees and shareholders with a greater than 5% ownership in the Company as of December 31, 2012 and 2011, included in the table above, are included in Customer liabilities in the consolidated statements of financial condition.

Pursuant to an agreement with a former employee, the Company incurred compensation expense in connection with the IPO in the amount of \$5.7 million for the year ended December 31, 2010. This amount is included in the consolidated statements of operations as Compensation and benefits.

In June 2011, US entered into an agreement with certain founding members of Holdings, whereby, these members reimbursed US for amounts related to National Futures Association ("NFA") and Commodity Futures Trading Commission ("CFTC") matters, up to \$16.3 million.

UK is party to an arrangement with Global Finance Company (Cayman) Limited, ("Global Finance"), and Master Capital Group, S.A.L. ("Master Capital"). A shareholder with greater than a 5% ownership of the Company beneficially owns more than 90% of the equity of Global Finance and Master Capital. Pursuant to such arrangement, Global Finance and Master Capital are permitted to use the brand name "FXCM" and our technology platform to act as the Company's local presence in certain countries in the Middle East and North Africa ("MENA"). UK collects and remits to Global Finance and Master Capital fees and commissions charged by Global Finance and Master Capital to customers in MENA countries. For the years ended December 31, 2012, 2011 and 2010, these fees and commissions were approximately \$2.5 million, \$3.5 million and \$1.8 million, respectively, and are included in the consolidated statements of operations. The Company expects to enter into a definitive agreement in the near future.

In March 2012, the Company entered into a settlement agreement with the former owners of ODL in connection with the acquisition of ODL by the Company in October 2010. The settlement agreement serves to settle outstanding claims arising out of the acquisition of ODL related to certain warranties and indemnities pursuant to the share and purchase agreement. The settlement to the Company included cash of \$1.2 million,

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 14. Related Party Transactions – (continued)**

return of capital, (i.e., equity interest of Holdings) of \$4.0 million, and the forgiveness of the payment of a liability by the Company to the former owners in the amount of \$1.4 million. The Company recorded a gain of \$1.4 million, included in Other income in the consolidated statements of operations, in connection with this settlement. In addition, the settlement required ODL to establish a collateral account for the benefit of the Company to pay certain outstanding third party claims up to an agreed upon amount.

In August 2012, the Company entered into a master guaranty agreement (the “Guaranty”) with Method Credit Fund (“Method”), a newly formed Cayman Island company, owned by certain directors and shareholders of the Company including several of the Company’s executive officers. Pursuant to the Guaranty, Method unconditionally guarantees the obligations of certain counterparties that maintain a margin account with the Company. The Guaranty requires Method to maintain a cash collateral account held by the Company equal to the aggregate amount of margin extended to all counterparties covered by the Guaranty. In exchange for this unconditional guaranty, the Company remits a fee to Method determined on counterparty by counterparty basis which is agreed upon by the Company, Method and the respective counterparty. As of December 31, 2012, the Company held cash collateral in the amount of \$9.0 million and the aggregate amount of margin extended under the Guaranty was \$1.1 million. The cash collateral of \$9.0 million is included Cash and cash equivalents, held for customers and Customer account liabilities in the consolidated statements of financial condition. During 2012, no payments were made by Method to the Company to satisfy a guaranteed counterparty obligation. For the year ended December 31, 2012, fees collected from counterparties and subsequently remitted to Method by the Company under the Guaranty were not material and are included in the consolidated statement of operations.

The Guaranty may be terminated by either the Company or Method at any time provided that if Method elects to terminate the Guaranty Company consent is required if a guaranteed obligation is outstanding. Additionally, the Company maintains a call option to buy the equity stakes of the foregoing directors and shareholders for book value at any time. The right to exercise such option rests exclusively with the independent and disinterested directors of the Company.

Accounts payable and accrued expenses include a balance of \$9.6 million of advances from certain Lucid non-controlling members in connection with trade settlements. Notes payable of \$22.9 million represents the amount borrowed from the Lucid non-controlling members in connection with the Acquisition (see Notes 5 and 20).

In June 2011, US entered into an agreement with certain founding members of Holdings, whereby, these members reimbursed US for amounts related to National Futures Association (“NFA”) and Commodity Futures Trading Commission (“CFTC”) matters, up to \$16.3 million.

**Exchange Agreement**

As discussed in Note 2, Existing Unit Holders owners entered into an Exchange Agreement under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO (subject to the terms of the exchange agreement as described therein), to exchange their Holding Units for shares of the Corporation’s Class A Common Stock on a one-for-one basis at fair value, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. During the year ended December 31, 2012, certain members of Holdings exchanged 10.8 million of their Holding Units, on a one-for-one basis, for shares of Class A common stock of the Corporation under the Exchange Agreement.

**Payments under Tax Receivable Agreement**

As discussed in Note 2, the Corporation entered into a tax receivable agreement with the Existing Unit Holders. The aggregate payments due under the tax receivable agreement were \$100.9 million and \$70.9 million as of December 31, 2012 and 2011, respectively.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 15. Stock-Based Compensation**

The Company has a long term incentive plan (the "LTIP") that provides for the grant of stock options to purchase shares of the Corporation's Class A common stock to its employees ("Employee Stock Options") and the independent board of directors ("Independent Directors Options") (collectively, the "Stock Options"). The Employee Stock Options have a contractual term of seven years and a four-year graded vesting schedule. The Independent Directors Options also have a seven-year contractual term but cliff vest on the first anniversary after the grant date. Under the terms of the LTIP, the Company may issue new shares or treasury shares upon share option exercise.

In January 2012, the Company granted 109,488 stock options to purchase shares of the Corporation's Class A common stock to its independent board of directors. During the year ended December 31, 2012, the Company granted 725,000 stock options to purchase the Corporation's Class A common stock to its employees.

The following table summarizes the Company's stock options activity as of December 31, 2011 and changes for the year then ended:

<b>Options</b>	<b>Shares</b>	<b>Weighted-Average Exercise Price</b>	<b>Weighted-Average Remaining Contractual Term</b>
Outstanding at January 1, 2011	8,127,890	\$ 14.00	—
Granted	690,000	10.73	—
Exercised	—	—	—
Forfeited or expired	(219,750)	14.00	—
Outstanding as of December 31, 2011	8,598,140	\$ 13.74	2.9
Vested or expected to vest at December 31, 2011	8,025,927	\$ 13.75	2.9
Exercisable as of December 31, 2011	2,041,453	\$ 14.00	2.8

The following table summarizes the Company's stock options activity as of December 31, 2012 and changes for the year then ended:

<b>Options</b>	<b>Shares</b>	<b>Weighted-Average Exercise Price</b>	<b>Weighted-Average Remaining Contractual Term</b>
Outstanding at January 1, 2012	8,598,140	\$ 13.74	—
Granted	834,488	9.72	—
Exercised	—	—	—
Forfeited or expired	(254,500)	14.00	—
Outstanding as of December 31, 2012	9,178,128	\$ 13.37	2.1
Vested or expected to vest at December 31, 2012	8,695,163	\$ 13.37	2.1
Exercisable as of December 31, 2012	4,096,140	\$ 13.86	1.9

The weighted-average grant date fair value of options granted during the years 2012, 2011, and 2010 was \$3.55, \$4.26 and \$5.26, respectively.

As of December 31, 2012, the weighted average period over which compensation cost on non-vested Stock Options is expected to be recognized is 2.1 years and the unrecognized expense is \$22.2 million. The Company had 2,046,250 and 2,049,890 vested stock options under LTIP during the years ended December 31, 2012 and 2011, respectively. The fair value of the options vested was \$21.3 million and \$10.7 million during both the years ended December 31, 2012 and 2011, respectively.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 15. Stock-Based Compensation – (continued)**

Stock-based compensation before income taxes included in Compensation and benefits in the consolidated statements of operations was \$9.8 million, \$9.1 million and \$0.7 million for the years ended December 31, 2012, 2011 and 2010, respectively, for the Employee Stock Options. Stock-based compensation before income taxes included in Compensation and benefits in the consolidated statements of operations was \$0.4 million, for each year ended December 31, 2012 and 2011 and not material for the year ended December 31, 2010 for the Independent Directors Options. The total compensation cost capitalized and included in office, communication and computer equipment, net, in the consolidated statements of financial condition was \$1.4 million, \$1.1 million and not material for the years ended December 31, 2012, 2011 and 2010, respectively.

In arriving at stock-based compensation expense, the Company estimates the number of stock-based awards that will be forfeited due to employee turnover. The Company's forfeiture assumption is based primarily on its turn-over historical experience. If the actual forfeiture rate is higher than the estimated forfeiture rate, then an adjustment will be made to increase the estimated forfeiture rate, which will result in a decrease to the expense recognized in the Company's financial statements. If the actual forfeiture rate is lower than the estimated forfeiture rate, then an adjustment will be made to lower the estimated forfeiture rate, which will result in an increase to expense recognized in the Company's financial statements. The expense the Company recognizes in future periods will be affected by changes in the estimated forfeiture rate and may differ significantly from amounts recognized in the current period.

The Company did not have any cash proceeds or income tax benefits realized from the exercise of Stock Options for the years ended December 31, 2012, 2011 and 2010.

**Valuation Assumptions**

Calculating the fair value of Employee Stock Options requires estimates and significant judgment. The Company uses the Black-Scholes option pricing model to estimate the fair value of its employee stock options, consistent with the provisions of ASC 718. The fair value of the Stock Options grant is estimated on the date of the grant using the Black-Scholes option pricing model, and is not remeasured as a result of subsequent stock price fluctuations. Options granted to the Company's independent directors are considered options granted to employees under ASC 718 as defined therein.

Assumptions used in the Black Scholes valuation model were as follows:

	<b>Employee Stock Options</b>			<b>Independent Directors Options</b>		
	<b>For the Year Ended</b>			<b>For the Year Ended</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
Expected term in years	4.75	4.75	4.75	4.00	—	4.0
Risk-free interest rate	0.71%	0.96%	1.57%	0.60%	—	1.28%
Expected volatility	52.00%	56.00%	50.00%	63.00%	—	50.00%
Dividend yield	2.48%	2.24%	1.86%	2.40%	—	1.86%
Estimated fair value at grant date	\$ 3.47	\$ 4.26	\$ 5.26	\$ 4.11	\$ —	\$ 4.88

Expected term for the Employee Stock Option and the Independent Directors Options is based on the simplified method outlined in Staff Accounting Bulletin No. 107, *Valuation of Share-Based Arrangements for Public Companies* ("SAB 107") and Staff Accounting Bulletin No. 110 ("SAB 110"), Use of a Simplified Method in Developing an Estimate of Expected Term of "Plain Vanilla" Share Options. In accordance with SAB 107 and SAB 110, options are considered to be exercised halfway between the average vesting date and the contractual term of each option grant. The simplified method is applicable for "plain vanilla" stock options, as defined in SAB 107, only if the Company does not have sufficient historical data upon which to estimate an expected term. Given that the Corporation's Class A common stock has been publically traded for less than three years, the Company believes that the simplified method is an applicable methodology to estimate the expected term of the options as of the grant date.

TABLE OF CONTENTS

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 15. Stock-Based Compensation – (continued)**

The risk free interest rates for the Employee Stock Options and the Independent Directors Options are based on U.S. treasury instruments whose terms are consistent with the expected lives of the Stock Options.

Expected volatility is based on a weighing of the historical and implied volatilities of the Company and for a set of public guideline companies deemed comparable to it. The guideline companies selected operate in a similar industry, pursue similar market opportunities, and are subject to similar risks of the Company. Changes in the subjective assumptions required in the valuation models may significantly affect the estimated value of the Company's Stock Options, the related stock-based compensation expense and, consequently, its results of operations and comprehensive income.

The dividend yield is determined based on the Company's expected dividend payouts.

The LTIP also provides for other stock based awards ("Other Equity Awards") which may be granted by the Company's Executive Compensation Committee (the "Committee"). Pursuant to the terms of the LTIP, the Committee may grant Other Equity Awards that are valued in whole or in part by reference to or that are otherwise based on the fair market value of the Company's Class A common stock. During the year ended December 31, 2012, the Company granted 945,847 of the Corporation's Class A common stock as Other Equity Awards. The Other Equity Awards were fully vested at the date of the grant. The fair market value of the Other Equity Awards at grant date was \$11.76. Compensation expense before income taxes for the Other Equity Awards, included in Compensation and benefits in the consolidated statements of operations, was \$11.1 million for the year ended December 31, 2012. The Company did not record compensation expense for the years ended December 31, 2011 and 2010 since Other Equity Awards were not granted during those periods.

**Note 16. Stockholders' Equity**

Refer to the description of the Reorganization and IPO as described in Note 2 for further information regarding the current capital structure of the Company.

The Corporation's authorized capital stock consists of 3,000,000,000 shares of Class A common stock, par value \$.01 per share, 1,000,000 shares of Class B common stock, par value \$.01 per share, and 300,000,000 shares of preferred stock, par value \$.01 per share.

***Class A Common Stock Repurchase Program***

On May 17, 2011 and October 17, 2011, the Company's Board of Directors approved the repurchase of \$30.0 million and \$20 million of its Class A common stock (the "Stock Repurchase Program"), respectively. On November 7, 2012, the Board of Directors approved a \$30.0 million increase in the Stock Repurchase Program for an aggregate of \$80.0 million. Purchases under the Stock Repurchase Program may be made from time to time in the open market and in privately negotiated transactions. Under the Stock Repurchase Program, there is no expiration date or other restrictions limiting the period over which the Company can make its share repurchase. The Stock Repurchase Program will expire only when and if the Company has repurchased \$80.0 million of its shares under this program. Under the Stock Repurchase Program, repurchased shares are retired and returned to unissued stock. The size and timing of these purchases are based on a number of factors, including price, business and market conditions.

During the year ended December 31, 2012, the Company repurchased and retired 750,125 shares of its Class A common stock, at an average price of \$9.96 per share, for approximately \$7.5 million pursuant to the trading program under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. The following table presents the changes in the Company's Class A common stock shares outstanding during the year ended December 31, 2012, with amounts in thousands:

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 16. Stockholders' Equity – (continued)**

Class A Common Stock	As of December 31, 2012
Balance at January 1, 2012	\$ 14,899
Issued	9,782
Repurchased	(750)
Exchange of Holdings units into Class A common stock	10,752
Balance at December 31, 2012	<u>\$ 34,683</u>

As of December 31, 2012 and 2011, there were 43 and 100 shares of Class B common stock issued and held by the members of Holdings, respectively.

Holders of shares of our Class A common stock and Class B common stock vote together as a single class on all matters presented to our stockholders for their vote or approval, except as otherwise required by applicable law.

***Class A Common Stock***

Holders of shares of the Corporation's Class A common stock are entitled to one vote for each share held of record on all matters submitted to a vote of stockholders. Holders of shares of Class A common stock are entitled to receive dividends when and if declared by the Corporation's board of directors out of funds legally available therefore, subject to any statutory or contractual restrictions on the payment of dividends and to any restrictions on the payment of dividends imposed by the terms of any outstanding preferred stock. Upon dissolution or liquidation or the sale of all or substantially all of the Corporation's assets, after payment in full of all amounts required to be paid to creditors and to the holders of preferred stock having liquidation preferences, if any, the holders of shares of Class A common stock will be entitled to receive pro rata the Corporation's remaining assets available for distribution. Holders of shares of Class A common stock do not have preemptive, subscription, redemption or conversion rights.

***Class B Common Stock***

Each holder of the Company's Class B common stock is entitled, without regard to the number of shares of Class B common stock held by such holder, to one vote for each Holdings Unit in Holdings held by such holder. The unitholders of Holdings collectively have a number of votes in the Corporation that is equal to the aggregate number of Holdings Units that they hold. Holders of our Class B common stock do not have any right to receive dividends or to receive a distribution upon a liquidation or dissolution of the Corporation.

**Note 17. Employee Benefit Plan**

The Company maintains a defined contribution employee profit-sharing and savings 401(k) plan for all eligible full time employees. The Company was not required to and made no contributions to the plan for the years ended December 31, 2012, 2011 and 2010.

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 18. Net Capital Requirements**

US is registered as a futures commission merchant and a retail foreign exchange dealer with the CFTC and NFA. US is subject to the NFA's net capital requirements for forex dealing members. Since the agency model (see Note 1) is not used for all customer transactions, US is required to maintain "adjusted net capital" equal to or in excess of \$20.0 million plus 5% of all liabilities owed to customers exceeding \$10.0 million. Adjusted net capital and the level of notional values under these transactions change from day to day.

HK is organized in Hong Kong and is a licensed leveraged foreign exchange trading company with the Securities and Futures Commission ("SFC"). HK is subject to required minimum liquid capital financial requirements.

UK is organized in the U.K. and is regulated by the Financial Services Authority ("FSA"). UK is a registered securities and futures firm with the FSA. UK is subject to minimum capital requirements.

ODL and FSL are organized in the U.K. and are regulated by the FSA. ODL is a registered consolidated group company. FSL is a registered broker dealer. ODL and FSL are subject to minimum capital requirements.

FXCMJ is organized in Japan and is regulated by the Finance Services Agency of Japan ("JFSA") and is subject to minimum capital requirements.

Australia is organized in New Zealand and is a registered exchange contract dealer with the Australia Securities & Investments Commission ("ASIC"). Australia is subject to ASIC minimum financial requirements or "adjusted surplus liquid funds."

The minimum capital requirements of the above entities may effectively restrict the payment of cash distributions to members.

The tables below present the capital, as defined by the respective regulatory authority, the minimum capital requirement and the excess capital for US, HK, UK, Australia, ODL, FSL and FXCMJ as of December 31, 2012 and 2011, with amounts in millions:

<b>December 31, 2012</b>							
	<b>US</b>	<b>HK</b>	<b>UK</b>	<b>Australia</b>	<b>ODL</b>	<b>FSL</b>	<b>FXCMJ</b>
Capital	\$ 53.5	\$ 22.7	\$ 73.1	\$ 4.2	\$ 14.1	\$ 30.7	\$ 33.5
Minimum capital requirement	26.1	8.1	17.4	1.2	4.4	4.4	5.6
Excess capital	<u>\$ 27.4</u>	<u>\$ 14.6</u>	<u>\$ 55.7</u>	<u>\$ 3.0</u>	<u>\$ 9.7</u>	<u>\$ 26.3</u>	<u>\$ 27.9</u>
<b>December 31, 2011</b>							
	<b>US</b>	<b>HK</b>	<b>UK</b>	<b>Australia</b>	<b>ODL</b>	<b>FSL</b>	<b>FXCMJ</b>
Capital	\$ 27.1	\$ 17.4	\$ 40.3	\$ 4.3	\$ 38.2	\$ 24.4	\$ 33.6
Minimum capital requirement	26.7	5.5	12.7	1.3	10.2	5.2	9.5
Excess capital	<u>\$ 0.4</u>	<u>\$ 11.9</u>	<u>\$ 27.6</u>	<u>\$ 3.0</u>	<u>\$ 28.0</u>	<u>\$ 19.2</u>	<u>\$ 24.1</u>

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 19. Commitments and Contingencies**

***Operating Lease Commitments***

The Company leases office space and equipment under operating leases. Some of the lease agreements contain renewal options ranging from 3 to 5 years at prevailing market rates. The lease for the office facilities is subject to escalation factors primarily related to property taxes and building operating expenses. Future minimum lease payments under non-cancelable operating leases with terms in excess of one year are as follows as of December 31, 2012, with amounts in thousands:

Year Ending December 31,	As of December 31, 2012
2013	7,032
2014	5,213
2015	3,398
2016	2,469
2017	2,818
Thereafter	24,199
	<u>\$ 45,129</u>

The aggregate rental expense for operating leases charged to operations, included in General and administrative expense in the consolidated statements of operations, for the years ended December 31, 2012, 2011 and 2010, was \$7.9 million, \$8.9 million and \$4.6 million, respectively. These amounts are net of sublease income. There was no sublease income for the year ended December 31, 2012. Sublease income was not material for the years ended December 31, 2011 and 2010. For the years ended December 31, 2012 and 2011, there were no sublease commitments.

***Capital Lease Commitments***

The Company leases office equipment under capital leases. Interest paid as part of our capital lease obligation was not material for the years ended December 31, 2012, 2011, and 2010, respectively. The capital leases expire in 2015. Future minimum lease payments for capital leases are not material for the years 2012 to 2015.

***Litigation***

In the ordinary course of business, we may from time to time be involved in litigation and claims incidental to the conduct of our business, including intellectual property claims. In addition, our business is also subject to extensive regulation, which may result in regulatory proceedings against us. We have been named in various arbitrations and civil litigation cases brought by customers seeking damages for trading losses. Management has investigated these matters and believes that such cases are without merit and is defending them vigorously. However, the arbitrations and litigations are presently in various stages of the judicial process and no judgment can be made regarding the ultimate outcome of the arbitrators' and/or court's decisions.

In August 2011, FXCM US entered into a settlement with the NFA. The settlement terms principally pertain to FXCM US's practice concerning the execution of price improvements in its trading execution system prior to August 2010. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations to pay a fine of \$2.0 million to the NFA and to provide restitution to the affected clients.

In October 2011, FXCM US entered into a settlement with the CFTC. The settlement principally addresses allegations regarding FXCM US's failure to monitor and maintain its trading systems prior to August 2010. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations to pay a fine of \$6.0 million to the CFTC and to provide restitution to the affected clients.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 19. Commitments and Contingencies – (continued)**

The Company incurred costs of approximately \$16.3 million relating to these matters which are included in General and administrative in the consolidated statement of operations. Additionally, in June 2011, FXCM US entered into an agreement with certain founding members of Holdings, whereby these members reimbursed FXCM US for the amounts related to the NFA and CFTC matters, up to \$16.0 million, plus additional amounts, as approved by such founding members. Consequently, there was no impact to the Corporation's net income as the expense was allocated to the respective founding members as permitted under the terms of the LLC Agreement. Accordingly, \$16.3 million of additional capital was provided by the respective founding members.

In October, 2011, the Trustee in bankruptcy, representing three debtors, Certified, Inc., Global Bullion Trading Group, Inc., and WJS Funding, Inc., filed an adversary complaint in the United States Bankruptcy Court for the Southern District of Florida against US, ODL Securities, Inc. and ODL Securities, Ltd. (the "Defendants"). Before the Defendants filed any response, the Trustee amended the Complaint to add ODL Group Limited, FXCM Securities, LLC, FSL, the Corporation and Holdings as Defendants. The Amended Complaint asserts claims under the Federal Bankruptcy Code to recover allegedly preferential and fraudulent transfers to the Defendants, under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C § 1961 et seq., as well as the common law. The Amended Complaint seeks an unspecified amount of compensatory and punitive damages, interests, and costs. The Defendants have filed motions to dismiss the Amended Complaint in its entirety. Thereafter, the parties engaged in non-binding mediation. Ultimately a settlement was reached in the amount of \$0.7 million which was approved by the Bankruptcy Court on June 20, 2012.

In September 2012, the FSA initiated investigations relating to UK's and FSL's past trade execution practices. Although we are in the process of complying with the FSA's requests, we have not been formally notified whether or not the FSA intends to take any action against us with respect to our trade execution practices.

In 2012, FXCMJ accrued \$2.6 million as an estimate to settle certain trading system matters with the JFSA. The Company expects settlement of this matter, including any administrative penalty, in the first quarter of 2013 and does not expect the ultimate settlement amount to differ materially from the amount accrued.

For the outstanding matters referenced above for which a loss is more than remote but less than likely, whether in excess of an accrued liability or where there is no accrued liability, the Company has estimated a range of possible loss. The Company believes the estimate of the aggregate range of possible loss in excess of accrued liabilities for such matters is between nil and \$6.5 million as of December 31, 2012.

In view of the inherent difficulty of predicting the outcome of litigation and claims, the Company often cannot predict what the eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss related to each pending matter may be. Furthermore, the above-referenced matters represented in the estimated aggregate range of possible loss will change from time to time and actual results may vary significantly from the current estimate. An adverse outcome in one or more of these matters could be material to the Company's results of operations or cash.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 20. Debt*****Credit Agreement***

On December 19, 2011, Holdings entered into a three year credit agreement (the "Credit Agreement") with a syndicate of financial institutions. The Credit Agreement provided for a revolving credit facility of up to \$75.0 million. The credit facility is guaranteed by certain subsidiaries of Holdings and is secured by a pledge of all of the equity interests in certain of Holdings' domestic subsidiaries and 65% of the voting equity interests in certain of its foreign subsidiaries.

On November 8, 2012, the Holdings entered into an amendment to the Credit Agreement (the "Amendment"). The Amendment provides Holdings with the ability to increase the credit facility during the term of the Credit Agreement up to a maximum of \$175.0 million. Additionally, the Amendment modified certain terms of the Credit Agreement, among other things, to provide additional flexibility regarding financing and investment initiatives. Simultaneously, on November 8, 2012, Holdings received additional commitments from a group of financial institutions, both new and existing lenders, and increased the credit facility to \$155.0 million. As of December 31, 2012, Holdings' outstanding balance under the Credit Agreement was \$85.0 million.

Under the terms of the Credit Agreement, loans will bear interest at either a Eurodollar Rate or a Base rate (as defined below), at the Holdings' election, plus an applicable margin, based on Holdings' leverage ratio. In addition, the Holdings must pay an annual commitment fee based on Holdings' leverage ratio on the undrawn commitments under the Credit Agreement. The applicable margin and commitment fees are set forth in the table below:

<b>Consolidated Leverage Ratio</b>	<b>Commitment Fee</b>	<b>Applicable Margin for Eurodollar Loans</b>	<b>Applicable Margin for Base Rate Loans</b>
Less than .5 to 1.0	0.25%	1.75%	0.75%
Greater than or equal to 0.5 to 1.0 but less than 1.0 to 1.0	0.30%	2.00%	1.00%
Greater than or equal to 1.0 to 1.0 but less than 1.50 to 1.00	0.35%	2.25%	1.25%
Greater than or equal to 1.50 to 1.00	0.40%	2.50%	1.50%

The Base Rate means for any day a fluctuating rate per annum equal to the highest of (a) the Federal Funds Rate, as defined in the Credit Agreement, plus 0.5%, (b) the rate of interest in effect for such day as publicly announced from time to time by the administrative agent, Bank of America, N.A., as its prime rate, and (c) the Eurodollar Rate plus 1.00%. The Eurodollar Rate means the rate per annum equal to (i) the British Bankers Association LIBOR Rate, or (ii) if such rate is not available, the rate per annum determined by the administrative agent.

Interest expense related to borrowings under the Credit Agreement, including the amortization of debt financing costs, included in interest on borrowings in the consolidated statements of operations was \$0.9 million and \$0.8 million for the years ended December 31, 2012 and 2011, respectively. No interest expense or commitment fee was recorded for the year ended December 31, 2010 since the Credit Agreement was not in place during this period.

Pursuant to covenants in the Credit Agreement, Holdings' is required to maintain: excess net capital amount of 125% of adjusted net capital required to be maintain as of the last day of any fiscal quarter for US and UK (see Note 18), Consolidated Interest Coverage Ratio and Consolidated Leverage Ratio, as defined in Credit Agreement, of 4:00 to 1:00 and 2:00 to 1:00, respectively, as of the last day of any fiscal quarter and Net Unhedged Exposure, as defined Credit Agreement, of less than 20% of total assets of Holdings and its

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 20. Debt – (continued)**

subsidiaries. In addition, the Credit Agreement contains certain customary covenants as well as certain customary events of default. As of December 31, 2012, Holdings was in compliance with all material covenants.

During the years ended December 31, 2012 and 2011, the weighted average dollar amount of borrowings related to the Credit Agreement was \$41.2 million and the weighted average interest rate was 2.1%. The weighted dollar amount related to the Credit Agreement and the weighted interest rate do not apply to the year ended December 31, 2010 since the Credit Agreement was not in place during the period.

**Notes Payable**

As discussed in Note 5, in connection with the acquisition of Lucid, the Company issued to the Lucid Sellers 3.5% unsecured promissory notes in the amounts of \$71.4 million and \$15.8 maturing on December 21, 2012. On December 21, 2012, the Company repaid \$64.0 million of these notes and issued a series of 2.25%, \$22.9 million unsecured promissory notes for the balance. The notes mature on December 21, 2013.

**Note 21. Derivative Financial Instruments**

The fair values of the assets and liabilities associated with the Company's derivative financial instruments included in Due to/from brokers in the consolidated statements of financial condition was not material as of December 31, 2012 and 2011. For the years ended December 31, 2012, 2011 and 2010, trading revenues of \$401.7 million, \$392.7 million and \$346.3 million included net losses of \$55.9 million, \$8.8 million and \$5.4 million, respectively, related to derivative financial instrument transactions. The net notional value of the derivative financial instruments was \$471.1 million and \$104.6 million as of December 31, 2012 and 2011, respectively.

**Note 22. Income Taxes**

Holdings, operates in the U.S. as a limited liability company that is treated as a partnership for U.S. federal, state, and local income tax purposes. As a result, Holdings income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holdings' income attributable to the Corporation and excludes the income attributable to other members of Holdings whose income is included in Net income attributable to non-controlling interest in FXCM Holdings LLC in the consolidated statements of operations. Prior to the IPO, the Company operated as a limited liability company that was treated as partnership for U.S. federal income tax purposes. As a result, the Company's income from its U.S. operations was not subject to U.S. federal income tax because such income was entirely attributed to its members and included in the tax returns of its members.

In addition to U.S. federal and state income taxes, the Company is subject to Unincorporated Business Tax which is attributable to Holdings' operations apportioned to New York City. The Company's foreign subsidiaries are also subject to local taxes.

Income before income taxes, as shown in the consolidated statements of operations, includes the following income components, with amounts in thousands:

	<b>Years Ended December 31,</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>
Domestic	19,794	29,035	92,724
Foreign	27,670	40,562	11,586
	<u>47,464</u>	<u>69,597</u>	<u>104,310</u>

Foreign income tax	4,504	(5,850)	969
Subtotal	<u>7,170</u>	<u>(74)</u>	<u>976</u>
Total provision for taxes	<u>8,986</u>	<u>10,816</u>	<u>4,149</u>

The following table reconciles the provision for income taxes to the U.S. federal statutory tax rate:

	<b>Year Ended December 31,</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>
Statutory U.S. federal income tax rate	34.0%	34.0%	35.0%
Income passed through to non-controlling members	(15.5)	(13.0)	(35.0)
State and local income tax	1.0	2.1	0.6
Foreign income tax	(3.10)	(0.2)	3.4
Release of valuation allowance	—	(11.8)	—
Foreign tax credit valuation allowance	2.5	0.8	—
Impact of rate change on deferred tax assets	—	4.0	—
Other	—	(0.4)	—
Effective tax rate	<u>18.9%</u>	<u>15.5%</u>	<u>4.0%</u>

The increase in the effective tax rate for the year ended December 31, 2012 compared to the year ended December 31, 2011 was primarily due to an increase in the Corporation's ownership in Holdings. The increase in the Corporation's ownership in Holdings is due to members Existing Unit Holders exchanging their membership units for the Corporation's Class A common stock. The Company's effective tax rate increases as additional exchanges occur because the portion of Holdings' income attributable to the Corporation increases. The effect of Holdings member unit exchanges is partially offset by the Corporation's Class A common stock repurchases. Anytime the Corporation repurchases shares of its Class A common stock, Holdings, enters into an equivalent Holdings membership unit transaction with the Corporation. The effect of these repurchases decreases the Corporation's ownership in Holdings and, accordingly, decreases the portion of Holdings' income attributable to the Corporation. See Note 4 for further details regarding changes in the Corporation's ownership in Holdings. In addition, the Company's effective tax rate increased due to the Company earning a higher portion of its income from subsidiaries (primarily Lucid) taxed locally as corporations in their respective foreign jurisdictions in 2012. This increase in tax on foreign sourced income is somewhat offset by a lower statutory tax rate in effect in the U.K. for the year ended December 31, 2012. The Company's effective tax rate for the year ended December 31, 2011 reflects the release of valuation allowance relating to FXCMJ's tax loss carryforwards.

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 22. Income Taxes – (continued)**

Deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. A summary of the tax effects of the temporary differences is as follows, with amounts in thousands:

	<b>Years Ended December 31,</b>	
	<b>2012</b>	<b>2011</b>
<b>Deferred tax assets</b>		
Equity based compensation	1,259	206
Investment in partnership	118,327	79,353
<b>Fixed assets</b>	<b>4,009</b>	<b>4,052</b>
Tax loss carryforwards	7,761	7,602
Tax credit carryforward/foreign sub income	2,083	878
Japan software	3,083	4,045
Other	140	280
<b>Gross deferred tax assets</b>	<b>136,662</b>	<b>96,416</b>
<b>Less: valuation allowance</b>	<b>(8,843)</b>	<b>(878)</b>
<b>Net deferred tax asset</b>	<b>127,819</b>	<b>95,538</b>
<b>Deferred tax liabilities</b>		
Fixed assets	65	54
Intangible assets	6,292	8,873
Goodwill	12,563	—
Software development cost	193	116
Other	338	242
<b>Gross deferred tax liabilities</b>	<b>19,451</b>	<b>9,285</b>
<b>Net deferred tax asset</b>	<b>108,368</b>	<b>86,253</b>

The increase in deferred tax assets was primarily driven by the increase in the Corporation's ownership in Holdings as a result of members of Holdings exchanging their membership units for the Corporation. Class A common stock. As Existing Unit Holder exchange their membership units, the Company records a deferred tax benefit related to Holdings election under Section 754 of the Internal Revenue Code (see Note 2).

The Company assesses available positive and negative evidence to estimate if it is more-likely-than-not to use certain jurisdiction-based deferred tax assets including certain tax credits and net operating loss carryovers. On the basis of this assessment, a valuation allowance of \$8.8 million was recorded as of December 31, 2012.

The Company has foreign net operating loss carryforwards of \$9.1 million and \$19.6 million from Japan and the United Kingdom, respectively. The Japanese net operating loss carryforwards may be carried forward for nine years, while the United Kingdom net operating loss has an indefinite life. The tax credit carryforward includes foreign tax credits of \$1.9 million that may be carried forward for a period of 10 years and unincorporated business tax credits of \$0.2 million that may be carried forward for an indefinite period.

The Company does not provide for deferred taxes on the excess of the financial reporting over the tax basis in its investments in foreign subsidiaries that are essentially permanent in duration. That excess totaled \$22.8 million as of December 31, 2012.

[TABLE OF CONTENTS](#)

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 22. Income Taxes – (continued)**

Taxes payable as of December 31, 2012 and 2011 were \$1.2 million and \$8.1 million, respectively, and are included in accounts payable and accrued expenses in the consolidated statements of financial condition (see note 12). Taxes receivable as of December 31, 2012 and 2011 were \$6.0 million and \$2.0 million respectively.

The following is a tabular reconciliation of the total amounts of unrecognized tax benefits, with amounts in thousands:

	2012	2011	2010
<b>Unrecognized tax benefits – January 1</b>	<b>\$ 223</b>	<b>\$ —</b>	<b>\$ —</b>
Gross increases – tax positions in prior period	1	44	—
Gross decreases – tax positions in prior period	(16)	—	—
Gross increases – tax positions in current period	3,483	179	—
Settlement	—	—	—
Lapse of statute of limitations	—	—	—
<b>Unrecognized tax benefits – December 31</b>	<b>\$ 3,691</b>	<b>\$ 223</b>	<b>\$ —</b>

The Company recognizes interest and penalties related to unrecognized tax benefits within the income tax expense line in the accompanying consolidated statement of operations. Accrued interest and penalties are included within the related tax liability line in the consolidated statements of financial condition.

Related to the unrecognized tax benefits noted above, the Company accrued penalties and interest of immaterial amounts during 2012. The Company accrued penalties and interest of nil for the years ended December 31, 2012 and 2011.

The Company does not believe that it will have a material increase in its unrecognized tax benefits during the coming year.

The Company is subject to taxation in the United States and various states and foreign jurisdictions. As of December 31, 2012, the Company's tax years for 2009, 2010, and 2011 are subject to examination by the tax authorities. With a few exceptions, as of December 31, 2012, the Company is no longer subject to U.S. federal, state, local, or foreign examinations by tax authorities for years before 2009.

**Note 23. Foreign Currencies and Concentrations of Credit Risk**

Under the agency model, the Company accepts and clears FX spot contracts for the accounts of its customers (see Notes 1 and 3). These activities may expose the Company to off-balance-sheet risk in the event that the customer or other broker is unable to fulfill its contracted obligations and the Company has to purchase or sell the financial instrument underlying the contract at a loss.

In connection with these activities, the Company executes and clears customers' transactions involving the sale of foreign currency not yet purchased, substantially all of which are transacted on a margin basis subject to internal policies. Such transactions may expose the Company to off-balance-sheet risk in the event margin deposits are not sufficient to fully cover losses that customers may incur. In the event that a customer fails to satisfy its obligations, the Company may be required to purchase or sell financial instruments at prevailing market prices to fulfill the customer's obligation.

The Company controls such risks associated with its customer activities by requiring customers to maintain margin collateral, in the form of cash, in compliance with various internal guidelines. The Company's trading software technology monitors margin levels on a real time basis and, pursuant to such guidelines, requires customers to deposit additional cash collateral, or to reduce positions, if necessary. The system is designed to ensure that any breach in a customer's margin requirement as a result of losses on the trading account will automatically trigger a final liquidation, which will execute the closing of all positions.

**FXCM Inc.**  
**(Prior to December 7, 2010, FXCM Holdings, LLC and Subsidiaries)**

**Notes to Consolidated Financial Statements**

**Note 23. Foreign Currencies and Concentrations of Credit Risk – (continued)**

Exposure to credit risk is therefore minimal. Institutional customers are permitted credit pursuant to limits set by the Company's prime brokers. The prime brokers incur the credit risk relating to the trading activities of these customers in accordance with the respective agreements between such brokers and the Company.

The Company is engaged in various trading activities with counterparties which include brokers and dealers, futures commission merchants, banks, and other financial institutions. In the event counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the financial instrument. It is the Company's policy to: (i) perform credit reviews and due diligence prior to conducting business with counterparties; (ii) set exposure limits and monitor exposure against such limits; and (iii) periodically review, as necessary, the credit standing of counterparties using multiple sources of information. The Company's due from brokers balance included in the consolidated statements of financial condition was \$8.0 million and \$1.3 million as of December 31, 2012 and 2011, respectively. As of December 31, 2012, 91.5% of the Company's due from brokers balance, included on the consolidated statements of financial condition, was from one large financial institution. As of December 31, 2011, 72.7% of the Company's due from brokers balance, included in the consolidated statements of financial condition, was from one large financial institution. Three banks held more than 10.0% each of the Company's total cash and cash equivalents and cash and cash equivalents, held for customers as of December 31, 2012 and 2011.

**Note 24. Segments**

ASC 280, *Segments Reporting*, establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. The Company's operations relate to FX trading and related services and operate in two segments — retail and institutional, with different target markets and are covered by a separate sales force, customer support and trading platforms. The Company's segments are organized around three geographic areas. These geographic areas are the United States, Asia and Europe and are based on the location of its customers' accounts.

***Retail Trading***

The Company operates its retail business whereby it acts as an agent between retail customers and a collection of large global banks and financial institutions by making foreign currency markets for customers trading in foreign exchange spot markets through its Retail Trading business segment. The Retail Trading business segment also includes the Company's white label relationships CFDs, payments for order flow and rollovers. In addition, the Retail Trading business segment includes offerings to some of the Company's smaller retail clients to trade with a dealing desk, or principal model.

***Institutional Trading***

Institutional Trading facilitates spot foreign currency trades on behalf of institutional customers, market making and electronic trading in the institutional foreign exchange spot and futures markets. The facilitation of spot foreign currency trades allows customers to obtain the best execution price from external banks and financial institutions.

**Note 25. Subsequent Events**

The Company has evaluated subsequent events after the date of the consolidated financial statements to consider whether or not the impact of such events needed to be reflected or disclosed in the consolidated financial statements. Such evaluation was performed through the report date of the consolidated financial statements.

The Company declared a quarterly dividend of \$0.06 per share on its outstanding Class A common stock. The dividend is payable on April 1, 2013 to Class A stockholders of record at the close of business on March 25, 2013.

TABLE OF CONTENTS**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures.****Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2012. Based upon that evaluation and subject to the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2012, the design and operation of our disclosure controls and procedures were effective to accomplish their objectives at the reasonable assurance level.

**Management's Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate controls over financial reporting (as that term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Internal control over financial reporting is a process to provide reasonable assurance regarding the reliability of our financial reporting for external purposes in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes maintaining records that, in reasonable detail, accurately and fairly reflect our transactions, providing reasonable assurance that transactions are recorded as necessary for the preparation of our financial statements, providing reasonable assurance that receipts and expenditures of assets are made in accordance with management authorization and providing reasonable assurance that unauthorized acquisition, use or disposition of assets that could have a material effect on our financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2012.

The effectiveness of our internal control over financial reporting has been audited by the our independent auditor, Ernst & Young LLP, a registered public accounting firm, as stated in their report herein.

TABLE OF CONTENTS**Attestation Report of Independent Registered Public Accounting Firm****Report of Independent Registered Public Accounting Firm****The Board of Directors and Shareholders of FXCM Inc.**

We have audited FXCM Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). FXCM Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Lucid Markets Trading Ltd., which is included in the 2012 consolidated financial statements of FXCM Inc. and constituted \$40.1 million and \$13.6 million of total and net assets, respectively, as of December 31, 2012 and \$42.1 million and \$21.4 million of revenues and net income, respectively, for the year then ended. Our audit of internal control over financial reporting of FXCM Inc. also did not include an evaluation of the internal control over financial reporting of Lucid Markets Trading Ltd.

In our opinion, FXCM Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of FXCM Inc. as of December 31, 2012 and 2011 and the related consolidated statements of operations, comprehensive income, stockholders' equity/members' capital, and cash flows for each of the three years in the period ended December 31, 2012 of FXCM Inc. (prior to December 7, 2010, FXCM Holdings LLC and subsidiaries) and our report dated March 15, 2012 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP  
New York, NY  
March 15, 2013

TABLE OF CONTENTS**Changes in Internal Control over Financial Reporting**

On June 18, 2012, the Company completed its acquisition of Lucid. Management has considered this transaction material to the results of operations, cash flows and financial position from the date of the acquisition through December 31, 2012, and believes that the internal controls and procedures of the acquisition have a material effect on internal controls over financial reporting. In accordance with SEC guidance, management has elected to exclude Lucid from its December 31, 2012 assessment of and report on internal controls over financial reporting. The Company is currently in the process of incorporating the internal controls and procedures of Lucid into the internal controls over financial reporting for our assessment of and report on internal controls over financial reporting for December 31, 2013. Management has not identified any other changes in the Company's internal control over financial reporting that occurred during the year ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**Item 9B. Other Information**

None.

TABLE OF CONTENTS**PART III**

The information required by Part III is incorporated by reference to the information to be set forth in our definitive Proxy Statement for the 2013 Annual Meeting of Stockholders (the “Proxy Statement”). The Proxy Statement is to be filed with the SEC pursuant to Regulation 14A of the Exchange Act, no later than 120 days after the end of the fiscal year covered by this Annual Report.

**PART III****Item 10. Directors, Executive Officers and Corporate Governance**

The information regarding our directors and executive officers set forth under the captions “Proposal No. 1 — Election of Directors” and “The Board of Directors and Certain Governance Matters — Executive Officers of the Company” in the Proxy Statement is incorporated herein by reference.

The information regarding compliance with Section 16(a) of the Exchange Act set forth under the caption “Section 16(a) Beneficial Ownership Reporting Compliance” in the Proxy Statement is incorporated herein by reference.

The information regarding our Code of Ethics, our audit committee and our audit committee financial expert under the captions “The Board of Directors and Certain Governance Matters — Code of Ethics for Financial Professionals,” “The Board of Directors and Certain Governance Matters — Board Committees and Meetings” and “The Board of Directors and Certain Governance Matters — Committee Membership — Audit Committee” in the Proxy Statement is incorporated herein by reference.

**Code of Ethics**

The Company has adopted a Code of Ethics for Financial Professionals, which is applicable to our Chief Executive Officer, Chief Financial Officer, our principal accounting officer or controller and to other professionals of the Company serving in a finance, accounting, corporate treasury or tax role. The Code of Ethics for Financial Professionals may be found on our website at [www.fxcn.com](http://www.fxcn.com) under Company Profile: Investor Relations: Corporate Governance: Code of Ethics for Financial Professionals. If the Company ever were to amend or waive any provision of its Code of Ethics for Financial Professionals, the Company intends to satisfy its disclosure obligations with respect to any such waiver or amendment by posting such information on its website set forth above rather than by filing a Form 8-K.

**Item 11. Executive Compensation**

## Exhibit 31.1

## CHIEF EXECUTIVE OFFICER CERTIFICATION

I, Dror (Drew) Niv, certify that:

1. I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2012 of FXCM Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report)] that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## CHIEF FINANCIAL OFFICER CERTIFICATION

I, Robert Lande, certify that:

1. I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2012 of FXCM Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Significant Accounting Policies and Estimates (Policies)	12 Months Ended Dec. 31, 2012																		
<u>Accounting Policies [Abstract]</u>																			
<u>Basis of Presentation</u>	<p><b><i>Basis of Presentation</i></b></p> <p>The accompanying consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Company consolidates those entities in which it is the primary beneficiary of a variable-interest entity as required by ASC 810, <i>Consolidations</i> ("ASC 810"), or entities where it has a controlling interest. Intercompany accounts and transactions are eliminated in consolidation.</p> <p>As indicated above, the Corporation operates and controls all of the businesses and affairs of Holdings and its subsidiaries. As such, Holdings meets the definition of a variable interest entity under ASC 810. Further, the Corporation is the primary beneficiary of Holdings as a result of its 100% voting power and control over Holdings. As a result, the Corporation consolidates the financial results of Holdings and records a non-controlling interest for the economic interest in Holdings held by the Existing Unit Holders to the extent that the book value of their interest in Holdings is greater than zero. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 42.5% and 57.5%, respectively, as of December 31, 2012. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 20.4% and 79.6%, respectively, as of December 31, 2011.</p> <p>Net income attributable to the non-controlling interest on the consolidated statements of operations represents the portion of earnings or loss attributable to the economic interest in Holdings held by the non-controlling unit holders and the portion of earnings or loss attributable to the economic interest in Lucid (see Note 5) held by Lucid non-controlling members. Non-controlling interest in the consolidated statements of financial condition represents the portion of net assets of Holdings attributable to the non-controlling unit holders based on total units of Holdings owned by such unit holder and the portion of the net assets of Lucid attributable to the non-controlling Lucid members based on the equity interest owned by each of the Lucid non-controlling members.</p> <p>The Company's consolidated financial statements include the following subsidiaries of Holdings:</p> <table border="0"> <tr> <td>Forex Capital Markets LLC</td><td>("US")</td></tr> <tr> <td>FXCM Asia Limited</td><td>("HK")</td></tr> <tr> <td>Forex Capital Markets Limited</td><td>("UK")</td></tr> <tr> <td>FXCM Australia Limited</td><td>("Australia")</td></tr> <tr> <td>ODL Group Limited</td><td>("ODL")</td></tr> <tr> <td>FXCM Securities Limited</td><td>("FSL")</td></tr> <tr> <td>FXCM Japan Securities Co., Ltd.</td><td>("FXCMJ")</td></tr> <tr> <td>FXCM UK Merger Limited</td><td>("Merger")</td></tr> <tr> <td>Lucid Markets Trading Limited</td><td>("Lucid")</td></tr> </table> <p>FXCMJ a wholly owned subsidiary of Holdings, has a fiscal year end of March 31 while the Company has a fiscal year end of December 31. FXCMJ is a Japanese based foreign exchange provider and is required under Japanese law to have a fiscal year end of March 31. The difference between the Company's reporting year end and FXCMJ does not result in a material impact on the Company's financial position or results of operations.</p> <p>Certain reclassifications have been made to previously reported amounts to conform to the current presentation.</p>	Forex Capital Markets LLC	("US")	FXCM Asia Limited	("HK")	Forex Capital Markets Limited	("UK")	FXCM Australia Limited	("Australia")	ODL Group Limited	("ODL")	FXCM Securities Limited	("FSL")	FXCM Japan Securities Co., Ltd. FXCM Japan Securities Co., Ltd.	("FXCMJ")																		
FXCM UK Merger Limited	("Merger")																		
Lucid Markets Trading Limited	("Lucid")																		
<u>Use of Estimates</u>	<p><b><i>Use of Estimates</i></b></p> <p>The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements as well as the reported amount of revenue and expenses during the year. Actual results could differ from those estimates and could have a material impact on the consolidated financial statements.</p>																		
<u>Cash and Cash Equivalents</u>	<p><b><i>Cash and Cash Equivalents</i></b></p> <p>Cash and cash equivalents include cash at banks and highly liquid instruments with original maturities of less than 90 days at the time of purchase and cash held by FX and CFD market makers related to hedging activities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.</p>																		
<u>Cash and Cash Equivalents, held for customers</u>	<p><b><i>Cash and Cash Equivalents, held for customers</i></b></p> <p>Cash and cash equivalents, held for customers represents cash held to fund customer liabilities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.</p> <p>The balance arises primarily from cash deposited by customers and net realized gains from customer trading activity. The Company records a corresponding liability in connection with this amount that is included in customer account liabilities in the consolidated statements of financial condition (see Note 6). A portion of the balance is not available for general use due to legal restrictions in accordance with certain jurisdictional regulatory requirements. These legally restricted balances were \$1.0 billion and \$0.9 billion as of December 31, 2012 and 2011, respectively.</p>																		
<u>Due from/to Brokers</u>	<p><b><i>Due from/to Brokers</i></b></p> <p>Due from/to brokers represents the amount of the unsettled spot currency trades that the Company has open with its financial institutions. Also included in due from/to brokers is the fair value of open future contracts discussed above. The Company has master netting agreements with its respective counterparties under which its due to/from brokers are presented on a net-by-counterparty basis in accordance with ASC 815.</p>																		
<u>Derivatives</u>	<p><b><i>Derivatives</i></b></p> <p>Derivative financial instruments are accounted for in accordance with ASC 815, <i>Derivatives and Hedging</i> ("ASC 815"), and are included in due to/from brokers in the consolidated statements of financial condition. The Company recognizes all derivative financial instruments in the consolidated balance sheet as either assets or liabilities at fair value. The Company enters into future contracts to (i) economically hedge the open customer contracts on its CFD business and (ii) hedge trading in its electronic market making and institutional foreign exchange spot and futures markets. Future contracts are</p>																		

exchanged traded contracts to either purchase or sell a specific asset at a specified future date for a specified price. Gains or losses on future contracts related to the Company's CFD business are included in Retail trading revenue and gains or losses on hedge trading in its electronic market making and institutional foreign exchange spot and futures markets are included in Institutional trading revenue in the consolidated statements of operations.

#### Fair Value Measurements

##### ***Fair Value Measurements***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. These three levels of fair value hierarchy are defined as follows:

***Level I:*** Quoted prices in active markets for identical assets or liabilities, accessible by the Company at the measurement date.

***Level II:*** Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

***Level III:*** Unobservable inputs for assets or liabilities.

As of December 31, 2012 and 2011, substantially all of the Company's financial instruments were carried at fair value based on spot exchange rates broadly distributed in active markets, or amounts approximating fair value. Cash and cash equivalents and cash and cash equivalents, held for customers are deemed to be Level I financial assets. Open futures contracts included in Due from brokers and Due to brokers are classified as Level I financial assets and liabilities, respectively, as they are actively traded and valued at their quoted market prices. Unsettled spot currency trades included in Due from brokers and Due to brokers are classified as Level II financial assets and liabilities, respectively, and are carried at contracted amounts, which approximate fair value. Other assets, including receivables from others, are carried at contracted amounts, which approximate fair value and are classified as Level II financial assets. Other liabilities, including customer account liabilities, payables to others, credit agreement and notes payable are carried at contracted amounts, which approximates fair value and are classified as Level II financial liabilities.

The Company did not have any Level III financial assets or liabilities as of December 31, 2012 and 2011. The Company did not have any transfers in or out of Level I and II during the year ended December 31, 2012.

#### Office, Communication and Computer Equipment, net

##### ***Office, Communication and Computer Equipment, net***

Office, communication and computer equipment, net, consist of computer equipment, purchased technology hardware and software, internally developed software, leasehold improvements, furniture and fixtures and other equipment, licenses and communication equipment. Office, communication and computer equipment are recorded at historical cost, net of accumulated depreciation. Additions and improvements that extend the lives of assets are capitalized, while expenditures for repairs and maintenance are expensed as incurred. Certain costs of software developed or obtained for internal use are capitalized. Depreciation is computed using the straight-line method. The Company depreciates these assets using the following useful lives:

Computer equipment	3 to 5 years
Software	2 to 5 years
Leasehold improvements	Lesser of the estimated economic useful life or the term of the lease
Furniture and fixtures and other equipment	3 to 5 years
Licenses	2 to 3 years
Communication equipment	3 to 5 years

#### Valuation of Other Long-Lived Assets

##### ***Valuation of Other Long-Lived Assets***

The Company also assesses potential impairments of its other long-lived assets, including office, communication and computer equipment, when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is recognized when the carrying amount of the long-lived asset exceeds its fair value and is not recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Any required impairment loss is measured as the amount by which the carrying amount of a long-lived asset exceeds its fair value and is recorded as a reduction in the carrying value of the related asset and a charge to operating results. There was no impairment of other long-lived assets in the years ended December 31, 2012, 2011 and 2010.

#### Business Combination

##### ***Business Combination***

The Company accounts for business acquisitions in accordance with ASC 805 and records assets acquired and liabilities assumed at their fair values as of the acquisition date. The Company records any excess purchase price over the value assigned to net tangible and identifiable intangible assets of a business acquired as goodwill. Acquisition related costs are expensed as incurred. See Note 5 for further details.

#### Goodwill

##### ***Goodwill***

The Company recorded goodwill from the acquisitions of ODL, FXCMJ, Foreland Forex Co. Limited ("Foreland") and Lucid. Goodwill represents the excess purchase price over the value assigned to the net tangible and identifiable intangible assets of a business acquired. Goodwill is allocated to the Company's reporting units based on the assignment of the fair values of each reporting unit of the acquired company. For purposes of the goodwill impairment test, the Company has identified its Retail and Institutional trading segments as its reporting units. The Company performs a two-step goodwill impairment review at the reporting unit level annually, or in interim periods if certain events occur indicating that the carrying value may be impaired. The Company tests for impairment during the fourth quarter of our fiscal year using October 1 carrying values.

The first step of the two-step process involves a comparison of the estimated fair value of a reporting unit to its carrying amount, including goodwill. In performing the first step, the Company determines the fair value of a reporting unit using a discounted cash flow ("DCF") analysis. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, the amount and timing of expected future cash flows. The cash flows employed in the DCF analyses are based on the Company's most recent budgets and business plans and, when applicable, various growth rates are assumed for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the respective reporting units. If the

estimated fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with its carrying amount to measure the amount of impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination (i.e., the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that reporting unit including any unrecognized intangible assets as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid). If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the reporting unit's goodwill, an impairment loss is recognized in an amount equal to that excess.

There was no impairment of goodwill for the year ended December 31, 2012. Although there is no impairment as of December 31, 2012, events such as economic weakness and unexpected significant declines in operating results of reporting units may result in our having to perform a goodwill impairment test for some or all of our reporting units prior to the required annual assessment. These types of events and the resulting analysis could result in goodwill impairment charges in the future. See Note 9 below for further discussion.

#### Other Intangible Assets, net

##### ***Other Intangible Assets, net***

Other intangible assets, net, primarily include customer relationships, proprietary technology and non-compete agreements. Customer relationships were acquired from ODL, Foreland and FXCMJ, non-compete agreements were acquired from ODL, and Lucid and the proprietary technology was acquired from Lucid.

The customer relationships and non-compete agreements are finite-lived intangibles and are amortized on a straight-line basis over their estimated average useful life of 2 to 9 years and 2 to 3 years, respectively. Proprietary technology is also finite-lived intangibles and is amortized on a straight-line basis over their estimated average useful life of 4 to 7 years, respectively. The useful life of these intangibles is based on the period they are expected to contribute to future cash flows as determined by the Company's historical experience. For these finite-lived intangible assets subject to amortization, impairment is considered upon certain "triggering events" and is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset. There was no impairment of finite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

The FX trading license is an indefinite-lived asset that is not amortized but tested for impairment. The Company's policy is to test for impairment at least annually or in interim periods if certain events occur indicating that the fair value of the asset may be less than its carrying amount. An impairment test on this indefinite-lived asset is performed during the fourth quarter of the Company's fiscal year using the October 1<sup>st</sup> carrying value. Impairment exists if the carrying value of the indefinite-lived intangible asset exceeds its fair value. There was no impairment of indefinite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

#### Equity Method Investment

##### ***Equity Method Investment***

Investments where the Company is deemed to exercise significant influence (generally defined as owning a voting interest of 20% to 50%), but no control, are accounted for using the equity method of accounting. The Company records its pro-rata share of earnings or losses each period and records any dividends as a reduction in the investment balance. These investments are included in Other assets in the consolidated statements of financial condition and earnings or losses are included in Other income in the consolidated statements of operations. Equity method investments are included in corporate for purposes of segment reporting (see Note 24).

#### Accounts Receivable, net

##### ***Accounts Receivable, net***

As of December 31, 2012 and 2011, accounts receivable, net, consisted primarily of amounts due from institutional customers relating to the Company's FX business, and fees receivable from the Company's white label service to third parties and payments for order flow, described in "Retail Trading Revenue" below. Receivables are shown net of reserves for uncollectible accounts. The reserve for bad debts is maintained at a level that management believes to be sufficient to absorb estimated losses in the accounts receivable portfolio. The reserve is increased by the provision for bad debts which is charged against operating results and decreased by the amount of charge-offs, net of recoveries. The amount charged against operating results is based on several factors including, but not limited to, a continuous assessment of the collectability of each account, the length of time a receivable is past due and our historical experience with the particular customer. As of December 31, 2012 and 2011, the reserve netted against receivables in the consolidated statements of financial condition was not material.

#### Other Assets

##### ***Other Assets***

Other assets include prepaid expenses, equity method investments, deposits for rent security and employee advances (see Note 11).

#### Accounts Payable and Accrued Expenses

##### ***Accounts Payable and Accrued Expenses***

Accounts payable and accrued expenses include operating expenses payable, commissions payable which represents balances owed to referring brokers for trades transacted by customers that were introduced to the Company by such brokers, taxes payable, due to members pursuant to a tax receivable agreement (see Note 14), due to the Lucid non-controlling members in connection with trade settlements, bonuses payable, deferred rent, interest due on borrowings and a payable for a portion of the cash consideration relating to the business acquisitions (see Notes 5 and 12).

#### Foreign Currency

##### ***Foreign Currency***

Foreign denominated assets and liabilities are re-measured into the functional currency at exchange rates in effect at the statement of financial condition dates through the consolidated statements of operations. Gains or losses resulting from foreign currency transactions are re-measured using the rates on the dates on which those elements are recognized during the period, and are included in retail and institutional trading revenue in the consolidated statements of operations. The Company recorded a gain of \$0.8 million, \$3.1 million and \$2.8 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Translation gains or losses resulting from translating the Company's subsidiaries' financial statements from the functional currency to the reporting currency, net of tax, are included in Foreign currency translation gain (loss) in the consolidated statements of comprehensive income. Assets and liabilities are translated at the statement of financial condition date while revenues and expenses are translated at an applicable average rate.

#### Revenue Recognition

##### ***Revenue Recognition***

The Company makes foreign currency markets for customers trading in FX spot markets and through its subsidiary FSL, engages in equity and related brokerage activities. FX transactions are recorded on the trade date and positions are marked to market daily with related gains and losses, including gains and losses on open spot transactions, recognized currently in income. Commissions earned on brokerage activities are recorded on a trade date basis and are recognized currently in income.

#### Retail Trading Revenue

##### ***Retail Trading Revenue***

Under the Company's retail agency FX offering, trading revenue is earned by adding a markup to the price provided by FX market makers generating trading revenue based on the volume of transactions and is recorded on trade date. Under the agency model, when a customer executes a trade on the best price quotation presented by the FX market maker, the Company acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. This agency model has the effect of automatically hedging the Company's positions and eliminating market risk exposure. Retail trading revenues principally represent the difference of the Company's realized and unrealized foreign currency trading gains or losses on its positions with customers and the systematic hedge gains and losses from the trades entered into with the FX market makers. Retail trading revenue also includes fees earned from arrangements with other financial institutions to provide platform, back office and other trade execution services. This service is generally referred to as a white label arrangement. The Company earns a percentage of the markup charged by the financial institutions to their customers. Fees from this service are recorded when earned on a trade date basis. Additionally, the Company earns income from trading in CFDs, rollovers, payments for order flow, and spread betting. Income or loss on CFDs represents the difference between the Company's realized and unrealized trading gains or losses on its positions and the hedge gains or losses with the other financial institutions. Income or loss on CFDs is recorded on a trade date basis. Income or loss on rollovers is the interest differential customers earn or pay on overnight currency pair positions held and the markup that the Company receives on interest paid or received on currency pair positions held overnight. Income or loss on rollovers is recorded on a trade date basis. Income earned on order flow represents payments received from certain FX market makers in exchange for routing trade orders to these firms for execution. The Company's order routing software ensures that payments for order flow do not affect the routing of orders in a manner that is detrimental to its retail customers. The Company recognizes payments for order flow as earned on a trade date basis. Spread betting is where a customer takes a position against the value of an underlying financial instrument moving either upward or downward in the market. Income on spread betting is recorded as earned on a trade date basis.

Recently, the Company launched an offering to some of its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, the Company earns revenue from: (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades the Company has chosen to hedge and (ii) net gains or losses, if any, where the Company has not hedged the customer trade.

#### Institutional Trading Revenue

##### ***Institutional Trading Revenue***

Institutional trading revenue relates to commission income generated by facilitating spot FX trades on behalf of institutional customers through the services provided by the FXCM Pro division. The counterparties to these trades are external financial institutions that also hold customer account balances. The Company receives commission income for customers' use of FXCM Pro without taking any market or credit risk. Institutional trading revenue is recorded on a trade date basis. The Company also earns income from market making and electronic trading in the institutional foreign exchange spot and futures markets through its subsidiary, Lucid. Income on market making and electronic trading in foreign exchange spot and future currencies represents the spread between the bid and ask price for positions purchased and sold and the change in value of positions purchased and sold. Income on market making is recorded as trading gains, net of trading losses, on a trade date basis.

#### Interest Income

##### ***Interest Income***

Interest income consists of interest earned on cash and cash equivalents and cash and cash equivalents, held for customers and is recognized in the period earned.

#### Other Income

##### ***Other Income***

Other income includes amounts earned from the sale of market data, equity and equity option brokerage activities, earnings and losses from equity method investments, account maintenance fees and ancillary fee income.

For the year ended December 31, 2012, Other income in the consolidated statements of operations includes the recognition of a gain related to a settlement with the former owners of ODL in connection with the acquisition of ODL in October 2010 (see Note 14).

For the year ended December 31, 2011, Other income in the consolidated statements of operations includes \$4.5 million of revenue related to the termination of a trade execution services contract that resulted in the recognition of previously deferred income and \$3.3 million attributable to the re-measurement of the Due to related parties pursuant to tax receivable agreement to reflect the Company's revised U.S. Federal income tax rate.

#### Communications and Technology

##### ***Communications and Technology***

Communications and technology expense consists primarily of costs for network connections to our electronic trading platforms, telecommunications costs, and fees paid for access to external market data. This expense is affected primarily by the growth of electronic trading, our network/ platform capacity requirements and by changes in the number of telecommunication hubs and connections which provide our customers with direct access to our electronic trading platforms.

#### Trading Costs, Prime Brokerage and Clearing Fees

##### ***Trading Costs, Prime Brokerage and Clearing Fees***

Trading costs, prime brokerage and clearing fees primarily represent fees paid to third party clearing banks and prime brokers for clearing foreign exchange spot futures currency and contract transactions, transaction fees paid to exchanges, equity options brokerage activity fees, and fees paid to third party providers for use of their platform for the Company's market making trading business. Clearing fees primarily fluctuate based on changes in volume, rate of clearing fees charged by clearing banks and rate of fees paid to exchanges.

#### Referring Broker Fees

##### ***Referring Broker Fees***

Referring broker fees represent commissions paid to brokers for introducing trading customers to the Company. Commissions are determined based on the number and size of transactions executed by the customers and are recorded on a

trade date basis.

<u>Compensation and Benefits</u>	<p><b><i>Compensation and Benefits</i></b></p> <p>Compensation and benefits expense represents employee and member salaries and benefit expense, including stock based compensation expense.</p> <p>The Company accounts for stock-based compensation in accordance with ASC 718, <i>Compensation-Stock Compensation</i> ("ASC 718"). The fair value of the Company's stock-based compensation is estimated using the Black-Scholes option pricing model or on the fair value of the Corporation's Class A common stock. The Company recognizes compensation expense for equity awards on a straight-line basis over the requisite service period of the award. Compensation expense is adjusted for an estimate of equity awards that do not vest in the future because service or performance conditions are not satisfied (forfeitures) and have been included in Compensation and benefits in the consolidated statements of operations. See Note 15 for further details.</p>
<u>Advertising and Marketing</u>	<p><b><i>Advertising and Marketing</i></b></p> <p>Advertising and marketing costs are charged to operations when incurred.</p>
<u>General and Administrative Expenses</u>	<p><b><i>General and Administrative Expenses</i></b></p> <p>General and administrative expenses include bank processing and regulatory fees, professional and consulting fees, occupancy and equipment expense and other administrative costs. Bank processing fees are costs associated with the processing of credit card transactions. Regulatory fees are volume-based costs and annual fees charged by certain regulatory authorities.</p>
<u>Income Taxes</u>	<p><b><i>Income Taxes</i></b></p> <p>Holdings operates in the United States ("U.S.") as a limited liability company that is treated as a partnership for U.S. federal, state and local income tax purposes. As a result, Holding's income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holdings' income attributable to the Corporation and excludes the income attributable to other members of Holdings whose income is included in Net Income attributable to non-controlling interest in FXCM Holdings LLC in the consolidated statements of operations. Prior to the IPO, the Company operated as a limited liability company that was treated as partnership for U.S. federal income tax purposes. As a result, the Company's income from its U.S. operations was not subject to U.S. federal income tax because such income was entirely attributed to its members and included in the tax returns of its members.</p> <p>Deferred taxes are provided using a liability method, whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences represent the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect for changes in tax laws and rates on the date of enactment. See Note 22 for further details.</p> <p>In addition to U.S. federal and state income taxes, the Company is subject to Unincorporated Business Tax which is attributable to Holding's operations apportioned to New York City. The Company's foreign subsidiaries are also subject to local taxes.</p> <p>The Company recognizes tax benefits for uncertain tax positions only if it is more likely than not that a position is sustainable based on its technical merits. Interest and penalties on uncertain tax positions are included as a component of the provision for Income taxes on the consolidated statements of operations.</p>
<u>Allocation and Distribution to Non-controlling Interests</u>	<p><b><i>Allocation and Distribution to Non-controlling Interests</i></b></p> <p>The allocation of Holdings' earnings to the members is determined in accordance with the sharing ratios as defined in the LLC Agreement. Distributions to members are made according to the LLC Agreement. See Notes 14 and 21 for further details. The allocation of Lucid's earnings to the Lucid non-controlling member is determined in accordance with the Deed of Shareholders Agreement (the "Shareholders Agreement"). Distributions to the Lucid non-controlling members are made in accordance with the Shareholders Agreement. See Note 5 for further details.</p>
<u>Recently Adopted Accounting Pronouncement</u>	<p><b><i>Recently Adopted Accounting Pronouncements</i></b></p>
<u>Fair Value Measurements and Related Disclosures</u>	<p><b><i>Fair Value Measurements and Related Disclosures</i></b></p> <p>In May 2011, the FASB issued authoritative guidance that provides a uniform framework for fair value measurements and related disclosures between U.S GAAP and International Financial Reporting Standards. Additional disclosure requirements under this guidance include: (1) for Level 3 fair value measurements, quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity's use of nonfinancial asset that is different from the asset's highest and best use, the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required, the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.</p>
<u>Presentation of Comprehensive Income</u>	<p><b><i>Presentation of Comprehensive Income</i></b></p> <p>In June 2011, the FASB issued authoritative guidance that eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other updates to the presentation of comprehensive income. Under this guidance, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.</p>

<u>Recently Issued Accounting Pronouncement</u>	<b><i>Recently Issued Accounting Pronouncement</i></b>
<u>Balance Sheet Offsetting</u>	<p><b><i>Balance Sheet Offsetting</i></b></p> <p>In December 2011, the FASB issued Accounting Standards Update (“ASU”) No. 2011-11 which requires disclosures of both gross and net information about instrument and transactions eligible for offset as well as transactions subject to an agreement similar to a master netting agreement. ASU No. 2011-11 is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods and must be applied retrospectively. As this guidance is limited to presentation only, adoption of this guidance is not expected to have a material impact on the Company’s financial statements.</p>
<u>Testing Goodwill for Impairment</u>	<p><b><i>Testing Goodwill for Impairment</i></b></p> <p>In July 2012, the FASB issued amended guidance relating to FASB ASC Topic 350, “Intangibles — Goodwill and Other,” which permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then no further action is required. This accounting guidance is effective for the Company on January 1, 2013 with early adoption permitted. Since this guidance only changes the manner in which the Company assesses indefinite-lived intangible assets for impairment, adoption is not expected to have a material effect on the Company’s financial position or results of operations.</p>

Net Capital Requirements	12 Months Ended Dec. 31, 2012						
Banking and Thrift [Abstract]							
Capital Requirements on Trust Assets							
<b>Note 18. Net Capital Requirements</b>							
<p>US is registered as a futures commission merchant and a retail foreign exchange dealer with the CFTC and NFA. US is subject to the NFA's net capital requirements for forex dealing members. Since the agency model (see Note 1) is not used for all customer transactions, US is required to maintain "adjusted net capital" equal to or in excess of \$20.0 million plus 5% of all liabilities owed to customers exceeding \$10.0 million. Adjusted net capital and the level of notional values under these transactions change from day to day.</p> <p>HK is organized in Hong Kong and is a licensed leveraged foreign exchange trading company with the Securities and Futures Commission ("SFC"). HK is subject to required minimum liquid capital financial requirements.</p> <p>UK is organized in the U.K. and is regulated by the Financial Services Authority ("FSA"). UK is a registered securities and futures firm with the FSA. UK is subject to minimum capital requirements.</p> <p>ODL and FSL are organized in the U.K. and are regulated by the FSA. ODL is a registered consolidated group company. FSL is a registered broker dealer. ODL and FSL are subject to minimum capital requirements.</p> <p>FXCMJ is organized in Japan and is regulated by the Finance Services Agency of Japan ("JFSA") and is subject to minimum capital requirements.</p> <p>Australia is organized in New Zealand and is a registered exchange contract dealer with the Australia Securities &amp; Investments Commission ("ASIC"). Australia is subject to ASIC minimum financial requirements or "adjusted surplus liquid funds."</p> <p>The minimum capital requirements of the above entities may effectively restrict the payment of cash distributions to members.</p> <p>The tables below present the capital, as defined by the respective regulatory authority, the minimum capital requirement and the excess capital for US, HK, UK, Australia, ODL, FSL and FXCMJ as of December 31, 2012 and 2011, with amounts in millions:</p>

Reorganization and IPO	12 Months Ended Dec. 31, 2012
<u>Reorganization and Ipo Disclosure</u> <u>[Abstract]</u>	
<u>Reorganization and Ipo Disclosure</u>	<p><b>Note 2. Reorganization and IPO</b></p> <p><b><i>Reorganization</i></b></p> <p>Prior to the completion of the Corporation's IPO, the limited liability company agreement of Holdings (the "LLC Agreement") was restated among other things, to modify its capital structure by reclassifying the interests held by its existing owners (i.e., the owners of Holdings prior to the IPO) (the "Existing Unit Holders") into a single new class of units ("Holding Units"). The Existing Unit Holders also entered into an exchange agreement (the "Exchange Agreement") under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO, subject to the terms of the exchange agreement as described therein, to exchange their Holding Units for shares of the Corporation's Class A common stock on a one-for-one basis, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. Following the IPO, each of the Existing Unit Holders held one share of Class B common stock. The shares of Class B common stock have no economic rights but entitle the holder, without regard to the number of shares of Class B common stock held, to a number of votes on matters presented to stockholders of the Corporation that is equal to the aggregate number of Holdings Unit held by such holder, subject to customary adjustments for stock splits, stock dividends and reclassifications.</p> <p>At the time of the IPO, the Corporation purchased newly-issued Holding Units from Holdings and outstanding Holding Units from the Existing Unit Holders, including members of its senior management, at a purchase price per unit equal to the \$14.00 price per share of Class A common stock in the offering net of underwriting discounts. Since the Existing Unit Holders continued to have control of over 50% of the voting shares (through their interests in the Corporation) upon completion of the exchange, the exchange of cash by the Corporation for Holding Units was accounted for as a transaction between entities under common control in accordance with the guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805, <i>Business Combinations</i> ("ASC 805"). The date of the exchange was December 7, 2010 (i.e., the effective date of the IPO).</p> <p><b><i>IPO</i></b></p> <p>On December 7, 2010, the Corporation closed the IPO of its Class A common stock. Pursuant to the IPO, the Corporation offered and sold 17,319,000 shares of Class A common stock. The Corporation also acquired an equivalent number of Holding Units. Total proceeds from the IPO were \$226.7 million. The Corporation used \$49.7 million of these proceeds to purchase 3,800,000 newly issued Holding Units, and \$177.0 million of the proceeds to purchase 13,519,000 Holding Units from Existing Unit Holders, including members of Holdings senior management.</p> <p>As described in more detail in Note 3, subsequent to the IPO and the reorganization described above, the Corporation consolidates the financial results of Holdings and its subsidiaries and reflects the ownership interest of the other members of Holdings as a non-controlling interest in the Corporation's consolidated financial statements.</p> <p><b><i>Tax Receivable Agreement</i></b></p> <p>In connection with the Reorganization, Holdings made an election under Section 754 of the Internal Revenue Code effective for each taxable year in which an exchange of Holding Units shares of Class A common stock as described above occurs, which may result in an adjustment to a portion of the tax basis of the assets of Holdings at the time of an exchange of Holding Units. As a result of both the initial purchase of Holding Units from the Existing Unit Holders in connection with the IPO and these subsequent exchanges, the Corporation is entitled to a proportionate share of the existing tax basis of the assets of Holdings. In addition, the purchase of Holding Units and subsequent exchanges, in conjunction with the election under Section 754 described above, are expected to result in increases in the tax basis of the assets of Holdings that otherwise would not have been available. Both this proportionate share and these increases in tax basis may reduce the amount of tax that the Corporation would otherwise be required to pay in the future. These increases in tax basis may also decrease gains (or increase losses) on future dispositions of certain capital assets to the extent tax basis is allocated to those capital assets.</p> <p>The Corporation entered into a tax receivable agreement with Holdings members that will provide for the payment by the Corporation to Holdings members an amount equal to 85% of the amount of the benefits, if any, that the Corporation is deemed to realize as a result of (i) the existing tax basis in the intangible assets of Holdings on the date of the IPO, (ii) any increases in tax basis resulting from Section 754 election and (iii) certain other tax benefits related to our entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement. These payment obligations are obligations of the Corporation and not of Holdings. For purposes of the tax receivable agreement, the benefit deemed realized by the Corporation is computed by comparing the actual income tax liability of the Corporation to the amount of such taxes that the Corporation would have been required to pay had there been no increase to the tax basis of the assets of Holdings as a result of the purchase or exchanges, had there been no tax benefit from the tax basis in the intangible assets of Holdings on the date of the IPO and had the Corporation not entered into the tax receivable agreement. The term of the tax receivable agreement will continue until all such tax benefits have been utilized or expired, unless the Corporation exercises its right to terminate the tax receivable agreement for an amount based on the agreed payments remaining to be made under the agreement or the Corporation breaches any of its material obligations under the tax receivable agreement in which case all obligations will generally be accelerated and due as if the Corporation had exercised its right to terminate the agreement.</p>

Income Taxes	12 Months Ended		
	Dec. 31, 2012		
Income Tax Disclosure [Abstract]			
Income Tax			

**Note 22. Income Taxes**

Holdings, operates in the U.S. as a limited liability company that is treated as a partnership for U.S. federal, state, and local income tax purposes. As a result, Holdings income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holdings' income attributable to the Corporation and excludes the income attributable to other members of Holdings whose income is included in Net income attributable to non-controlling interest in FXCM Holdings LLC in the consolidated statements of operations. Prior to the IPO, the Company operated as a limited liability company that was treated as partnership for U.S. federal income tax purposes. As a result, the Company's income from its U.S. operations was not subject to U.S. federal income tax because such income was entirely attributed to its members and included in the tax returns of its members.

In addition to U.S. federal and state income taxes, the Company is subject to Unincorporated Business Tax which is attributable to Holding's operations apportioned to New York City. The Company's foreign subsidiaries are also subject to local taxes.

Income before income taxes, as shown in the consolidated statements of operations, includes the following income components, with amounts in thousands:

	Years Ended December 31,		
	2012	2011	2010
Domestic	19,794	29,035	92,724
Foreign	27,670	40,562	11,586
	47,464	69,597	104,310

The provision for income taxes consists of the following, with amounts in thousands:

	Year Ended December 31,		
	2012	2011	2010
<b>Current</b>			
Federal income tax	478	238	—
State and local income tax	574	1,384	588
Foreign income tax	764	9,268	2,585
Subtotal	1,816	10,890	3,173
<b>Deferred</b>			
Federal income tax	2,837	7,578	(12)
State and local income tax	(171)	(1,820)	19
Foreign income tax	4,504	(5,850)	969
Subtotal	7,170	(74)	976
Total provision for taxes	8,986	10,816	4,149

The following table reconciles the provision for income taxes to the U.S. federal statutory tax rate:

	Year Ended December 31,		
	2012	2011	2010
Statutory U.S. federal income tax rate	34.0%	34.0%	35.0%
Income passed through to non-controlling members	(15.5)	(13.0)	(35.0)
State and local income tax	1.0	2.1	0.6
Foreign income tax	(3.10)	(0.2)	3.4
Release of valuation allowance	—	(11.8)	—
Foreign tax credit valuation allowance	2.5	0.8	—
Impact of rate change on deferred tax assets	—	4.0	—
Other	—	(0.4)	—
Effective tax rate	18.9%	15.5%	4.0%

The increase in the effective tax rate for the year ended December 31, 2012 compared to the year ended December 31, 2011 was primarily due to an increase in the Corporation's ownership in Holdings. The increase in the Corporation's ownership in Holdings is due to members Existing Unit Holders exchanging their membership units for the Corporation's Class A common stock. The Company's effective tax rate increases as additional exchanges occur because the portion of Holdings' income attributable to the Corporation increases. The effect of Holdings member unit exchanges is partially offset by the Corporation's Class A common stock repurchases. Anytime the Corporation repurchases shares of its Class A common stock, Holdings, enters into an equivalent Holdings membership unit transaction with the Corporation. The effect of these repurchases decreases the Corporation's ownership in Holdings and, accordingly, decreases the portion of Holdings' income attributable to the Corporation. See Note 4 for further details regarding changes in the Corporation's ownership in Holdings. In addition, the Company's effective tax rate increased due to the Company earning a higher portion of its income from subsidiaries (primarily Lucid) taxed locally as corporations in their respective foreign jurisdictions in 2012. This increase in tax on foreign sourced income is somewhat offset by a lower statutory tax rate in effect in the U.K for the year ended December 31, 2012. The Company's effective tax rate for the year ended December 31, 2011 reflects the release of valuation allowance relating to FXCMJ's tax loss carryforwards.

Deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. A summary of the tax effects of the temporary differences is as follows, with amounts in thousands:

	Years Ended December 31,	
	2012	2011
<b>Deferred tax assets</b>		
Equity based compensation	1,259	206
Investment in partnership	118,327	79,353
Fixed assets	4,009	4,052
Tax loss carryforwards	7,761	7,602
Tax credit carryforward/foreign sub income	2,083	878
Japan software	3,083	4,045

Other	140	280
<b>Gross deferred tax assets</b>	<b>136,662</b>	<b>96,416</b>
<b>Less: valuation allowance</b>	<b>(8,843)</b>	<b>(878)</b>
<b>Net deferred tax asset</b>	<b>127,819</b>	<b>95,538</b>
<b>Deferred tax liabilities</b>		
Fixed assets	65	54
Intangible assets	6,292	8,873
Goodwill	12,563	—
Software development cost	193	116
Other	338	242
<b>Gross deferred tax liabilities</b>	<b>19,451</b>	<b>9,285</b>
<b>Net deferred tax asset</b>	<b>108,368</b>	<b>86,253</b>

The increase in deferred tax assets was primarily driven by the increase in the Corporation's ownership in Holdings as a result of members of Holdings exchanging their membership units for the Corporation. Class A common stock. As Existing Unit Holder exchange their membership units, the Company records a deferred tax benefit related to Holdings election under Section 754 of the Internal Revenue Code (see Note 2).

The Company assesses available positive and negative evidence to estimate if it is more-likely-than-not to use certain jurisdiction-based deferred tax assets including certain tax credits and net operating loss carryovers. On the basis of this assessment, a valuation allowance of \$8.8 million was recorded as of December 31, 2012.

The Company has foreign net operating loss carryforwards of \$9.1 million and \$19.6 million from Japan and the United Kingdom, respectively. The Japanese net operating loss carryforwards may be carried forward for nine years, while the United Kingdom net operating loss has an indefinite life. The tax credit carryforward includes foreign tax credits of \$1.9 million that may be carried forward for a period of 10 years and unincorporated business tax credits of \$0.2 million that may be carried forward for an indefinite period.

The Company does not provide for deferred taxes on the excess of the financial reporting over the tax basis in its investments in foreign subsidiaries that are essentially permanent in duration. That excess totaled \$22.8 million as of December 31, 2012.

Taxes payable as of December 31, 2012 and 2011 were \$1.2 million and \$8.1 million, respectively, and are included in accounts payable and accrued expenses in the consolidated statements of financial condition (see note 12). Taxes receivable as of December 31, 2012 and 2011 were \$6.0 million and \$2.0 million respectively.

The following is a tabular reconciliation of the total amounts of unrecognized tax benefits, with amounts in thousands:

	2012	2011	2010
<b>Unrecognized tax benefits – January 1</b>	<b>\$ 223</b>	<b>\$ —</b>	<b>\$ —</b>
Gross increases – tax positions in prior period	1	44	—
Gross decreases – tax positions in prior period	(16)	—	—
Gross increases – tax positions in current period	3,483	179	—
Settlement	—	—	—
Lapse of statute of limitations	—	—	—
<b>Unrecognized tax benefits – December 31</b>	<b>\$ 3,691</b>	<b>\$ 223</b>	<b>\$ —</b>

The Company recognizes interest and penalties related to unrecognized tax benefits within the income tax expense line in the accompanying consolidated statement of operations. Accrued interest and penalties are included within the related tax liability line in the consolidated statements of financial condition.

Related to the unrecognized tax benefits noted above, the Company accrued penalties and interest of immaterial amounts during 2012. The Company accrued penalties and interest of nil for the years ended December 31, 2012 and 2011.

The Company does not believe that it will have a material increase in its unrecognized tax benefits during the coming year.

The Company is subject to taxation in the United States and various states and foreign jurisdictions. As of December 31, 2012, the Company's tax years for 2009, 2010, and 2011 are subject to examination by the tax authorities. With a few exceptions, as of December 31, 2012, the Company is no longer subject to U.S. federal, state, local, or foreign examinations by tax authorities for years before 2009.

Foreign Currencies and Concentrations of Credit Risk	12 Months Ended
	Dec. 31, 2012
<u>Foreign Currency [Abstract]</u>	
<u>Foreign Currencies and Concentrations of Credit Risk</u>	<b>Note 23. Foreign Currencies and Concentrations of Credit Risk</b>
	<p>Under the agency model, the Company accepts and clears FX spot contracts for the accounts of its customers (see Notes 1 and 3). These activities may expose the Company to off-balance-sheet risk in the event that the customer or other broker is unable to fulfill its contracted obligations and the Company has to purchase or sell the financial instrument underlying the contract at a loss.</p> <p>In connection with these activities, the Company executes and clears customers' transactions involving the sale of foreign currency not yet purchased, substantially all of which are transacted on a margin basis subject to internal policies. Such transactions may expose the Company to off-balance-sheet risk in the event margin deposits are not sufficient to fully cover losses that customers may incur. In the event that a customer fails to satisfy its obligations, the Company may be required to purchase or sell financial instruments at prevailing market prices to fulfill the customer's obligation.</p> <p>The Company controls such risks associated with its customer activities by requiring customers to maintain margin collateral, in the form of cash, in compliance with various internal guidelines. The Company's trading software technology monitors margin levels on a real time basis and, pursuant to such guidelines, requires customers to deposit additional cash collateral, or to reduce positions, if necessary. The system is designed to ensure that any breach in a customer's margin requirement as a result of losses on the trading account will automatically trigger a final liquidation, which will execute the closing of all positions. Exposure to credit risk is therefore minimal. Institutional customers are permitted credit pursuant to limits set by the Company's prime brokers. The prime brokers incur the credit risk relating to the trading activities of these customers in accordance with the respective agreements between such brokers and the Company.</p> <p>The Company is engaged in various trading activities with counterparties which include brokers and dealers, futures commission merchants, banks, and other financial institutions. In the event counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the financial instrument. It is the Company's policy to: (i) perform credit reviews and due diligence prior to conducting business with counterparties; (ii) set exposure limits and monitor exposure against such limits; and (iii) periodically review, as necessary, the credit standing of counterparties using multiple sources of information. The Company's due from brokers balance included in the consolidated statements of financial condition was \$8.0 million and \$1.3 million as of December 31, 2012 and 2011, respectively. As of December 31, 2012, 91.5% of the Company's due from brokers balance, included on the consolidated statements of financial condition, was from one large financial institution. As of December 31, 2011, 72.7% of the Company's due from brokers balance, included in the consolidated statements of financial condition, was from one large financial institution. Three banks held more than 10.0% each of the Company's total cash and cash equivalents and cash and cash equivalents, held for customers as of December 31, 2012 and 2011.</p>

Segments	12 Months Ended			
	Dec. 31, 2012			
Segment Reporting [Abstract]				
Segments				
Note 24. Segments				
ASC 280, <i>Segments Reporting</i> , establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. The Company's operations relate to FX trading and related services and operate in two segments — retail and institutional, with different target markets and are covered by a separate sales force, customer support and trading platforms. The Company's segments are organized around three geographic areas. These geographic areas are the United States, Asia and Europe and are based on the location of its customers' accounts.				
<b>Retail Trading</b>				
The Company operates its retail business whereby it acts as an agent between retail customers and a collection of large global banks and financial institutions by making foreign currency markets for customers trading in foreign exchange spot markets through its Retail Trading business segment. The Retail Trading business segment also includes the Company's white label relationships CFDs, payments for order flow and rollovers. In addition, the Retail Trading business segment includes offerings to some of the Company's smaller retail clients to trade with a dealing desk, or principal model.				
<b>Institutional Trading</b>				
Institutional Trading facilitates spot foreign currency trades on behalf of institutional customers, market making and electronic trading in the institutional foreign exchange spot and futures markets. The facilitation of spot foreign currency trades allows customers to obtain the best execution price from external banks and financial institutions.				
Information concerning the Company's operations by reportable segment is as follows, with amounts in thousands:

Nature of Business and Organization	12 Months Ended Dec. 31, 2012
<b><u>Business Description and Basis Of Presentation [Abstract]</u></b>	
<u>Nature of Business and Organization</u>	<p><b>Note 1. Nature of Business and Organization</b></p> <p>FXCM Inc. (the “Corporation”), a Delaware holding company incorporated on August 10, 2010, is a global online provider of foreign exchange (“FX”) trading and related services to retail and institutional customers worldwide. The Corporation operates through its managing membership interest in FXCM Holding, LLC (“Holdings”), the Corporation’s sole operating asset. Holdings is a minority-owned, controlled and consolidated subsidiary of the Corporation. Prior to the completion of the reorganization and the Corporation’s initial public offering (“IPO”) described in Note 2, the Corporation was a wholly-owned subsidiary of Holdings. As used in these notes, the term “Company” collectively refers to the Corporation, Holdings and subsidiaries of Holdings.</p> <p>As an online provider of FX trading and related services, the Company offers its retail and institutional customers access to global over-the-counter FX markets. In a FX trade, a participant buys one currency and simultaneously sells another, a combination known as a “currency pair.” The Company’s proprietary trading platform presents its FX customers with the price quotations on several currency pairs from a number of global banks, financial institutions and market makers, or FX market makers. The Company’s primary offering to retail customers is what is referred to as agency execution or an agency model. Under the agency model, when a customer executes a trade on the price quotation presented by the FX market maker, the Company acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. The Company earns trading revenue by adding a markup to the price provided by the FX market makers, not trading profit or losses. Recently, the Company launched an offering to its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, the Company earns revenue from (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades the Company has chosen to hedge and (ii) net gains or losses, if any, where the Company has not hedged the customer trade.</p> <p>The Company also offers FX trading services to banks, hedge funds and other institutional customers, on an agency model basis, through its FXCM Pro division. These services allow customers to obtain optimal prices offered by external banks. The counterparties to these trades are external financial institutions that hold customer account balances and settle the transactions. The Company receives commissions for providing these services. In addition, the Company, through its 50.1% controlling interest in Lucid Markets Trading Limited (“Lucid”) (see Note 5), is an electronic market-maker and trader in the institutional FX market. The Company is also engaged in various ancillary FX related services which include use of its platform, technical expertise, trading facilities and software. Additionally, the Company offers its customers the ability to trade contract for differences (“CFDs”), spread betting, equities and equity options through its United Kingdom subsidiary FXCM Securities Limited (“FSL”). CFDs allow for the exchange of the difference in the value of a particular asset such as a stock index or oil or gold contracts, between the time at which a contract is opened and the time at which it is closed. Spread betting allows our customers to bet on the price fluctuations of various financial markets such as FX, indices, oil and metals.</p>

Subsequent Events	12 Months Ended
	Dec. 31, 2012
<b><u>Subsequent Events [Abstract]</u></b>	
<u>Subsequent Events</u>	<p><b>Note 25. Subsequent Events</b></p> <p>The Company has evaluated subsequent events after the date of the consolidated financial statements to consider whether or not the impact of such events needed to be reflected or disclosed in the consolidated financial statements. Such evaluation was performed through the report date of the consolidated financial statements.</p> <p>The Company declared a quarterly dividend of \$0.06 per share on its outstanding Class A common stock. The dividend is payable on April 1, 2013 to Class A stockholders of record at the close of business on March 25, 2013.</p>

<u>Disclosure of Compensation Related Costs, Share-based Payments</u>	

**Note 15. Stock-Based Compensation**

The Company has a long term incentive plan (the "LTIP") that provides for the grant of stock options to purchase shares of the Corporation's Class A common stock to its employees ("Employee Stock Options") and the independent board of directors ("Independent Directors Options") (collectively, the "Stock Options"). The Employee Stock Options have a contractual term of seven years and a four-year graded vesting schedule. The Independent Directors Options also have a seven-year contractual term but cliff vest on the first anniversary after the grant date. Under the terms of the LTIP, the Company may issue new shares or treasury shares upon share option exercise.

In January 2012, the Company granted 109,488 stock options to purchase shares of the Corporation's Class A common stock to its independent board of directors. During the year ended December 31, 2012, the Company granted 725,000 stock options to purchase the Corporation's Class A common stock to its employees.

The following table summarizes the Company's stock options activity as of December 31, 2011 and changes for the year then ended:

Options	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding at January 1, 2011	8,127,890	\$ 14.00	—
Granted	690,000	10.73	—
Exercised	—	—	—
Forfeited or expired	(219,750)	14.00	—
Outstanding as of December 31, 2011	8,598,140	\$ 13.74	2.9
Vested or expected to vest at December 31, 2011	8,025,927	\$ 13.75	2.9
Exercisable as of December 31, 2011	2,041,453	\$ 14.00	2.8

The following table summarizes the Company's stock options activity as of December 31, 2012 and changes for the year then ended:

Options	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding at January 1, 2012	8,598,140	\$ 13.74	—
Granted	834,488	9.72	—
Exercised	—	—	—
Forfeited or expired	(254,500)	14.00	—
Outstanding as of December 31, 2012	9,178,128	\$ 13.37	2.1
Vested or expected to vest at December 31, 2012	8,695,163	\$ 13.37	2.1
Exercisable as of December 31, 2012	4,096,140	\$ 13.86	1.9

The weighted-average grant date fair value of options granted during the years 2012, 2011, and 2010 was \$3.55, \$4.26 and \$5.26, respectively.

As of December 31, 2012, the weighted average period over which compensation cost on non-vested Stock Options is expected to be recognized is 2.1 years and the unrecognized expense is \$22.2 million. The Company had 2,046,250 and 2,049,890 vested stock options under LTIP during the years ended December 31, 2012 and 2011, respectively. The fair value of the options vested was \$21.3 million and \$10.7 million during both the years ended December 31, 2012 and 2011, respectively.

Stock-based compensation before income taxes included in Compensation and benefits in the consolidated statements of operations was \$9.8 million, \$9.1 million and \$0.7 million for the years ended December 31, 2012, 2011 and 2010, respectively, for the Employee Stock Options. Stock-based compensation before income taxes included in Compensation and benefits in the consolidated statements of operations was \$0.4 million, for each year ended December 31, 2012 and 2011 and not material for the year ended December 31, 2010 for the Independent Directors Options. The total compensation cost capitalized and included in office, communication and computer equipment, net, in the consolidated statements of financial condition was \$1.4 million, \$1.1 million and not material for the years ended December 31, 2012, 2011 and 2010, respectively.

In arriving at stock-based compensation expense, the Company estimates the number of stock-based awards that will be forfeited due to employee turnover. The Company's forfeiture assumption is based primarily on its turn-over historical experience. If the actual forfeiture rate is higher than the estimated forfeiture rate, then an adjustment will be made to increase the estimated forfeiture rate, which will result in a decrease to the expense recognized in the Company's financial statements. If the actual forfeiture rate is lower than the estimated forfeiture rate, then an adjustment will be made to lower the estimated forfeiture rate, which will result in an increase to expense recognized in the Company's financial statements. The expense the Company recognizes in future periods will be affected by changes in the estimated forfeiture rate and may differ significantly from amounts recognized in the current period.

The Company did not have any cash proceeds or income tax benefits realized from the exercise of Stock Options for the years ended December 31, 2012, 2011 and 2010.

**Valuation Assumptions**

Calculating the fair value of Employee Stock Options requires estimates and significant judgment. The Company uses the Black-Scholes option pricing model to estimate the fair value of its employee stock options, consistent with the provisions of ASC 718. The fair value of the Stock Options grant is estimated on the date of the grant using the Black-Scholes option pricing model, and is not remeasured as a result of subsequent stock price fluctuations. Options granted to the Company's independent directors are considered options granted to employees under ASC 718 as defined therein.

Assumptions used in the Black Scholes valuation model were as follows:

	Employee Stock Options			Independent Directors Options		
	For the Year Ended			For the Year Ended		
	2012	2011	2010	2012	2011	2010
Expected term in years	4.75	4.75	4.75	4.00	—	4.0

Risk-free interest rate	0.71%	0.96%	1.57%	0.60%	—	1.28%
Expected volatility	52.00%	56.00%	50.00%	63.00%	—	50.00%
Dividend yield	2.48%	2.24%	1.86%	2.40%	—	1.86%
Estimated fair value at grant date	\$ 3.47	\$ 4.26	\$ 5.26	\$ 4.11	\$ —	\$ 4.88

Expected term for the Employee Stock Option and the Independent Directors Options is based on the simplified method outlined in Staff Accounting Bulletin No. 107, *Valuation of Share-Based Arrangements for Public Companies* (“SAB 107”) and *Staff Accounting Bulletin No. 110* (“SAB 110”), Use of a Simplified Method in Developing an Estimate of Expected Term of “Plain Vanilla” Share Options. In accordance with SAB 107 and SAB 110, options are considered to be exercised halfway between the average vesting date and the contractual term of each option grant. The simplified method is applicable for “plain vanilla” stock options, as defined in SAB 107, only if the Company does not have sufficient historical data upon which to estimate an expected term. Given that the Corporation’s Class A common stock has been publically traded for less than three years, the Company believes that the simplified method is an applicable methodology to estimate the expected term of the options as of the grant date.

The risk free interest rates for the Employee Stock Options and the Independent Directors Options are based on U.S. treasury instruments whose terms are consistent with the expected lives of the Stock Options.

Expected volatility is based on a weighing of the historical and implied volatilities of the Company and for a set of public guideline companies deemed comparable to it. The guideline companies selected operate in a similar industry, pursue similar market opportunities, and are subject to similar risks of the Company. Changes in the subjective assumptions required in the valuation models may significantly affect the estimated value of the Company's Stock Options, the related stock-based compensation expense and, consequently, its results of operations and comprehensive income.

The dividend yield is determined based on the Company's expected dividend payouts.

The LTIP also provides for other stock based awards (“Other Equity Awards”) which may be granted by the Company's Executive Compensation Committee (the “Committee”). Pursuant to the terms of the LTIP, the Committee may grant Other Equity Awards that are valued in whole or in part by reference to or that are otherwise based on the fair market value of the Company's Class A common stock. During the year ended December 31, 2012, the Company granted 945,847 of the Corporation’s Class A common stock as Other Equity Awards. The Other Equity Awards were fully vested at the date of the grant. The fair market value of the Other Equity Awards at grant date was \$11.76. Compensation expense before income taxes for the Other Equity Awards, included in Compensation and benefits in the consolidated statements of operations, was \$11.1 million for the year ended December 31, 2012. The Company did not record compensation expense for the years ended December 31, 2011 and 2010 since Other Equity Awards were not granted during those periods.

Business Acquisition	12 Months Ended
	Dec. 31, 2012
Business Combinations [Abstract]	
Business Combination Disclosure	
<b>Note 5. Business Acquisition</b>	
<b>Lucid</b>	
<p>On June 18, 2012 (the "Acquisition Date"), the Company acquired a 50.1% controlling interest in Lucid, an electronic market maker and trader in the institutional foreign exchange spot and futures markets headquartered in the U.K., to expand the Company's presence and capabilities in the institutional marketplace. As consideration, the Company issued a \$71.4 million, 3.5% unsecured promissory note, and 9.0 million unregistered shares of the Corporation's Class A common stock to Lucid sellers as well as a \$15.8 million, 3.5% unsecured promissory note for all liquid assets for a total estimated purchase price of \$177.5 million. The Lucid sellers were entitled to 1.8 million shares of the 9.0 million shares at closing, with the remaining 7.2 million shares held in escrow (the "Remaining Shares"), subject to the achievement of certain fixed profit-based targets (the "Profit Targets"). If the Profit Targets are achieved, the Lucid sellers are entitled to receive the Remaining Shares on the first, second and third anniversary following the Acquisition Date or over a three year term (the "Term") pursuant to the sale purchase agreement (the "Purchase Agreement"). Pursuant to the terms of the Acquisition, any of the Corporation's common shares issuable to a Lucid seller on an anniversary from closing will be restricted (the "Lucid Liquidity Restriction") for sale until the eighth anniversary of the closing of the Acquisition if the recipient ceases to be employed by Lucid or any entity controlled by the Corporation for reasons other than death or incapacity on such anniversary. The Purchase Agreement includes a contingent arrangement which provides for a claw back of the Remaining Shares in the event that the Profit Targets are not achieved. Additionally, the Company has the option to buy-out the remaining interest of the Lucid sellers subject to terms of the Purchase Agreement. In the event the buy-out is not exercised by the Company within four years from the Acquisition Date, the Lucid sellers have the ability to buy-back the Company's ownership interests within 30 days of the fourth anniversary date.</p>	
<p>The estimated fair value of the 9.0 million shares was \$89.4 million and is accounted for as equity. This fair value consisted of 1.8 million shares with a fair value of \$21.5 million based on the Corporation's closing stock price as of the Acquisition Date and the Remaining Shares with an estimated fair value of \$67.9 million, adjusted for the Lucid Liquidity Restriction. The estimated fair value of the Lucid Liquidity Restriction was \$9.4 million, and is accounted for as deferred compensation and recognized over the Term.</p>	
<p>The Acquisition was accounted for in accordance with ASC 805. The assets acquired, liabilities assumed and non-controlling interest were recorded at their estimated fair values in accordance with ASC 820 at the Acquisition Date as summarized in the table below. Full goodwill of \$236.5 million was calculated as the fair value over the estimated fair value of the net assets acquired. The estimated fair value of the non-controlling interest was \$160.2 million, and was determined by valuing Lucid using a discounted cash flow method, less the considerations transferred. The estimated of the fair value of the non-controlling interest is based on an assumed discount rate between 10.0% and 11.0%, annual earnings growth rate of 4.0% and assumed adjustments due to the lack of control that market participants would consider when estimating the fair value of the non-controlling interest in Lucid. Goodwill was allocated at the reporting unit level in the Institutional segment based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining the Lucid market making business with the Company's foreign exchange trading expertise. The goodwill is deductible for United Kingdom income tax purposes.</p>	
<b>Lucid Purchase Price Allocation</b>	
<b>(Amounts in thousands)</b>	
Purchase price	\$ 177,496
Non-Controlling interest	160,165
Total fair value at Acquisition Date	337,661
Net assets acquired	\$ 16,237
Adjustments to reflect acquired assets and liabilities at fair value	
Proprietary technology <sup>(1)</sup>	83,900
Non-compete agreements <sup>(2)</sup>	1,000
Fair value of net assets acquired	101,137
Goodwill resulting from the Lucid acquisition	\$ 236,524

(1) Consists of internally developed software platforms through which the Company: (i) executes its specific trading strategies, with an amortization life of 4 years and (ii) clears and efficiently settle trades with, an amortization life of 7 years.

(2) Consists of two non-compete agreements with amortization lives of 3 years.

The amounts included in the Lucid Purchase Price Allocation table represent the preliminary allocation of the purchase price and are subject to revision during the remainder of the measurement period, a period not to exceed 12 months from the acquisition date. Adjustments, if any, to the provisional values during the measurement period will be pushed back to the date of acquisition. Comparative information for periods after acquisition but before the period in which the adjustments are identified will be adjusted to reflect the effects of the adjustments as if they were taken into account as of the acquisition date. Changes to the amounts recorded as assets and liabilities may result in a corresponding adjustment to goodwill.	
**Condensed Statement of Net Assets Acquired**	
The following condensed statement of net assets acquired reflects the amounts of Lucid net assets recognized as of the Acquisition Date, with amounts in thousands:	
	**As of June 18, 2012**
**Assets**	
Cash and cash equivalents	\$ 28,656
Accounts receivable, net	5,100
Due from brokers	302
Deferred tax asset	125
Office, communication and computer equipment, net	499
Intangible assets	84,900
Other assets	226

Total assets	\$ 119,808
Liabilities	
Accounts payable and accrued expenses	13,361
Deferred tax liability	5,310
Total liabilities	18,671
Fair value of net assets acquired	\$ 101,137

#### Contingencies and Accounts Receivable

There were no contingent liabilities recorded in the fair value of net assets acquired as of the Acquisition Date and the fair value of net assets acquired includes accounts receivables with book value that approximates fair value. There was no reserve netted against receivables as of the Acquisition Date (see Note 3) since based on current information and events, it is probable that the Company will collect all amounts due according to the contractual terms of the receivable.

#### Condensed Combined Financial Information:

The following condensed financial information presents the resulting operations of Lucid from the Acquisition Date to December 31, 2012:

		For the period June 18, 2012 to December 31, 2012
Total revenue	\$	42,198
Net income	\$	21,446

#### Foreland

On October 7, 2011, the Company acquired a 100% interest in Foreland (the "Foreland Acquisition"), a Japan based foreign exchange provider. The Foreland Acquisition was designed to increase the Company's profile in the Japanese market and accelerate its growth in Asia, utilizing Foreland's relationships and sales force. The Company's purchase price was \$37.7 million provided in cash. The Foreland Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$37.7 million purchase price was allocated to Foreland assets acquired and liabilities assumed based on their estimated fair values at the acquisition date as summarized in the following table. Goodwill of \$10.0 million was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Goodwill was allocated to the Retail Trading segment based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining Foreland's FX business with the Company's foreign exchange trading expertise, the economies of scale expected from combining the operations of the two companies and the retail relationships brought by the Foreland's management. No goodwill is expected to be deductible for federal income tax purposes.

#### Foreland Purchase Price Allocation

(Amounts in thousands)		
Purchase price		\$ 37,654
Net assets acquired	\$ 21,460	
Adjustments to reflect acquired assets and liabilities at fair value		
Customer relationships <sup>(1)</sup>	9,925	
Deferred tax liability	(3,726)	
Fair value of net assets acquired		27,659
Goodwill resulting from the Foreland acquisition		\$ 9,995

(1) Consists of retail customers. The amortization life is 6 years.

#### Condensed Statement of Net Assets Acquired

The following condensed statement of net assets acquired reflects the amounts of Foreland net assets recognized as of October 7, 2011, with amounts in thousands:

	As of October 7, 2011
Assets	
Cash and cash equivalents	\$ 29,853
Cash and cash equivalents, held for customers	172,826
Accounts receivable, net	501
Office, communication and computer equipment, net	847
Intangible assets	9,934
Other assets	1,199
Total assets	\$ 215,160
Liabilities	
Customer account liabilities	\$ 172,826
Accounts payable and accrued expenses	6,502
Due to brokers	4,447
Deferred tax liability	3,726
Total liabilities	187,501
Fair value of net assets acquired	\$ 27,659

#### Accounts Receivable

The Company has collected all material accounts receivable amounts as of December 31, 2012.

#### FXCMJ

On March 31, 2011, the Company acquired a 100% interest in FXCMJ (the "FXCMJ Acquisition"), a Japan based foreign exchange provider that had previously contracted to use the FXCM Japan trademark. The FXCMJ Acquisition was designed to increase the Company's profile in the Japanese market and accelerate its growth in Asia, utilizing FXCMJ's relationships and sales force. The Company's purchase price was \$15.7 million provided in cash. The FXCMJ Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$15.7 million purchase price was allocated to FXCMJ assets acquired and liabilities assumed based on their

estimated fair values at the acquisition date as summarized in the following table. Goodwill of \$0.8 million was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Goodwill was allocated to the Retail Trading segments based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining FXCMJ's foreign exchange with the Company's foreign exchange trading expertise, the economies of scale expected from combining the operations of the two companies and the retail relationships brought by the FXCMJ's management. No goodwill is expected to be deductible for federal income tax purposes.

Fair value of net assets acquired		14,959
Goodwill resulting from the FXCMJ acquisition		\$ 766

(1) Consists of retail customers. The amortization life is 6 years.

#### Condensed Statement of Net Assets Acquired

The following condensed statement of net assets acquired reflects the amounts of FXCMJ net assets recognized as of March 31, 2011, with amounts in thousands:

	As of March 31, 2011
<b>Assets</b>	
Cash and cash equivalents	\$ 9,827
Cash and cash equivalents, held for customers	114,024
Due from broker	3,885
Accounts receivable, net	194
Tax receivable	478
Office, communication and computer equipment, net	2,279
Intangible assets	1,064
Other assets	1,189
Total assets	\$ 132,940
<b>Liabilities</b>	
Customer account liabilities	\$ 114,023
Accounts payable and accrued expenses	3,561
Deferred tax liability	397
Total liabilities	117,981
Fair value of net assets acquired	\$ 14,959

#### Accounts Receivable

The Company has collected all material accounts receivable amounts as of December 31, 2012.

#### ODL

On the October 1, 2010, the Company acquired a 100% interest in ODL (the "ODL Acquisition"), a leading broker of FX, CFDs, spread betting, equities and equity options headquartered in the U.K. The ODL Acquisition was designed to increase the Company's profile in the U.K. market and accelerate its growth in continental Europe, utilizing ODL's relationships and sales force. As consideration, the Company provided \$2.2 million in cash and issued a 5.25% equity interest in the Company to ODL's shareholders for a total purchase price of \$54.6 million. The ODL Acquisition was accounted for in accordance with ASC 805. The assets acquired and the liabilities assumed were recorded at their fair values in accordance with ASC 820.

The \$54.6 million purchase price was allocated to ODL assets acquired and liabilities assumed based on their estimated fair values at the acquisition date as summarized in the following table. Goodwill of \$38.2 million was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Goodwill was allocated to the Retail Trading and Institutional segments based on an analysis of the fair value of assets acquired and expected future benefits of synergies created from combining ODL's FX, CFDs and spread betting business with the Company's foreign exchange trading expertise, the economies of scale expected from combining the operations of the two companies and the retail and institutional relationships brought by the ODL's management. No goodwill is expected to be deductible for federal income tax purposes.

#### ODL Purchase Price Allocation

(Amounts in thousands)

Purchase price		\$ 54,588
Net assets acquired	\$ (3,251)	
Adjustments to reflect acquired assets and liabilities at fair value	19,708	
Customer relationships <sup>(1)</sup>		
Non-compete agreements <sup>(2)</sup>	7,214	
Trade name <sup>(3)</sup>	330	
Deferred tax liability	(7,630)	
Fair value of net assets acquired		16,371
Goodwill resulting from the ODL acquisition		\$ 38,217

(1) Consists of retail and institutional customers. The amortization lives are 6 and 9 years for retail and institutional customers, respectively.

(2) Consists of two non-compete agreements with amortization lives of 2 and 3 years.

(3) Amortization life is 1 year

**Condensed Statement of Net Assets Acquired**

The following condensed statement of net assets acquired reflects the amounts of ODL net assets recognized as of the Acquisition Date, with amounts in thousands:

	<b>As of October 1, 2010</b>
<b>Assets</b>	
Cash and cash equivalents	\$ 3,823
Cash and cash equivalents, held for customers	162,299
Accounts receivable, net	13,382
Due from brokers	2,603
Deferred tax asset	12,051
Office, communication and computer equipment, net	3,248
Intangible assets	27,252
Other assets	1,795
Total assets	\$ 226,453
<b>Liabilities</b>	
Customer account liabilities	\$ 186,749
Accounts payable and accrued expenses	14,352
Due to brokers	1,351
Deferred tax liability	7,630
Total liabilities	210,082
Fair value of net assets acquired	\$ 16,371

**Accounts Receivable**

The Company has collected all material accounts receivable amounts as of December 31, 2012.

**Condensed Combined Financial Information**

The following condensed financial information presents the results of operations of ODL from the Acquisition Date to December 31, 2010, with amounts in thousands:

	<b>For the Period October 1, 2010 to December 31, 2010</b>
Total revenues	\$ 10,588
Net Income	\$ 3,007

**Pro Forma Condensed Combined Financial Information**

Pro Forma condensed combined financial information for the acquisitions completed in 2012 (i.e., Lucid), 2011 (i.e., Foreland and FXCMJ) and 2010 (i.e., ODL) are presented as they may have appeared if all acquisitions had been completed on January 1, 2012, 2011 and 2010, with amounts in thousands:

	<b>For the Years Ended</b>		
	<b>December 31, 2012</b>	<b>December 31, 2011</b>	<b>December 31, 2010</b>
Total revenues	\$ 459,171	\$ 581,507	\$ 419,163
Net Income before non-controlling interest	\$ 51,337	\$ 114,739	\$ 73,612

These pro forma results for the years ended December 31, 2012, 2011 and 2010 primarily include the related tax impact and the elimination of certain revenues and expenses resulting from transactions conducted with Lucid, Foreland, FXCMJ and ODL prior to these acquisitions as well as the adjustments for the intangible assets acquired in the Acquisition and the related tax impact.

**Acquisition-related Costs**

For the year ended December 31, 2012, acquisition-related transaction costs for the Acquisitions was \$0.9 million. For the year ended December 31, 2011, acquisition-related transaction costs for the acquisitions were \$0.2 million for the acquisition of Foreland and \$0.3 for the acquisition of FXCMJ. For the year ended December 31, 2010, acquisition-related costs for the ODL Acquisition were \$2.0 million. Acquisition-related transaction costs are included in General and administrative expense in the consolidated statements of operations.

Stockholders' Equity	12 Months Ended Dec. 31, 2012												
<u>Stockholders' Equity Note [Abstract]</u>													
<u>Stockholders' Equity Note Disclosure</u>	<b>Note 16. Stockholders' Equity</b>												
	<p>Refer to the description of the Reorganization and IPO as described in Note 2 for further information regarding the current capital structure of the Company.</p>												
	<p>The Corporation's authorized capital stock consists of 3,000,000,000 shares of Class A common stock, par value \$.01 per share, 1,000,000 shares of Class B common stock, par value \$.01 per share, and 300,000,000 shares of preferred stock, par value \$.01 per share.</p>												
	<p><b><i>Class A Common Stock Repurchase Program</i></b></p>												
	<p>On May 17, 2011 and October 17, 2011, the Company's Board of Directors approved the repurchase of \$30.0 million and \$20 million of its Class A common stock (the "Stock Repurchase Program"), respectively. On November 7, 2012, the Board of Directors approved a \$30.0 million increase in the Stock Repurchase Program for an aggregate of \$80.0 million. Purchases under the Stock Repurchase Program may be made from time to time in the open market and in privately negotiated transactions. Under the Stock Repurchase Program, there is no expiration date or other restrictions limiting the period over which the Company can make its share repurchase. The Stock Repurchase Program will expire only when and if the Company has repurchased \$80.0 million of its shares under this program. Under the Stock Repurchase Program, repurchased shares are retired and returned to unissued stock. The size and timing of these purchases are based on a number of factors, including price, business and market conditions.</p>												
	<p>During the year ended December 31, 2012, the Company repurchased and retired 750,125 shares of its Class A common stock, at an average price of \$9.96 per share, for approximately \$7.5 million pursuant to the trading program under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. The following table presents the changes in the Company's Class A common stock shares outstanding during the year ended December 31, 2012, with amounts in thousands:</p>												
	<table> <tr> <th data-bbox="419 784 1150 846">Class A Common Stock</th><th data-bbox="1150 784 1315 846">As of December 31, 2012</th></tr> <tr> <td data-bbox="419 846 1150 878">Balance at January 1, 2012</td><td data-bbox="1150 846 1315 878">\$ 14,899</td></tr> <tr> <td data-bbox="419 878 1150 909">Issued</td><td data-bbox="1150 878 1315 909">9,782</td></tr> <tr> <td data-bbox="419 909 1150 940">Repurchased</td><td data-bbox="1150 909 1315 940">(750)</td></tr> <tr> <td data-bbox="419 940 1150 972">Exchange of Holdings units into Class A common stock</td><td data-bbox="1150 940 1315 972">10,752</td></tr> <tr> <td data-bbox="419 972 1150 990">Balance at December 31, 2012</td><td data-bbox="1150 972 1315 990">\$ 34,683</td></tr> </table>	Class A Common Stock	As of December 31, 2012	Balance at January 1, 2012	\$ 14,899	Issued	9,782	Repurchased	(750)	Exchange of Holdings units into Class A common stock	10,752	Balance at December 31, 2012	\$ 34,683

	December 31, 2012	December 31, 2011
Receivables		
Advances to employees	\$ 0.9	\$ 0.5
Payables		
Method Credit Fund	\$ 9.0	\$ —
Employees	0.3	0.3
Shareholders with greater than 5% ownership in the Company	0.7	2.5
Due to Holdings non-controlling members	8.6	3.7
Due to Lucid non-controlling members in connection with trade settlements	9.6	—
Notes payable to Lucid non-controlling members in connection with the Acquisition	22.9	—
Tax receivable agreement	92.3	67.2
	\$ 143.4	\$ 73.7

The Company has advanced funds to several employees. The outstanding balances as of December 31, 2012 and 2011, included in the table above, are included in Other assets in the consolidated statements of financial condition.

Customer account liabilities include balances for employees and shareholders with greater than 5% ownership in the Company. Account liabilities of employees and shareholders with a greater than 5% ownership in the Company as of December 31, 2012 and 2011, included in the table above, are included in Customer liabilities in the consolidated statements of financial condition.

Pursuant to an agreement with a former employee, the Company incurred compensation expense in connection with the IPO in the amount of \$5.7 million for the year ended December 31, 2010. This amount is included in the consolidated statements of operations as Compensation and benefits.

In June 2011, US entered into an agreement with certain founding members of Holdings, whereby, these members reimbursed US for amounts related to National Futures Association ("NFA") and Commodity Futures Trading Commission ("CFTC") matters, up to \$16.3 million.

UK is party to an arrangement with Global Finance Company (Cayman) Limited, ("Global Finance"), and Master Capital Group, S.A.L. ("Master Capital"). A shareholder with greater than a 5% ownership of the Company beneficially owns more than 90% of the equity of Global Finance and Master Capital. Pursuant to such arrangement, Global Finance and Master Capital are permitted to use the brand name "FXCM" and our technology platform to act as the Company's local presence in certain countries in the Middle East and North Africa ("MENA"). UK collects and remits to Global Finance and Master Capital fees and commissions charged by Global Finance and Master Capital to customers in MENA countries. For the years ended December 31, 2012, 2011 and 2010, these fees and commissions were approximately \$2.5 million, \$3.5 million and \$1.8 million, respectively, and are included in the consolidated statements of operations. The Company expects to enter into a definitive agreement in the near future.

In March 2012, the Company entered into a settlement agreement with the former owners of ODL in connection with the acquisition of ODL by the Company in October 2010. The settlement agreement serves to settle outstanding claims arising out of the acquisition of ODL related to certain warranties and indemnities pursuant to the share and purchase agreement. The settlement to the Company included cash of \$1.2 million, return of capital, (i.e., equity interest of Holdings) of \$4.0 million, and the forgiveness of the payment of a liability by the Company to the former owners in the amount of \$1.4 million. The Company recorded a gain of \$1.4 million, included in Other income in the consolidated statements of operations, in connection with this settlement. In addition, the settlement required ODL to establish a collateral account for the benefit of the Company to pay certain outstanding third party claims up to an agreed upon amount.

In August 2012, the Company entered into a master guaranty agreement (the "Guaranty") with Method Credit Fund ("Method"), a newly formed Cayman Island company, owned by certain directors and shareholders of the Company including several of the Company's executive officers. Pursuant to the Guaranty, Method unconditionally guarantees the obligations of certain counterparties that maintain a margin account with the Company. The Guaranty requires Method to maintain a cash collateral account held by the Company equal to the aggregate amount of margin extended to all counterparties covered by the Guaranty. In exchange for this unconditional guaranty, the Company remits a fee to Method determined on counterparty by counterparty basis which is agreed upon by the Company, Method and the respective counterparty. As of December 31, 2012, the Company held cash collateral in the amount of \$9.0 million and the aggregate amount of margin extended under the Guaranty was \$1.1 million. The cash collateral of \$9.0 million is included Cash and cash equivalents, held for customers and Customer account liabilities in the consolidated statements of financial condition. During 2012, no payments were made by Method to the Company to satisfy a guaranteed counterparty obligation. For the year ended December 31, 2012, fees collected from counterparties and subsequently remitted to Method by the Company under the Guaranty were not material and are included in the consolidated statement of operations.

The Guaranty may be terminated by either the Company or Method at any time provided that if Method elects to terminate the Guaranty Company consent is required if a guaranteed obligation is outstanding. Additionally, the Company maintains a call option to buy the equity stakes of the foregoing directors and shareholders for book value at any time. The right to exercise such option rests exclusively with the independent and disinterested directors of the Company.

Accounts payable and accrued expenses include a balance of \$9.6 million of advances from certain Lucid non-controlling members in connection with trade settlements. Notes payable of \$22.9 million represents the amount borrowed from the Lucid non-controlling members in connection with the Acquisition (see Notes 5 and 20).

In June 2011, US entered into an agreement with certain founding members of Holdings, whereby, these members reimbursed US for amounts related to National Futures Association ("NFA") and Commodity Futures Trading Commission ("CFTC") matters, up to \$16.3 million.

#### Exchange Agreement

As discussed in Note 2, Existing Unit Holders owners entered into an Exchange Agreement under which they (or certain

permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO (subject to the terms of the exchange agreement as described therein), to exchange their Holding Units for shares of the Corporation's Class A Common Stock on a one-for-one basis at fair value, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. During the year ended December 31, 2012, certain members of Holdings exchanged 10.8 million of their Holding Units, on a one-for-one basis, for shares of Class A common stock of the Corporation under the Exchange Agreement.

**Payments under Tax Receivable Agreement**

As discussed in Note 2, the Corporation entered into a tax receivable agreement with the Existing Unit Holders. The aggregate payments due under the tax receivable agreement were \$100.9 million and \$70.9 million as of December 31, 2012 and 2011, respectively.

Commitments and Contingencies	12 Months Ended

<a href="#">Commitments and Contingencies Disclosure [Abstract]</a>	

[Commitments and Contingencies Disclosure](#)

## Note 19. Commitments and Contingencies

### *Operating Lease Commitments*

The Company leases office space and equipment under operating leases. Some of the lease agreements contain renewal options ranging from 3 to 5 years at prevailing market rates. The lease for the office facilities is subject to escalation factors primarily related to property taxes and building operating expenses. Future minimum lease payments under non-cancelable operating leases with terms in excess of one year are as follows as of December 31, 2012, with amounts in thousands:

Year Ending December 31,	As of December 31, 2012
2013	7,032
2014	5,213
2015	3,398
2016	2,469
2017	2,818
Thereafter	24,199
	<u>\$ 45,129</u>

The aggregate rental expense for operating leases charged to operations, included in General and administrative expense in the consolidated statements of operations, for the years ended December 31, 2012, 2011 and 2010, was \$7.9 million, \$8.9 million and \$4.6 million, respectively. These amounts are net of sublease income. There was no sublease income for the year ended December 31, 2012. Sublease income was not material for the years ended December 31, 2011 and 2010. For the years ended December 31, 2012 and 2011, there were no sublease commitments.

### *Capital Lease Commitments*

The Company leases office equipment under capital leases. Interest paid as part of our capital lease obligation was not material for the years ended December 31, 2012, 2011, and 2010, respectively. The capital leases expire in 2015. Future minimum lease payments for capital leases are not material for the years 2012 to 2015.

### *Litigation*

In the ordinary course of business, we may from time to time be involved in litigation and claims incidental to the conduct of our business, including intellectual property claims. In addition, our business is also subject to extensive regulation, which may result in regulatory proceedings against us. We have been named in various arbitrations and civil litigation cases brought by customers seeking damages for trading losses. Management has investigated these matters and believes that such cases are without merit and is defending them vigorously. However, the arbitrations and litigations are presently in various stages of the judicial process and no judgment can be made regarding the ultimate outcome of the arbitrators' and/or court's decisions.

In August 2011, FXCM US entered into a settlement with the NFA. The settlement terms principally pertain to FXCM US's practice concerning the execution of price improvements in its trading execution system prior to August 2010. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations to pay a fine of \$2.0 million to the NFA and to provide restitution to the affected clients.

In October 2011, FXCM US entered into a settlement with the CFTC. The settlement principally addresses allegations regarding FXCM US's failure to monitor and maintain its trading systems prior to August 2010. Under the terms of the settlement, FXCM US agreed, without admitting or denying any of the allegations to pay a fine of \$6.0 million to the CFTC and to provide restitution to the affected clients.

The Company incurred costs of approximately \$16.3 million relating to these matters which are included in General and administrative in the consolidated statement of operations. Additionally, in June 2011, FXCM US entered into an agreement with certain founding members of Holdings, whereby these members reimbursed FXCM US for the amounts related to the NFA and CFTC matters, up to \$16.0 million, plus additional amounts, as approved by such founding members. Consequently, there was no impact to the Corporation's net income as the expense was allocated to the respective founding members as permitted under the terms of the LLC Agreement. Accordingly, \$16.3 million of additional capital was provided by the respective founding members.

In October, 2011, the Trustee in bankruptcy, representing three debtors, Certified, Inc., Global Bullion Trading Group, Inc., and WJS Funding, Inc., filed an adversary complaint in the United States Bankruptcy Court for the Southern District of Florida against US, ODL Securities, Inc. and ODL Securities, Ltd. (the "Defendants"). Before the Defendants filed any response, the Trustee amended the Complaint to add ODL Group Limited, FXCM Securities, LLC, FSL, the Corporation and Holdings as Defendants. The Amended Complaint asserts claims under the Federal Bankruptcy Code to recover allegedly preferential and fraudulent transfers to the Defendants, under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C § 1961 et seq., as well as the common law. The Amended Complaint seeks an unspecified amount of compensatory and punitive damages, interests, and costs. The Defendants have filed motions to dismiss the Amended Complaint in its entirety. Thereafter, the parties engaged in non-binding mediation. Ultimately a settlement was reached in the amount of \$0.7 million which was approved by the Bankruptcy Court on June 20, 2012.

In September 2012, the FSA initiated investigations relating to UK's and FSL's past trade execution practices. Although we are in the process of complying with the FSA's requests, we have not been formally notified whether or not the FSA intends to take any action against us with respect to our trade execution practices.

In 2012, FXCMJ accrued \$2.6 million as an estimate to settle certain trading system matters with the JFSA. The Company expects settlement of this matter, including any administrative penalty, in the first quarter of 2013 and does not expect the ultimate settlement amount to differ materially from the amount accrued.

For the outstanding matters referenced above for which a loss is more than remote but less than likely, whether in excess of an accrued liability or where there is no accrued liability, the Company has estimated a range of possible loss. The Company believes the estimate of the aggregate range of possible loss in excess of accrued liabilities for such matters is between nil and \$6.5 million as of December 31, 2012.

In view of the inherent difficulty of predicting the outcome of litigation and claims, the Company often cannot predict what the eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss related to each pending matter may be. Furthermore, the above-referenced matters represented in the estimated aggregate range of possible loss will change from time to time and actual results may vary significantly from the current estimate. An adverse outcome in one or more of these matters could be material to the Company's results of operations or cash.

Significant Accounting Policies and Estimates	12 Months Ended Dec. 31, 2012																		
<u>Accounting Policies [Abstract]</u>																			
<u>Significant Accounting Policies and Estimates</u>	<p data-bbox="427 208 900 232"><b>Note 3. Significant Accounting Policies and Estimates</b></p> <p data-bbox="459 248 652 273"><i><b>Basis of Presentation</b></i></p> <p data-bbox="427 288 1490 389">The accompanying consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Company consolidates those entities in which it is the primary beneficiary of a variable-interest entity as required by ASC 810, <i>Consolidations</i> ("ASC 810"), or entities where it has a controlling interest. Intercompany accounts and transactions are eliminated in consolidation.</p> <p data-bbox="427 405 1490 607">As indicated above, the Corporation operates and controls all of the businesses and affairs of Holdings and its subsidiaries. As such, Holdings meets the definition of a variable interest entity under ASC 810. Further, the Corporation is the primary beneficiary of Holdings as a result of its 100% voting power and control over Holdings. As a result, the Corporation consolidates the financial results of Holdings and records a non-controlling interest for the economic interest in Holdings held by the Existing Unit Holders to the extent that the book value of their interest in Holdings is greater than zero. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 42.5% and 57.5%, respectively, as of December 31, 2012. The Corporation's and the non-controlling unit holders' economic interest in Holdings was 20.4% and 79.6%, respectively, as of December 31, 2011.</p> <p data-bbox="427 622 1490 797">Net income attributable to the non-controlling interest on the consolidated statements of operations represents the portion of earnings or loss attributable to the economic interest in Holdings held by the non-controlling unit holders and the portion of earnings or loss attributable to the economic interest in Lucid (see Note 5) held by Lucid non-controlling members. Non-controlling interest in the consolidated statements of financial condition represents the portion of net assets of Holdings attributable to the non-controlling unit holders based on total units of Holdings owned by such unit holder and the portion of the net assets of Lucid attributable to the non-controlling Lucid members based on the equity interest owned by each of the Lucid non-controlling members.</p> <p data-bbox="427 813 1294 837">The Company's consolidated financial statements include the following subsidiaries of Holdings:</p> <table data-bbox="427 837 1294 1066"> <tbody> <tr> <td>Forex Capital Markets LLC</td><td>("US")</td></tr> <tr> <td>FXCM Asia Limited</td><td>("HK")</td></tr> <tr> <td>Forex Capital Markets Limited</td><td>("UK")</td></tr> <tr> <td>FXCM Australia Limited</td><td>("Australia")</td></tr> <tr> <td>ODL Group Limited</td><td>("ODL")</td></tr> <tr> <td>FXCM Securities Limited</td><td>("FSL")</td></tr> <tr> <td>FXCM Japan Securities Co., Ltd.</td><td>("FXCMJ")</td></tr> <tr> <td>FXCM UK Merger Limited</td><td>("Merger")</td></tr> <tr> <td>Lucid Markets Trading Limited</td><td>("Lucid")</td></tr> </tbody> </table> <p data-bbox="427 1081 1474 1182">FXCMJ a wholly owned subsidiary of Holdings, has a fiscal year end of March 31 while the Company has a fiscal year end of December 31. FXCMJ is a Japanese based foreign exchange provider and is required under Japanese law to have a fiscal year end of March 31. The difference between the Company's reporting year end and FXCMJ does not result in a material impact on the Company's financial position or results of operations.</p> <p data-bbox="459 1198 1422 1223">Certain reclassifications have been made to previously reported amounts to conform to the current presentation.</p> <p data-bbox="459 1238 611 1263"><i><b>Use of Estimates</b></i></p> <p data-bbox="427 1279 1490 1402">The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements as well as the reported amount of revenue and expenses during the year. Actual results could differ from those estimates and could have a material impact on the consolidated financial statements.</p> <p data-bbox="459 1417 708 1442"><i><b>Cash and Cash Equivalents</b></i></p> <p data-bbox="427 1458 1490 1559">Cash and cash equivalents include cash at banks and highly liquid instruments with original maturities of less than 90 days at the time of purchase and cash held by FX and CFD market makers related to hedging activities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.</p> <p data-bbox="459 1574 879 1599"><i><b>Cash and Cash Equivalents, held for customers</b></i></p> <p data-bbox="427 1615 1490 1693">Cash and cash equivalents, held for customers represents cash held to fund customer liabilities. At times, balances held in U.S. bank accounts may exceed federally insured limits. This potentially subjects the Company to concentration risk. The Company has not experienced losses in such accounts.</p> <p data-bbox="427 1709 1490 1832">The balance arises primarily from cash deposited by customers and net realized gains from customer trading activity. The Company records a corresponding liability in connection with this amount that is included in customer account liabilities in the consolidated statements of financial condition (see Note 6). A portion of the balance is not available for general use due to legal restrictions in accordance with certain jurisdictional regulatory requirements. These legally restricted balances were \$1.0 billion and \$0.9 billion as of December 31, 2012 and 2011, respectively.</p> <p data-bbox="459 1848 644 1872"><i><b>Due from/to Brokers</b></i></p> <p data-bbox="427 1888 1474 1989">Due from/to brokers represents the amount of the unsettled spot currency trades that the Company has open with its financial institutions. Also included in due from/to brokers is the fair value of open future contracts discussed above. The Company has master netting agreements with its respective counterparties under which its due to/from brokers are presented on a net-by-counterparty basis in accordance with ASC 815.</p> <p data-bbox="459 2004 564 2029"><i><b>Derivatives</b></i></p> <p data-bbox="427 2045 1474 2145">Derivative financial instruments are accounted for in accordance with ASC 815, <i>Derivatives and Hedging</i> ("ASC 815"), and are included in due to/from brokers in the consolidated statements of financial condition. The Company recognizes all derivative financial instruments in the consolidated balance sheet as either assets or liabilities at fair value. The Company enters into future contracts to (i) economically hedge the open customer contracts on its CFD business and (ii) hedge</p>	Forex Capital Markets LLC	("US")	FXCM Asia Limited	("HK")	Forex Capital Markets Limited	("UK")	FXCM Australia Limited	("Australia")	ODL Group Limited	("ODL")	FXCM Securities Limited	("FSL")	FXCM Japan Securities Co., Ltd. trading in its electronic market making and institutional foreign exchange spot and futures markets. Future contracts are exchanged traded contracts to either purchase or sell a specific asset at a specified future date for a specified price. Gains or losses on future contracts related to the Company's CFD business are included in Retail trading revenue and gains or losses on hedge trading in its electronic market making and institutional foreign exchange spot and futures markets are included in Institutional trading revenue in the consolidated statements of operations.

#### ***Fair Value Measurements***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. These three levels of fair value hierarchy are defined as follows:

Level I: Quoted prices in active markets for identical assets or liabilities, accessible by the Company at the measurement date.

Level II: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level III: Unobservable inputs for assets or liabilities.

As of December 31, 2012 and 2011, substantially all of the Company's financial instruments were carried at fair value based on spot exchange rates broadly distributed in active markets, or amounts approximating fair value. Cash and cash equivalents and cash and cash equivalents, held for customers are deemed to be Level I financial assets. Open futures contracts included in Due from brokers and Due to brokers are classified as Level I financial assets and liabilities, respectively, as they are actively traded and valued at their quoted market prices. Unsettled spot currency trades included in Due from brokers and Due to brokers are classified as Level II financial assets and liabilities, respectively, and are carried at contracted amounts, which approximate fair value. Other assets, including receivables from others, are carried at contracted amounts, which approximate fair value and are classified as Level II financial assets. Other liabilities, including customer account liabilities, payables to others, credit agreement and notes payable are carried at contracted amounts, which approximates fair value and are classified as Level II financial liabilities.

The Company did not have any Level III financial assets or liabilities as of December 31, 2012 and 2011. The Company did not have any transfers in or out of Level I and II during the year ended December 31, 2012.

#### ***Office, Communication and Computer Equipment, net***

Office, communication and computer equipment, net, consist of computer equipment, purchased technology hardware and software, internally developed software, leasehold improvements, furniture and fixtures and other equipment, licenses and communication equipment. Office, communication and computer equipment are recorded at historical cost, net of accumulated depreciation. Additions and improvements that extend the lives of assets are capitalized, while expenditures for repairs and maintenance are expensed as incurred. Certain costs of software developed or obtained for internal use are capitalized. Depreciation is computed using the straight-line method. The Company depreciates these assets using the following useful lives:

Computer equipment	3 to 5 years
Software	2 to 5 years
Leasehold improvements	Lesser of the estimated economic useful life or the term of the lease
Furniture and fixtures and other equipment	3 to 5 years
Licenses	2 to 3 years
Communication equipment	3 to 5 years

#### ***Valuation of Other Long-Lived Assets***

The Company also assesses potential impairments of its other long-lived assets, including office, communication and computer equipment, when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is recognized when the carrying amount of the long-lived asset exceeds its fair value and is not recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Any required impairment loss is measured as the amount by which the carrying amount of a long-lived asset exceeds its fair value and is recorded as a reduction in the carrying value of the related asset and a charge to operating results. There was no impairment of other long-lived assets in the years ended December 31, 2012, 2011 and 2010.

#### ***Business Combination***

The Company accounts for business acquisitions in accordance with ASC 805 and records assets acquired and liabilities assumed at their fair values as of the acquisition date. The Company records any excess purchase price over the value assigned to net tangible and identifiable intangible assets of a business acquired as goodwill. Acquisition related costs are expensed as incurred. See Note 5 for further details.

#### ***Goodwill***

The Company recorded goodwill from the acquisitions of ODL, FXCMJ, Foreland Forex Co. Limited ("Foreland") and Lucid. Goodwill represents the excess purchase price over the value assigned to the net tangible and identifiable intangible assets of a business acquired. Goodwill is allocated to the Company's reporting units based on the assignment of the fair values of each reporting unit of the acquired company. For purposes of the goodwill impairment test, the Company has identified its Retail and Institutional trading segments as its reporting units. The Company performs a two-step goodwill impairment review at the reporting unit level annually, or in interim periods if certain events occur indicating that the carrying value may be impaired. The Company tests for impairment during the fourth quarter of our fiscal year using October 1 carrying values.

The first step of the two-step process involves a comparison of the estimated fair value of a reporting unit to its carrying amount, including goodwill. In performing the first step, the Company determines the fair value of a reporting unit using a discounted cash flow ("DCF") analysis. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, the amount and timing of expected future cash flows. The cash flows employed in the DCF analyses are based on the Company's most recent budgets and business plans and, when applicable, various growth rates are assumed for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the respective reporting units. If the estimated fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not impaired and the

second step of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with its carrying amount to measure the amount of impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination (i.e., the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that reporting unit including any unrecognized intangible assets as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid). If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the reporting unit's goodwill, an impairment loss is recognized in an amount equal to that excess.

There was no impairment of goodwill for the year ended December 31, 2012. Although there is no impairment as of December 31, 2012, events such as economic weakness and unexpected significant declines in operating results of reporting units may result in our having to perform a goodwill impairment test for some or all of our reporting units prior to the required annual assessment. These types of events and the resulting analysis could result in goodwill impairment charges in the future. See Note 9 below for further discussion.

#### ***Other Intangible Assets, net***

Other intangible assets, net, primarily include customer relationships, proprietary technology and non-compete agreements. Customer relationships were acquired from ODL, Foreland and FXCMJ, non-compete agreements were acquired from ODL, and Lucid and the proprietary technology was acquired from Lucid.

The customer relationships and non-compete agreements are finite-lived intangibles and are amortized on a straight-line basis over their estimated average useful life of 2 to 9 years and 2 to 3 years, respectively. Proprietary technology is also finite-lived intangibles and is amortized on a straight-line basis over their estimated average useful life of 4 to 7 years, respectively. The useful life of these intangibles is based on the period they are expected to contribute to future cash flows as determined by the Company's historical experience. For these finite-lived intangible assets subject to amortization, impairment is considered upon certain "triggering events" and is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset. There was no impairment of finite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

The FX trading license is an indefinite-lived asset that is not amortized but tested for impairment. The Company's policy is to test for impairment at least annually or in interim periods if certain events occur indicating that the fair value of the asset may be less than its carrying amount. An impairment test on this indefinite-lived asset is performed during the fourth quarter of the Company's fiscal year using the October 1<sup>st</sup> carrying value. Impairment exists if the carrying value of the indefinite-lived intangible asset exceeds its fair value. There was no impairment of indefinite-lived intangible assets for the years ended December 31, 2012, 2011 and 2010.

#### ***Equity Method Investment***

Investments where the Company is deemed to exercise significant influence (generally defined as owning a voting interest of 20% to 50%), but no control, are accounted for using the equity method of accounting. The Company records its pro-rata share of earnings or losses each period and records any dividends as a reduction in the investment balance. These investments are included in Other assets in the consolidated statements of financial condition and earnings or losses are included in Other income in the consolidated statements of operations. Equity method investments are included in corporate for purposes of segment reporting (see Note 24).

#### ***Accounts Receivable, net***

As of December 31, 2012 and 2011, accounts receivable, net, consisted primarily of amounts due from institutional customers relating to the Company's FX business, and fees receivable from the Company's white label service to third parties and payments for order flow, described in "Retail Trading Revenue" below. Receivables are shown net of reserves for uncollectible accounts. The reserve for bad debts is maintained at a level that management believes to be sufficient to absorb estimated losses in the accounts receivable portfolio. The reserve is increased by the provision for bad debts which is charged against operating results and decreased by the amount of charge-offs, net of recoveries. The amount charged against operating results is based on several factors including, but not limited to, a continuous assessment of the collectability of each account, the length of time a receivable is past due and our historical experience with the particular customer. As of December 31, 2012 and 2011, the reserve netted against receivables in the consolidated statements of financial condition was not material.

#### ***Other Assets***

Other assets include prepaid expenses, equity method investments, deposits for rent security and employee advances (see Note 11).

#### ***Accounts Payable and Accrued Expenses***

Accounts payable and accrued expenses include operating expenses payable, commissions payable which represents balances owed to referring brokers for trades transacted by customers that were introduced to the Company by such brokers, taxes payable, due to members pursuant to a tax receivable agreement (see Note 14), due to the Lucid non-controlling members in connection with trade settlements, bonuses payable, deferred rent, interest due on borrowings and a payable for a portion of the cash consideration relating to the business acquisitions (see Notes 5 and 12).

#### ***Foreign Currency***

Foreign denominated assets and liabilities are re-measured into the functional currency at exchange rates in effect at the statement of financial condition dates through the consolidated statements of operations. Gains or losses resulting from foreign currency transactions are re-measured using the rates on the dates on which those elements are recognized during the period, and are included in retail and institutional trading revenue in the consolidated statements of operations. The Company recorded a gain of \$0.8 million, \$3.1 million and \$2.8 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Translation gains or losses resulting from translating the Company's subsidiaries' financial statements from the functional currency to the reporting currency, net of tax, are included in Foreign currency translation gain (loss) in the consolidated statements of comprehensive income. Assets and liabilities are translated at the statement of financial condition date while revenues and expenses are translated at an applicable average rate.

#### ***Revenue Recognition***

The Company makes foreign currency markets for customers trading in FX spot markets and through its subsidiary FSL, engages in equity and related brokerage activities. FX transactions are recorded on the trade date and positions are marked to market daily with related gains and losses, including gains and losses on open spot transactions, recognized currently in income. Commissions earned on brokerage activities are recorded on a trade date basis and are recognized currently in income.

#### ***Retail Trading Revenue***

Under the Company's retail agency FX offering, trading revenue is earned by adding a markup to the price provided by FX market makers generating trading revenue based on the volume of transactions and is recorded on trade date. Under the agency model, when a customer executes a trade on the best price quotation presented by the FX market maker, the Company acts as a credit intermediary, or a riskless principal, simultaneously entering into a trade with the customer and the FX market maker. This agency model has the effect of automatically hedging the Company's positions and eliminating market risk exposure. Retail trading revenues principally represent the difference of the Company's realized and unrealized foreign currency trading gains or losses on its positions with customers and the systematic hedge gains and losses from the trades entered into with the FX market makers. Retail trading revenue also includes fees earned from arrangements with other financial institutions to provide platform, back office and other trade execution services. This service is generally referred to as a white label arrangement. The Company earns a percentage of the markup charged by the financial institutions to their customers. Fees from this service are recorded when earned on a trade date basis. Additionally, the Company earns income from trading in CFDs, rollovers, payments for order flow, and spread betting. Income or loss on CFDs represents the difference between the Company's realized and unrealized trading gains or losses on its positions and the hedge gains or losses with the other financial institutions. Income or loss on CFDs is recorded on a trade date basis. Income or loss on rollovers is the interest differential customers earn or pay on overnight currency pair positions held and the markup that the Company receives on interest paid or received on currency pair positions held overnight. Income or loss on rollovers is recorded on a trade date basis. Income earned on order flow represents payments received from certain FX market makers in exchange for routing trade orders to these firms for execution. The Company's order routing software ensures that payments for order flow do not affect the routing of orders in a manner that is detrimental to its retail customers. The Company recognizes payments for order flow as earned on a trade date basis. Spread betting is where a customer takes a position against the value of an underlying financial instrument moving either upward or downward in the market. Income on spread betting is recorded as earned on a trade date basis.

Recently, the Company launched an offering to some of its smaller retail clients to trade with a dealing desk, or principal model. In the principal model offering, the Company earns revenue from: (i) the difference between the retail bid/offer spread and wholesale bid/offer spread for trades the Company has chosen to hedge and (ii) net gains or losses, if any, where the Company has not hedged the customer trade.

#### ***Institutional Trading Revenue***

Institutional trading revenue relates to commission income generated by facilitating spot FX trades on behalf of institutional customers through the services provided by the FXCM Pro division. The counterparties to these trades are external financial institutions that also hold customer account balances. The Company receives commission income for customers' use of FXCM Pro without taking any market or credit risk. Institutional trading revenue is recorded on a trade date basis. The Company also earns income from market making and electronic trading in the institutional foreign exchange spot and futures markets through its subsidiary, Lucid. Income on market making and electronic trading in foreign exchange spot and future currencies represents the spread between the bid and ask price for positions purchased and sold and the change in value of positions purchased and sold. Income on market making is recorded as trading gains, net of trading losses, on a trade date basis.

#### ***Interest Income***

Interest income consists of interest earned on cash and cash equivalents and cash and cash equivalents, held for customers and is recognized in the period earned.

#### ***Other Income***

Other income includes amounts earned from the sale of market data, equity and equity option brokerage activities, earnings and losses from equity method investments, account maintenance fees and ancillary fee income.

For the year ended December 31, 2012, Other income in the consolidated statements of operations includes the recognition of a gain related to a settlement with the former owners of ODL in connection with the acquisition of ODL in October 2010 (see Note 14).

For the year ended December 31, 2011, Other income in the consolidated statements of operations includes \$4.5 million of revenue related to the termination of a trade execution services contract that resulted in the recognition of previously deferred income and \$3.3 million attributable to the re-measurement of the Due to related parties pursuant to tax receivable agreement to reflect the Company's revised U.S. Federal income tax rate.

#### ***Communications and Technology***

Communications and technology expense consists primarily of costs for network connections to our electronic trading platforms, telecommunications costs, and fees paid for access to external market data. This expense is affected primarily by the growth of electronic trading, our network/ platform capacity requirements and by changes in the number of telecommunication hubs and connections which provide our customers with direct access to our electronic trading platforms.

#### ***Trading Costs, Prime Brokerage and Clearing Fees***

Trading costs, prime brokerage and clearing fees primarily represent fees paid to third party clearing banks and prime brokers for clearing foreign exchange spot futures currency and contract transactions, transaction fees paid to exchanges, equity options brokerage activity fees, and fees paid to third party providers for use of their platform for the Company's market making trading business. Clearing fees primarily fluctuate based on changes in volume, rate of clearing fees charged by clearing banks and rate of fees paid to exchanges.

#### ***Referring Broker Fees***

Referring broker fees represent commissions paid to brokers for introducing trading customers to the Company. Commissions are determined based on the number and size of transactions executed by the customers and are recorded on a trade date basis.

### ***Compensation and Benefits***

Compensation and benefits expense represents employee and member salaries and benefit expense, including stock based compensation expense.

The Company accounts for stock-based compensation in accordance with ASC 718, *Compensation-Stock Compensation* ("ASC 718"). The fair value of the Company's stock-based compensation is estimated using the Black-Scholes option pricing model or on the fair value of the Corporation's Class A common stock. The Company recognizes compensation expense for equity awards on a straight-line basis over the requisite service period of the award. Compensation expense is adjusted for an estimate of equity awards that do not vest in the future because service or performance conditions are not satisfied (forfeitures) and have been included in Compensation and benefits in the consolidated statements of operations. See Note 15 for further details.

### ***Advertising and Marketing***

Advertising and marketing costs are charged to operations when incurred.

### ***General and Administrative Expenses***

General and administrative expenses include bank processing and regulatory fees, professional and consulting fees, occupancy and equipment expense and other administrative costs. Bank processing fees are costs associated with the processing of credit card transactions. Regulatory fees are volume-based costs and annual fees charged by certain regulatory authorities.

### ***Income Taxes***

Holdings operates in the United States ("U.S.") as a limited liability company that is treated as a partnership for U.S. federal, state and local income tax purposes. As a result, Holding's income from its U.S. operations is not subject to U.S. federal income tax because the income is attributable to its members. Accordingly, subsequent to the IPO, the Company's U.S. tax provision is solely based on the portion of Holdings' income attributable to the Corporation and excludes the income attributable to other members of Holdings whose income is included in Net Income attributable to non-controlling interest in FXCM Holdings LLC in the consolidated statements of operations. Prior to the IPO, the Company operated as a limited liability company that was treated as partnership for U.S. federal income tax purposes. As a result, the Company's income from its U.S. operations was not subject to U.S. federal income tax because such income was entirely attributed to its members and included in the tax returns of its members.

Deferred taxes are provided using a liability method, whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences represent the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect for changes in tax laws and rates on the date of enactment. See Note 22 for further details.

In addition to U.S. federal and state income taxes, the Company is subject to Unincorporated Business Tax which is attributable to Holding's operations apportioned to New York City. The Company's foreign subsidiaries are also subject to local taxes.

The Company recognizes tax benefits for uncertain tax positions only if it is more likely than not that a position is sustainable based on its technical merits. Interest and penalties on uncertain tax positions are included as a component of the provision for Income taxes on the consolidated statements of operations.

### ***Allocation and Distribution to Non-controlling Interests***

The allocation of Holdings' earnings to the members is determined in accordance with the sharing ratios as defined in the LLC Agreement. Distributions to members are made according to the LLC Agreement. See Notes 14 and 21 for further details. The allocation of Lucid's earnings to the Lucid non-controlling member is determined in accordance with the Deed of Shareholders Agreement (the "Shareholders Agreement"). Distributions to the Lucid non-controlling members are made in accordance with the Shareholders Agreement. See Note 5 for further details.

### ***Recently Adopted Accounting Pronouncements***

#### ***Fair Value Measurements and Related Disclosures***

In May 2011, the FASB issued authoritative guidance that provides a uniform framework for fair value measurements and related disclosures between U.S. GAAP and International Financial Reporting Standards. Additional disclosure requirements under this guidance include: (1) for Level 3 fair value measurements, quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity's use of nonfinancial asset that is different from the asset's highest and best use, the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required, the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.

#### ***Presentation of Comprehensive Income***

In June 2011, the FASB issued authoritative guidance that eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other updates to the presentation of comprehensive income. Under this guidance, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. This guidance became effective for the Company on January 1, 2012 and did not have a material impact on its consolidated financial statements.

### ***Recently Issued Accounting Pronouncement***

#### ***Balance Sheet Offsetting***

In December 2011, the FASB issued Accounting Standards Update (“ASU”) No. 2011-11 which requires disclosures of both gross and net information about instrument and transactions eligible for offset as well as transactions subject to an agreement similar to a master netting agreement. ASU No. 2011-11 is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods and must be applied retrospectively. As this guidance is limited to presentation only, adoption of this guidance is not expected to have a material impact on the Company’s financial statements.

***Testing Goodwill for Impairment***

In July 2012, the FASB issued amended guidance relating to FASB ASC Topic 350, “Intangibles — Goodwill and Other,” which permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then no further action is required. This accounting guidance is effective for the Company on January 1, 2013 with early adoption permitted. Since this guidance only changes the manner in which the Company assesses indefinite-lived intangible assets for impairment, adoption is not expected to have a material effect on the Company’s financial position or results of operations.

Debt	12 Months Ended Dec. 31, 2012																						
Debt Disclosure [Abstract]																							
Debt																							
Note 20. Debt																							
Credit Agreement																							
<p>On December 19, 2011, Holdings entered into a three year credit agreement (the “Credit Agreement”) with a syndicate of financial institutions. The Credit Agreement provided for a revolving credit facility of up to \$75.0 million. The credit facility is guaranteed by certain subsidiaries of Holdings and is secured by a pledge of all of the equity interests in certain of Holdings’ domestic subsidiaries and 65% of the voting equity interests in certain of its foreign subsidiaries.</p> <p>On November 8, 2012, the Holdings entered into an amendment to the Credit Agreement (the “Amendment”). The Amendment provides Holdings with the ability to increase the credit facility during the term of the Credit Agreement up to a maximum of \$175.0 million. Additionally, the Amendment modified certain terms of the Credit Agreement, among other things, to provide additional flexibility regarding financing and investment initiatives. Simultaneously, on November 8, 2012, Holdings received additional commitments from a group of financial institutions, both new and existing lenders, and increased the credit facility to \$155.0 million. As of December 31, 2012, Holdings’ outstanding balance under the Credit Agreement was \$85.0 million.</p> <p>Under the terms of the Credit Agreement, loans will bear interest at either a Eurodollar Rate or a Base rate (as defined below), at the Holdings’ election, plus an applicable margin, based on Holdings’ leverage ratio. In addition, the Holdings must pay an annual commitment fee based on Holdings’ leverage ratio on the undrawn commitments under the Credit Agreement. The applicable margin and commitment fees are set forth in the table below:</p> <table><tr><th>Consolidated Leverage Ratio</th><th>Commitment Fee</th><th>Applicable Margin for Eurodollar Loans</th><th>Applicable Margin for Base Rate Loans</th></tr><tr><td>Less than .5 to 1.0</td><td>0.25%</td><td>1.75%</td><td>0.75%</td></tr><tr><td>Greater than or equal to 0.5 to 1.0 but less than 1.0 to 1.0</td><td>0.30%</td><td>2.00%</td><td>1.00%</td></tr><tr><td>Greater than or equal to 1.0 to 1.0 but less than 1.50 to 1.00</td><td>0.35%</td><td>2.25%</td><td>1.25%</td></tr><tr><td>Greater than or equal to 1.50 to 1.00</td><td>0.40%</td><td>2.50%</td><td>1.50%</td></tr></table> <p>The Base Rate means for any day a fluctuating rate per annum equal to the highest of (a) the Federal Funds Rate, as defined in the Credit Agreement, plus 0.5%, (b) the rate of interest in effect for such day as publicly announced from time to time by the administrative agent, Bank of America, N.A., as its prime rate, and (c) the Eurodollar Rate plus 1.00%. The Eurodollar Rate means the rate per annum equal to (i) the British Bankers Association LIBOR Rate, or (ii) if such rate is not available, the rate per annum determined by the administrative agent.</p> <p>Interest expense related to borrowings under the Credit Agreement, including the amortization of debt financing costs, included in interest on borrowings in the consolidated statements of operations was \$0.9 million and \$0.8 million for the years ended December 31, 2012 and 2011, respectively. No interest expense or commitment fee was recorded for the year ended December 31, 2010 since the Credit Agreement was not in place during this period.</p> <p>Pursuant to covenants in the Credit Agreement, Holdings’ is required to maintain: excess net capital amount of 125% of adjusted net capital required to be maintain as of the last day of any fiscal quarter for US and UK (see Note 18), Consolidated Interest Coverage Ratio and Consolidated Leverage Ratio, as defined in Credit Agreement, of 4:00 to 1:00 and 2:00 to 1:00, respectively, as of the last day of any fiscal quarter and Net Unhedged Exposure, as defined Credit Agreement, of less than 20% of total assets of Holdings and its subsidiaries. In addition, the Credit Agreement contains certain customary covenants as well as certain customary events of default. As of December 31, 2012, Holdings was in compliance with all material covenants.</p> <p>During the years ended December 31, 2012 and 2011, the weighted average dollar amount of borrowings related to the Credit Agreement was \$41.2 million and the weighted average interest rate was 2.1%. The weighted dollar amount related to the Credit Agreement and the weighted interest rate do not apply to the year ended December 31, 2010 since the Credit Agreement was not place during the period.</p>				Consolidated Leverage Ratio	Commitment Fee	Applicable Margin for Eurodollar Loans	Applicable Margin for Base Rate Loans	Less than .5 to 1.0	0.25%	1.75%	0.75%	Greater than or equal to 0.5 to 1.0 but less than 1.0 to 1.0	0.30%	2.00%	1.00%	Greater than or equal to 1.0 to 1.0 but less than 1.50 to 1.00	0.35%	2.25%	1.25%	Greater than or equal to 1.50 to 1.00	0.40%	2.50%	1.50%

Earnings per Share	12 Months Ended		
	Dec. 31, 2012		
<u>Earnings Per Share [Abstract]</u>			
<u>Earnings per Share</u>			

**Note 13. Earnings per Share**

Basic earnings per share (“EPS”) measures the performance of an entity over the reporting period. Diluted earnings per share measures the performance of an entity over the reporting period while giving effect to all potentially dilutive common shares that were outstanding during the period. The Company uses the treasury stock method in accordance with ASC Topic 260 — *Earnings per Share* (“ASC 260”), to determine the dilutive potential of stock options and Class B common stock that are exchangeable into the Corporation’s Class A common stock.

In accordance with ASC 260, all outstanding unvested share-based payments that contain rights to non-forfeitable dividends participate in the undistributed earnings with the common stockholders and are therefore participating securities. The shares of Class B common stock do not share in the earnings of the Company and are therefore not participating securities. Accordingly, basic and diluted net earnings per share of Class B common stock have not been presented.

In 2012, the Company granted 109,488 stock options to purchase shares of the Corporation’s Class A common stock to its independent directors and 725,000 stock options to purchase shares of the Corporation’s Class A common stock to its employees. For the years ended December 31, 2012 and 2011, stock options granted to certain employees, non-employees and members of the board of directors in the aggregate of 9,178,128 and 8,598,140, respectively, were not included in the computation of earnings per common share because they were antidilutive under the treasury method.

The Company also issued 9.0 million shares of the Corporation’s Class A common stock in connection with the Lucid Acquisition. For the year ended December 31, 2012, 7.2 million of these shares were subject to the achievement of certain Profit Targets and, therefore, considered contingently issuable shares under ASC 260. In accordance with ASC 260, contingently issuable shares are considered outstanding common shares and included in basic EPS as of the date that all necessary conditions have been satisfied (that is, when issuance of the shares is no longer contingent). Since the Profit Targets were not achieved as of December 31, 2012, the shares were not included in the computation of basic or diluted EPS.

Additionally, as discussed in Note 2, the Existing Unit Holders also entered into an Exchange Agreement under which they (or certain permitted transferees thereof) have the right, from and after the first anniversary of the date of the closing of the IPO, (subject to the terms of the Exchange Agreement as described therein) to exchange their Holding Units for shares of the Corporation’s Class A common stock on a one-for-one basis at fair value, subject to customary conversion rate adjustments for stock splits, stock dividends and reclassifications. These shares were also excluded from the computation of earnings per common shares because they were anti-dilutive under the treasury method. During the year ended December 31, 2012, certain members of Holdings exchanged 10.8 million of their Holding Units, on a one-for-one basis, for shares of Class A common stock of the Corporation under the Exchange Agreement (see Note 14).

The following is a reconciliation of the numerator and denominator used in the basic and diluted EPS calculations, with amounts in thousands except per share data:

	Year ended December 31, 2012	Year ended December 31, 2011	December 7, 2010 through December 31, 2011
<b>Basic and diluted net income per share:</b>			
<b>Numerator</b>			
Net income available to holders of Class A common stock	\$ 8,958	\$ 12,736	\$ 146
Earnings allocated to participating securities	—	—	—
Earnings available for common stockholders	<u>\$ 8,958</u>	<u>\$ 12,736</u>	<u>\$ 146</u>
<b>Denominator for basic net income per share of Class A common stock</b>			
Weighted average shares of Class A common stock	24,086	16,567	17,319
Add dilutive effect of the following:			
Stock options	—	—	—
Assumed conversion of Holding Units for Class A common stock	—	—	—
Dilutive weighted average shares of Class A common stock	<u>24,086</u>	<u>16,567</u>	<u>17,319</u>
<b>Basic income per share of Class A common stock</b>	<u>\$ 0.37</u>	<u>\$ 0.77</u>	<u>\$ 0.01</u>
<b>Diluted income per share of Class A common stock</b>	<u>\$ 0.37</u>	<u>\$ 0.77</u>	<u>\$ 0.01</u>
